#### UNITED STATES SECURITIES AND EXCHANGE COMMISSION WASHINGTON, D.C. 20549

#### FORM 8-K

# CURRENT REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of Report (Date of earliest event reported): December 12, 2019

KBL MERGER CORP. IV
(Exact Name of Registrant as Specified in Charter)

	(Exact Name of Registrant as Specified in Charter)	
Delaware	001-38105	81-3832378
(State or Other Jurisdiction of Incorporation)	(Commission File Number)	(IRS Employer Identification No.)
527 Stanton Christian Road		10712
Newark, DE 19713 (Address of Principal Executive Off	ices)	19713 (Zip Code)
·	,	
Regis	strant's telephone number, including area code: (302) 502-	2727
(For	Not Applicable rmer Name or Former Address, if Changed Since Last Rep	port)
Check the appropriate box below if the Form 8-K filing is General Instruction A.2. below):	intended to simultaneously satisfy the filing obligation of	of the registrant under any of the following provisions ⅇ
☑ Written communications pursuant to Rule 425 under the	e Securities Act (17 CFR 230.425)	
☐ Soliciting material pursuant to Rule 14a-12 under the E	Exchange Act (17 CFR 240.14a-12)	
☐ Pre-commencement communications pursuant to Rule	14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))	
☐ Pre-commencement communications pursuant to Rule	13e-4(c) under the Exchange Act (17 CFR 240.13e 4(c))	
Indicate by check mark whether the registrant is an emerging the Securities Exchange Act of 1934 (§240.12b-2 of this ch		es Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of
Emerging growth company ⊠		
If an emerging growth company, indicate by check mark if accounting standards provided pursuant to Section 13(a) of		on period for complying with any new or revised financial
	Securities registered pursuant to Section 12(b) of the Act:	
Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$0.0001 per share	KBLM	The NASDAQ Stock Market LLC
Warrants, each warrant exercisable for one-half of one share of Common Stock at an exercise price of \$5.75 per half share	KBLMW	The NASDAQ Stock Market LLC
Rights, exchangeable into one-tenth of one share of Common Stock	KBLMR	The NASDAQ Stock Market LLC
Units, each consisting of one share of Common Stock, one Warrant and one Right	KBLMU	The NASDAQ Stock Market LLC

#### Item 7.01 Regulation FD Disclosure.

Attached as Exhibit 99.1 to this Current Report on Form 8-K and incorporated into this Item 7.01 by reference is the investor presentation dated December 12, 2019 that will be used by KBL Merger Corp. IV ("KBL") in making presentations to certain of its stockholders and other persons with respect to the transactions contemplated by that certain Business Combination Agreement, dated as of July 25, 2019 (as it may be further amended from time to time, the "Business Combination Agreement"), entered into among KBL, CannBioRx Life Sciences Corp., a Delaware corporation (the "Company"), Katexco Pharmaceuticals Corp., a British Columbia corporation ("Katexco"), CannBioRex Pharmaceuticals Corp., a British Columbia corporation ("CBR Pharma"), 180 Therapeutics L.P., a Delaware limited partnership ("180" and together with Katexco and CBR Pharma, the "Company Subsidiaries"), KBL Merger Sub, Inc., a Delaware corporation, and Lawrence Pemble, in his capacity as representative of the stockholders of the Company and the Company Subsidiaries.

The information in this Current Report on Form 8-K and Exhibit 99.1 attached hereto is being furnished pursuant to Item 7.01 and shall not be deemed to be "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise be subject to the liabilities of that section, nor shall it be deemed to be incorporated by reference in any filing under the Securities Act of 1933, as amended (the "Securities Act"), or the Exchange Act, regardless of any general incorporation language in such filings. This Current Report on Form 8-K will not be deemed an admission as to the materiality of any of the information in this Item 7.01, including Exhibit 99.1.

#### Forward-Looking Statements

Certain statements made herein are "forward-looking statements" within the meaning of U.S. federal securities laws. Words such as "expect," "estimate," "project," "budget," "forecast," "anticipate," "intend," "plan," "may," "will," "could," "should," "believes," "predicts," "potential," "continue" and similar expressions are intended to identify such forward-looking statements. These forward-looking statements involve significant risks and uncertainties that could cause the actual results to differ materially from the expected results and, consequently, you should not rely on these forward-looking statements as predictions of future events. These forward-looking statements and factors that may cause such differences include, without limitation, statements relating to the timing and completion of the proposed business combination; KBL's continued listing on the Nasdaq Stock Market until closing of the proposed business combination; expectations regarding the capitalization, resources and ownership structure of the combined company; the inability to recognize the anticipated benefits of the proposed business combination, which may be affected by, among other things, the amount of cash available following redemptions by KBL stockholders; the ability to meet the Nasdaq Stock Market's listing standards following the consummation of the transactions contemplated by the proposed business combination; costs related to the proposed business combination; expectations with respect to future performance, growth and anticipated acquisitions; ability to recognize the anticipated benefits of the proposed business combination; the Company's ability to execute its plans to develop and market new drug products and the timing and costs of these development programs; the Company's estimates of the size of the markets for its potential drug products; potential litigation involving KBL or the Company or the validity or enforceability of the Company's intellectual property; global economic conditions; geopolitical events and regulatory changes; access to additional financing; and other risks and uncertainties indicated from time to time in filings with the Securities and Exchange Commission (the "SEC"). Other factors include the possibility that the proposed business combination does not close, including due to the failure to receive required security holder approvals, or the failure of other closing conditions. The foregoing list of factors is not exclusive. Additional information concerning these and other risk factors is contained in KBL's most recent filings with the SEC and will be contained in the proxy statement/prospectus to be filed as result of the transactions described above. All subsequent written and oral forward-looking statements concerning KBL or the Company, the transactions described herein or other matters and attributable to KBL or the Company or any person acting on their behalf are expressly qualified in their entirety by the cautionary statements above. Readers are cautioned not to place undue reliance upon any forward-looking statements, which speak only as of the date made. None of KBL or the Company undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statement to reflect any change in their expectations or any change in events, conditions or circumstances on which any such statement is based.

#### Additional Information and Where to Find It

KBL has filed a registration statement on Form S-4, which includes a preliminary proxy statement/prospectus for KBL's stockholders, with the SEC. KBL's definitive proxy statement/prospectus will be mailed to KBL's stockholders that do not opt to receive the document electronically. KBL and the Company urge investors, stockholders and other interested persons to read the preliminary proxy statement/prospectus, as well as other documents that will be filed with the SEC, because these documents will contain important information about the proposed business combination transaction. Such persons can also read KBL's Annual Report on Form 10-K for the fiscal year ended December 31, 2018, for a description of the security holdings of its officers and directors and their respective interests as security holders in the consummation of the proposed business combination transaction. KBL's definitive proxy statement/prospectus, which is included in the registration statement, will be mailed to stockholders of KBL as of a record date to be established. KBL's stockholders will also be able to obtain a copy of such documents, without charge, by directing a request to: KBL Merger Corp. IV, 150 West 56th Street, Suite 5901, New York, NY 10019; e-mail: admin@kblvc.com. These documents can also be obtained, without charge, at the SEC's web site (http://www.sec.gov).

#### Participants in the Solicitation

KBL and its directors and executive officers, may be deemed to be participants in the solicitation of proxies for the special meeting of KBL's stockholders to be held to approve the proposed transactions in connection with the business combination. Information regarding the persons who may, under the rules of the SEC, be deemed participants in the solicitation of KBL's stockholders in connection with the proposed transactions are set forth in the preliminary proxy statement/prospectus included in the registration statement that was filed with the SEC on November 12, 2019. You can find information about KBL's executive officers and directors in its Annual Report on Form 10-K for the fiscal year ended December 31, 2018, which was filed with the SEC on April 1, 2019. You can obtain free copies of these documents from KBL using the contact information above.

#### Disclaimer

This communication is not a proxy statement or solicitation of a proxy, consent or authorization with respect to any securities or in respect of the proposed transaction and shall not constitute an offer to sell or a solicitation of an offer to buy the securities of KBL and the Company, nor shall there be any sale of any such securities in any state or jurisdiction in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of such state or jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act.

#### Item 9.01 Financial Statements and Exhibits.

(d) Exhibits

Exhibit Number	Description
99.1	Investor Presentation dated December 12, 2019.

## SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Dated: December 12, 2019

#### KBL MERGER CORP. IV

By: /s/ Marlene Krauss, M.D.
Name: Marlene Krauss, M.D.
Title: Chief Executive Officer

1

#### DISCLAIMER

This Presentation is for informational purposes only and does not constitute an offer to sell, a solicitation of an offer to buy, or a recommendation to purchase any equity, debt or other financial instruments of CannBioRx Life Sciences Corp. ("CannBioRx") or KBL Merger Corp. IV ("KBL") or any of CannBioRx's or KBL's affiliates' securities. This Presentation has been prepared to assist interested parties in making their own evaluation with respect to the proposed business combination of CannBioRx and KBL and for no other purpose. The information contained herein does not purport to be all-inclusive. The data contained herein is derived from various internal and external sources. No representation is made as to the reasonableness of the assumptions made within or the accuracy or completeness of any projections or any other information contained herein. Any data on past performance or projections contained herein is no indication as to future performance. CannBioRx and KBL assume no obligation to update the information in this Presentation.

#### Forward-Looking Statements

This Presentation includes "forward-looking statements" within the meaning of U.S. federal securities laws. Words such as "expect," "estimate," "project," "budget," "forecast," "anticipate," "intend," "plan," "may," "will," "could," "should," "believes," "predicts," "potential," "continue" and similar expressions are intended to identify such forward-looking statements. These forward-looking statements involve significant risks and uncertainties that could cause the actual results to differ materially from the expected results and, consequently, you should not rely on these forward-looking statements as predictions of future events. These forward-looking statements as predictions of future performance, growth and anticipated business combination; expectations of the meet the Nasdaq Stock Market's listing standards following the consummation of the transactions contemplated by the proposed business combination; costs related to the proposed business combination; expectations with respect to future performance, growth and anticipated acquisitions; ability to recognize the anticipated benefits of these forward-looking statements are such as a summary and anticipated acquisitions; ability to recognize the anticipated benefits of these development programs; CannBioRx's estimates of the size of the proposed business combination; cannbioRx's ability to exceute its plans

#### Additional Information and Where to Find It

KBL has filed a registration statement on Form S-4, which includes a preliminary proxy statement/prospectus for KBL's stockholders, with the SEC. KBL's definitive proxy statement/prospectus will be mailed to KBL's stockholders that do not opt to receive the document electronically. KBL and CannBioRs urge investors, stockholders and other interested persons to read the preliminary proxy statement/prospectus, as well as other documents that will be filed with the SEC, because these documents will contain important information about the proposed business combination transaction. Such persons can also read KBL's Annual Report on Form 10-K for the fiscal year ended December 31, 2018, for a description of the security holdings of its officers and directors and their respective interests as security holders in the consummation of the proposed business combination transaction. KBL's definitive proxy statement/prospectus, which is included in the registration statement, will be mailed to stockholders of KBL as of a record date to be established. KBL's stockholders will also be able to obtain a copy of such documents, without charge, by directing a request to: KBL Merger Corp. IV, 150 West 56th Street, Suite 5901, New York, NY 10019; e-mail: <a href="mailto:admin@kblvc.com">admin@kblvc.com</a>. These documents can also be obtained, without charge, at the SEC's website <a href="mailto:http://www.sec.gov">https://www.sec.gov</a>).

#### Participants in the Solicitation

KBL and its directors and executive officers, may be deemed to be participants in the solicitation of proxies for the special meeting of KBL's stockholders to be held to approve the proposed transactions in connection with the business combination. Information regarding the persons who may, under the rules of the SEC, be deemed participants in the solicitation of KBL's stockholders in connection with the proposed transactions are set forth in the preliminary proxy statement/prospectus included in the registration statement that was filled with the SEC on November 12, 2019. You can find information about KBL's executive officers and directors in its Annual Report on Form 10-K for the fiscal year ended December 31, 2018, which was filed with the SEC on April 1, 2019. You can obtain free copies of these documents from KBL using the contact information above.

#### Disclaimer

This Presentation is not a proxy statement or solicitation of a proxy, consent or authorization with respect to any securities or in respect of the proposed transaction and shall not constitute an offer to sell or a solicitation of an offer to buy the securities of RIS and Camabians, nor shall there be any sale of any such securities in such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities have of such state or jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of Securities Description 10 of the Securities Act of 1933, as amended.

# INFLAMMATION DRIVES THE WORLD'S BIGGEST DISEASES

The experienced and world-renowned scientific team are proven leaders in this field.

- Sir Marc Feldmann: Centocor sold to J&J for \$4.9 B USD
- Lawrence Steinman: Tysabri sold to Royalty Pharma for \$2.85 B USD
- Jonathan Rothbard: Amylin sold to AstraZeneca and Bristol-Myers Squibb for \$7 B USD
- Raphael Mechoulam: Identified major phytocannabinoids (tetrahydrocannabinol (THC), cannabidiol (CBD) etc.) and discovered the endocannabinoid system

Prof Raphael Mechoulam receiving Honorary
Doctorate in Madrid.

Prof Sir Marc Feldmann in his office with Gairdner Award, European Inventor of Year, and Lasker Award.

Dr Lawrence Steinman signing National Academy of Science register.

# **CANNBIORX HIGHLIGHTS**

- Scientific team and founders are pioneers with proven track record in drug discovery from the University of Oxford, Hebrew University and Stanford University
- Developing three families of novel drugs addressing significant market opportunities in inflammation, fibrosis and pain:
  - -Fibrosis & Anti-TNF
  - -Synthetic CBD Analogs (SCAs)
  - $-\alpha$ 7nAChR
- · Multiple programs in synchronized stages of development combined with IP portfolio reduces risk
- Numerous near-term inflection points for anti-TNF programs: one program late stage 2b/3 trial, two additional clinical programs projected to start Q4 2020
  - Initial clinical anti-TNF clinical trials funded by investments and grants (UK and Dutch).
  - \*Regulatory approvals obtained from the UK Medicines and Healthcare Products Regulatory Agency (MHRA)
    and the Dutch Centrale Commissie Mensgebonden Onderzoek (CCMO) and the relevant accredited ethics
    committees to perform clinical trials in the UK and The Netherlands for anti-TNF products.
- Three anti-inflammatory therapeutic programs potentially used in combination

\*No meetings have been held with, and no applications or requests for approval have been submitted to the FDA for any products at this time.

# CO-FOUNDERS AND MANAGEMENT

# Incredible discoveries in scientific fields; successful business leaders

#### Prof Sir Marc Feldmann Co-Chairman

- Pioneer of anti-TNF therapy, world's biggest drug class (\$40B USD pa)
- Numerous accolades including Crafoord and Lasker Awards, fellow of the Royal Society

#### Prof Raphael Mechoulam Founder, CBRx

- Godfather of cannabinoid chemistry; discovered the body's endocannabinoid system
- Recipient of Israel Exact Sciences Prize, member of Israel Academy of Science and Humanities

#### Prof Lawrence Steinman Co-Chairman

- Discovered role of integrins, led to Natalizumab, highly effective treatment for MS and IBD
- Member of National Academy of Sciences, many accolades including Charcot Prize; founder of Centocor (sold to J&J for \$4.9B USD)

#### Dr Marlene Krauss CEO

- Harvard Business School, Harvard Medical School, Cornell University
- CEO of 4 SPACs and 3 VC funds; invested more than \$1B USD in early to mid-stage companies

#### Mr George Hornig COO & Acting CFO

- Harvard College, Harvard Business School, Harvard Law School
- Considerable banking experience, in high-level positions for Deutsche Bank and Credit Suisse

#### Prof Jagdeep Nanchahal CMO

- Surgeon-scientist, leading 2b/3 trial funded by Wellcome Trust and UK Dept. of Health
- Member of the Royal College of Surgeons; discovered new treatments for fibrosis

#### Dr Jonathan Rothbard CSO

- Stanford University, broad experience in small molecule development
- Founder of 5 biotech companies; Amylin sold to AstraZeneca and BMS for \$5.3B USD

# OVERVIEW: CANNBIORX DEVELOPMENT PROGRAMS

	FIBROSIS & ANTI-TNF (CLINICAL STAGE)*	SYNTHETIC CBD ANALOGS (SCAs)	α7nAChR
TECHNOLOGIES	Repurposing of anti-TNF for major unmet needs, other patented drugs	Novel non-psychoactive synthetic CBD analogs	Novel α7nAChR agonists
TARGETED DISEASES	NEAR TERM  Early stage Dupuytren's disease (DD)  Frozen Shoulder  Post Operative Delirium/Cognitive Deficit (POCD)  FURTHER OUT  Non-Alcoholic Steatohepatitis (NASH)	Arthritis     Pain/Inflammation	Smoking cessation induced Ulcerative Colitis (UC) initially     Other inflammatory indications will be targeted after results in UC
COMPETITIVE ADVANTAGE	DD: no treatment for early disease     Frozen Shoulder: local steroid only for short term pain relief, does not modulate long-term disease activity     POCD: No treatment available	Novel, >99.5% pure,     Robust batch to batch consistency (non-botanical)     Developing advanced formulation for increased bioavailability	Orally available     Potentially as effective as biologics (like anti-TNF)     Proven lack of toxicity
STAGE	DD: Phase 2b/3 in early DD, results Q1/2 2021 Frozen Shoulder: Initiate Phase 2 trials Q4 2020 POCD: Initiate Phase 3 trials Q4 2020 NASH: Preclinical studies to begin Q2 2020	Preclinical – lead SCAs and formulations being identified     Trials planned in arthritis and pain	Preclinical – optimizing new compounds based on safe α7nAchR agonists
INTELLECTUAL PROPERTY	Patents issued for treatment of DD & POCD with anti-TNF     Additional patents issued (anti-IL-33) or pending in localized and systemic fibrosis and delivery systems	Patent issued for Cyclohexenyl compounds, compositions and uses thereof     Patents pending & to be filed	Three patents issued, one patent pending

<sup>\*</sup>Regulatory approvals obtained from the MHRA and CCMO and the relevant accredited ethics committees to perform clinical trials in the UK and The Netherlands. No meetings have been held with, and no applications or requests for approval have been submitted to the FDA for any products at this time.

# THREE PLATFORM TECHNOLOGIES TARGETING MULTIPLE INDICATIONS

PLATFORM	INDICATION	PRECLINICAL	PHASE 1	PHASE 2	PHASE 3
	Dupuytren's contracture			ongoing	
Fibrosis & Anti-	Frozen shoulder			Est. start Q4 2020	
TNF*	• POCD				Est. start Q4 2020
	• NASH	Est. start Q2 2020			
	Chronic pain	ongoing	Est. start Q3 2021	Est. start Q3 2022	
SCAs	Early arthritis	ongoing		Est. start Q1 2023	
α7nAChR	Smoking cessation induced ulcerative colitis	ongoing			

<sup>\*</sup>Regulatory approvals obtained from the MHRA and CCMO and the relevant accredited ethics committees to perform clinical trials in the UK and The Netherlands. No meetings have been held with, and no applications or requests for approval have been submitted to the FDA for any products at this time.

# FIBROSIS & ANTI-TNF PLATFORM

# Developing targeted therapies for:

- Early Stage Dupuytren's disease (DD) patent issued; Phase 2b/3 results expected Q1/2 2021\*
- > Frozen shoulder patent issued; clinical trials projected in Q4 2020
- Post operative cognitive decline (POCD) patent issued, clinical trials projected in Q4 2020
- ➤ Liver fibrosis (NASH) initial laboratory studies done with Celgene-BMS on human tissue; preclinical studies to begin in Q2 2020

# UNIQUE COMPETITIVE ADVANTAGE #1

## COST EFFECTIVE, TIME EFFICIENT, ACADEMIC LED CLINICAL TRIALS PERFORMED IN UK

- Working with disease experts and key opinion leaders, who are highly motivated to improve patient standard of care
- · No payment for trial patients required in the UK/EU
- Easier recruitment. Access to large registries of patients/diseases
- Staff costs can be covered by academic grants (Wellcome Trust, NIHR)
- Established reputation and prestige in conducting clinical trials across academic and clinical networks<sup>1</sup>
- Skilled at writing protocols compliant with regulatory authorities, seeking approvals, accessing
  patient registries, establishing good working relations with trial centers and coordination of
  patient recruitment and data collection across multiple sites, industry standard statistical analysis
  of blinded data, report submission....
- · Well practiced in publishing trials in peer reviewed clinical journals

1 https://www.ndorms.ox.ac.uk/octru

Prof Sallie Lamb Prof Jagdeep Nanchahal

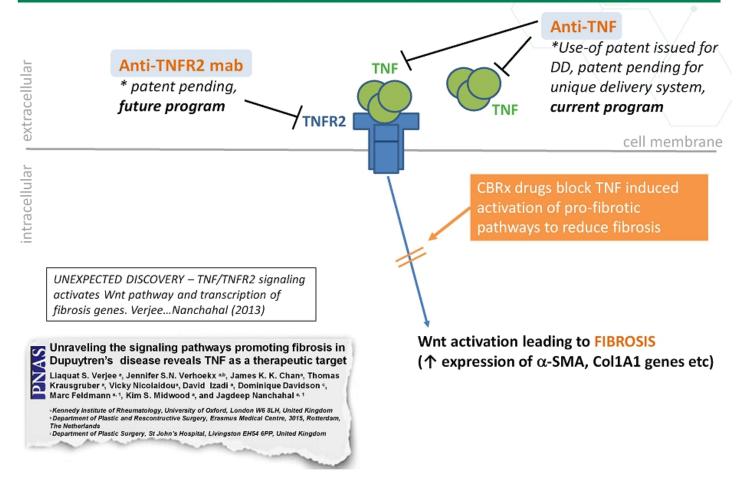

# UNIQUE COMPETITIVE ADVANTAGE #2

# NOVEL USE OF HUMAN DISEASE TISSUE TO IDENTIFY NEW TARGETS IN FIBROSIS

Studies in DD lead the way for novel approach to develop clinical programs in other fibrotic diseases:

- · All fibrosis preceded by inflammation, involves myofibroblasts
- · Our targets identified in patient myofibroblasts and associated immune cells
- · Using human tissue from DD nodules
- Tissue and cells from most fibrotic diseases not readily accessible as diagnosed late
- · Competitors use animals or late stage cells in culture, neither reflect human disease
- Novel therapeutics testable, assessed by molecular changes
- Same approach will be applied to target discovery in NASH

# RATIONALE FOR THE BLOCKADE IN FIBROSIS

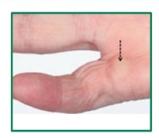

# INITIAL INDICATION TARGETING DUPUYTREN'S DISEASE

- · Common localized fibrotic condition of the hand, develops over years
- · Nodules form under skin eventually creating a thick cord pulling one or more fingers
- Can limit hand functions
- Unlike liver and lung fibrosis can be identified early

## Early disease

## Late disease - results in impaired hand function

- · No approved treatment: unmet need
- · Our trial is in early disease\*

#### Current treatment options suboptimal:(1)

- · Surgery long (3 month) recovery, 6% recurrence at 5yr
- · Needle perforation less invasive, 30% recurrence at 5yr
- Collagenase injections office procedure, 47% recurrence at 5yr

#### TRIAL OVERVIEW

Dose ranging with 28 patients.

- · 40 mg in 0.4ml effective dose.
- Funded by HICF (Wellcome Trust
   + Dept of Health) and CannBioRx

## Demonstrated efficacy at high concentration & dose

<sup>\*</sup>Approval only from MHRA/CCMO and relevant accredited ethics committees.

# PHASE 2b/3 TRIAL FULLY ENROLLED - LOCAL ADALIMUMAB IN EARLY DD

- Randomized blinded trial in patients with early DD injected with optimal dose adalimumab\*
- Every 3 months for 1 year (4 injections), following for a total of 18 months
- Outcome measures include nodule hardness, size and disease progression
- Randomized 181 patients across 3 sites in UK and the Netherlands
- FULLY ENROLLED, FULLY PAID FOR
- All UK patients have received final injection
- Results expected Q1/2 2021

	Objectives	Outcome measures
Primary Objective	To determine if injection with adalimumab is superior to placebo injection of normal saline in controlling disease progression.	Hardness of selected nodule.
Secondary Objectives	To compare the development of Dupuytren's nodules and associated cord, flexion deformities of the fingers and impairment of hand function for participants on each treatment.  2. Monitor for adverse events.	1.1. Ultrasound imaging of nodule size. 1.2. Range of motion of the affected digit. 1.3. Grip strength. 1.4. Participant Reported Outcomes: Michigan Hand Outcomes Questionnaire (MHQ) Participant identified activity most restricted by DD scored on a scale of 1–10. 1.5. Clinical assessment of the hand. 2.1. Adverse event assessment comparing active and placebo groups using visual inspection of injection site and laboratory reports. 2.2. Progression to surgery of the digit being assessed.
Tertiary Objectives	To assess if early DD injection therapy represents good value for money compared to current clinical care.     Monitor circulating levels of adalimumab and antibodies to adalimumab in the blood.	Analysis of health care resource utilisation data and EQ-SD-SL data to estimate cost and utilities from participants on each treatment.     Analysis of blood sample.

Trial sites - Oxford, Edinburgh, Groningen

CannBioRx clinical trial 2b/3 - Nanchahal J et al, 2017 Wellcome Open Research, 2:37

<sup>\*</sup>Approval only from MHRA/CCMO and relevant accredited ethics committees.

# LARGE MARKET OPPORTUNITY FOR EARLY DUPUYTREN'S DISEASE

# Estimated future worldwide market for Dupuytren's >\$1B per year (1) All current treatments for Dupuytren's are for LATE stage disease

- 4% of the EU & US population suffer from Dupuytren's disease (1,2)
- Assume ~25% of these (1% total) are symptomatic & require treatment (3)
   Potential patients in the U.S. (1% of 315M) = 3M patients
- Conservatively assume 25% of symptomatic patients get treatment (4)

US 3M x 25%

~ 0.8M pa

EU (Assume 50% of US)

~ 0.4M patients

4. Nanchahal J, personal communication

<sup>1.</sup> Hindocha S, McGrouther DA, Bayat A (2009) Hand (NY) 4(3):256-69.

<sup>2.</sup> Lanting et al. (2014) PRS 133: 593-603

<sup>3.</sup> Nanchahal J, et al. (2017) Wellcome Open Res 2:37.,

# **ADDITIONAL INDICATIONS:**

Post Operative
Delirium/Cognitive
Deficit
(POCD)

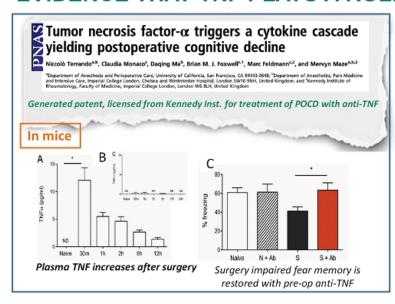

- Over 300,000 hip fractures each year in the U.S. alone<sup>1</sup>
- Strong pre-clinical and clinical evidence for anti-TNF as preventative therapy
- Patent claims granted, patent is licensed from Kennedy Trust, UK
- Phase 3 multi-centre trial of pre-operative anti-TNF in hip fracture surgery planned to initiate by Q4 2020, single dose administered just prior to surgery, to be complete in 4 years
- Grant application submitted to EME (Efficacy and Mechanism Evaluation)
   board of National Institute of Health Research (NIHR)
- Trial to be executed in the UK, and therefore protocol will be approved by MHRA and Research Ethics Committee. Will seek advice from the FDA when appropriate
- Working with Prof Matt Costa, trauma surgeon previously recruited 20,000 patients to hip fracture trials
  - · Direct entry to phase 3 permissible:
    - Anti-TNF has a well defined safety profile, dosing understood
    - · Have access to patients for large scale trial required for sufficient powering

<sup>1</sup>https://www.cdc.gov/homeandrecreationalsafety/falls/adulthipfx.html

# **EVIDENCE THAT TNF PLAYS A ROLE IN POCD**

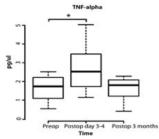

- Mice subjected to surgery (open tibial fracture) experience a rapid increase in plasma TNF levels (A) - not caused by anesthesia alone (B)
- Administration of pre-operative anti-TNF reduces freezing behavior, indicative of contextual fear memory, characteristic of cognitive decline (C)
- Surgery in humans triggers TNF release, and is associated with reduced brain activity cognitive decline <sup>1-2</sup>

## In man

## Plasma TNF increases after surgery and correlates with post operative delirium

Forsberg A et al, Annals of Neurology (2017) 81:4, 572-582

# ADDITIONAL FIBROTIC INDICATIONS CONTINUED:

## Frozen Shoulder

- · Painful inflammatory condition that progresses to scarring, limiting movement
- Affects 9% of the of the population aged 25-64yr, more common in diabetics<sup>1</sup>
- · Only treatment for early stage is local steroid injection for short term relief
- Phase 2 clinical trials planned for local injection of anti-TNF, initiates Q4 2020
- Trial protocol completed and grant application submitted to NIHR (National Institute of Health Research) in collaboration with leading experts who pioneered delivery of large trials in frozen shoulder
- Will obtain MHRA and Research Ethics Committee approval (clinical trial to be conducted in the UK) and will seek FDA advice when appropriate

# Fibrosis of the liver

- · Long-term damage characterized by the replacement of normal liver tissue by scar tissue
- Most commonly caused by non-alcoholic fatty liver disease (NAFLD), which affects ~30% of the US population<sup>2</sup>
- ~2% of patients with non-alcoholic fatty liver disease and 15-20% with non-alcoholic steatohepatitis (NASH) progress to cirrhosis<sup>3</sup>
- No approved therapeutic for NASH
- Lab program in collaboration with Celgene-BMS for target discovery using human liver samples
- Optimised process for acquiring fresh human liver tissue from clinical network

## **NEXT GENERATION THERAPEUTICS: ANTI-TNFR2 & ANTI-IL-33 INHIBITORS**

PUTATIVE THERAPEUTIC INTERVENTIONS

 Anti-TNF (in Phase 2b/3 trial with approval only from MHRA/CCMO and relevant accredited ethics committees)

Dupuytren's disease fibrotic nodules comprise myofibroblasts and immune

Proposed mechanism:

myofibroblasts

1. Myofibroblasts secrete IL-33

cells and macrophages

3. Triggers production of TNF

cells (macrophages and mast cells mostly)

2. IL-33 signals through ST2 receptor on mast

4. TNF drives differentiation and activation of

- 2. Anti-IL-33 and/or anti-TNFR2 (next generation)
- Double pronged approach, blocking production of TNF and downstream signaling

# FIBROSIS & ANTI-THE CLINICAL DEVELOPMENT PLAN\*

<sup>\*</sup>Based on current proposals.

<sup>\*\*</sup>Regulatory approvals obtained from the MHRA and CCMO and the relevant accredited ethics committees to perform clinical trials in the UK and The Netherlands. No meetings have been held with, and no applications or requests for approval have been submitted to the FDA for any products at this time.

# Synthetic CBD analogs (SCAs) for unmet needs in pain and inflammation

## Developing proprietary compounds which aim to be:

- Safe & non-psychoactive
- · Formulated to offer improved oral bioavailability (> three-fold)
- Rigorously tested in clinical trials for inflammatory pain (efficacy and dosing)
- Granted market approval by FDA, EMA and others
- A real alternative to unregulated consumption of medical marijuana or OTC CBD (no clinical evidence, not FDA approved, unreliable composition, unpredictable dosing and safety ....)

## Regulatory landscape

Only two drugs approved, both from GW Pharma, both cannabis derived:

- Epidiolex oral CBD for treatment of rare childhood epilepsies Lennox Gastaut and Dravet Syndrome, FDA and EMA approved, recently recommended by National Institute for Health and Care Excellence) NICE in UK for National Health Service (NHS) reimbursement
- 2. Sativex (nabiximols) THC:CBD (1:1) oromucosal spray for multiple sclerosis (MS) related spasticity, approved by EMA but not by FDA.
- Points to opportunities across Europe and UK for uptake of medical cannabinoids 1
- > FDA warns about unregulated consumption of CBD 2,3
- More trials needed to establish safety

CBRx SCAs are pure, not derived from cannabis, offer more efficient & controlled oral dosing, easy to administer, positioned for treatment of residual pain in inflammatory arthritis and other – not competing with GW products which are plant derived!

<sup>1 &</sup>quot;GW Pharma Shares Rise" https://www.marketwatch.com/story/gw-pharma-shares-rise-after-uk-recommends-nhs-reimburse-its-cbd-based-epilepsy-drug-2019-11-11

<sup>2 &</sup>quot;CBD has the potential to harm you" https://www.marketwatch.com/story/cbd-has-the-potential-to-harm-you-fda-warns-consumers-2019-11-25

<sup>&</sup>lt;sup>3</sup> "FDA warns 15 companies" https://www.fda.gov/news-events/press-announcements/fda-warns-15-companies-illegally-selling-various-products-containing-cannabidiol-agency-details

# PLATFORM DESCRIPTION

- Non-psychoactive CBD analogs (SCAs) are anti-inflammatory, and elicit analgesic effects
- Studied by Mechoulam, Gallily, Feldmann since 1998 (Malfait et al, PNAS 2000)

#### **HOW DOES IT WORK?**

- •CBD signals through multiple GPCR receptors, eg CB2R, TRPV-1, 5HT1α, GPR55, GPR18 and others
- Anti-inflammatory, analgesic and anxiolytic properties

## **OUR PRODUCTS:**

#### NON-PSYCHOACTIVE SCAs

- Scientifically formulated analogs of CBD (SCAs) have been synthesized and patented, new formulations under analysis
- Analysed in animal models of inflammation and pain

#### WHY MAN-MADE?

- High purity (>99.5%)
- CBD from plants are typically ≤ 98% pure, contain THC, minor cannabinoids, terpenes, flavonoids etc.
- Consistent across batches, more favourable for obtaining regulatory approval

## **OUR DRUGS**

- 1. HU-436\*
- 2. Domb patent 1\*\*
- 3. Mechoulam patent 2<sup>†</sup>
- 4. Mechoulam patent 3 & others†

<sup>\*</sup> Patented drug we licensed from HU, but expect to discover superior drugs from ongoing research

 $<sup>^{\</sup>star\star}$  CBD derivative, patent being filed, agreement with Domb & HU completed † not filed yet

# PROBLEMS OF MEDICAL MARIJUANA (MM) & OTC CBD THAT CANNBIORX SOLVES

#### FDA position - Nov 25, 20191

"There are many unanswered questions about the science, safety, and quality of products containing CBD. Some products are being marketed with unproven medical claims and could be produced with unsafe manufacturing practices".

"The agency is committed to supporting the development of new drugs, including cannabis and cannabis-derived drugs, through the investigational new drug and drug approval process...".

- With the only cannabinoid FDA approved drug, GW Pharma shares have gained 15% in 2019, outperforming the broader cannabis sector <sup>2</sup>.
- FDA warnings have been issued to 15 companies in US illegally selling CBD products with unproven medical claims.
- CBRx will develop SCAs for treatment of well-defined clinical indications, adhering fully to regulatory approved
  procedures for obtaining marketing authorisation.

#### Problems with MM / OTC CBD **Our Solution** CBD-PNL Enhances Bioavailability > 3 fold 3 Variable composition, ✓ We will use SYNTHETIC >99.5% potency, and may contain AUC (h\*ng/ml) pure SCAs 140 undesirable contaminants 120 100 Side effects can be triggered We will use synthetic CBD 80 CBD-Analogs (SCAs) - no THC by THC (e.g. psychosis) 60 CBD-PNL Little clinical data from Planning blinded clinical trials approved drugs exist initially in musculoskeletal pain (outside of epilepsy) to and arthritis determine dosing CBD and CBD-PNL administered orally to rats & plasma levels assessed over time Developing novel, patented Variable uptake and low CBD-PNL >3x absorption compared to CBD alone ProNanoLipospheres (PNL) absorption (~4 - 9%) due to CBD-PNL safe and well tolerated which enhance bioavailability Additional methods to improve absorption are being patented lipophilic properties of CBD / under a recently completed agreement with HU CBD-like (opposite graph shows improvements offered by CBD-PNL vs CBD IN PEG)

<sup>1 &</sup>quot;What you need to know" https://www.fda.gov/consumers/consumer-updates/what-you-need-know-and-what-were-working-find-out-about-products-containing-cannabis-or-cannabis

# CBD - A SUPERIOR TREATMENT FOR ARTHRITIS

#### **PROBLEM**

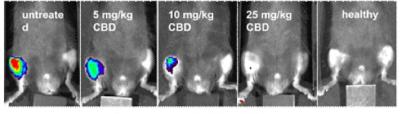

- Very early arthritis, pain & swelling is not effectively treated clinically
- Nonsteroidals do not help, can increase TNF<sup>1</sup>
- · Existing therapies are suboptimal:
  - Methotrexate has side effects patients dislike
  - Anti-TNF is costly and use restricted / delayed by NICE (National Institute of Clinical Evidence, in UK)
  - Early rheumatoid or psoriatic arthritis is badly treated: delays mean the "window of opportunity" for best results is missed

#### **SOLUTION**

- · For very early arthritis: novel SCAs being developed
- Effective anti-inflammatory (better than NSAIDs)
- · Effective analgesic
- For early established RA, PsA: SCA will be tried in combination (offers additional patentability)
- · Trials will be performed by Oxford rheumatologists and trial experts

# Oral CBD is effective in mouse model of RA A. M. Malfait, R. Mechoulam, M. Feldmann, R. Gallily PNAS 2000;97:17:9561-9566 7 6 5 4 0 2 4 6 8 10 From the first clinical signs of arthritis, mice were given CBD orally, at the following doses: 50 mg/kg (△), 25mg/kg (▲), or 10 mg/kg (o).

#### CBD reduces inflammation in knee arthritis - unpublished new data

Zymosan induced arthritis in left knee

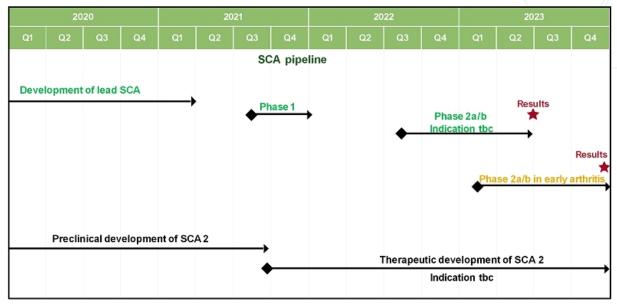

CBD was administered intraperitoneally to mice with zymosan induced arthritis in the left knee. Inflammation intensity is marked by colour scale shown on right, using a fluorescent reporter of cathepsin. CBD (5-25 mg/kg) attenuates local inflammation in a dose dependent manner.

# **SCA PIPELINE\***

<sup>\*</sup>Based on current proposals. No regulatory approvals sought from appropriate authorities at this time.

# WHY DEVELOP $\alpha$ 7 AGONISTS FOR INFLAMMATION?

- Decade of research on immune suppression in multiple sclerosis led to realization of the importance of the α7 subunit of nicotinic Acetylcholine Receptor (nAChR)
- α7 nAChR also a central factor in evolutionarily ancient neural circuit to control of inflammation<sup>1&2</sup>
- Large pharma identified  $\alpha 7$  as a pharmaceutical target for Alzheimer's disease and schizophrenia
  - multiple specific agonists developed
  - · all shown to be safe, but did not meet milestones in human clinical trials
  - strategic goal of CannBioRx to repurpose drugs for inflammation

<sup>&</sup>lt;sup>1</sup> Rothbard JB, Rothbard JJ, Soares L, Fathman CG, and Steinman L. Identification of a common immune regulatory pathway induced by small heat shock proteins, amyloid fibrils, and nicotine. Proc Natl Acad Sci U S A. 2018 115:7081-7086.

<sup>&</sup>lt;sup>2</sup> Tracey KJ. Reflex control of immunity. Nat Rev Immunol. (2009) 9:418-28

## **CHEMISTRY**

- Synthesize patentable, orally bioavailable α7 agonist
- Chemically modify known agonist to retain/improve anti-inflammatory activity
- · Retain CNS penetration

# **Bioassays**

- Inhibition of TNFα & IL6 secretion after stimulation with LPS in cell lines and primary cells
- Stimulation of Ca+2 flux in α7 transfected HEK293 cells
- qPCR measurement of inhibition of a set of proinflammatory cytokines and transcriptional activators
- Inhibition of inflammation and secretion of proinflammatory cytokines in vivo in murine models of inflammation

# **SELECTION OF CLINICAL INDICATION**

- Nicotine binds  $\alpha$ 7 and is a known immune suppressive
- a subgroup of patients who cease smoking subsequently acquire ulcerative colitis
- Treatment of these patients with  $\alpha 7$  agonist has a high probability of therapeutic success (can be viewed as nicotine replacement therapy without issues of addiction)

	Significan	t Unmet Need
<b>⇔</b> 7	Ulcerative	Colitis Market 6.6
Market Value in Billions \$	4.2	
Market Va		
1	2012	2022

Existing Therapies Are Sub-Optimal			
Existing Therapy Issues			
Anti-inflammatory drugs (5-aminosalicylates, corticosteroids)	×	capability to induce remission is quite low known deleterious side	
corticosteroiasj		effects of steroids	
Immunosuppressants	×	long-term administration of thiopurine may correlate with an increased risk of developing lymphoma	
	×	cyclosporine leads to kidney damage	
Infliximab (anti-TNF)	×	serious adverse events, such as opportunistic infections, including tuberculosis, as wel as congestive heart failure in cardiopathic patients	

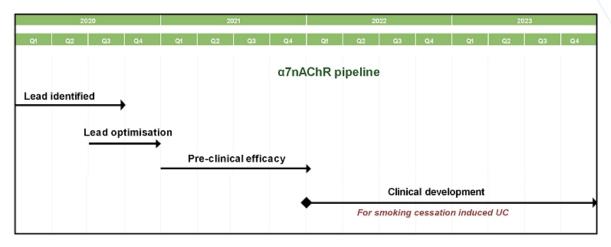

# α7 nAChR PLATFORM, A NOVEL THERAPEUTIC PLATFORM FOR UC

- essential receptor in the neural circuit controlled by the vagus nerve

 $<sup>{\</sup>it *Based on current proposals.}\ \ No\ regulatory\ approvals\ obtained\ from\ appropriate\ authorities\ at\ this\ time.$ 

# CONCLUSION

- Scientific team and founders are pioneers with proven track record in drug discovery from the University of Oxford, Hebrew University and Stanford University
- Developing three families of novel drugs addressing significant market opportunities in inflammation, fibrosis and pain:
  - -Fibrosis & Anti-TNF
  - -Synthetic CBD Analogs (SCAs)
  - $-\alpha$ 7nAChR
- · Multiple programs in synchronized stages of development combined with IP portfolio reduces risk
- Numerous near-term inflection points for anti-TNF programs: one program late stage 2b/3 trial, two additional clinical programs projected to start Q4 2020
  - Initial clinical anti-TNF clinical trials funded by investments and grants (UK and Dutch).
  - \*Regulatory approvals obtained from the UK Medicines and Healthcare Products Regulatory Agency (MHRA)
    and the Dutch Centrale Commissie Mensgebonden Onderzoek (CCMO) and the relevant accredited ethics
    committees to perform clinical trials in the UK and The Netherlands for anti-TNF products.
- Three anti-inflammatory therapeutic programs potentially used in combination

<sup>\*</sup>No meetings have been held with, and no applications or requests for approval have been submitted to the FDA for any products at this time.
