

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2020

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from: _____ to _____

001-38105

(Commission File Number)

180° LIFE SCIENCES CORP.

(Exact name of registrant as specified in its charter)

Delaware

(State or Other Jurisdiction of
Incorporation or Organization)

81-3832378

(I.R.S. Employer
Identification No.)

3000 El Camino Real, Bldg. 4, Suite 200
Palo Alto, CA

(Address of Principal Executive Offices)

94306

(Zip Code)

(650) 507-0669

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$0.0001 per share	ATNF	The NASDAQ Stock Market LLC (NASDAQ Capital Market)
Warrants to purchase shares of Common Stock	ATNFW	The NASDAQ Stock Market LLC (NASDAQ Capital Market)

Securities registered pursuant to Section 12(g) of the Act:

None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T ($\$232.405$ of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer
Emerging growth

Accelerated filer
Smaller reporting company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common stock held by non-affiliates of the registrant as of the last business day of the registrant's most recently completed second fiscal quarter was approximately \$20,791,676. For purposes of calculating the aggregate market value of shares held by non-affiliates, we have assumed that all outstanding shares are held by non-affiliates, except for shares held by each of our executive officers, directors and 5% or greater stockholders. In the case of 5% or greater stockholders, we have not deemed such stockholders to be affiliates unless there are facts and circumstances which would indicate that such stockholders exercise any control

over our company, or unless they hold 10% or more of our outstanding common stock. These assumptions should not be deemed to constitute an admission that all executive officers, directors and 5% or greater stockholders are, in fact, affiliates of our company, or that there are not other persons who may be deemed to be affiliates of our company. Further information concerning shareholdings of our officers, directors and principal stockholders is included in Part III, Item 12 of this Annual Report on Form 10-K.

As of July 7, 2021, there were 30,768,873 shares of common stock issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

None.

GLOSSARY

The following are abbreviations and definitions of certain terms used in this Report, which are commonly used in the pharmaceutical and biotechnology industry:

“ACA” means the Patient Protection and Affordable Care Act, often shortened to the Affordable Care Act, nicknamed Obamacare, which is a U.S. federal statute which provides numerous rights and protections that make health coverage fairer and easier to understand, along with subsidies (through “premium tax credits” and “cost-sharing reductions”) to make it more affordable. The law also expands the Medicaid program to cover more people with low incomes.

“Analgesics” are a class of medications designed specifically to relieve pain.

“ANDA” means an abbreviated new drug application which contains data which is submitted to the FDA for the review and potential approval of a generic drug product.

“Anti-TNF” is a pharmaceutical drug that suppresses the physiologic response to TNF.

“Cannabinoids” mean compounds found in *cannabis sativa L.*, and when used throughout this prospectus, refer to compounds found in the hemp plant which do not contain THC.

“CBD” or cannabidiol is an active ingredient in cannabis derived from the hemp plant. CBD is a non-psychoactive oxidative degradation product of THC.

“CBG” or cannabigerol is one of the compounds found in the cannabis plant.

“CCMO” means De Centrale Commissie Mensgebonden Onderzoek (CCMO), or the Central Committee on Research Involving Human Subjects, the organizational responsible for reviewing and regulating medical research involving human subjects in The Netherlands.

“CHMP” means the Committee for Medicinal Products for Human Use, formerly known as Committee for Proprietary Medicinal Products, which is the European Medicines Agency’s committee responsible for elaborating the agency’s opinions on all issues regarding medicinal products for human use.

“CMS” means the Centers for Medicare & Medicaid Services, which is a federal agency within the HHS that administers the Medicare program and works in partnership with state governments to administer Medicaid.

“Corticosteroids” are a class of drug that lowers inflammation in the body.

“CRO” means a contract research organization which is a company that provides support to the pharmaceutical, biotechnology, and medical device industries in the form of research services outsourced on a contract basis.

“CSA” means the Controlled Substances Act, the statute establishing federal U.S. drug policy under which the manufacture, importation, possession, use, and distribution of certain substances is regulated.

“CTA” means a Clinical Trial Application, which is a submission to the competent National Regulatory Authority(ies) for obtaining authorization to conduct a clinical trial in a specific country. It is an application with necessary information on investigational medicinal products. The purpose of a CTA is to provide all the important details about the clinical trial to the health authorities in order to obtain the product approval.

“DEA” means the Drug Enforcement Administration, a United States federal law enforcement agency under the United States Department of Justice, tasked with combating drug trafficking and distribution within the United States.

“EMA” means the European Medicines Agency, an agency of the EU in charge of the evaluation and supervision of medicinal products.

“EU” means the European Union.

FDC Act means the Federal Food, Drug and Cosmetic Act, which is a set of U.S. laws passed by Congress in 1938 giving authority to the FDA to oversee the safety of food, drugs, medical devices, and cosmetics.

FDA means U.S. The Food and Drug Administration, which is a federal agency of the United States Department of Health and Human Services. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of U.S. food supply, cosmetics, and products that emit radiation.

FS means Frozen Shoulder, a condition characterized by stiffness and pain in an individual's shoulder joint.

GCP means good clinical practice, which is an international quality standard, which governments can then transpose into regulations for clinical trials involving human subjects. GCP follows the International Council on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH), and enforces tight guidelines on ethical aspects of clinical research.

GLP means good laboratory practice, which is a quality system concerned with the organization process and the conditions under which non-clinical health and environmental safety studies are planned, performed, monitored, recorded, archived and reported.

GMP means good manufacturing practice regulations promulgated by the FDA under the authority of the FDC Act. These regulations, which have the force of law, require that manufacturers, processors, and packagers of drugs, medical devices, some food, and blood take proactive steps to ensure that their products are safe, pure, and effective.

HHS, the U.S. Department of Health and Human Services also known as the Health Department, is a cabinet-level department of the U.S. federal government with the goal of protecting the health of all Americans and providing essential human services.

HIPAA means the Health Insurance Portability and Accountability Act of 1996, which has the goal of making it easier for people to keep health insurance, protect the confidentiality and security of healthcare information and help the healthcare industry control administrative costs.

IBD means inflammatory bowel disease, an umbrella term used to describe disorders that involve chronic inflammation of the digestive tract.

IND means investigational new drug application. Before a clinical trial can be started, the research must be approved. An investigational new drug or IND application or request must be filed with the FDA when researchers want to study a drug in humans. The IND application must contain certain information, such as: results from studies so that the FDA can decide whether the treatment is safe for testing in people; how the drug is made, who makes it, what's in it, how stable it is, and more; detailed outlines for the planned clinical studies, called study protocols, are reviewed to see if people might be exposed to needless risks; and details about the clinical trial team to see if they have the knowledge and skill to run clinical trials.

Individually identifiable health information is defined by HIPPA to mean information that is a subset of health information, including demographic information collected from an individual, and: (1) is created or received by a health care provider, health plan, employer, or health care clearinghouse; and (2) relates to the past, present, or future physical or mental health or condition of an individual; the provision of health care to an individual; or the past, present, or future payment for the provision of health care to an individual; and (a) that identifies the individual; or (b) with respect to which there is reasonable basis to believe the information can be used to identify the individual.

IRB means an Institutional Review Board, which is group that has been formally designated to review and monitor biomedical research involving human subjects. In accordance with FDA regulations, an IRB has the authority to approve, require modifications in (to secure approval), or disapprove research. This group review serves an important role in the protection of the rights and welfare of human research subjects.

Medicaid is a federal and state health insurance program in the U.S. that helps with medical costs for some people with limited income and resources. Medicaid also offers benefits not normally covered by Medicare, including nursing home care and personal care services.

Medicare is a national health insurance program in the U.S. It primarily provides health insurance for Americans aged 65 and older, but also for some younger people with disability status as determined by the Social Security Administration, as well as people with end stage renal disease and amyotrophic lateral sclerosis (ALS or Lou Gehrig's disease).

"MHRA" means The Medicines and Healthcare products Regulatory Agency, an executive agency of the Department of Health and Social Care in the United Kingdom which is responsible for ensuring that medicines and medical devices work and are acceptably safe.

"MRP" means a Mutual Recognition Procedure, a market authorization which is granted in one EU member state and is recognized in other EU member states.

"NDA" means the FDA's New Drug Application, which is the vehicle in the United States through which drug sponsors formally propose that the FDA approve a new pharmaceutical for sale and marketing.

"NIHR" means The National Institute for Health Research is a United Kingdom government agency which funds research into health and care, and is the largest national clinical research funder in Europe.

"Orphan Drug Designation" means a pharmaceutical agent developed to treat medical conditions which, because they are so rare, would not be profitable to produce without government assistance.

"Phase 1" trials are typically where the drug is initially introduced into healthy human subjects and tested for safety, dosage tolerance, absorption, metabolism, distribution and elimination. In the case of some drug candidates for severe or life-threatening diseases, such as cancer, especially when the drug candidate may be inherently too toxic to ethically administer to healthy volunteers, the initial human testing is often conducted in patients.

"Phase 2" trials are generally when clinical trials are initiated in a limited patient population intended to identify possible adverse effects and safety risks, to preliminarily evaluate the efficacy of the drug candidate for specific targeted diseases and to determine dosage tolerance and optimal dosage. Phase 2 trials are sometimes further divided into: Phase 2a and Phase 2b trials — Phase 2a is focused specifically on dosing requirements. A small number of patients are administered the drug in different quantities to evaluate whether there is as a dose-response relationship, which is an increase in response that correlates with increasing increments of dose. In addition, the optimal frequency of dose is also explored; and Phase 2b trials are designed specifically to rigorously test the efficacy of the drug in terms of how successful it is in treating, preventing or diagnosing a disease.

"Phase 3" trials are when clinical trials are undertaken to further evaluate dosage, clinical efficacy and safety in an expanded patient population at geographically dispersed clinical trial sites. These clinical trials are intended to establish the overall risk-benefit ratio of the drug candidate and provide an adequate basis for regulatory approval and product labeling.

"Phase 4" trials are studies required to be conducted as a condition of approval in order to gather additional information on the drug's effect in various populations and any side effects associated with long-term use.

"Physiotherapy" is treatment to restore, maintain, and make the most of a patient's mobility, function, and well-being.

"POCD" means post-operative cognitive dysfunction/delirium.

"RA" means rheumatoid arthritis.

"REMS" means a risk evaluation and mitigation strategy is a drug safety program that the FDA can require for certain medications with serious safety concerns to help ensure the benefits of the medication outweigh its risks.

"SCA" means Synthetic Cannabidiol Analogs, which are synthetic pharmaceutical grade molecules close or distant analogues of non-psychoactive cannabinoids such as CBD for the treatment of inflammatory diseases and pain.

"Sponsor" means the applicant or drug sponsor, which is the person or entity who assumes responsibility for the marketing of a new drug, including responsibility for compliance with applicable provisions of the FSC Act and related regulations. *Note that as used herein the term "Sponsor" may also refer to the Sponsor of our IPO, depending on the context in which such term is used.*

"THC" means tetrahydrocannabinol, which is the principal psychoactive constituent of cannabis.

"TNF" means tumor necrosis factor, which is part of the body's response to inflammation.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This Annual Report on Form 10-K (this “Report”) contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In some cases, you can identify forward-looking statements by the following words: “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “ongoing,” “plan,” “potential,” “predict,” “project,” “should,” or the negative of these terms or other comparable terminology, although not all forward-looking statements contain these words. Forward-looking statements are not a guarantee of future performance or results, and will not necessarily be accurate indications of the times at, or by, which such performance or results will be achieved. Forward-looking statements are based on information available at the time the statements are made and involve known and unknown risks, uncertainties and other factors that may cause our results, levels of activity, performance or achievements to be materially different from the information expressed or implied by the forward-looking statements in this Report. Forward-looking statements include, but are not limited to, any statements that are not statements of current or historical facts. These statements are based on management’s current expectations, but actual results may differ materially due to various factors, including, but not limited to:

- our ability to execute our plans to develop, manufacture, distribute and market new drug products and the timing and costs of these development, manufacturing, distribution and marketing programs, including approval by the applicable regulatory authorities;
- our success in retaining or recruiting, or changes required in, our officers, key employees or directors;
- our potential ability to obtain substantial additional financing in the near term to advance our business;
- the continued impact of the COVID-19 pandemic on our business operations and our research and development initiatives;
- risks associated with penalties arising from not filing our periodic reports and certain registration statements timely;
- the impact of any future restatements of our financial results, including any restatements arising from the acts or omissions of management of KBL prior to the Closing of the Business Combination, or associated with changes in accounting standards, policies, guidelines, interpretations or principles;
- changes in our future operating results;
- failure to maintain the listing on, or the delisting of our securities from, NASDAQ;
- the ability of our officers and directors to generate a number of potential investment opportunities;
- our public securities’ potential liquidity and trading;
- the lack of a market for our securities; or
- our financial performance.

The forward-looking statements contained herein are based on our current expectations and beliefs concerning future developments and their potential effects on us. Future developments affecting us may not be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond our control) and other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements. These risks and uncertainties include, but are not limited to, those factors described under “Summary Risk Factors” and those disclosed under “Risk Factors”, below. Should one or more of these risks or uncertainties materialize, or should any of our assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

You should read the matters described and incorporated by reference in “Risk Factors” and the other cautionary statements made in this Report, and incorporated by reference herein, as being applicable to all related forward-looking statements wherever they appear in this Report. We cannot assure you that the forward-looking statements in this Report will prove to be accurate and therefore prospective investors are encouraged not to place undue reliance on forward-looking statements. Other than as required by law, we undertake no obligation to update or revise these forward-looking statements, even though our situation may change in the future.

Summary Risk Factors

We face risks and uncertainties related to our business, many of which are beyond our control. In particular, risks associated with our business include:

- We are clinical stage biotechnology company that had no revenue for the years ended December 31, 2020 and 2019, and do not anticipate generating revenue for the near future;
- Our need for additional financing, both near term and long term, to support our operations, our ability to raise such financing as needed, the terms of such financing, if available, potential significant dilution associated therewith, and covenants and restrictions we may need to comply with in connection with such funding;
- Restrictions on our ability to issue securities, anti-dilution and most favored nation rights provided in connection therewith;
- Our dependence on the success of our future product candidates, some of which may not receive regulatory approval or be successfully commercialized; problems in our manufacturing process for our new products and/or our failure to comply with manufacturing regulations, or unexpected increases in our manufacturing costs; problems with distribution of our products; and failure to adequately market our products;
- Risks associated with the growth of our business, our ability to maintain such growth, difficulties in managing our growth, and executing our growth strategy;
- Liability for previously restated financial statements and associated with ineffective controls and procedures;
- Our dependence on our key personnel and our ability to attract and retain employees;
- Risks from intense competition from companies with greater resources and experience than we have;
- Risks that our future product candidates, if approved, may be unable to achieve the expected market acceptance and, consequently, limit our ability to generate revenue from new products;
- The fact that the majority of our license agreements provide the licensors and/or counter-parties the right to use and/or exploit such licensed intellectual property;
- Preclinical studies and earlier clinical trials may not necessarily be predictive of future results and may not have favorable results; we have limited marketing experience, and our future ability to successfully commercialize any of our product candidates, even if they are approved in the future is unknown; and business interruptions could delay us in the process of developing our future product candidates and could disrupt our product sales;
- Third-party payors may not provide coverage and adequate reimbursement levels for any future products;
- Liability from lawsuits (including product liability lawsuits, stockholder lawsuits and regulatory matters), including judgments, damages, fines and penalties;
- Security breaches, loss of data and other disruptions which could prevent us from accessing critical information or expose us to liabilities or damages;

- Risks associated with clinical trials that are expensive, time-consuming, uncertain and susceptible to change, delay or termination and which are open to differing interpretations;
- Our ability to comply with existing and future rules and regulations, including federal, state and foreign healthcare laws and regulations and implementation of, or changes to, such healthcare laws and regulations;
- Delays in the trials, testing, application, or approval process for drug candidates and/or our ability to obtain approval for promising drug candidates, and the costs associated therewith;
- Our ability to adequately protect our future product candidates or our proprietary technology in the marketplace, claims and liability from third parties regarding our alleged infringement of their intellectual property;
- Differences in laws and regulations between countries and other jurisdictions;
- Changes in laws or regulations, including, but not limited to tax laws and controlled substance laws, or a failure to comply with any laws and regulations;
- Conflicts of interest between our officers, directors, consultants and scientists;
- Penalties associated with our failure to comply with certain pre-agreed contractual obligations and restrictions;
- Dilution caused by future fund raising, the conversion/exercise of outstanding convertible securities, and downward pressure on the value of our securities caused by such future issuances/sales;
- Negative effects on our business from the COVID-19 pandemic and other potential future pandemics;
- The extremely volatile nature of our securities and potential lack of liquidity therefore;
- The fact that our Certificate of Incorporation provides for indemnification of officers and directors, limits the liability of officers and directors, allows for the authorization of preferred stock without stockholder approval, includes certain anti-takeover provisions;
- Our ability to maintain the listing of our common stock and warrants on NASDAQ and the costs of compliance with SEC and NASDAQ rules and requirements;
- Risks associated with our status as an emerging growth company and the provisions of the JOBS Act, which we are able to take advantage of, due to such status;
- Failure of our information technology systems, including cybersecurity attacks or other data security incidents, that could significantly disrupt the operation of our business;
- The fact that we may acquire other companies which could divert our management's attention, result in additional dilution to our stockholders and otherwise disrupt our operations and harm our operating results and if we make any acquisitions, they may disrupt or have a negative impact on our business;
- The fact that we may apply working capital and future funding to uses that ultimately do not improve our operating results or increase the value of our securities; and
- Our growth depends in part on the success of our strategic relationships with third parties.

PART I

ITEM 1. BUSINESS

INTRODUCTION

General

This information included in this Annual Report on Form 10-K should be read in conjunction with the consolidated financial statements and related notes included at the end of this report.

Please see the “Glossary” above for a list of biotechnology industry abbreviations and definitions used throughout this Report.

Our logo and some of our trademarks and tradenames are used in this Report. This Report also includes trademarks, tradenames and service marks that are the property of others. Solely for convenience, trademarks, tradenames and service marks referred to in this Report may appear without the ®, ™ and SM symbols. References to our trademarks, tradenames and service marks are not intended to indicate in any way that we will not assert to the fullest extent under applicable law our rights or the rights of the applicable licensors if any, nor that respective owners to other intellectual property rights will not assert, to the fullest extent under applicable law, their rights thereto. We do not intend the use or display of other companies’ trademarks and trade names to imply a relationship with, or endorsement or sponsorship of us by, any other companies.

The market data and certain other statistical information used throughout this Report are based on independent industry publications, reports by market research firms or other independent sources that we believe to be reliable sources. Industry publications and third-party research, surveys and studies generally indicate that their information has been obtained from sources believed to be reliable, although they do not guarantee the accuracy or completeness of such information. We are responsible for all of the disclosures contained in this Report, and we believe these industry publications and third-party research, surveys and studies are reliable. While we are not aware of any misstatements regarding any third-party information presented in this Report, their estimates, in particular, as they relate to projections, involve numerous assumptions, are subject to risks and uncertainties, and are subject to change based on various factors, including those discussed under the section entitled “Risk Factors” beginning on page 41 of this Report. These and other factors could cause our future performance to differ materially from our assumptions and estimates. Some market and other data included herein, as well as the data of competitors as they relate to 180 Life Sciences Corp., is also based on our good faith estimates.

Our fiscal year ends on December 31. Interim results are presented on a quarterly basis for the quarters ended March 31, June 30, and September 30, the first quarter, second quarter and third quarter, respectively, with the quarter ended December 31st being referenced herein as our fourth quarter. Fiscal 2020 means the year ended December 31, 2020, whereas fiscal 2019 means the year ended December 31, 2019.

Definition

Unless the context requires otherwise, references to the “Company,” “we,” “us,” “our,” “180 Life”, “180LS” and “180 Life Sciences Corp.” refer specifically to 180 Life Sciences Corp. and its consolidated subsidiaries.

In addition, unless the context otherwise requires and for the purposes of this Report only:

- “CAD” refers to Canadian dollars;
- “Exchange Act” refers to the Securities Exchange Act of 1934, as amended;
- “£” or “GBP” refers to British pounds sterling;
- “SEC” or the “Commission” refers to the United States Securities and Exchange Commission; and
- “Securities Act” refers to the Securities Act of 1933, as amended.

Where You Can Find Other Information

We file annual, quarterly, and current reports, proxy statements and other information with the SEC. Our SEC filings are available to the public over the Internet at the SEC's website at www.sec.gov and are available for download, free of charge, soon after such reports are filed with or furnished to the SEC, on the "Investors"—"SEC Filings"—"All SEC Filings" page of our website at www.180lifesciences.com. Copies of documents filed by us with the SEC are also available from us without charge, upon oral or written request to our Secretary, who can be contacted at the address and telephone number set forth on the cover page of this Report. Our website address is www.180lifesciences.com/. The information on, or that may be accessed through, our website is not incorporated by reference into this Report and should not be considered a part of this Report.

Business Combination

On November 6, 2020, 180 Life Sciences Corp., then known as KBL Merger Corp. IV (the "Company", sometimes referred to herein as KBL prior to the Business Combination) consummated the previously announced business combination (the "Business Combination") following a special meeting of stockholders, where the stockholders of the Company considered and approved, among other matters, a proposal to adopt that certain Business Combination Agreement (as amended, the "Business Combination Agreement"), dated as of July 25, 2019, entered into by and among the Company, KBL Merger Sub, Inc. ("Merger Sub"), 180 Life Corp. (f/k/a 180 Life Sciences Corp.), Katexco Pharmaceuticals Corp. ("Katexco"), CannBioRex Pharmaceuticals Corp. ("CBR Pharma"), 180 Therapeutics L.P. ("180 LP") and together with Katexco and CBR Pharma, the "180 Subsidiaries" and, together with 180 Life Sciences Corp., the "180 Parties", and Lawrence Pemble, in his capacity as representative of the stockholders of the 180 Parties (the "Stockholder Representative"). Pursuant to the Business Combination Agreement, among other things, Merger Sub merged with and into 180, with 180 continuing as the surviving entity and a wholly-owned subsidiary of the Company (the "Merger"). The Merger became effective on November 6, 2020 (the closing of the Merger being referred to herein as the "Closing"). In connection with, and prior to, the Closing, 180 Life Sciences Corp. filed a Certificate of Amendment of its Certificate of Incorporation in Delaware to change its name to 180 Life Corp., and KBL Merger Corp. IV changed its name to 180 Life Sciences Corp.

Company Overview

We are a clinical stage biotechnology company headquartered in Palo Alto, California, focused on the development of therapeutics for unmet medical needs in chronic pain, inflammation, inflammatory diseases and fibrosis by employing innovative research, and, where appropriate, combination therapy. We have three product development platforms each of which (i) focus on different diseases, pains or medical conditions and target different factors, molecules or proteins and (ii) have or will have their own product candidates:

- Anti-TNF platform: Focusing on fibrosis and anti-tumour necrosis factor ("anti-TNF");
- SCAs platform: Focusing on drugs which are synthetic cannabidiol ("CBD") or cannabigerol ("CBG") analogues ("SCAs"); and
- α 7nAChR platform: Focusing on alpha 7 nicotinic acetylcholine receptor (" α 7nAChR").

We have several future product candidates in development, including one product candidate in a Phase 2b clinical trial in the United Kingdom ("UK") and the Netherlands for Dupuytren's disease, a condition that affects the development of fibrous connective tissue in the palm of the hand. Our Company was founded by several world-leading scientists, in the biotechnology and pharmaceutical sectors. Our world-renowned scientists Prof. Sir Marc Feldmann, Prof. Lawrence Steinman, Prof. Raphael Mechoulam, Dr. Jonathan Rothbard, and Prof. Jagdeep Nanchahal have significant experience and significant previous success in drug discovery. The scientists are from the University of Oxford ("Oxford"), Stanford University and Hebrew University of Jerusalem (the "Hebrew University"), and the management team has extensive experience in financing and growing early-stage healthcare companies.

Currently, we are conducting clinical trials only for certain indications under the anti-TNF platform. Of our three product development platforms, only one, the SCAs platform, involves products that are related to CBD (and not to cannabis or THC), and no clinical trials for any indications or products under the SCAs platform are currently being conducted in the United States or abroad.

Business Strategy

Our goal is to capitalize on our research in chronic pain, inflammation and fibrosis by pursuing the following strategies:

- Advance our clinical-stage product candidate for Dupuytren's disease from its current late-stage development to seek and obtain approval in the UK, European Union ("EU") and the United States ("U.S.") for such product candidate, potentially commercialize the product candidate in the UK, EU and the U.S. and identify the optimal commercial pathway in other markets around the world;
- Move our pre-clinical product candidates into clinical trials, seek and obtain approval in the UK, EU and U.S. for such future product candidates, and potentially commercialize such future product candidates in the U.S., UK and Europe;
- Leverage our proprietary product development platforms to discover, develop and commercialize novel first-in-class products for the treatment of chronic pain, inflammation and fibrosis; and
- Strengthen our position in research in chronic pain, inflammation and fibrosis.

Overview of Product Development Platforms

The following chart summarizes the products and indications, including those currently in clinical trial, for our three product development platforms.

*Regulatory approvals obtained from the MHRA and CCMO and the relevant accredited ethics committees to perform clinical trials in the UK and The Netherlands. No meetings have been held with, and no applications or requests for approval have been submitted to the FDA for any products at this time.

**Regulatory approvals obtained from the MHRA and CCMO and the relevant accredited ethics committees to perform clinical trials in the UK and The Netherlands. No meetings have been held with, and no applications or requests for approval have been submitted to the FDA for any products at this time.”

The product development platforms are each described in more detail below.

Anti-TNF Platform

Our anti-TNF platform began at our wholly-owned subsidiary, 180 LP. This platform is focused on studying the molecular mechanism of inflammatory diseases and fibrosis and on the discovery of TNF as a mediator of fibrosis, as well as other immune-driven diseases. This research was first undertaken in the 1980s by our Co-Chairman, Prof. Sir Marc Feldmann, based on analysis of tissue from patients with rheumatoid arthritis (“RA”). We are applying this same approach to the analysis of human disease tissue from patients with active fibrosis, research led by Prof. Jagdeep Nanchahal in Oxford (who is also the Chairman of our Clinical Advisory Board), which has led to the identification of new therapeutic targets and approaches that we are developing. Profs. Nanchahal and Feldmann, in collaboration with other scientists, are leveraging their experience and expertise in developing anti-inflammatories to search for new applications for anti-TNF therapeutics. We are seeking to demonstrate that anti-TNF drugs, such as adalimumab, have a positive effect on new indications such as Dupuytren’s disease, frozen shoulder and post-operative cognitive dysfunction/delirium (“POCD”).

Our first and currently only product candidate in clinical development is for the potential treatment of early-stage fibrosis of the hand, Dupuytren’s disease, for which there is currently no approved treatment in the UK or EU. Collagenase from Clostridium histolyticum has been approved in the USA for late-stage Dupuytren’s disease. The proposed treatment will be administered by a local injection of adalimumab, an anti-TNF antibody into early-stage disease tissue. The results for the Phase 2a clinical trial for Dupuytren’s disease, supported by the Wellcome Trust, UK Department of Health and the Company, were published in July 2018. The study demonstrated positive tissue response indicative of anti-fibrotic mechanisms, as well as guiding dosing for follow up trials. Having defined the most efficacious dose and preparation and based on these positive proof of concept data, the Company, together with the Wellcome Trust and the UK Department of Health, initiated a Phase 2b trial in patients with early stage Dupuytren’s disease. The initial plan was to randomize 138 patients in a ratio of 1:1 to receive four injections of adalimumab or placebo at three-month intervals, and followed for a total of 18 months from baseline. With additional funding from the Wellcome Trust, the Phase 2b trial completed recruitment of 181 patients in April 2019, having commenced dosing in February 2017. The final patient was enrolled in April 2019. This trial has been completed and the data is being verified and analyzed, and we expect to present top line data towards the end of the third quarter or early part of the fourth quarter of 2021. Through this fibrosis and anti-TNF product development platform, we are also performing research for the development of potential treatments of frozen shoulder, liver and lung fibrosis and POCD.

The following chart summarizes the timing of current and future clinical trials, based on current proposals, under the anti-TNF platform.

Milestone	Timing
Dupuytren's Disease	
• Phase 2b Results	Q4 2021
Frozen Shoulder	
• Phase 2 Launch	Q3 2021
• Phase 2 Results	Q4 2023
POCD	
• Phase 2 Launch	Q2 2022
• Phase 2 Results	Q4 2024

We have obtained regulatory approvals from the UK Medicines and Healthcare Products Regulatory Agency (MHRA) and the Dutch Centrale Commissie Mensgebonden Onderzoek (CCMO), as well as from the relevant accredited ethics committees, in order to perform clinical trials in the UK and The Netherlands solely for indications under the anti-TNF platform. We have not held any meetings with, and no applications or requests for approval have been submitted to, the U.S. Food and Drug Administration (“FDA”) for any indications or products under the anti-TNF platform at this time.

SCAs Platform

Our SCAs platform began at our wholly-owned subsidiary, CBR Pharma with the collaborative work of its founders Prof. Mechoulam and Prof. Feldmann. This platform focuses on the development of synthetic pharmaceutical grade molecules close or distant analogues of non-psychoactive cannabinoids such as CBD for the treatment of inflammatory diseases and pain. These development efforts are a result of a 20-year collaboration between Prof. Feldmann, who discovered and commercialized anti-TNF therapy for treatment of RA and subsequently a number of inflammatory diseases, which is currently the best-selling drug class in the world, and Prof. Mechoulam, a world leading expert in cannabis chemistry who successfully identified THC, CBD and, subsequently, the endocannabinoids. We are working with a research team based at the Kennedy Institute at Oxford, consisting of Prof. Feldmann, Prof. Richard Williams and others, and a research team based at Hebrew University, consisting of Prof. Raphael Mechoulam, Prof. Avi Domb, Prof. Amnon Hoffman and others, to generate new drugs, test them, and optimize their uptake and delivery to disease targets. The aim is to develop novel, orally active analgesic and anti-inflammatory medications based on synthetic compounds to target chronic diseases. We term these synthetic compounds generically as “synthetic CBD analogues” (“SCAs”). Our primary development targets are arthritis and chronic and recurrent pain, while our secondary development targets are diabetes/diabetic neuropathy, fibromyalgia, multiple sclerosis, obesity and fatty liver disease.

The following chart summarizes the timing of current and future clinical trials, based on current proposals, under the SCAs platform.

Milestone	Timing
Chronic Pain	
• Phase 1 Launch	Q3 2022

No regulatory approvals have been sought or obtained from appropriate authorities at this time for any products or indications under the SCAs platform.

$\alpha 7nAChR$ Platform

Our $\alpha 7nAChR$ platform began at our wholly-owned subsidiary, Katexco, where its founders identified $\alpha 7nAChR$ as a key receptor for the amyloid proteins associated with diseases like Alzheimer’s and Parkinson’s Disease. $\alpha 7nAChR$ is expressed on the surface of both neuronal cells in the brain and on important cells of the immune system. The research conducted by Dr. Jonathan Rothbard and Prof. Steinman has shown that small molecules available as drugs taken by mouth can engage this receptor and potently reduce inflammatory diseases. Dr. Rothbard and Prof. Steinman have also shown that $\alpha 7nAChR$ is critical in reducing disease animal models of multiple sclerosis and RA, as well as heart attack and stroke. Our $\alpha 7nAChR$ product development platform is currently focused on developing $\alpha 7nAChR$ agonists for the treatment of inflammatory diseases, initially ulcerative colitis induced after cessation of smoking.

No regulatory approvals have been sought or obtained from appropriate authorities at this time for any products or indications under the $\alpha 7nAChR$ platform.

Product Candidates

We are attempting to build a broad and diverse pipeline of product candidates in chronic pain, inflammation and fibrosis. Our product candidates are and will be selected for development based on: potential to address unmet medical needs; development feasibility as determined by our preclinical research and development efforts; potential to rapidly achieve proof-of-concept based on easy-to-measure validated regulatory endpoints; and significant commercial potential.

Anti-TNF Platform Dupuytren's Disease

Overview

Dupuytren's disease, also referred to as hand fibrosis, tends to manifest itself in middle to later age populations and causes fingers in the hand to curl irreversibly. According to an article published in the Journal of Hand Surgery in 2011, it is estimated that approximately 4% to 6% of the Western adult population suffers from Dupuytren's disease, which, in the U.S., translates to approximately 11 million people. According to Market Research Future, the market for Dupuytren's disease is expected to rise to \$5.5 billion by 2023 at a compound annual growth rate ("CAGR") of approximately 4%. We believe these estimates could rise with the development of an effective treatment. Surgery remains the standard treatment for patients with Dupuytren's contractures, but is associated with extended recovery periods and risks of recurrence. Furthermore, patients have to wait until their fingers are bent as there is no approved treatment for early stage Dupuytren's disease. We believe that, if successful, our anti-TNF product candidate may become a preferred treatment option for patients as it will be the only modality targeted at early-stage patients. Early treatment is advantageous, as it can prevent deformity and reduce the need for surgery.

Phase 2 Clinical Trials

Our wholly-owned subsidiary, 180 LP, contributed to the funding of a Phase 2a clinical trial for Dupuytren's disease along with the Wellcome Trust and the UK Department of Health, which using an experimental medicine clinical trial design demonstrated positive tissue response, as well as guiding dosing and tolerability for follow up trials. The data was published in June 2018. Having defined the most efficacious dose and preparation and based on these positive proof of concept data, the Company, together with the Wellcome Trust and the UK Department of Health, initiated a Phase 2b trial in patients with early stage Dupuytren's disease. The initial plan was to randomize 138 patients in a ratio of 1:1 to receive four injections of adalimumab or placebo at three-month intervals and followed for a total of 18 months from baseline. The Phase 2b trial, which was funded by grants from the Wellcome Trust and the UK Department of Health, with a contribution from 180 LP to purchase the drug, completed recruitment of 181 patients in April 2019 and commenced dosing in February 2017 in the UK and Groningen, the Netherlands. This trial has been completed and the data is being verified and analyzed, and we expect to present top line data towards the end of the third quarter or early part of the fourth quarter of 2021.

Other Product Candidates or Indications

In addition to the potential treatment for Dupuytren's disease described above, we are seeking to repurpose anti-TNF for use as a treatment for other fibrotic conditions such as frozen shoulder. Prof. Feldmann's previous work in the 1980s demonstrated that anti-TNF is an effective anti-inflammatory with many possible uses, and it was subsequently approved for various forms of inflammatory arthritis and inflammatory bowel disease (IBD), as well as other indications. This has since created what is currently the best-selling drug class in the world, anti-TNF therapeutics, which, according to Research and Markets, was valued at over \$40 billion in 2019. By using a well-known and extensively used therapeutic, adalimumab, the research and development process may be truncated because of existing product information relating to safety, as the drug has been widely used over the past 20 years in millions of patients.

Frozen Shoulder

Frozen shoulder, also referred to as adhesive capsulitis, is an extremely painful and debilitating condition that affects an individual's most basic activities, including sleep. Frozen shoulder affects approximately 9% of the population in Western countries between the ages of 25 and 64 according to an article published in Arthritis & Rheumatology in 2004. In addition, approximately 20% of people suffering from a frozen shoulder will develop the same problem in their other shoulder. According to an article published in Shoulder & Elbow in 2010, it is estimated that up to 30% of patients with diabetes develop frozen shoulder, and the symptoms tend to be more persistent and recalcitrant in this group.

During the pain predominant inflammatory phase, patients are typically treated with analgesics, physiotherapy and corticosteroid injections. Patients with persistent stiffness may be referred to secondary care for capsular release by manipulation under anesthesia, hydrodilatation or surgical arthroscopy. There is currently no approved targeted therapy, and in conjunction with the National Institute for Health Research (UK), we are investigating the feasibility of recruiting patients during the early pain-predominant inflammatory phase the disease and delivery of a local injection of anti-TNF. The set up stage for this Phase 2 clinical trial for the local injection of anti-TNF for frozen shoulder started in June 2021. Trial protocol is being finalized and a £250,000 grant has been awarded from NIHR to the University of Oxford to support execution and clinical trial sites are being identified. The Company will provide additional funding to support this trial.

Human Liver Fibrosis

Fibrosis of the liver is characterized by long-term damage to the organ caused by the replacement of normal liver tissue with scar tissue. The condition is most commonly caused by non-alcoholic fatty liver disease ("NAFLD"), which encompasses non-alcoholic fatty liver ("NFL") and non-alcoholic steatohepatitis ("NASH"). NAFLD affects approximately 30% of the U.S. population, according to an article published in Nature Reviews Gastroenterology & Hepatology in 2016. Approximately 2% of patients with NFL and approximately 15% to 20% of patients with NASH progress to cirrhosis, fibrosis of the liver with major health issues.

There is no current approved treatment for individuals with NASH. We therefore believe that there is a large potential market for the creation of an effective preventative treatment. According to Allied Market Research, the market for treating liver fibrosis was approximately \$13 billion in 2018, and is projected to rise to approximately \$20 billion in 2022, rising at a CAGR of over 11% per year. We initiated preclinical studies for NASH based on human liver samples during the second quarter of 2020.

POCD

POCD is a common neuropsychiatric syndrome, defined as disturbance of attention, awareness and cognition, which develops over a short period of time and tends to fluctuate during the course of the day. Patients with hip fracture are at particularly high risk of developing POCD. United Kingdom national audit data for 2018 showed that 25% of all patients with hip fracture suffered from delirium. POCD is associated with poor functional outcomes, reduced quality of life and longer hospital stays. People with hip fracture who developed delirium are twice as likely to die as inpatients, and nearly four times more likely to need placement in a nursing home. POCD has also been closely associated with long-term cognitive impairment.

Hip fractures are one of the main challenges facing elderly patients and healthcare systems. According to an article published in The Lancet Public Health in 2017, hip fractures are associated with an average loss of 2.7% of the healthy life expectancy in the middle-aged and older population in the U.S. and Europe. People suffering hip fracture have a mean age of 83 years, are frail, and two-thirds are women. They suffer a 30-day mortality of 7%, and experience a persistent reduction in their health-related quality-of-life similar to that of a diagnosis of Parkinson's disease or multiple sclerosis. According to various studies, POCD is developed in 13-40% of patients following cardiac surgery. With 500,000 cardiac surgeries and 450,000 hip surgeries in the USA each year, in advanced age patients, a beneficial therapy to treat POCD would be a significant benefit to these patients. We plan to initiate a Phase 2 study using anti-TNF for POCD during the second quarter of 2022. An issued patent to protect this potential use has been licensed from The Kennedy Trust for Rheumatology Research.

Overview

Cannabinoids are a class of compounds derived from cannabis plants. The two major cannabinoids contained in cannabis are CBD and THC. Although one cannabinoid, THC, is known to cause psychoactive effects associated with the use of herbal cannabis, no other cannabinoid is known to share these properties. In recent decades, there have been major scientific advances that have led to the discovery of new plant-derived cannabinoids and the endocannabinoid system. There are at least two types of cannabinoid receptors, cannabinoid receptor 1 (“CB1”) and cannabinoid receptor 2 (“CB2”), in the human endocannabinoid system. CB1 receptors are considered to be among the most widely expressed G protein-coupled receptors in the brain and are particularly abundant in areas of the brain concerned with movement and postural control, pain and sensory perception, memory, cognition, emotion, and autonomic and endocrine function. CB1 receptors are also found in peripheral tissues including peripheral nerves and non-neuronal tissues such as muscle, liver tissues and fat. CB2 receptors are expressed primarily in tissues in the immune system and are believed to mediate the immunological effects of cannabinoids. CBD does not interact with CB1R and is only a weak agonist of CB2R. CBD interacts with other important neurotransmitter and neuromodulatory systems in the human body, including transient receptor potential channels, adenosine uptake and serotonin receptors. The far-reaching and diverse pharmacology of the numerous cannabinoids provides significant potential for development of cannabinoid therapeutics across many indications and disease areas, but also adds to the complexity of the research.

Product Candidates or Indications

We believe that there are unmet needs for orally available, relatively safe anti-inflammatory drugs, especially those with analgesic properties. We believe that SCAs have the potential to fulfill these needs and we have started to develop novel, orally available and patentable drug candidates to treat certain diseases or conditions such as arthritis, multiple sclerosis, diabetes, psoriasis, obesity and fatty liver, and various painful conditions. Our work on SCAs is currently in the preclinical development stage.

Because medical cannabis is a complex mixture of compounds from plants, providing a consistent level of the active compound of interest or controlling the level of the other natural compounds is difficult. Accordingly, we are working on orally available SCAs, not derived from plants, to address the deleterious issues of medical cannabis described above. If successful, these SCAs could become approved drug products that offer a robustly consistent and safe dosage that allows patient intake to be carefully controlled.

We believe that the development and clinical study of SCAs will reveal that SCAs have several key advantages over medical cannabis, including:

- use of a pure compound (>99.5%) rather than a mixture of compounds;
- ability to test and control dosing, which in turn controls efficacy and side effect levels;
- creation of a reproducible product; and
- ability to engineer novel synthetic analogues to control binding preferences to select receptors, control agonist or antagonist effects of receptor binding (pharmacokinetics and dynamics), modify half-life of the drug in the body, and create pro-drug forms that are only activated in specified tissues, thereby potentially reducing off target side effects.

In addition to the above advantages, testing SCAs in scientific, double-blind clinical trials would help to allay physicians' concerns regarding the therapeutic use of marijuana-based compounds. This change could increase the number of patients that have access to these drug therapies. If clinical studies are successful, there are a number of potential markets and indications for SCAs which we could target, which include individuals suffering from chronic and recurrent pain, diabetes, osteoarthritis, obesity and fatty liver disease.

Overview

Two of our lead scientists, Prof. Steinman and Dr. Rothbard, previously identified a key receptor for the amyloid proteins associated with diseases like Alzheimer's and Parkinson's disease, called α7nAChR. The α7nAChR is expressed on the surface of both neuronal cells in the brain and on cells of the immune system. The research conducted by Dr. Rothbard and Prof. Steinman has shown that small molecules available as drugs taken by mouth can engage this receptor and potently reduce inflammatory diseases. Dr. Rothbard and Prof. Steinman have shown that this receptor is critical in reducing disease in animal models of multiple sclerosis and RA, as well as heart attack and stroke.

Our efforts to understand the role of the high concentration of small heat shock proteins ("sHsp") found in the lesions in the brains of patients with multiple sclerosis led us to realize that the protein was (i) immune suppressive and (ii) therapeutic in animal 2 models of multiple sclerosis, cardiac and retinal ischemia, and stroke. A significant realization was that amyloid fibrils composed of proteins or small peptides exhibited biological responses equivalent to the sHsps. The fibrils and the sHsps specifically bound and activated macrophages ("MΦ") and regulatory B cells. Crosslinking and precipitation experiments demonstrated that both species bound nAChR and signaled through Jak2/Stat3. We realized that nicotine treatment of experimental autoimmune encephalomyelitis ("EAE") induces an identical pattern of immune suppression as our treatments and exhibits pre-clinical efficacy that is comparable with many of the drugs that are approved for multiple sclerosis (MS) when they were tested in EAE models. Collectively, these observations have informed our strategy to develop an orally available, small molecule agonist of α7nAChR for inflammation and autoimmune diseases.

The α7 subunit of α7nAChR is an integral part of an endogenous immune suppressive pathway, in which activation of the vagus nerve stimulates acetylcholine secretion, which in turn binds α7nAChR on MΦs and regulatory B lymphocytes. Activation of the MΦs initiates an immunosuppressive cascade of events that lead to reduction of pro-inflammatory cytokines, suppression of B and T cell activation and control of inflammation.

In autoimmune diseases like RA, where there is intense inflammation destroying joints, and in multiple sclerosis, where the brain is under attack with damage to vital neurologic circuits, the body's immune system turns against its own tissues. Other diseases ranging from atherosclerosis to gout, also reveal manifestations of an unwanted autoimmune attack.

Activation of the α7nAChR results in a signaling cascade involving Jak2 and Stat3 leading to the conversion of the macrophages to an immune suppressive phenotype and the production of IL-10. IL-10 is known to reduce inflammatory cytokines, most prominently TNF, IL-1, and IL-6. Consequently, α7nAChR agonists should complement anti-TNF therapy, which opens up the possibility of developing a new class of orally available medicines which are anti-inflammatory but much safer than existing medications such as NSAIDS, Cox2 inhibitors, methotrexate, and Janus kinase (JAK) inhibitors. This is because α7nAChR agonists are activating an endogenous regulatory pathway, rather than blocking important pathways needed for diverse processes. The market opportunity arises from the complex and expensive effort by several large and small biotechnology companies in the development of a spectrum of orally available partial agonists specific for α7nAChR. The compounds underwent extensive preclinical assessment and were used in 18 studies comprising 2,670 subjects.

The drugs universally were shown to be safe, but ineffective in trials for neurologic and psychiatric diseases, namely Alzheimer's disease and schizophrenia. In randomized, placebo-controlled clinical trials for cognitive impairment in Alzheimer's disease and schizophrenia, the compounds failed to meet their primary endpoint.

We plan to use these previous studies as a foundation to potentially develop a patentable α7nAChR analog within this family to use as an immune suppressive to treat a range of inflammatory and autoimmune indications including RA, IBD, relapsing and progressive forms of multiple sclerosis, atherosclerosis, gout and osteoarthritis. Our scientists have found that the α7 receptor on macrophages and regulatory B lymphocytes are different from the target of the drugs developed so far.

Product Candidates or Indications

We intend to identify, characterize, synthesize, and patent an orally available small molecular weight agonist of α 7nAChR by screening non-patented analogs of large numbers of known agonists defined by pharmaceutical companies. We intend to outsource this work to Evotec GMBH, an integrated early discovery organization, and one which we have worked with in the past, specializing in ion channels and transporters, offering clients specialized technologies and scientific expertise to move from target to lead compounds.

Following a safety and efficacy assessment program, we intend to select candidates for pre-clinical development as a prelude to the potential initiation of clinical studies, which could potentially be followed by an Investigational New Drug Application ("IND") to the FDA. Our first intended target indication for its α 7nAChR development platform is smoking cessation induced ulcerative colitis.

Outsourcing and Manufacturing

We are currently outsourcing our clinical trials, which are conducted at Oxford University, Edinburgh, UK and Groningen, The Netherlands and only involve certain indications under the anti-TNF platform. We expect to continue to outsource our clinical trials and conduct them at (1) in the case of the anti-TNF platform, Oxford University and Groningen, The Netherlands, (2) in the case of the SCAs platform, Hebrew University and Oxford University and (3) in the case of the α 7nAChR platform, to be determined.

We also expect to outsource all of our manufacturing activities, including those activities at the research or clinical stage, with SCAs to be produced at Hebrew University and α 7nAChR to be produced by Evotec and the anti-TNF platform utilizing off-the-shelf adalimumab. In addition, we expect our products to be good manufacturing practice (GMP) grade and produced by accredited contract research organizations (CROs).

Material Agreements

We have entered into material research and licensing agreements (the "Research Agreements") with various universities and parties in order to conduct research to develop potential product candidates. We have also entered into other material consulting and advisory services agreements with various scientists (the "Consulting Agreements") to assist with such research.

Overview of Research Agreements

The Research Agreements include agreements with the Hebrew University and Oxford. For the anti-TNF platform, the Research Agreements with Oxford allow 180LS to contribute financially to sponsor the research being conducted for the anti-TNF platform. In return, 180LS will receive an exclusive option to license any IP arising from the Research Agreements. There are also license agreements in place whereby we have exclusively licensed certain intellectual property from Oxford.

For the SCA program, we have agreements in place with Hebrew University and Oxford, pursuant to which we intend to conduct research to develop and characterize novel SCAs for the treatment of certain target indications, and to perform early-phase clinical trials. Through the Research Agreements with Hebrew University and Oxford, we established research facilities at the Hebrew University and Oxford, in which the development and testing of new cannabinoids designed and synthesized at the Hebrew University will be facilitated. The labs at the Hebrew University, led by Prof. Mechoulam, will synthesize the chemical compounds and perform preliminary efficacy and safety studies.

Once these initial studies are completed at the Hebrew University, the chemical compounds are sent to Prof. Richard Williams at Oxford, where further evaluation is carried out to identify candidates which have the best potential for clinical efficacy and commercial development. Subsequently, we will support the clinical development of the lead compound(s), culminating in Phase 2 clinical trials to establish clinical utility in chronic pain and inflammatory indications.

The research team at Hebrew University has identified a series of SCAs that have demonstrated promising analgesic and anti-inflammatory effects in mouse models. These studies comprise testing the effects on pain responses, production of TNF (pro-inflammatory cytokine key to multiple inflammatory disorders), and local joint swelling, indicative of inflammation. Early studies during the first phase of the project have identified three to five compounds that are being analyzed in arthritis models at Oxford.

Previously, certain SCAs developed by the Hebrew University have been shown to inhibit the production of TNF, and to be very effective in collagen induced arthritis, a mouse model of human RA that was established with the specific aim of evaluating novel anti-arthritic compounds. CB2 receptor agonists (i.e., the receptor for cannabinoids) have been confirmed by third parties to reduce the production and activity of inflammatory mediators such as TNF, and to suppress joint swelling, synovial membrane thickening and the expression of pro-inflammatory markers. These effects can be demonstrated at doses that do not affect general motor activity and behavior of the animals tested.

The Hebrew Licensed Technology (as defined below) will be evaluated for efficacy and safety using in-house pre-clinical models of inflammatory pain in parallel with absorption, distribution, metabolism and excretion and safety assessments carried out by third-party professional contract research organizations ("CRO"). In parallel, blood will be collected from treated animals to determine levels of key circulating proteins that may serve as blood biomarkers that report on response to treatment. Other studies are anticipated to comprise studying the effects of treatment on immune responses that are expected to be informative for steering future studies towards other auto-immune indications.

Following the above safety and efficacy assessment program, we intend to select candidates for clinical studies.

Clinical trial design and regulatory affairs will be undertaken by the research team at Oxford and their advisors, led by Prof. Sallie Lamb (working at University of Exeter & University of Oxford). We expect that initial indications will focus on chronic pain in patients with rheumatoid arthritis; however, we envisage that other indications to include neuropathic pain will be considered for subsequent trials.

A recent review examining treatment aspirations for RA patients, as well as the founders' expertise in this field, has led us to believe that there are still major unmet needs in key areas such as pain, physical and mental function, as well as fatigue, and hence there is a need for new medications, especially with orally available drugs. There is also a significant gap in the availability of well-tolerated drugs that have immunomodulatory and analgesic activity that would be suitable for treatment of early RA or undifferentiated arthritis, for which conventional disease-modifying anti-rheumatic drugs or biologics would be inappropriate. Research led by Prof. Richard Williams at Oxford was instrumental in the pre-clinical development of TNF inhibitors, and in the development of robust and predictive in vivo and in vitro assays. These assays helped provide the scientific basis for the clinical development, not only of biologics, but also of small molecular weight inhibitors of TNF production, such as Apremilast, which is now in widespread clinical use. More recently, the research team at the Hebrew University characterized a number of synthetic SCAs with anti-inflammatory and immunomodulatory properties.

The SCAs that will be our product candidates are synthetically manufactured rather than extracted from cannabis plants. We believe that SCAs offer several advantages over botanically-derived cannabinoids, including consistent, reproducible pharmaceutical-grade active ingredients ("API"), with well-defined purity. We believe such candidates may improve the desired therapeutic effect without adverse psychoactive effects associated with botanical cannabis compounds. Synthetic manufacturing also allows for a more efficient chemistry, manufacturing and control process. We believe synthetic manufacturing will allow for a more clearly defined and straightforward FDA approval pathway by avoiding the potential problems faced when seeking approval for product candidates containing botanically derived cannabinoids, which include inconsistent API production and additional toxicology related to botanical impurities.

In summary, the initial focus of the research will be on the development of safe and well-tolerated compounds with analgesic and immunomodulatory activity and with the capacity to synergize with current therapies, which primarily target downstream inflammatory processes. After conducting initial research and development, we will select the most promising of the chemical compounds to move into Phase 1 and 2 clinical trials, which we expect to commence by the third quarter of 2022.

The Research Agreements are each described below.

Research Agreements with the Hebrew University

On May 13, 2018, our wholly-owned subsidiary CBR Pharma entered into a research and license agreement (the “2018 Hebrew Agreement”) with Yissum Research Development Company of the Hebrew University of Jerusalem, Ltd. (“Yissum”), pursuant to which Yissum granted CBR Pharma a worldwide exclusive license (the “2018 Hebrew License”) to develop and commercialize certain patents (the “2018 Hebrew Licensed Patents”), know-how and research results (collectively, the “2018 Hebrew Licensed Technology”), in order to develop, manufacture, market, distribute or sell products, all within the use of the 2018 Hebrew Licensed Technology for the treatment of any and all veterinary and human medical conditions, including obesity, pain, inflammation and arthritis (the “2018 Field”).

Pursuant to the 2018 Hebrew Agreement, notwithstanding the grant of the 2018 Hebrew License, Yissum, on behalf of Hebrew University, will retain the right to (i) make, use and practice the 2018 Hebrew Licensed Technology for Hebrew University’s own research and educational purposes; (ii) license or otherwise convey to other academic and not-for-profit research organizations the 2018 Hebrew Licensed Technology for use in non-commercial research; and (iii) license or otherwise convey the 2018 Hebrew Licensed Technology to any third party for research or commercial applications outside the 2018 Field.

The 2018 Hebrew Agreement further provides that CBR Pharma is entitled to grant one or more sublicenses to the 2018 Hebrew Licensed Technology for exploitation in the 2018 Field.

All right, title and interest in and to the 2018 Hebrew Licensed Technology vest solely in Yissum, and CBR Pharma will hold and make use of the rights granted pursuant to the 2018 Hebrew License solely in accordance with the terms of the 2018 Hebrew Agreement.

As consideration for the 2018 Hebrew License, CBR Pharma paid Yissum a license fee of \$75,000 and agreed to continue to pay an annual license maintenance fee (the “License Maintenance Fee”) of \$50,000, beginning on May 1, 2019 and thereafter on the first day of May each year. The License Maintenance Fee is non-refundable, but may be credited each year against royalties on account of net sales of products made from May 1 to April 30 of each year.

Yissum has also agreed to undertake research and to synthesize chemical compounds that will be used by CBR Pharma, through additional research at both Oxford and Hebrew University, to develop orally active analgesic and anti-inflammatory medications. Compounds will be shipped from Hebrew University to Oxford for use in pre-clinical studies to establish efficacy in pain and inflammation.

Upon the achievement of certain milestones in respect of the chemical compounds derived from the 2018 Hebrew Licensed Technology, CBR Pharma is obligated to make certain payments to Yissum, including but not limited to the following:

Milestone	Milestone Fee
Submission of the first IND testing for the FDA	\$ 75,000
Commencement of one Phase 1/2 trial with the FDA	\$ 100,000
Commencement of one Phase 3 trial with the FDA	\$ 150,000
For each product market authorization/clearance (maximum of \$500,000)	\$ 100,000 (maximum of \$500,000)
For every \$250 million in accumulated sales of the product until \$1 billion in sales is achieved	\$ 250,000

CBR Pharma will pay Yissum royalties equal to (i) 3% of the net sales for the first annual \$500 million of net sales, and (ii) 5% of the net sales after the net sales are at or in excess of \$500 million.

In the event of a sale by CBR Pharma stockholders of their common shares or the transfer or assignment of the 2018 Hebrew Agreement, CBR Pharma is obligated to pay Yissum a fee of 5% of the consideration received by CBR Pharma pursuant to such corporate transaction. In the event of an initial public offering, or a go-public event, CBR Pharma was obligated to issue registered common shares to Yissum equal to 5% of the issued and outstanding common shares, on a fully-diluted basis, concurrently with the closing of such transaction. The Business Combination that was consummated on November 6, 2020, was considered a go-public event, pursuant to which the Company issued 240,541 of its common shares to Yissum prior to the closing of the Business Combination. See Note 14 Commitments and Contingencies and Note 15 – Stockholders’ Equity for more information on the shares issued to Yissum as per the research and license agreement.

CBR Pharma has also agreed to reimburse Yissum (to a maximum of \$30,000) for costs incurred for patent expenses.

Yissum and CBR Pharma also agreed to establish a research program for which CBR Pharma funded a \$400,000 budget for the 12-month period ended May 2019, which is in the process of being extended by an amendment.

The 2018 Hebrew Agreement will terminate upon the occurrence of the later of the following: (i) the expiration of the last of the 2018 Hebrew Licensed Patents; (ii) the expiration of the last exclusivity on any product granted by any regulatory or government body; (iii) the expiration of a continuous period of twenty years during which there was no commercial sale of any product in any country; or (iv) if we elect to obtain an exclusive license to the know-how under the terms of the 2018 Hebrew Agreement, the expiration of such exclusive license.

On November 11, 2019, CBR Pharma entered into an additional research and license agreement (the “2019 Hebrew Agreement”) with Yissum, pursuant to which Yissum granted CBR Pharma a worldwide sole and exclusive license (the “2019 Hebrew License”) to develop and commercialize certain patents (the “2019 Hebrew Licensed Patents”), know-how and research results (collectively, the “2019 Hebrew Licensed Technology,” and together with the 2018 Hebrew Licensed Technology, the “Hebrew Licensed Technology”), in order to develop, manufacture, market, distribute, sell, repair and refurbish products, all within the use of the 2019 Hebrew Licensed Technology for (i) Cannabinoid phenolate metal salts, including mono, di and trivalent metals such as Li, Na, K, Ca, Mg, Zn, Fe and Al and their mixtures with native or synthetic cannabinoids, their pharmaceutical formulations, including for oral and topical administration; and (ii) pharmaceutical formulations, for the administration of cannabinoid chemical derivatives, including any and all veterinary and human medical conditions, including obesity, pain, inflammation and arthritis (the “2019 Field”).

Pursuant to the 2019 Hebrew Agreement, notwithstanding the grant of the 2019 Hebrew License, Yissum, on behalf of Hebrew University, will retain the right to (i) make, use and practice the 2019 Hebrew Licensed Technology for Hebrew University’s own research and educational purposes, but not for commercial purposes, and subject to the maintenance of confidentiality for any know-how or unpublished patent information contain in the 2019 Hebrew Licensed Technology; (ii) license or otherwise convey to other academic and not-for-profit research organizations the 2019 Hebrew Licensed Technology for use in non-commercial research and subject to the maintenance of confidentiality for any know-how or unpublished patent information contain in the 2019 Hebrew Licensed Technology; and (iii) license or otherwise convey the 2019 Hebrew Licensed Technology to any third party for research or commercial applications outside the 2019 Field, subject to the maintenance of confidentiality for any know-how or unpublished patent information contain in the 2019 Hebrew Licensed Technology.

The 2019 Hebrew Agreement further provides that CBR Pharma is entitled to grant one or more sublicenses to the 2019 Hebrew Licensed Technology for exploitation in the 2019 Field.

All right, title and interest in and to the 2019 Hebrew Licensed Technology vest solely in Yissum, and CBR Pharma will hold and make use of the rights granted pursuant to the 2019 Hebrew License solely in accordance with the terms of the 2019 Hebrew Agreement.

The 2019 Hebrew Licensed Technology will terminate upon the occurrence of the later of the following: (i) the expiration of the last of the 2019 Hebrew Licensed Patents; (ii) the expiration of the last exclusivity on any product granted by any regulatory or government body; (iii) the expiration of a continuous period of twenty years plus any applicable patent extension period, during which there was no commercial sale of any product in any country; or (iv) if we elect to obtain an exclusive license to the know-how under the terms of the 2019 Hebrew Agreement, the expiration of such exclusive license.

On January 1, 2020, CBR Pharma and Yissum entered into the first amendment to the 2018 Hebrew Agreement, which provided for additional research to be done at Yissum on new derivatives of certain molecules. Pursuant to the terms of the First Amendment, the Company will pay Yissum \$200,000 per year plus 35% additional for University overhead for the additional research performed by each professor over an 18-month period, starting May 1, 2019. The additional research was initially expected to end in April 2021 and we are in negotiations with Yissum to extend the agreement.

Research Agreements with the University of Oxford

On November 1, 2013, our wholly-owned subsidiary 180 LP entered into an agreement (the “First Oxford Agreement”) with Oxford, pursuant to which 180 LP will sponsor Oxford’s research and development of repurposing anti-TNF for Dupuytren’s disease.

Pursuant to the First Oxford Agreement, each payment is to be made to ISIS Innovation (the University of Oxford) at different milestones of the project, outlined below:

Milestone	Milestone Fee
Minimum investment completed	£ 10,000
Initiation of Phase 2 trial for a licensed product	£ 10,000
Initiation of Phase 3 trial for a licensed product	£ 10,000
Registerable Phase 3 trial primary endpoint achieved for a licensed product	£ 20,000
Any issued U.S. patent of the licensed intellectual property rights	£ 5,000
Approval by FDA of an NDA filed by 180 LP or one of its sub-licensees for a licensed product	£ 30,000
Approval by EMA of an MAA filed by 180 LP or one of its sub-licensees for a licensed product	£ 30,000
First commercial sale of a licensed product by 180 LP or any sub-licensee in the U.S.	£ 50,000
First commercial sale of a licensed product by 180 LP or any sub-licensee in the EU	£ 50,000

ISIS Innovation is also eligible for royalty payments equal to 0.5% of net sales in any country where there is a valid claim, 0.25% of net sales in other countries and a fee income royalty rate of 7.5% on all up-front, milestone and other one-off payments under or in connection with all sub-licenses and other contracts granted by 180 LP with respect to the licensed technology. The First Oxford Agreement is effective, unless earlier terminated, for so long as the specified patent application remains in effect as an issued patent, pending patent application or supplementary protection certificate or for a term of 20 years, whichever is longer.

On August 15, 2018, CannBioRex Pharma Limited, a company incorporated under the laws of England and Wales (“[CannUK](#)”) and a wholly-owned subsidiary of our wholly-owned subsidiary CBR Pharma, entered into the Research Agreement (the “[Second Oxford Agreement](#)”) with Oxford, pursuant to which CBR Pharma (through CannUK) will sponsor Oxford’s research and development of SCAs developed from the Hebrew Licensed Technology. At Oxford, the SCAs generated in the Hebrew University are being tested for analgesic and anti-inflammatory effects in established pre-clinical models.

Pursuant to the Second Oxford Agreement, Oxford will undertake a research project (the “[Research Project](#)”) based around the clinical development of SCAs that are known to exhibit both anti-inflammatory and immunomodulatory properties. The aim of the Research Project is to develop and characterize chemical compounds that are synthesized at Hebrew University to create treatments for chronic pain, RA and other chronic inflammatory conditions, and to eventually obtain regulatory approval to initiate early-phase clinical trials by mid to late 2022 or as soon as possible thereafter. The Second Oxford Agreement had an initial term of one year beginning on March 22, 2019, but was extended by amendment to March 31, 2020, or any later date agreed to by the parties, unless terminated earlier. The Second Oxford Agreement was not extended any further after March 31, 2020.

CannUK, as the sponsor of the Research Project, agreed to make the following payments to Oxford:

Milestone	Milestone Fee
Signature of the Oxford Agreement	£ 166,800
6 months post start of the Research Project	£ 166,800
9 months post start of the Research Project	£ 166,800
12 months post start of the Research Project, after report	£ 55,600

On September 18, 2020, CannUK entered into another research agreement with Oxford (the “Third Oxford Agreement”), pursuant to which CannUK will sponsor work led by Prof. Nanchahal at the University of Oxford to investigate the mechanisms underlying fibrosis. In connection with the agreement, CannUK will initially provide \$100,000 and then at 6-month intervals further funding to support the salary of Dr. Lynn Williams and consumables.

CannUK, as the sponsor, agreed to make the following payments to Oxford:

Milestone	Amount Due (excluding VAT)
30 days post signing of the Third Oxford Agreement	£ 80,000
6 months post signing of the Third Oxford Agreement	£ 178,867
12 months post signing of the Third Oxford Agreement	£ 178,867
24 months post signing of the Third Oxford Agreement	£ 178,867
36 months post signing of the Third Oxford Agreement	£ 178,867

On September 21, 2020, CannUK entered into another research agreement with Oxford (the “Fourth Oxford Agreement”), pursuant to which CannUK will sponsor work at the University of Oxford to develop and characterize novel cannabinoid derived new chemical entities (NCEs) for the treatment of inflammatory diseases towards initiation of early phase clinical trials in patients within a period of 3 years.

CannUK, as the sponsor, agreed to make the following payments to Oxford:

Milestone	Amount Due (excluding VAT)
30 days post signing of the Fourth Oxford Agreement	£ 101,778
6 months post signing of the Fourth Oxford Agreement	£ 101,778
12 months post signing of the Fourth Oxford Agreement	£ 101,778
18 months post signing of the Fourth Oxford Agreement	£ 101,778
24 months post signing of the Fourth Oxford Agreement	£ 101,778

On May 24, 2021, CannUK entered into another research agreement with Oxford (the “Fifth Oxford Agreement”), pursuant to which CannUK will sponsor work at the University of Oxford to conduct a multi-centre, randomised, double blind, parallel group, feasibility study of anti-TNF injection for the treatment of adults with frozen shoulder during the pain-predominant phase.

CannUK, as the sponsor, agreed to make the following payments to Oxford:

Milestone	Amount Due (excluding VAT)
Upon signing of the Fifth Oxford Agreement	£ 70,546
6 months post signing of the Fifth Oxford Agreement	£ 70,546
12 months post signing of the Fifth Oxford Agreement	£ 70,546
24 months post signing of the Fifth Oxford Agreement	£ 70,546

Stanford License Agreement

On May 8, 2018, Katexco Pharmaceuticals Corp, a wholly-owned subsidiary of our wholly-owned subsidiary Katexco, entered into an option agreement (the “Stanford Option”) with the Board of Trustees of the Leland Stanford Junior University (“Stanford”), pursuant to which Stanford granted Katexco an option to acquire an exclusive license for the development and commercialization of certain inventions. In consideration for the Stanford Option, Katexco paid Stanford \$10,000 (the “Option Payment”), creditable against the license issue fee agreement.

On July 25, 2018 (the “Stanford Effective Date”) Katexco exercised the Stanford Option, and entered into an exclusive license agreement (the “Stanford License Agreement”) with Stanford, pursuant to which Katexco was granted the rights to certain U.S. patents related to (i) alpha B-crystallin as a therapy for autoimmune demyelination and (ii) peptides as short as six amino acids that form amyloid fibrils that activate B-1 cells and macrophages and are anti-inflammatory and therapeutic in autoimmune and neurodegenerative diseases (the “Stanford Licensed Patents”). Through the Stanford License Agreement, Katexco established research facilities at Stanford. We will support the clinical development of the lead compound(s), culminating in Phase 1 and Phase 2 clinical trials to establish potential clinical utility in ulcerative colitis indications.

Under the Stanford License Agreement, no rights of Stanford, including intellectual property rights, are granted to Katexco other than those rights granted under the Stanford Licensed Patents.

As consideration for the grant of the Stanford Licensed Patents, Katexco paid Stanford an initial fee of \$50,000, inclusive of the Option Payment. The Company also issued 111,466 of common shares to Stanford, and provided a letter stating the value of such shares. A portion of the shares issued to Stanford were later distributed to five individuals, including our Chief Scientific Officer and co-chairman.

Beginning upon the first anniversary of the Stanford Effective Date and each anniversary thereafter, Katexco will pay Stanford an annual license maintenance fee of \$20,000 on the first and second anniversaries and \$40,000 on each subsequent anniversary. Furthermore, Katexco is obligated to make the following payments, including (i) \$100,000 upon initiation of Phase 2 trial, (ii) \$500,000 upon the first FDA approval of a product (the “Licensed Product”) resulting from the Stanford Licensed Patents, and (iii) \$250,000 upon each new Licensed Product thereafter. Royalties, calculated at 2.5% of net sales (calculated as gross revenue received by Katexco or its sublicensees, their distributors or designees, from the sale, transfer or other disposition of products based on the Stanford Licensed Patents minus 5%), will be payable to Stanford. In addition, Katexco has reimbursed Stanford \$51,385 to offset the Stanford Licensed Patent’s patenting expenses, and will reimburse Stanford for all Stanford Licensed Patent’s patenting expenses, including any interference and or re-examination matters, incurred by Stanford after March 3, 2018.

We can terminate the Stanford License Agreement without cause by providing a 30-day notice. In the case of a change of control, upon the assignment of the Stanford License Agreement, Katexco is obligated to pay Stanford a \$200,000 change of control fee. The Stanford License Agreement also provides Stanford with the right to purchase for cash up to either (i) 10% or (ii) the percentage necessary for Stanford to maintain its pro rata ownership interest in Katexco, of Katexco’s equity securities issued in a private offering. The shares issued to Stanford in connection with the Stanford License Agreement, gave Stanford and the five individuals who received a portion of the shares a total ownership of 2.11% in Katexco’s stock, prior to the Reorganization.

The Evotec Agreement

On June 7, 2018, our wholly-owned subsidiary Katexco entered into the Evotec Agreement with Evotec, a leading CRO, pursuant to which Evotec was retained to perform certain research services. Pursuant to the Evotec Agreement, the goal of the joint project (the “Evotec Project”) is to identify small molecules that pharmacologically stimulate the human ChrFam7a receptor and function. The Evotec Project is being conducted in two phases over a 24-month period where resources are allocated by the steering committee, which is controlled equally by the parties to the Evotec Agreement, on a quarterly basis.

Subject to certain exemptions described in the Evotec Agreement, Katexco owns all intellectual property rights, conceived, invented, discovered or made by Evotec during the performance of its services, other than intellectual property rights owned or controlled by Evotec relating to its already existing technology and components to be used in the services to be provided under the Evotec Agreement.

The Evotec Agreement is subject to a minimum payment of \$4,937,500 and a maximum payment of \$5,350,250 to Evotec. This program was paused in mid-2019 and the Company is currently in negotiations with Evotec to continue this program.

The Petcanna Agreement

On August 20, 2018, we entered into a sublicense agreement with Petcanna Pharma Corp. (“Petcanna”), a private company which was founded by Prof. Sir Marc Feldmann (our Co-Executive Chairman), and Yissum (the “Petcanna Agreement”).

Under the Petcanna Agreement, we granted Petcanna an exclusive, worldwide, non-transferable, non-sublicensable sublicense to make commercial use of the certain patents related to cyclohexenyl compounds and listed in the Petcanna Agreement (the “Petcanna IP”) in order to develop, manufacture, market, distribute or sell products that incorporate the Petcanna IP in products that are intended for the treatment of veterinary medical conditions, initially osteoarthritis.

As consideration for the sublicense, Petcanna agreed to issue to us approximately 9,000,000 of Petcanna’s common shares in the fourth quarter of 2018. As of the date of this filing, Petcanna has not issued shares to any shareholder and has not commenced operations. We intend to retain 85% of such shares, and transfer 15% of such shares to Yissum. In the event that Yissum does not accept such shares, we will have an obligation to pay Yissum 15% of the-then current fair market value of such shares. Petcanna will also pay a 1% royalty to us on Petcanna’s net sales of products that incorporate the Petcanna IP.

All right, title and interest in and to the Petcanna IP, including any improvements to the Petcanna IP, will vest solely in our company.

Unless the parties to the Petcanna Agreement agree otherwise in writing, the Petcanna Agreement will terminate on the occurrence of the later of: (i) the date of expiration of the last of the Petcanna IP, (ii) the date of the final expiration of exclusivity on any Product granted by any regulatory or government body, and (iii) the expiration of a continuous period of twenty (20) years during which there was no First Commercial Sale of any product. The terms “Product” and “First Commercial Sale” apply as they are defined in the Petcanna Agreement. Our ability to grant this sublicense to Petcanna is contingent upon (i) Yissum having the necessary rights to the Hebrew Patent Applications assigned to it from all applicable parties, (ii) Yissum being able to grant a license to us per the terms of the Hebrew Agreement, and (iii) the Hebrew Patent Applications and any related resulting patents being valid and maintained in good standing for the respective terms of the Hebrew Licensing Agreement and the Petcanna Agreement.

Kennedy License Agreement

On September 27, 2019, our wholly-owned subsidiary 180 LP entered into an exclusive license agreement (the “Kennedy License Agreement”) with the Kennedy Trust For Rheumatology Research (“Kennedy”), pursuant to which Kennedy granted to 180 LP an exclusive license in the U.S., Japan and member countries of the EU (including the United Kingdom), to certain licensed patents (the “Kennedy Licensed Patents”), including the right to grant sublicenses, and the right to research, develop, sell or manufacture any pharmaceutical product (i) whose research, development, manufacture, use, importation or sale would infringe on the Kennedy Licensed Patents absent the license granted under the Kennedy License Agreement or (ii) containing an antibody that is a fragment of or derived from an antibody whose research, development, manufacture, use, importation or sale would infringe on the Kennedy Licensed Patents absent the license granted under the Kennedy License Agreement, for all human uses, including the diagnosis, prophylaxis and treatment of diseases and conditions.

Under the Kennedy License Agreement, Kennedy reserves the perpetual, irrevocable, non-exclusive, royalty-free, sublicensable, worldwide right for the Kennedy Licensed Patents and its affiliates, employees, students and other researchers to carry out any acts which would otherwise infringe on the Kennedy Licensed Patents for the purposes of teaching and carrying out research and development, including the right to accept external sponsorship for such research and development and the right to grant sub-licenses for the same purposes.

As consideration for the grant of the Kennedy Licensed Patents, 180 LP paid Kennedy an upfront fee of £60,000, and will also pay Kennedy royalties equal to (i) 1% of the net sales for the first annual \$1 billion of net sales, and (ii) 2% of the net sales after the net sales are at or in excess of \$1 billion, as well as 25% of all sublicense revenue, provided that the amount of such percentage of sublicense revenue based on amounts which constitute royalties shall not be less than 1% on the first cumulative \$1 billion of net sales of the products sold by such sublicenses or their affiliates, and 2% on that portion of the cumulative net sales of the products sold by such sublicenses or their affiliates in excess of \$1 billion.

The term of the royalties paid to Kennedy will expire on the later of (i) the last valid claim of a patent included in the Kennedy Licensed Patents which covers or claims the exploitation of a product in the applicable country; (ii) the expiration of regulatory exclusivity for the product in the country; or (iii) 10 years from first commercial sale of the product in the country.

We may terminate the Kennedy License Agreement without cause by providing 90-days’ notice.

Consulting Agreements

The Consulting Agreements are each described below.

Consulting Agreements with Yissum and each of Prof. Mechoulam and Prof. Gallily

On May 13, 2018, in connection with the Hebrew Agreement, we entered into consulting agreements (each, a “Consulting Agreement” and, collectively, the “Consulting Agreements”) with Yissum and each of Prof. Mechoulam and Prof. Gallily (each, a “Consultant”). Pursuant to the Consulting Agreements, each of the Consultants agreed to provide advice, support, theories, techniques and improvements in our scientific research and product development activities related to the commercialization of the Hebrew Licensed Technology (the “Consulting Services”).

In consideration of the Consulting Services, we will pay Yissum a quarterly consultancy fee of \$12,500 for each Consultant. According to the Consulting Agreements, any inventions, know-how, or intellectual property developed by a Consultant in the course of providing the Consulting Services will be owned (a) by Yissum alone, if the Consultant developed such inventions, know-how or intellectual property alone or with other Hebrew University employees or associates; or (b) jointly by Yissum and us, if the Consultant developed such inventions, know-how or intellectual property together with any employee or consultant of our company; and, in either case, such technology will be deemed to be the Hebrew Licensed Technology under the Hebrew Agreement, and will be handled in accordance with its terms.

Each Consulting Agreement is in effect for a period of three years, and may be extended for additional one-year periods at each time, by mutual written consent of the parties to such Consulting Agreement.

Advisory Services or Consulting Agreements with each of John Todd, Kevin Tracy, Christopher Loren Van Deusen and William Taylor

On July 1, 2018, our wholly-owned subsidiary Katexco entered into advisory services agreements (each, an “Advisory Services Agreement”, and, collectively, the “Advisory Services Agreements”) with each of John Todd, Kevin Tracey, Christopher Loren Van Deusen and William Taylor (each, an “Advisor”). Pursuant to the Advisory Services Agreements, each Advisor agreed to provide advisory services in relation to research and development of drugs combining the use of synthetic CBD with nicotine receptor treatments aimed at autoimmune diseases and multiple sclerosis, as well as to conduct such other services and duties as may be reasonably requested from time to time (the “Advisory Services”).

Each Advisor will be paid an annual fee of \$20,000 in consideration of the Advisory Services, and may be granted stock options of the Company in an amount to be determined in the future.

Each Advisory Services Agreement is in effect until July 1, 2019, unless terminated earlier in accordance with its terms, and will automatically renew for successive one-year periods from such date unless one party delivers written notice to the other, at least 60 days before the next renewal term, that it wishes to terminate.

On July 1, 2018, the parties entered into an addendum to the Advisory Services Agreement of Kevin Tracey (the “Addendum”), in order to ensure that the commitments of Dr. Tracey thereunder are consistent with his obligations to The Feinstein Institute for Medical Research and to Northwell Health (“Feinstein”). Pursuant to the Addendum, Katexco agreed and understood that Dr. Tracey is obligated to assign, and has preemptively assigned, to Feinstein all of his rights in intellectual property conceived or made by Dr. Tracey and arising from research that has been or is supported entirely or partly by Feinstein resources. In addition, Katexco acknowledged that it has no rights, by reason of the Advisory Services Agreement, in any intellectual property that is subject to Dr. Tracey’s obligations to Feinstein. The Addendum further provided that the mere de minimis use of Feinstein’s facilities by Dr. Tracey in the performance of his services under the Advisory Services Agreement will not, without more, bestow upon Feinstein any rights to any intellectual property generated by Dr. Tracey under the Advisory Services Agreement.

In connection with and as part of the Advisory Services Agreements, each Advisor entered into a protection of corporate interests agreement (each, a “POCI Agreement”) with Katexco, pursuant to which each Advisor agreed that Katexco (or its designee) own all right, title and interest in and to all “inventions”, defined as all inventions, original works of authorship, developments, concepts, improvements, designs, discoveries, ideas, trademarks, confidential information, work product, data, and all tangible and intangible materials, in each case whether or not patentable or registrable under copyright or other intellectual property laws anywhere in the world, that such Advisor may (solely or jointly with others) conceive of, develop, create, improve, acquire, reduce to practice or otherwise make, refine or bring into existence, or cause any of the foregoing to be done, whether or not during regular working hours and whether or not such advisor is or was specifically instructed to do so, where: (i) it in any way relates to the present or proposed programs, services, products or business of the Katexco group of entities or to tasks assigned to the Advisor in relation to his engagement; or (ii) such advisor, in any way, used any of the Katexco group of entities’ property, products, processes, software or other resources, including any confidential information.

The provisions of each POCI Agreement will survive the termination of the engagement of the Advisor for any reason, whether voluntary or involuntary.

Advisory Services Agreement with Rajesh Munglani

On July 27, 2018, we entered into advisory services agreement (the “Munglani Services Agreement”) with Rajesh Munglani, acting under Rajesh Munglani Limited. Pursuant to the Munglani Services Agreement, Mr. Munglani agreed to advise on aspects of pre-clinical and clinical development, in return for (i) £20,000 per year, inclusive of any applicable taxes, and (ii) an option to acquire 500,000 shares of CBR Pharma, determined on a pro rata basis based on the number of months in the advisory period, defined as three years from July 27, 2018. The option to acquire shares of CBR Pharma was not issued and the Company may issue options to Dr. Munglani at an amount to be determined in the future.

The Munglani Services Agreement provides that all interests in patents (including, without limitation, provisional patents), patent applications, inventions, improvements, enhancements, discoveries, whether patentable or not, arising out of or relating to the Munglani Services Agreement, as well as all Work Product (as defined in the Munglani Services Agreement) will be deemed works made for hire under applicable copyright law, if applicable, and will belong exclusively to our company.

The Munglani Services Agreement may be terminated by either party by providing thirty (30) days’ prior written notice to the other party.

Advisory Services Agreement with Irene Tracey

On November 19, 2018, we entered into advisory services agreement (the “Tracey Services Agreement”) with Irene Tracey. Pursuant to the Tracey Services Agreement, Ms. Tracey agreed to advise us on aspects of pre-clinical and clinical development, in return for (i) £20,000 per year and (ii) an option to acquire 200,000 shares of CBR Pharma, determined on a pro rata basis based on the number of months in the advisory period, defined as three years from November 19, 2018. The option to acquire shares of CBR Pharma was not issued and the Company may issue options to Prof. Tracey in an amount to be determined in the future.

The Tracey Services Agreement provides that all interests in patents (including, without limitation, provisional patents), patent applications, inventions, improvements, enhancements, discoveries, whether patentable or not, arising out of or relating to the Tracey Services Agreement, as well as all Work Product (as defined in the Tracey Services Agreement) will be deemed works made for hire under applicable copyright law, if applicable, and will belong exclusively to our company, excepting any different terms agreed in contractual arrangements with Oxford when undertaking specific research with us and during which IP might be generated by Ms. Tracey that needs protecting by Oxford as part of the agreed contract.

The Tracey Services Agreement may be terminated by either party by providing thirty (30) days’ prior written notice to the other.

On November 1, 2013, our wholly-owned subsidiary 180 LP entered into letter agreements regarding inflammation consultancy services (each, an “Inflammation Consultancy Agreement”, and, collectively, the “Inflammation Consultancy Agreements”) with Isis Innovation Limited for the services of each of Prof. Sir Marc Feldmann and Prof. Jagdeep Nanchahal (each, an “Inflammation Consultant”). Pursuant to the Inflammation Consultancy Agreements, each Inflammation Consultant agreed to provide advice and expertise on inflammatory and degenerative diseases including fibrosis as exemplified by Dupuytren’s Disease and osteoinduction (bone formation), in relation to the technology, programs and products of 180 LP, and, specifically, to provide general and specific advice and guidance on how 180 LP might further develop its different programs that are ongoing, contemplated, or conceived at or by 180 LP (the “Inflammation Consulting Services”).

In consideration of the Inflammation Consulting Services, Prof. Sir Marc Feldmann and Prof. Jagdeep Nanchahal were paid a fixed fee of \$500 and \$10,000 per annum, respectively.

The initial term of each Advisory Services Agreement was until November 1, 2015. On November 8, 2015, each of the Advisory Services Agreement was extended until November 1, 2020. A new contract with Prof. Jagdeep Nanchahal is described below. A new contract with Prof. Sir Marc Feldman is currently under negotiation at terms not materially different from the prior contract.

Prof Jagdeep Nanchahal Consulting Agreement

On February 25, 2021, we (and CannBioRex Pharma Limited, which was added as a party to the agreement later), entered into a Consultancy Agreement dated February 22, 2021, and effective December 1, 2020, with Prof Jagdeep Nanchahal (as amended, the “Consulting Agreement”). Prof Nanchahal has been providing services to the Company and/or its subsidiaries since 2014, and is currently a greater than 5% stockholder of the Company and the Chairman of our Clinical Advisory Board.

On March 31, 2021, we entered into a First Amendment to Consultancy Agreement with Prof. Jagdeep Nanchahal, which amended the Consultancy Agreement entered into with Prof. Nanchahal on February 25, 2021, to include CannBioRex Pharma Limited, a corporation incorporated and registered in England and Wales (“CannBioRex”), and an indirect wholly-owned subsidiary of the Company, as a party thereto, and to update the prior Consultancy Agreement to provide for cash payments due to Prof. Nanchahal to be paid by CannBioRex, for tax purposes, provide for CannBioRex to be party to certain other provisions of the agreement and to provide for the timing of certain cash bonuses due under the terms of the agreement.

Prof Nanchahal is a surgeon scientist focusing on defining the molecular mechanisms of common diseases and translating his findings through to early phase clinical trials. He undertook his Ph.D., funded by the UK Medical Research Council, whilst a medical student in London and led a lab group funded by external grants throughout his surgical training. After completing fellowships in microsurgery and hand surgery in the USA and Australia, he was appointed as a senior lecturer at Imperial College. His research is focused on promoting tissue regeneration by targeting endogenous stem cells and reducing fibrosis. In 2013 his group identified anti-tumor necrosis factor (TNF) as therapeutic target for Dupuytren’s disease, a common fibrotic condition of the hand. He is currently leading a phase 2b clinical trial funded by the Wellcome Trust and Department of Health to assess the efficacy of local administration of anti-TNF in patients with early stage Dupuytren’s disease. He is a proponent of evidence-based medicine and was the only plastic surgery member of the NICE Guidance Development Groups on complex and non-complex fractures. He was a member of the group that wrote the Standards for the Management of Open Fractures published in 2020. This is an open-source publication to facilitate the care of patients with these severe injuries.

Pursuant to the Consulting Agreement, Prof Nanchahal agreed, during the term of the agreement, to serve as a consultant to the Company and provide such services as the Chief Executive Officer and/or the board of directors of the Company shall request from time to time, including but not be limited to: (1) conducting clinical trials in the fields of Dupuytren’s disease, frozen shoulder and post-operative delirium/cognitive decline; and (2) conducting laboratory research in other fibrotic disorders, including fibrosis of the liver and lung (collectively, the “Services”).

In consideration for providing the Services, the Company (through CannBioRex Pharma Limited) agreed to pay Prof Nanchahal 15,000 British Pounds (GBP) per month (approximately \$20,800) during the term of the agreement, increasing to GBP 23,000 (approximately \$32,000) on the date (a) of publication of the data from the phase 2b clinical trial for Dupuytren's disease (RIDD) and (b) the date that the Company has successfully raised over \$15 million in capital. The fee will increase annually thereafter to reflect progression in other clinical trials and laboratory research as approved by the board of directors. The Company also agreed to pay Prof Nanchahal a bonus ("Bonus 1") in the sum of GBP 100,000 upon submission of the Dupuytren's disease clinical trial data for publication in a peer-reviewed journal. In addition, for prior work performed, including completion of the recruitment to the RIDD (Dupuytren's) trial, the Company agreed to pay Prof Nanchahal GBP 434,673 (approximately \$605,000) ("Bonus 2"). At the election of Prof Nanchahal, Bonus 2 shall be paid at least 50% (fifty percent) or more, as Prof Nanchahal elects, in shares of the Company's common stock, at a share price of \$3.00 per share, or the share price on the date of the grant, whichever is lower, with the remainder paid in GBP. Bonus 2 shall be deemed earned and payable upon the Company raising a minimum of \$15 million in additional funding, through the sale of debt or equity, after December 1, 2020 (the "Vesting Date") and shall not be accrued, due or payable prior to such Vesting Date. Bonus 2 shall be payable by the Company within 30 calendar days of the Vesting Date. Finally, Prof Nanchahal shall receive another one-time bonus ("Bonus 3") of GBP 5,000 (approximately \$7,000) on enrollment of the first patient to the phase 2 frozen shoulder trial, and another one-time bonus ("Bonus 4") of GBP 5,000 (approximately \$7,000) for enrollment of the first patient to the phase 2 delirium/POCD trial. On March 30, 2021, the Company issued Prof Nanchahal 100,699 shares of Company common stock in lieu of GBP 217,337 and on April 15, 2021, the Company issued Prof Nanchahal 37,715 shares of Company common stock in lieu of GBP 82,588. The Company also waived the requirement for the Company having to raise \$15 million in order for Prof Nanchahal to agree to receive an aggregate of GBP 300,000 via the issuance of shares. Prof Nanchahal agreed that the remaining GBP 134,673 that is due pursuant to Bonus 2 shall be paid after the Company has raised a minimum of \$15 million in additional funding.

Notwithstanding the above, the board of directors or Compensation Committee of the Company may grant Prof Nanchahal additional bonuses from time to time in their discretion, in cash, stock or options.

The Consulting Agreement has an initial term of three years, and renews thereafter for additional three-year terms, until terminated as provided in the agreement. The Consulting Agreement can be terminated by either party with 12 months prior written notice (provided the Company's right to terminate the agreement may only be exercised if Prof Nanchahal fails to perform his required duties under the Consulting Agreement), or by the Company immediately if (a) Prof Nanchahal fails or neglects efficiently and diligently to perform the Services or is guilty of any breach of its or his obligations under the agreement (including any consent granted under it); (b) Prof Nanchahal is guilty of any fraud or dishonesty or acts in a manner (whether in the performance of the Services or otherwise) which, in the reasonable opinion of the Company, has brought or is likely to bring Prof Nanchahal, the Company or any of its affiliates into disrepute or is convicted of an arrestable offence (other than a road traffic offence for which a non-custodial penalty is imposed); or (c) Prof Nanchahal becomes bankrupt or makes any arrangement or composition with his creditors. If the Consulting Agreement is terminated by the Company for any reason other than cause, Prof Nanchahal is entitled to a lump sum payment of 12 months of his fee as at the date of termination.

The Consulting Agreement includes a 12 month non-compete and non-solicitation obligation of Prof Nanchahal, preventing him from competing against the Company in any part of any country in which he was actively engaged in the Company's business, subject to certain exceptions, including research conducted at the University of Oxford. The Consulting Agreement also includes customary confidentiality and assignment of inventions provisions, in each case subject to the Company's previously existing agreements with various universities, including the University of Oxford, where Prof Nanchahal serves as a Professor of Hand, Plastic and Reconstructive Surgery.

Intellectual Property

Our success depends in significant part on our ability to protect the proprietary elements of our product candidates, technology and know-how, to operate without infringing on the proprietary rights of others, and to defend challenges and oppositions from others and prevent others from infringing on our proprietary rights. We have sought, and will continue to seek, patent protection in the U.S., UK, Europe and other countries for our proprietary technologies. Our intellectual property portfolio as of September 30, 2019, includes fifteen patent families with issued and/or pending claims, pharmaceutical formulations, drug delivery and the therapeutic uses of SCAs, as well as know-how and trade secrets.

Within the U.S., we have licensed six issued patents and thirteen pending patent applications under active prosecution. There are an additional eight issued patents outside of the U.S. Our policy is to seek patent protection for the technology, inventions and improvements that we consider important to the development of our business, but only in those cases where we believe that the costs of obtaining patent protection is justified by the commercial potential of the technology, and typically only in those jurisdictions that we believe present significant commercial opportunities. We also rely on trademarks, trade secrets, know-how and continuing innovation to develop and maintain our competitive position.

The term of individual patents depends upon the countries in which they are obtained. In most countries in which we have filed, the patent term is 20 years from the earliest date of filing a non-provisional patent application. In the U.S., a patent's term may be lengthened by patent term adjustment, which compensates a patentee for administrative delays by the U.S. Patent and Trademark Office ("USPTO"), in granting a patent, or may be shortened if a patent is terminally disclaimed over another patent.

The term of a patent that covers an FDA-approved drug may also be eligible for extension, which permits term restoration as compensation for the term lost during the FDA regulatory review process. The Drug Price Competition and Patent Term Restoration Act of 1984 (the Hatch-Waxman Act) permits an extension of up to five years beyond the expiration of the patent. The length of the patent term extension is related to the length of time the drug is under regulatory review. Extensions cannot extend the remaining term of a patent beyond 14 years from the date of product approval and only one patent applicable to an approved drug may be extended. Similar provisions to extend the term of a patent that covers an approved drug are available in Europe and other non-U.S. jurisdictions.

To protect our rights to any of our issued patents and proprietary information, we may need to litigate against infringing third parties, avail ourselves of the courts or participate in hearings to determine the scope and validity of those patents or other proprietary rights.

We also rely on trade secret protection for our confidential and proprietary information. Our policy requires our employees, consultants, outside scientific collaborators, sponsored researchers and other advisors to execute confidentiality agreements upon the commencement of employment or consulting relationships with us.

From time to time, in the normal course of our operations, we will be a party to litigation and other dispute matters and claims relating to intellectual property.

180LS' Research, Development and License Agreements

180LS has entered into research and licensing agreements with various parties, including the Hebrew University of Jerusalem and Oxford. For information regarding these agreements, see "Material Agreements", above.

Competition

Below is a description of the competitive environment of each of our product candidate development platforms and potential product candidates.

Dupuytren's disease

Our treatment is for early stage Dupuytren's disease, for which there is no approved treatment. Existing treatments focus on late stage Dupuytren's disease, when the fingers are irreversibly curled into the palm. Surgery remains the typical standard treatment but the relatively long post-operative rehabilitation has driven the reach for less invasive techniques. Xiaflex, a drug developed by Auxilium, has shown effective in treating patients with contractures although many patients experience relatively mild side effects. An alternative approach is disruption of the late stage cords with a needle and data from a comparative clinical trial published in the Journal of Bone and Joint Surgery (American) in 2018 showed similar recurrence rates between collagenase and percutaneous needle fasciotomy at 2 years. A clinical trial funded by the National Institute for Health Research Health Technology Assessment Programme (UK) is currently underway in the UK, comparing the cost efficacy of surgery for Dupuytren's disease with a collagenase injection, which softens the fibrous tissue. The aims of the study are to determine (i) whether collagenase injections are as effective and as safe as surgery for treating this condition and (ii) the costs of both treatments.

SCAs

Despite roughly 3,000 pharmaceutical and biotechnology companies globally, only a handful of companies are actively developing synthetic cannabinoids for human and veterinary health. Presently, most of the focus of these companies is on pain management, multiple sclerosis and epileptic-seizure disorders, and most of these companies are using natural plant products.

We expect that the market for cannabinoid therapeutics will also grow significantly in the coming years due to increasing awareness of the potential benefits that cannabinoid products may provide over existing therapies. Interest in cannabinoid therapeutics has increased over the past several years as some pre-clinical and clinical data has emerged highlighting the potential efficacy and safety benefits of cannabinoid and synthetic cannabinoid therapeutics. Pharmaceutical companies that have publicized their engagement in testing cannabinoid and synthetic cannabinoid therapeutics include Zynerba, Skye Bioscience, IntelGenx, Ananda Scientific, InMed Pharmaceuticals, GW Pharmaceuticals PLC (acquired by Jazz Pharmaceuticals), Tetra Bio-Pharma, and GB Sciences.

Multiple companies are working in the cannabis therapeutic area and are pursuing regulatory approval for their product candidates. For example, GW Pharmaceuticals PLC, which markets Sativex, a botanical cannabinoid oral mucosal for the treatment of spasticity due to multiple sclerosis is seeking FDA approval in the U.S., and Epidiolex, a liquid formulation of highly purified cannabidiol extract, which was recently approved as a treatment for Dravet's Syndrome, Lennox Gastaut Syndrome, and various childhood epilepsy syndromes. Skye Bioscience, Inc. is focused on the discovery, development and commercialization of synthetic cannabinoid derived therapeutics to target glaucoma. Corbus Pharmaceuticals Holdings, Inc.'s lead drug candidate, lenabasum, is a novel, synthetic, oral, cannabinoid (CB2 agonist) designed to treat four serious and rare chronic inflammatory diseases (systemic sclerosis ("SSc"), dermatomyositis ("DM"), cystic fibrosis ("CF") and systemic lupus erythematosus), and the FDA has granted lenabasum Orphan Drug Designation as well as Fast Track Status for SSc and CF, and Orphan Drug Designation for DM. Zynerba Pharmaceuticals focuses on pharmaceutically-produced transdermal cannabinoid therapies for rare and near-rare neuropsychiatric disorders and is currently evaluating ZygelTM, a patent-protected transdermal CBD gel for the treatment of Fragile X syndrome, for which it filed an NDA with the FDA, developmental and epileptic encephalopathies and Autism Spectrum Disorder.

α 7nAChR

Competition to the acetylcholine receptor program is diverse, ranging from a small biotechnology company, Attenua, who is using an α 7nAChR agonist, bradanicline, in Phase 2 clinical trials for chronic cough to electroceutical companies. The latter group of companies is very competitive, all of whom are developing devices to stimulate the vagus nerve as a therapy for inflammation. For example, Endonovo Therapeutics has developed a non-invasive electroceutical device using pulsed short-wave radiofrequency at 27.12 MHz that has been FDA-cleared and CE Marked for the palliative treatment of soft tissue injuries and post-operative pain and edema, and has Centers for Medicare and Medicaid Services (formerly the Health Care Financing Administration) ("CMS") national coverage for the treatment of chronic wounds. Additionally, SetPoint Medical Corp is using vagal nerve stimulation for IBD and RA.

The electroceutical companies can be viewed as competition, or a vast proof-of-concept. Because in many respects, the α 7nAChR program can be viewed as a chemical stimulation of the vagus nerve, and each of the indications benefiting from electrical stimulation, should be amenable to chemical stimulation.

Lastly, each of the large pharmaceutical companies that initially developed α 7nAChR agonists could revitalize their programs and use their drugs in clinical trials for inflammatory indications.

Government Regulation

We have obtained regulatory approvals from the UK Medicines and Healthcare Products Regulatory Agency (MHRA) and the Dutch Centrale Commissie Mensgebonden Onderzoek (CCMO), as well as from the relevant accredited ethics committees, in order to perform clinical trials in the UK and The Netherlands solely for indications under the anti-TNF platform. We have not held any meetings with, and no applications or requests for approval have been submitted to, the FDA for any indications or products under any of our product development platforms at this time.

FDA Approval Process

In the U.S., pharmaceutical products are subject to extensive regulation by the FDA. The U.S. Federal Food, Drug, and Cosmetic Act (the “FDC Act”), and other federal and state statutes and regulations, govern, among other things, the research, development, testing, manufacture, storage, recordkeeping, approval, labeling, promotion and marketing, distribution, post-approval monitoring and reporting, sampling, and import and export of pharmaceutical products. Failure to comply with applicable U.S. requirements may subject a company to a variety of administrative or judicial sanctions, such as imposition of clinical holds, FDA refusal to approve pending NDAs or supplements to approved NDAs, withdrawal of approvals, warning letters, product recalls, product seizures, total or partial suspension of production or distribution, injunctions, fines, civil penalties and criminal prosecution.

Pharmaceutical product candidate development in the U.S. typically involves pre-clinical laboratory and animal tests, the submission to the FDA of an IND, which must become effective before clinical testing may commence. For commercial approval, the sponsor must submit adequate tests by all methods reasonably applicable to show that the drug is safe for use under the conditions prescribed, recommended or suggested in the proposed labeling. The sponsor must also submit substantial evidence, generally consisting of adequate, well-controlled clinical trials to establish that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended or suggested in the proposed labeling. Satisfaction of FDA pre-market approval requirements typically takes many years and the actual time required may vary substantially based upon the type, complexity and novelty of the product candidate or disease.

Pre-clinical tests include laboratory evaluation of product candidate chemistry, formulation and toxicity, as well as animal trials to assess the characteristics and potential safety and efficacy of the product candidate. The conduct of the pre-clinical tests must comply with federal regulations and requirements, including FDA’s GLP regulations and the U.S. Department of Agriculture’s regulations implementing the Animal Welfare Act of 1996. The results of pre-clinical testing are submitted to the FDA as part of an IND along with other information, including information about product candidate chemistry, manufacturing and controls, and a proposed clinical trial protocol. Long-term pre-clinical tests, such as animal tests of reproductive toxicity and carcinogenicity, may continue after the IND is submitted.

A 30-day waiting period after the submission of each IND is required prior to the commencement of clinical testing in humans. If the FDA has not imposed a clinical hold on the IND or otherwise commented or questioned the IND within this 30-day period, the clinical trial proposed in the IND may begin.

Clinical trials involve the administration of the investigational new drug to healthy volunteers or patients under the supervision of a qualified investigator. Clinical trials must be conducted: (i) in compliance with GCP, an international standard and U.S. legal requirement meant to protect the rights and health of patients and to define the roles of clinical trial sponsors, administrators and monitors, (ii) in compliance with other federal regulations, and (iii) under protocols detailing the objectives of the trial, the parameters to be used in monitoring safety and the effectiveness criteria to be evaluated. Each protocol involving testing on U.S. patients and subsequent protocol amendments must be submitted to the FDA as part of the IND.

The FDA may order the temporary, or permanent, discontinuation of a clinical trial at any time or impose other sanctions if it believes that the clinical trial either is not being conducted in accordance with FDA requirements or presents an unacceptable risk to the clinical trial patients. The trial protocol and informed consent information for patients in clinical trials must also be submitted to an Institutional Review Board (“IRB”), for approval. An IRB may also prevent a clinical trial from beginning or require the clinical trial at the site to be halted, either temporarily or permanently, for failure to comply with the IRB’s requirements or may impose other conditions.

Clinical trials to support NDAs for marketing approval are typically conducted in three sequential phases, but the phases may overlap or otherwise vary in particular circumstances. In Phase 1, the initial introduction of the drug into healthy human subjects or patients, the drug is tested to assess metabolism, pharmacokinetics, pharmacological actions, side effects associated with increasing doses and, if possible, early evidence on effectiveness. Phase 2 usually involves trials in a limited patient population to determine the effectiveness of the drug for a particular indication, dosage tolerance and optimum dosage, and to identify common adverse effects and safety risks. If a compound demonstrates evidence of effectiveness and an acceptable safety profile in Phase 2 evaluations, Phase 3 trials are undertaken to obtain the additional information about clinical efficacy and safety in a larger number of patients, typically at geographically dispersed clinical trial sites, to permit the FDA to evaluate the overall benefit-risk relationship of the drug and to provide adequate information for the labeling of the drug. In most cases, the FDA requires two adequate and well-controlled Phase 3 clinical trials to demonstrate the efficacy of the drug. The FDA may, however, determine that a single Phase 3 trial with other confirmatory evidence may be sufficient in some instances. In some cases, the FDA may require post-market studies, known as Phase 4 studies, to be conducted as a condition of approval in order to gather additional information on the drug's effect in various populations and any side effects associated with long-term use. Depending on the risks posed by the drugs, other post-market requirements may be imposed.

After completion of the required clinical testing, a New Drug Application (“NDA”) is prepared and submitted to the FDA. The FDA approval of the NDA is required before marketing of the product candidate may begin in the U.S. The NDA must include the results of all pre-clinical, clinical, and other testing and a compilation of data relating to the product candidate’s pharmacology, chemistry, manufacture, and controls. The cost of preparing and submitting an NDA is substantial. Under federal law, the submission of most NDAs is also subject to an application user fee, which, for the year ended December 31, 2020, was in the amount of approximately \$2.9 million.

The FDA has 60 days from its receipt of an NDA to determine whether the application will be accepted for filing based on the agency’s threshold determination that it is sufficiently complete to permit substantive review. Once the submission is accepted for filing, the FDA begins an in-depth review. Under the Prescription Drug User Fee Act, the FDA has agreed to certain performance goals in the review of NDAs. FDA’s current performance goals call for FDA to complete review of 90 percent of standard (non-priority) NDAs within 10 months of receipt and within six months for priority NDAs, but two additional months are added to standard and priority NDAs for a new molecular entity. A drug is eligible for priority review if it addresses an unmet medical need in a serious or life-threatening disease or condition. The review process for both standard and priority review may be extended by FDA for three additional months to consider certain late-submitted information, or information intended to clarify information already provided in the submission. These timelines are not legally binding on the FDA.

The FDA may also refer applications for novel drug products, or drug products that present difficult questions of safety or efficacy, to an advisory committee, which is typically a panel that includes clinicians and other experts, for review, evaluation and a recommendation as to whether the application should be approved. The FDA is not bound by the recommendation of an advisory committee, but it generally follows such recommendations. Before approving an NDA, the FDA will typically inspect one or more clinical sites to assure compliance with GCP.

Additionally, the FDA will inspect the facility or the facilities at which the drug is manufactured. The FDA will not approve the product candidate unless compliance with Good Manufacturing Practice regulations (“GMPs”), is satisfactory and the NDA contains data that provide substantial evidence that the drug is safe and effective in the indication studied.

After the FDA evaluates the NDA and the manufacturing facilities, the FDA issues either an approval letter or a complete response letter. A complete response letter generally outlines the deficiencies in the submission and may require substantial additional testing, or information, in order for the FDA to reconsider the application. If, or when, those deficiencies have been addressed to the FDA’s satisfaction in a resubmission of the NDA, the FDA will issue an approval letter. The FDA has committed to reviewing 90 percent of resubmissions within two or six months depending on the type of information included. Notwithstanding the submission of any requested additional information, the FDA ultimately may decide that the application does not satisfy the regulatory criteria for approval.

An approval letter authorizes commercial marketing of the drug with specific prescribing information for specific indications. As a condition of NDA approval, the FDA may require a Risk Evaluation and Mitigation Strategy (“REMS”), to help ensure that the benefits of the drug outweigh the potential risks. REMS can include medication guides, communication plans for health care professionals, and Elements to Assure Safe Use (ETASU). ETASU can include, but are not limited to, special training or certification for prescribing or dispensing, dispensing only under certain circumstances, special monitoring, and the use of patient registries. The requirement for a REMS can materially affect the potential market and profitability of the drug. Moreover, product candidate approval may require substantial post approval testing and surveillance to monitor the drug’s safety or efficacy. Once granted, product candidate approvals may be withdrawn if compliance with regulatory standards is not maintained or problems are identified following initial marketing.

Disclosure of Clinical Trial Information

Sponsors of clinical trials of certain FDA-regulated products, including prescription drugs, are required to register and disclose certain clinical trial information on a public website maintained by the U.S. National Institutes of Health. Information related to the product candidate, patient population, phase of investigation, study sites and investigator, and other aspects of the clinical trial is made public as part of the registration. Sponsors are also obligated to disclose the results of these trials after completion. The deadline for submitting the results of these trials can be extended for up to two years if the sponsor certifies that it is seeking approval of an unapproved product or that it will file an application for approval of a new indication for an approved product within one year. Competitors may use the publicly available information to gain knowledge regarding the design and progress of our development programs.

Fast Track Designation and Accelerated Approval

If our drug candidate meets the requirements of the FDA's fast track program, we would seek to have our drug candidate expedited through this program. The FDA has programs to facilitate the development, and expedite the review, of drugs that are intended for the treatment of a serious or life-threatening disease or condition for which there is no effective treatment and which demonstrate the potential to address unmet medical needs for the condition. Under the fast-track program, the sponsor of a new drug candidate may request that FDA designate the drug candidate for a specific indication as a fast track drug concurrent with, or after, the filing of the IND for the drug candidate. FDA must determine if the drug candidate qualifies for fast track designation within 60 days of receipt of the sponsor's request. In addition to other benefits such as the ability to engage in more frequent interactions with FDA, FDA may initiate review of sections of a fast track drug's NDA before the application is complete. This rolling review is available if the applicant provides, and FDA approves, a schedule for the submission of the remaining information and the applicant pays applicable user fees. However, FDA's time period goal for reviewing an application does not begin until the last section of the NDA is submitted. Additionally, the fast track designation may be withdrawn by FDA if FDA believes that the designation is no longer supported by data emerging in the clinical trial process.

Under the FDA's accelerated approval regulations, FDA may approve a drug for a serious or life-threatening illness that provides meaningful therapeutic benefit to patients over existing treatments based upon a surrogate endpoint that is reasonably likely to predict clinical benefit, or on a clinical endpoint that can be measured earlier than irreversible morbidity or mortality, that is reasonably likely to predict an effect on irreversible morbidity or mortality or other clinical benefit, taking into account the severity, rarity or prevalence of the condition and the availability or lack of alternative treatments.

In clinical trials, a surrogate endpoint is a measurement of laboratory or clinical signs of a disease or condition that substitutes for a direct measurement of how a patient feels, functions or survives. Surrogate endpoints can often be measured more easily or more rapidly than clinical endpoints. A drug candidate approved on this basis is subject to rigorous post-marketing compliance requirements, including the completion of Phase 4 or post-approval clinical trials to confirm clinical benefit. Failure to conduct required post-approval studies, or confirm a clinical benefit during post-marketing studies, will allow FDA to withdraw the drug from the market on an expedited basis. Unless otherwise informed by the FDA, for an accelerated approval product an applicant must submit to the FDA for consideration during the preapproval review period copies of all promotional materials, including promotional labeling as well as advertisements, intended for dissemination or publication within 120 days following marketing approval. After 120 days following marketing approval, unless otherwise informed by the FDA, the applicant must submit promotional materials at least 30 days prior to the intended time of initial dissemination of the labeling or initial publication of the advertisement.

Breakthrough Therapy Designation

As with the FDA's fast track program, if our drug candidate meets the requirements to receive the FDA's Breakthrough Therapy designation, we would seek to have our drug candidate expedited through this program. The FDA's Breakthrough Therapy designation program is intended to expedite the development and review of products that treat serious or life-threatening diseases or conditions. A Breakthrough Therapy is defined, under the Food and Drug Administration Safety and Innovation Act, as a drug that is intended, alone or in combination with one or more other drugs, to treat a serious or life-threatening disease or condition, and preliminary clinical evidence indicates that the drug may demonstrate substantial improvement over existing therapies on one or more clinically significant endpoints, such as substantial treatment effects observed early in clinical development. The designation includes all of the features of fast track designation, as well as more intensive FDA interaction and guidance. The Breakthrough Therapy designation is a distinct status from both accelerated approval and priority review, but these can also be granted to the same product candidate if the relevant criteria are met. The FDA must take certain actions, such as holding timely meetings and providing advice, intended to expedite the development and review of an application for approval of a breakthrough therapy. All requests for breakthrough therapy designation will be reviewed within 60 days of receipt, and FDA will either grant or deny the request.

Fast track designation, accelerated approval, priority review, and Breakthrough Therapy designation do not change the standards for approval but may expedite the development or approval process. Even if the FDA grants one of these designations, the FDA may later decide that the drug products no longer meet the conditions for qualification.

The U.S. Drug Price Competition and Patent Term Restoration Act of 1984 (the Hatch-Waxman Act)

Orange Book Listing

In seeking approval for a drug through an NDA, applicants are required to list with the FDA each patent whose claims cover the applicant's product candidate or a claimed method of use of the product candidate. Upon approval of a drug, each of the eligible patents listed in the application for the drug is then published in the FDA's Approved Drug Products with Therapeutic Equivalence Evaluations, commonly known as the Orange Book. Drugs listed in the Orange Book must, in turn, be the subject of a special certification by the filer of an abbreviated new drug application ("ANDA"), for a generic version of the drug, or by the applicant of a hybrid application known as a 505(b)(2) application. An ANDA provides for marketing of a drug product candidate that has the same active ingredient(s) in the same strengths and dosage form as the reference listed innovator drug and has been shown to be bioequivalent to the reference listed drug. Other than the requirement for bioequivalence testing (absent a waiver), ANDA applicants are not required to conduct, or submit results of, pre-clinical or clinical tests to prove the safety or effectiveness of their drug product candidate. Drugs approved in this way are commonly referred to as "generic equivalents" to the listed drug, are considered therapeutically equivalent to the listed drug, and can often be substituted by pharmacists under prescriptions written for the original listed drug.

The ANDA applicant is required to certify to the FDA concerning any patents listed for the approved product candidate in the FDA's Orange Book. Specifically, the applicant must certify that: (i) the required patent information has not been filed; (ii) the listed patent has expired; (iii) the listed patent has not expired, but will expire on a particular date and approval is sought after patent expiration; or (iv) the listed patent is invalid or will not be infringed by the new product candidate. The ANDA applicant may also elect to submit a "section viii statement", certifying that its proposed ANDA labeling does not contain (or carves out) any language regarding the patented method-of-use, rather than certify to a listed method-of-use patent.

If the applicant does not challenge the listed patents, the ANDA application will not be approved until all the listed patents claiming the referenced product have expired.

A certification that the new product candidate will not infringe the already approved product candidate's listed patents, or that such patents are invalid or unenforceable, is called a Paragraph IV certification. If the ANDA applicant has provided a Paragraph IV certification to the FDA, the applicant must also send notice of the Paragraph IV certification to the NDA and patent holders once the ANDA has been accepted for filing by the FDA. The NDA and patent holders may then initiate a patent infringement lawsuit in response to the notice of the Paragraph IV certification. The filing of a patent infringement lawsuit within 45 days of the receipt of notice of a Paragraph IV certification automatically prevents the FDA from approving the ANDA until the earlier of 30 months, expiration of the patent, settlement of the lawsuit, a decision in the infringement case that is favorable to the ANDA applicant, or some other order of the court.

Competitors may also seek to market versions of our drug products via a section 505(b)(2) application, which is a type of somewhat abbreviated NDA. NDA Section 505(b)(2) applications may be submitted for drug products that represent a modification, such as a new indication or new dosage form, of a previously approved drug. Section 505(b)(2) applications may rely on the FDA's previous findings for the safety and effectiveness of the previously approved drug in addition to information obtained by the 505(b)(2) applicant to support the modification of the previously approved drug. Preparing Section 505(b)(2) applications may be less costly and time-consuming than preparing an NDA based entirely on new data and information. Section 505(b)(2) applications are subject to the same patent certification procedures as an ANDA.

Exclusivity

Upon NDA approval of a new chemical entity ("NCE"), which is a drug that contains no active moiety that has been approved by the FDA in any other NDA, that drug receives five years of marketing exclusivity during which time the FDA cannot receive any ANDA or 505(b)(2) application seeking approval of a drug that references a version of the NCE drug. Certain changes to a drug, such as the addition of a new indication to the package insert, are associated with a three-year period of exclusivity during which the FDA cannot approve an ANDA or 505(b)(2) application that includes the change.

An ANDA or 505(b)(2) application may be submitted one year before NCE exclusivity expires if a Paragraph IV certification is filed. If there is no listed patent in the Orange Book, there may not be a Paragraph IV certification and thus no ANDA or 505(b)(2) may be filed before the expiration of the exclusivity period.

For a botanical drug, FDA may determine that the active moiety is one or more of the principle components or the complex mixture as a whole. This determination would affect the utility of any five-year exclusivity as well as the ability of any potential generic competitor to demonstrate that it is the same drug as the original botanical drug.

Five-year and three-year exclusivities do not preclude FDA approval of a 505(b)(1) application for a version of the drug during the period of exclusivity, provided that the 505(b)(1) conducts or obtains a right of reference to all of the pre-clinical studies and adequate and well controlled clinical trials necessary to demonstrate safety and effectiveness.

Patent Term Extension

After NDA approval, owners of relevant drug patents may apply for up to a five-year patent extension. The allowable patent term extension is calculated as half of the drug's testing phase — the time between IND submission and NDA submission — and all of the review phase — the time between NDA submission and approval up to a maximum of five years. The time can be shortened if FDA determines that the applicant did not pursue approval with due diligence. The total patent term after the extension may not exceed 14 years.

For patents that might expire during the application phase, the patent owner may request an interim patent extension. An interim patent extension increases the patent term by one year and may be renewed up to four times. For each interim patent extension granted, the post-approval patent extension is reduced by one year. The director of the United States Patent and Trademark Office (USPTO) must determine that approval of the drug covered by the patent for which a patent extension is being sought is likely. Interim patent extensions are not available for a drug for which an NDA has not been submitted.

Advertising and Promotion

Once an NDA is approved, a product candidate will be subject to certain post-approval requirements. For instance, FDA closely regulates the post-approval marketing and promotion of drugs, including standards and regulations for direct-to-consumer advertising, off-label promotion, industry-sponsored scientific and educational activities and promotional activities involving the internet.

Drugs may be marketed only for the approved indications and in accordance with the provisions of the approved labeling.

Post-Approval Changes

Changes to some of the conditions established in an approved application, including changes in indications, labeling, or manufacturing processes or facilities, require submission and FDA approval of a new NDA or NDA supplement before the change can be implemented. An NDA supplement for a new indication typically requires clinical data similar to that in the original application, and the FDA uses the same procedures and actions in reviewing NDA supplements as it does in reviewing NDAs.

Adverse Event Reporting and GMP Compliance

Adverse event reporting on an expedited basis and submission of periodic adverse event reports is required following FDA approval of an NDA. The FDA also may require post-marketing testing, known as Phase 4 testing, REMS and surveillance to monitor the effects of an approved product, or the FDA may place conditions on an approval that could restrict the distribution or use of the product. In addition, quality-control, drug manufacture, packaging, and labeling procedures must continue to conform GMPs after approval. Drug manufacturers and certain of their subcontractors are required to register their establishments with FDA and certain state agencies. Registration with the FDA subjects entities to periodic unannounced inspections by the FDA, during which the agency inspects manufacturing facilities to assess compliance with GMPs. Accordingly, manufacturers must continue to expend time, money and effort in the areas of production and quality control to maintain compliance with GMPs. Regulatory authorities may withdraw product approvals, issue warning letters, request product recalls or take other enforcement actions if a company fails to comply with regulatory standards, if it encounters problems following initial marketing or if previously unrecognized problems are subsequently discovered.

Special Protocol Assessment

A sponsor may reach an agreement with the FDA under the Special Protocol Assessment (“SPA”), process as to the required design and size of clinical trials intended to form the primary basis of an efficacy claim. According to its performance goals, the FDA has committed to evaluating 90 percent of the protocols within 45 days of its receipt of the requests to assess whether the proposed trial is adequate, and that evaluation may result in discussions and a request for additional information. An SPA request must be made before the proposed trial begins, and all open issues must be resolved before the trial begins. If a written agreement is reached, it will be documented and made part of the administrative record. Under the FDC Act and FDA guidance implementing the statutory requirement, an SPA is generally binding upon the FDA as to the design of the trial except in limited circumstances, such as if the FDA identifies a substantial scientific issue essential to determining safety or efficacy after the study begins, public health concerns emerge that were unrecognized at the time of the protocol assessment, the sponsor and FDA agree to the change in writing, or if the study sponsor fails to follow the protocol that was agreed upon with the FDA.

Controlled Substances

The CSA and the implementing regulations impose registration, security, recordkeeping and reporting, storage, manufacturing, distribution, dispensing, importation and other requirements on controlled substances under the oversight of the U.S. Drug Enforcement Administration (“DEA”). The DEA is the federal agency, responsible for regulating controlled substances, and requires those individuals or entities that manufacture, import, export, distribute, research, or dispense controlled substances to comply with the regulatory requirements in order to prevent the diversion and abuse of controlled substances.

The DEA regulates controlled substances as Schedule I, II, III, IV or V substances, depending on the substance’s medical effectiveness and abuse potential. Pharmaceutical products having a currently accepted medical use that are otherwise approved for marketing may be listed as Schedule II, III, IV or V substances, with Schedule II substances presenting the highest potential for abuse and physical or psychological dependence, and Schedule V substances presenting the lowest relative potential for abuse and dependence. The DEA has placed certain drug products that include cannabidiol, on Schedule V.

Following NDA approval of a drug containing a Schedule I controlled substance, that substance must be rescheduled as a Schedule II, III, IV or V substance before it can be marketed. The Improving Regulatory Transparency for New Medical Therapies Act enacted on November 25, 2015 and its implementing regulations has removed uncertainty associated with the timing of the DEA rescheduling process after NDA approval, under which a manufacturer may market its product no later than 90 days after the later of: (1) the date on which DEA receives from FDA the scientific and medical evaluation and scheduling recommendation; or (2) the date on which DEA receives from FDA notification that FDA has approved the drug. The Act also clarifies that the seven-year orphan exclusivity period begins with the approval of the NDA or DEA scheduling, whichever is later. This changes the previous situation whereby the orphan “clock” began to tick upon FDA’s NDA approval, even though the product could not be marketed until DEA scheduling was complete.

The CSA requires that facilities that manufacture, distribute, dispense, import or export any controlled substance must register annually with the DEA. Separate registrations are required for importation and manufacturing activities, and each registration authorizes the specific schedules of controlled substances the registrant may handle. Prior to issuance of a controlled substance registration, the DEA inspects all manufacturing facilities to review security, recordkeeping, reporting and handling of the controlled substances. The specific security requirements vary by, among other things, the type of business activity conducted, and the type, form, and quantity of controlled substances handled.

In addition, the states have their own distinct controlled substance laws and regulations, including licensure, distribution, dispensing, recordkeeping and reporting requirements for controlled substances. State boards of pharmacy or similar authorities regulate use of controlled substances in each state. Failure to comply with applicable requirements, such as the loss or diversion of controlled substances, can result in administrative fines, suspension or revocation of licenses, and civil and criminal liabilities.

UK/Europe/Rest of World Government Regulation

In addition to regulations in the U.S., we are and will be subject, either directly or through our distribution partners, to a variety of regulations in other jurisdictions governing, among other things, clinical trials and any commercial sales (including pricing and reimbursement) and distribution of our products, if approved.

Whether or not we obtain FDA approval for a product, we must obtain the requisite approvals from regulatory authorities in non-U.S. countries prior to the commencement of clinical trials or marketing of the product in those countries.

In the EU, medicinal products are subject to extensive pre- and post-marketing regulation by regulatory authorities at both the EU and national levels. Additional rules also apply at the national level to the manufacture, import, export, storage, distribution and sale of controlled substances. In many EU member states the regulatory authority responsible for medicinal products is also responsible for controlled substances. Responsibility is, however, split in some member states. Generally, any company manufacturing or distributing a medicinal product containing a controlled substance in the EU will need to hold a controlled substances license from the competent national authority and will be subject to specific record-keeping and security obligations. Separate import or export certificates are required for each shipment into or out of the member state.

In the UK, medicinal products are subject to extensive regulation by the Medicines and Healthcare products Regulatory Agency (“MHRA”), which is an executive agency, sponsored by the Department of Health and Social Care. MHRA regulates by ensuring that medicines, medical devices and blood components for transfusion meet applicable standards of safety, quality and efficacy, in addition to supporting innovation and research and development that is beneficial to public health.

Clinical Trials and Marketing Approval

Certain countries outside of the U.S. have a process that requires the submission of a clinical trial application much like an IND prior to the commencement of human clinical trials. In Europe, for example, a clinical trial application (“CTA”), must be submitted to the competent national health authority and to independent ethics committees in each country in which a company intends to conduct clinical trials. Once the CTA is approved in accordance with a country’s requirements and a company has received favorable ethics committee approval, clinical trial development may proceed in that country.

Requirements for the conduct of clinical trials in the UK and EU, including GCP, are implemented in the Clinical Trials Directive 2001/20/EC and the GCP Directive 2005/28/EC. Pursuant to Directive 2001/20/EC and Directive 2005/28/EC, as amended, a system for the approval of clinical trials in the EU has been implemented through national legislation of EU member states. Under this system, approval must be obtained from the relevant competent national authority of each EU member state in which a clinical trial is planned. A CTA must be submitted and supported by an investigational medicinal product dossier along with additional supporting information pursuant to Directive 2001/20/EC, Directive 2005/28/EC and other applicable guidance documents. Furthermore, a clinical trial may only commence after a competent ethics committee has issued a favorable opinion on the clinical trial application in the UK or the specific EU member state.

In April 2014, the Clinical Trials Regulation, Reg. (EU) No 536/2014 (the “New Regulation”) was adopted to replace the Clinical Trials Directive 2001/20/EC (the “Prior Directive”). To ensure that the rules for clinical trials are identical throughout the EU, new EU clinical trials legislation was passed as a “regulation” that is directly applicable to EU member states. A new, single CTA is planned for all EU member states, which will be submitted via an online portal to streamline the authorization process. Until the New Regulation is fully implemented, clinical trials will continue to be implemented under the Prior Directive.

The requirements and process governing the conduct of clinical trials, product licensing, pricing and reimbursement vary from country to country, even though there is already some degree of legal harmonization in the EU member states resulting from the national implementation of underlying EU legislation. In all cases, the clinical trials must be conducted in accordance with the International Conference on Harmonization guidelines on GCP and other applicable regulatory requirements.

To obtain regulatory approval to place a drug on the market in the UK or EU countries, we must submit a marketing authorization application. This application is similar to the NDA in the U.S., with the exception of, among other things, country-specific document requirements. All application procedures require an application in the common technical document, format, which includes the submission of detailed information about the manufacturing and quality of the product, and nonclinical and clinical trial information. Drugs can be authorized in the UK or EU by using (i) the centralized authorization procedure, (ii) the mutual recognition procedure, (iii) the decentralized procedure or (iv) national authorization procedures.

The European Commission created the centralized procedure for the approval of human drugs to facilitate marketing authorizations that are valid throughout the UK and EU and, by extension (after national implementing decisions) in Iceland, Liechtenstein and Norway, which, together with the EU member states, comprise the European Economic Area. Applicants file marketing authorization applications with the European Medicines Agency (EMA), where they are reviewed by a relevant scientific committee, in most cases the Committee for Medicinal Products for Human Use (“CHMP”). The European Medicines Agency (“EMA”) forwards CHMP opinions to the European Commission, which uses them as the basis for deciding whether to grant a marketing authorization. This procedure results in a single marketing authorization granted by the European Commission that is valid across the EU, as well as in Iceland, Liechtenstein and Norway. The centralized procedure is compulsory for human drugs that are: (i) derived from biotechnology processes, such as genetic engineering, (ii) contain a new active substance indicated for the treatment of certain diseases, such as HIV/AIDS, cancer, diabetes, neurodegenerative diseases, autoimmune and other immune dysfunctions and viral diseases, (iii) officially designated “orphan drugs” (drugs used for rare human diseases) and (iv) advanced-therapy medicines, such as gene-therapy, somatic cell-therapy or tissue-engineered medicines. The centralized procedure may at the voluntary request of the applicant also be used for human drugs that do not fall within the above-mentioned categories if the CHMP agrees that the human drug (a) contains a new active substance not yet approved on November 20, 2005; (b) constitutes a significant therapeutic, scientific or technical innovation or (c) authorization under the centralized procedure is in the interests of patients at the EU level.

Under the centralized procedure in the EU, the maximum time frame for the evaluation of a marketing authorization application by the EMA is 210 days (excluding clock stops, when additional written or oral information is to be provided by the applicant in response to questions asked by the CHMP), with adoption of the actual marketing authorization by the European Commission thereafter.

Accelerated evaluation might be granted by the CHMP in exceptional cases, when a medicinal product is expected to be of a major public health interest from the point of view of therapeutic innovation, defined by three cumulative criteria: the seriousness of the disease to be treated; the absence of an appropriate alternative therapeutic approach, and anticipation of exceptional high therapeutic benefit. In this circumstance, EMA ensures that the evaluation for the opinion of the CHMP is completed within 150 days and the opinion issued thereafter.

For those medicinal products for which the centralized procedure is not available, the applicant must submit marketing authorization applications to the national medicines regulators through one of three procedures: (i) the mutual recognition procedure (which must be used if the product has already been authorized in at least one other EU member state, and in which the EU member states are required to grant an authorization recognizing the existing authorization in the other EU member state, unless they identify a serious risk to public health), (ii) the decentralized procedure (in which applications are submitted simultaneously in two or more EU member states) or (iii) national authorization procedures (which results in a marketing authorization in a single EU member state).

Mutual Recognition Procedure

The mutual recognition procedure (“MRP”), for the approval of human drugs is an alternative approach to facilitate individual national marketing authorizations within the UK and EU. Basically, the MRP may be applied for all human drugs for which the centralized procedure is not obligatory. The MRP is applicable to the majority of conventional medicinal products, and must be used if the product has already been authorized in one or more member states.

The characteristic of the MRP is that the procedure builds on an already-existing marketing authorization in the UK or a member state of the EU that is used as a reference in order to obtain marketing authorizations in other EU member states. In the MRP, a marketing authorization for a drug already exists in one or more member states of the EU and subsequently marketing authorization applications are made in other EU member states by referring to the initial marketing authorization. The member state in which the marketing authorization was first granted will then act as the reference member state. The member states where the marketing authorization is subsequently applied for act as concerned member states. The concerned member states are required to grant an authorization recognizing the existing authorization in the reference member state, unless they identify a serious risk to public health.

The MRP is based on the principle of the mutual recognition by EU member states of their respective national marketing authorizations. Based on a marketing authorization in the reference member state, the applicant may apply for marketing authorizations in other member states. In such case, the reference member state shall update its existing assessment report about the drug in 90 days. After the assessment is completed, copies of the report are sent to all member states, together with the approved summary of product characteristics, labeling and package leaflet. The concerned member states then have 90 days to recognize the decision of the reference member state and the summary of product characteristics, labeling and package leaflet. National marketing authorizations shall be granted within 30 days after acknowledgement of the agreement.

Should any member state refuse to recognize the marketing authorization by the reference member state, on the grounds of potential serious risk to public health, the issue will be referred to a coordination group. Within a timeframe of 60 days, member states shall, within the coordination group, make all efforts to reach a consensus. If this fails, the procedure is submitted to an EMA scientific committee for arbitration. The opinion of this EMA Committee is then forwarded to the European Commission, for the start of the decision-making process. As in the centralized procedure, this process entails consulting various European Commission Directorates General and the Standing Committee on Human Medicinal Products.

Data Exclusivity

In the UK and EU, marketing authorization applications for generic medicinal products do not need to include the results of pre-clinical and clinical trials, but instead can refer to the data included in the marketing authorization of a reference product for which regulatory data exclusivity has expired. If a marketing authorization is granted for a medicinal product containing a new active substance, that product benefits from eight years of data exclusivity, during which generic marketing authorization applications referring to the data of that product may not be accepted by the regulatory authorities, and a further two years of market exclusivity, during which such generic products may not be placed on the market. The two-year period may be extended to three years if during the first eight years a new therapeutic indication with significant clinical benefit over existing therapies is approved.

Orphan Medicinal Products

The EMA's Committee for Orphan Medicinal Products ("COMP"), may recommend orphan medicinal product designation to promote the development of products that are intended for the diagnosis, prevention or treatment of life-threatening or chronically debilitating conditions affecting not more than five in 10,000 persons in the EU. Additionally, orphan designation is granted for products intended for the diagnosis, prevention or treatment of a life-threatening, seriously debilitating or serious and chronic condition and when, without incentives, it is unlikely that sales of the product in the UK and EU would be sufficient to justify the necessary investment in developing the medicinal product. The COMP may only recommend orphan medicinal product designation when the product in question offers a significant clinical benefit over existing approved products for the relevant indication. Following a positive opinion by the COMP, the European Commission generally grants orphan status within 30 days. When the draft decision of the European Commission is not aligned with the COMP opinion, the COMP will reassess orphan status in parallel with EMA review of a marketing authorization application and orphan status may be withdrawn at if the drug no longer fulfills the orphan criteria (for instance, because a new product was approved for the indication and no data is available to demonstrate a significant benefit over that new product). Orphan medicinal product designation entitles a party to financial incentives such as reduction of fees or fee waivers and ten years of market exclusivity is granted following marketing authorization. During this period, the competent authorities may not accept or approve any similar medicinal product for the same therapeutic indication, unless it offers a significant clinical benefit or if the holder of the marketing authorization for the original orphan drug is unable to supply sufficient quantities of the drug. This period may be reduced to six years if the orphan medicinal product designation criteria are no longer met, including where it is shown that the product is sufficiently profitable not to justify maintenance of market exclusivity.

Pediatric Development

In the EU and the UK, companies developing a new medicinal product must agree to a Pediatric Investigation Plan ("PIP"), with the EMA or the MHRA and must conduct pediatric clinical trials in accordance with that PIP unless a waiver applies, for example, because the relevant disease or condition occurs only in adults. The marketing authorization application for the product must include the results of pediatric clinical trials conducted in accordance with the PIP, unless a waiver applies, or a deferral has been granted, in which case the pediatric clinical trials must be completed at a later date. Products that are granted a marketing authorization on the basis of the pediatric clinical trials conducted in accordance with the PIP are eligible for a six-month extension of the protection under a supplementary protection certificate (if the product covered by it qualifies for one at the time of approval). This pediatric reward is subject to specific conditions and is not automatically available when data in compliance with the PIP are developed and submitted.

If we fail to comply with applicable foreign regulatory requirements, we may be subject to, among other things, fines, suspension of clinical trials, suspension or withdrawal of regulatory approvals, product recalls, seizure of products, operating restrictions and criminal prosecution.

In addition, most countries are parties to the Single Convention on Narcotic Drugs 1961 and the Convention on Psychotropic Substances 1971, which governs international trade and domestic control of narcotic substances, including cannabis extracts. Countries may interpret and implement their treaty obligations in a way that creates a legal obstacle to our obtaining marketing approval for our product candidates in those countries. These countries may not be willing or able to amend or otherwise modify their laws and regulations to permit our product candidates to be marketed, or achieving such amendments to the laws and regulations may take a prolonged period of time. In that case, we would be unable to market our products in those countries in the near future or perhaps at all.

In the UK, medicinal products are subject to extensive regulation by the Medicines and Healthcare products Regulatory Agency (“MHRA”), which is an executive agency, sponsored by the Department of Health and Social Care. MHRA regulates by ensuring that medicines, medical devices and blood components for transfusion meet applicable standards of safety, quality and efficacy, in addition to supporting innovation and research and development that is beneficial to public health.

Reimbursement

Sales of pharmaceutical products in the U.S. will depend, in part, on the extent to which the costs of the products will be covered by third-party payers, such as government health programs, and commercial insurance and managed health care organizations. These third-party payers are increasingly challenging the prices charged for medical products and services. Additionally, the containment of health care costs has become a priority of federal and state governments, and the prices of drugs have been a focus in this effort. The U.S. government, state legislatures and foreign governments have shown significant interest in implementing cost-containment programs, including price controls, utilization management and requirements for substitution of generic products. Adoption of price controls and cost-containment measures, and adoption of more restrictive policies in jurisdictions with existing controls and measures, could further limit our net revenue and results. If these third-party payers do not consider our products to be cost effective compared to other available therapies, they may not cover our products after approval as a benefit under their plans or, if they do, the level of payment may not be sufficient to allow us to sell our products on a profitable basis.

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (“MMA”), imposed requirements for the distribution and pricing of prescription drugs for Medicare beneficiaries and included a major expansion of the prescription drug benefit under Medicare Part D. Under Part D, Medicare beneficiaries may enroll in prescription drug plans offered by private entities that provide coverage of outpatient prescription drugs. Part D is available through both stand-alone prescription drug benefit plans and prescription drug coverage as a supplement to Medicare Advantage plans. Unlike Medicare Parts A and B, Part D coverage is not standardized. Part D prescription drug plan sponsors are not required to pay for all covered Part D drugs, and each drug plan can develop its own drug formulary that identifies which drugs it will cover and at what tier or level. However, Part D prescription drug formularies must include drugs within each therapeutic category and class of covered Part D drugs, though not necessarily all the drugs in each category or class. Any formulary used by a Part D prescription drug plan must be developed and reviewed by a pharmacy and therapeutic committee. Government payment for some of the costs of prescription drugs may increase demand for products for which we receive marketing approval. However, any negotiated prices for our products covered by a Part D prescription drug plan will likely be lower than the prices we might otherwise obtain. Moreover, while the MMA applies only to drug benefits for Medicare beneficiaries, private payers often follow Medicare coverage policy and payment limitations in setting their own payment rates. Any reduction in payment that results from the MMA may result in a similar reduction in payments from nongovernmental payers.

On February 17, 2009, President Obama signed into law The American Recovery and Reinvestment Act of 2009. This law provides funding for the federal government to compare the effectiveness of different treatments for the same illness. This research is overseen by the Department of Health and Human Services, the Agency for Healthcare Research and Quality and the National Institutes for Health, and periodic reports on the status of the research and related expenditures must be made to Congress. Although the results of the comparative effectiveness studies are not intended to mandate coverage policies for public or private payers, it is not clear how such a result could be avoided and what if any effect the research will have on the sales of our product candidates, if any such product or the condition that it is intended to treat is the subject of a study. It is also possible that comparative effectiveness research demonstrating benefits in a competitor’s product could adversely affect the sales of our product candidates. Decreases in third-party reimbursement for our product candidates or a decision by a third-party payer to not cover our product candidates could reduce physician usage of the product candidate and have a material adverse effect on our sales, results of operations and financial condition.

The Patient Protection and Affordable Care Act, as amended by the Health Care and Education Affordability Reconciliation Act of 2010 (collectively, the “ACA”) was enacted in March 2010. The ACA was enacted with the goal of expanding coverage for the uninsured while at the same time containing overall health care costs. With regard to pharmaceutical products, among other things, the ACA expanded and increased industry rebates for drugs covered under Medicaid programs and made changes to the coverage requirements under the Medicare D program. We still cannot fully predict the impact of the ACA on pharmaceutical companies as many of the ACA reforms require the promulgation of detailed regulations implementing the statutory provisions which has not yet been completed, and the Centers for Medicare & Medicaid Services has publicly announced that it is analyzing the ACA regulations and policies that have been issued to determine if changes should be made. In addition, although the U.S. Supreme Court has upheld the constitutionality of most of the ACA, some states have stated their intentions to not implement certain sections of the ACA and some members of Congress are still working to repeal the ACA. These challenges add to the uncertainty of the changes enacted as part of the ACA. In addition, the current legal challenges to the ACA, as well as Congressional efforts to repeal the ACA, add to the uncertainty of the legislative changes enacted as part of the ACA.

In addition, in some foreign countries, the proposed pricing for a drug must be approved before it may be lawfully marketed. The requirements governing drug pricing vary widely from country to country. For example, some EU jurisdictions operate positive and negative list systems under which products may only be marketed once a reimbursement price has been agreed. To obtain reimbursement or pricing approval, some of these countries may require the completion of clinical trials that compare the cost-effectiveness of a particular product candidate to currently available therapies. Other member states allow companies to fix their own prices for medicines but monitor and control company profits. Such differences in national pricing regimes may create price differentials between EU member states. There can be no assurance that any country that has price controls or reimbursement limitations for pharmaceutical products will allow favorable reimbursement and pricing arrangements for any of our products. Historically, products launched in the EU do not follow price structures of the U.S. In the EU, the downward pressure on healthcare costs in general, particularly prescription medicines, has become intense. As a result, barriers to entry of new products are becoming increasingly high and patients are unlikely to use a drug product that is not reimbursed by their government or other public or private payers.

Other Health Care Laws and Compliance Requirements

In the U.S., our activities are potentially subject to regulation by various federal, state and local authorities in addition to the FDA, including the CMS, other divisions of the U.S. Department of Health and Human Services (e.g., the Office of Inspector General), the U.S. Department of Justice and individual U.S. Attorney offices within the Department of Justice, and state and local governments. For example, sales, marketing and scientific/educational grant programs must comply with the anti-fraud and abuse provisions of the Social Security Act, the False Claims Act, the privacy provisions of the Health Insurance Portability and Accountability Act, and similar state laws, each as amended. Pricing and rebate programs must comply with the Medicaid rebate requirements of the Omnibus Budget Reconciliation Act of 1990 and the Veterans Health Care Act of 1992 (“VHCA”), each as amended. If products are made available to authorized users of the federal supply schedule, additional laws and requirements apply. Under the VHCA, drug companies are required to offer certain drugs at a reduced price to a number of federal agencies including the U.S. Department of Veteran Affairs and U.S. Department of Defense, the Public Health Service and certain private Public Health Service-designated entities in order to participate in other federal funding programs including Medicare and Medicaid. In addition, discounted prices must be offered for certain U.S. Department of Defense purchases for its TRICARE program via a rebate system. Participation under the VHCA requires submission of pricing data and calculation of discounts and rebates pursuant to complex statutory formulas, as well as the entry into government procurement contracts governed by the federal acquisition regulations.

In order to distribute products commercially, we must comply with state laws that require the registration of manufacturers and wholesale distributors of pharmaceutical products in a state, including, in certain states, manufacturers and distributors who ship products into the state, even if such manufacturers or distributors have no place of business within the state. Several states have enacted legislation requiring pharmaceutical companies to establish marketing compliance programs, file periodic reports with the state, make periodic public disclosures on sales and marketing activities or register their sales representatives. Other legislation has been enacted in certain states prohibiting certain other sales and marketing practices. All of our activities are potentially subject to federal and state consumer protection and unfair competition laws. Likewise, these activities are subject to authorization or license requirements, or other legal requirements, under EU or EU member states’ law, or the law of other countries where we operate or have products manufactured or distributed.

Cost of Compliance with Environmental Laws.

Our operations are subject to regulations under various federal, state, local and foreign laws concerning the environment, including laws addressing the discharge of pollutants into the air and water, the management and disposal of hazardous substances and wastes, and the cleanup of contaminated sites. We could incur substantial costs, including cleanup costs, fines and civil or criminal sanctions and third-party damage or personal injury claims, if in the future we were to violate or become liable under environmental laws. We are not aware of any costs or effects of our compliance with environmental laws.

Employees and Human Capital Management

As of July 2, 2021, we and our subsidiaries had six full-time employees. Two of these employees are located in the UK, and four are located in the U.S.

In addition, we employ a limited number of part-time employees on a temporary basis, as well as scientific advisors, consultants and service providers, mainly through academic institutions and contract research organizations.

We have never had a work stoppage and none of our employees are covered by collective bargaining agreements or represented by a labor union. We believe that we have good relationships with our employees.

Our human capital resources objectives include, as applicable, identifying, recruiting, retaining, incentivizing, and integrating our existing and new employees, advisors, and consultants. The principal purposes of our equity and cash incentive plans are to attract, retain and reward personnel through the granting of stock-based and cash-based compensation awards, in order to increase stockholder value and the success of our company by motivating such individuals to perform to the best of their abilities and achieve our objectives.

In response to the COVID-19 pandemic, we focused our health and safety efforts on protecting our employees and their families. We swiftly implemented changes that we determined were in the best interest of our employees and the communities in which we operate, and which are aligned with guidance from the Centers for Disease Control and Prevention and in compliance with state and local regulations. This includes having all of our employees work from home.

COVID-19

In December 2019, a novel strain of coronavirus, which causes the infectious disease known as COVID-19, was reported in Wuhan, China. The World Health Organization declared COVID-19 a “Public Health Emergency of International Concern” on January 30, 2020 and a global pandemic on March 11, 2020. In March and April, many U.S. states and foreign countries began issuing ‘stay-at-home’ orders.

Enrollment of patients in our clinical trials, maintaining patients in our ongoing clinical trials, doing follow up visits with recruited patients and collecting data have been, and may continue to be, delayed or limited as certain of our clinical trial sites limit their onsite staff or temporarily close as a result of the COVID-19 pandemic and ongoing government restrictions. In addition, patients may not be able or willing to visit clinical trial sites for dosing or data collection purposes due to limitations on travel and physical distancing imposed or recommended by federal or state governments or patients’ reluctance to visit the clinical trial sites during the pandemic. These factors resulting from the COVID-19 pandemic could delay or prevent the anticipated readouts from our clinical trials.

The pandemic is continuing and the full extent to which COVID-19 will ultimately impact us depends on future unknowable developments, including the duration and spread of the virus, the efficacy, availability and willingness of individuals to take vaccines, as well as potential new seasonal outbreaks.

We plan to continue to evaluate our business operations based on new information as it becomes available regarding the pandemic and will make changes that we consider necessary in light of any new developments.

Corporate History

Formation

We were formed as a blank check company organized under the laws of the State of Delaware on September 7, 2016. We were formed for the purpose of effecting a merger, capital stock exchange, stock purchase, asset acquisition or other similar business combination with one or more operating businesses. Since formation, we focused our efforts on acquiring an operating company in the healthcare and related wellness industry although our efforts in identifying a prospective target business were not limited to a particular industry.

Initial Public Offering

On June 7, 2017, pursuant to the Company's Initial Public Offering (the "IPO"), the Company sold 11,500,000 Units at a purchase price of \$10.00 per Unit, inclusive of 1,500,000 Units sold to the underwriters on June 23, 2017 upon the underwriters' election to fully exercise their over-allotment option, generating gross proceeds of \$115,000,000. Each "Unit" consisted of one share of the Company's common stock, one right to receive one-tenth of one share of the Company's common stock upon the consummation of a business combination ("Right"), and one redeemable warrant to purchase one-half of one share of the Company's common stock ("Warrant"). Each Warrant will entitle the holder to purchase one-half of one share of common stock at an exercise price of \$5.75 per half share (\$11.50 per whole share), subject to adjustment. No fractional shares will be issued upon exercise of the warrants. The Warrants became exercisable on the later of (i) 30 days after the completion of the initial business combination and (ii) 12 months from the closing of the Initial Public Offering, and expire five years after the completion of the Business Combination or earlier upon redemption or liquidation.

The Company may redeem the Warrants, in whole and not in part, at a price of \$0.01 per Warrant upon 30 days' notice ("30-day redemption period"), only in the event that the last sale price of the common stock equals or exceeds \$18.00 per share for any 20 trading days within a 30-trading day period ending on the third trading day prior to the date on which notice of redemption is given, provided there is an effective registration statement with respect to the shares of common stock underlying such Warrants and a current prospectus relating to those shares of common stock is available throughout the 30-day redemption period. If the Company calls the Warrants for redemption as described above, the Company's management will have the option to require all holders that wish to exercise Warrants to do so on a "cashless basis." In determining whether to require all holders to exercise their warrants on a "cashless basis," the management will consider, among other factors, the Company's cash position, the number of Warrants that are outstanding and the dilutive effect on the Company's stockholders of issuing the maximum number of shares of common stock issuable upon the exercise of the Warrants. Each holder of a Right received one-tenth (1/10) of one share of common stock upon consummation of the Business Combination. No fractional shares were issued upon exchange of the Rights.

Private Placement

Concurrent with the closing of the IPO, KBL IV Sponsor LLC (the "Sponsor") and the underwriters purchased an aggregate of 450,000 of unregistered Units ("Private Units") at \$10.00 per Unit, generating gross proceeds of \$4,500,000 in a private placement. In addition, on June 23, 2017, the Company consummated the sale of an additional 52,500 Private Units at a price of \$10.00 per Unit, which were purchased by the Sponsor and underwriters, generating gross proceeds of \$525,000. Of these, 377,500 Private Units were purchased by the Sponsor and 125,000 Private Units were purchased by the underwriters. The proceeds from the Private Units were added to the net proceeds from the IPO held in a Trust Account (the "Trust Account"). The Private Units (including their component securities) were not transferable, assignable or salable until 30 days after the completion of the Business Combination and the warrants included in the Private Units (the "Private Placement Warrants") will be non-redeemable so long as they are held by the Sponsor, the underwriters or their permitted transferees. If the Private Placement Warrants are held by someone other than the Sponsor, the underwriters or their permitted transferees, the Private Placement Warrants will be redeemable by the Company and exercisable by such holders on the same basis as the warrants included in the Units sold in the IPO. In addition, for as long as the Private Placement Warrants are held by the underwriters or its designees or affiliates, they may not be exercised after five years from the effective date of the registration statement related to the IPO. Otherwise, the Private Placement Warrants have terms and provisions that are identical to those of the warrants sold as part of the Units in the IPO and have no net cash settlement provisions.

Business Combination

On July 25, 2019, we entered into a Business Combination Agreement (as amended from time to time, the “Business Combination Agreement”), with KBL Merger Sub, Inc. (“Merger Sub”), 180 Life Corp. (f/k/a 180 Life Sciences Corp.) (“180”), Katexco Pharmaceuticals Corp. (“Katexco”), CannBioRex Pharmaceuticals Corp. (“CBR Pharma”), 180 Therapeutics L.P. (“180 LP” and together with Katexco and CBR Pharma, the “180 Subsidiaries” and, together with 180 Life Sciences Corp., the “180 Parties”), and Lawrence Pemble, in his capacity as representative of the stockholders of the 180 Parties (the “Stockholder Representative”). The business combination described in the Business Combination Agreement (the “Business Combination”), closed and became effective on November 6, 2020 (the “Closing”). Pursuant to the Business Combination Agreement, among other things, Merger Sub merged with and into 180, with 180 continuing as the surviving entity and a wholly-owned subsidiary of the Company (the “Merger”). In connection with, and prior to, the Closing, 180 Life Sciences Corp. filed a Certificate of Amendment of its Certificate of Incorporation in Delaware to change its name to 180 Life Corp., and we (which was known as of our entry into the Business Combination as KBL Merger Corp. IV, changed our name to 180 Life Sciences Corp.).

180 was incorporated in Delaware on January 28, 2019. Prior to the Closing of the Business Combination, 180 operated through three subsidiaries: 180 LP, a Delaware limited partnership formed on September 6, 2013; Katexco, a company incorporated in British Columbia, Canada on March 7, 2018; and CBR Pharma, a company incorporated in British Columbia, Canada on March 8, 2018.

In July 2019, 180 and each of 180 LP, Katexco and CBR Pharma completed a corporate restructuring, pursuant to which 180 LP, Katexco and CBR Pharma became wholly-owned subsidiaries of 180LS (the “Reorganization”). The corporate restructuring arrangements with respect to Katexco and CBR Pharma were completed under the *Business Corporations Act* (British Columbia).

On November 6, 2020 (the “Closing Date”), the Company consummated the Business Combination following a special meeting of stockholders held on November 5, 2020, where the stockholders of the Company considered and approved, among other matters, a proposal to adopt the Business Combination. Pursuant to the Business Combination Agreement, among other things, Merger Sub merged with and into 180, with 180 continuing as the surviving entity and a wholly-owned subsidiary of the Company. The Merger became effective on November 6, 2020 (such time, the “Effective Time”, and the closing of the Merger being referred to herein as the “Closing”). In connection with, and prior to, the Closing, 180 filed a Certificate of Amendment of its Certificate of Incorporation in Delaware to change its name to 180 Life Corp. and KBL Merger Corp. IV changed its name to 180 Life Sciences Corp.

At the Effective Time, each share of 180 common stock issued and outstanding prior to the Effective Time was automatically converted into the right to receive approximately 168,3784 shares of the common stock, par value \$0.0001 per share, of the Company (such shares of Common Stock issuable to the common stockholders of 180 pursuant to the Business Combination Agreement, the “Merger Consideration Shares”). An aggregate of 16,989,989 shares of common stock have been issued to date to the common stockholders of 180 as Merger Consideration Shares, including the Escrow Shares (as defined below). Also at the Effective Time, each share underlying the 180 preferred stock issued and outstanding prior to the Effective Time was converted into the right to receive one Class C Special Voting Share of the Company, or one Class K Special Voting Share of the Company, as applicable (such shares, the “Special Voting Shares”). The Special Voting Shares entitle the holder thereof to an aggregate number of votes, on any particular matter, proposition or question, equal to the number of Exchangeable Shares (as defined below) of each of CannBioRex Purchaseco ULC and Katexco Purchaseco ULC, Canadian subsidiaries of 180, respectively, that are outstanding from time to time.

As a result of the Merger, the existing exchangeable shares (collectively, the “Exchangeable Shares”) of CannBioRex Purchaseco ULC and/or Katexco Purchaseco ULC were adjusted in accordance with the share provisions in the articles of CannBioRex Purchaseco ULC or Katexco Purchaseco ULC, as applicable, governing the Exchangeable Shares such that they were multiplied by the exchange ratio for the Merger and became exchangeable into shares of Common Stock. The Exchangeable Shares entitle the holders to dividends and other rights that are substantially economically equivalent to those of holders of Common Stock, and holders of Exchangeable Shares have the right to vote at meetings of the stockholders of the Company. An aggregate of 510,011 shares of Common Stock are reserved for issuance to the holders of the Exchangeable Shares upon the exchange thereof.

Pursuant to the Business Combination Agreement, 1,499,999 of the Merger Consideration Shares (such shares, the “Escrow Shares”) were deposited into an escrow account (the “Escrow Account”) to serve as security for, and the exclusive source of payment of, the Company’s indemnity rights under the Business Combination Agreement, all of which will be released to the same stockholders 12 months following the Closing of the Business Combination.

As a result of the Business Combination, the former stockholders of 180 became the controlling stockholders of the Company and 180 became a wholly-owned subsidiary of the Company. The Business Combination was accounted for as a reverse merger, whereby 180 is considered the acquirer for accounting and financial reporting purposes.

In connection with the Closing, the Company withdrew \$9,006,493 of funds from the Trust Account (as defined below) to fund the redemptions of 816,461 shares.

The chart below shows our current organizational structure:

About Us

Our principal executive offices are located at 3000 El Camino Real, Bldg. 4, Suite 200, Palo Alto, CA 94306, and our telephone number is (678) 507-0669. We maintain a website at www.180lifesciences.com. We have not incorporated by reference into this Report the information in, or that can be accessed through, our website, and you should not consider it to be a part of this Report.

Jumpstart Our Business Startups Act

In April 2012, the Jumpstart Our Business Startups Act (“JOBS Act”) was enacted into law. The JOBS Act provides, among other things:

- Exemptions for “emerging growth companies” from certain financial disclosure and governance requirements for up to five years and provides a new form of financing to small companies;
- Amendments to certain provisions of the federal securities laws to simplify the sale of securities and increase the threshold number of record holders required to trigger the reporting requirements of the Exchange Act;
- Relaxation of the general solicitation and general advertising prohibition for Rule 506 offerings;
- Adoption of a new exemption for public offerings of securities in amounts not exceeding \$50 million; and
- Exemption from registration by a non-reporting company of offers and sales of securities of up to \$1,000,000 that comply with rules to be adopted by the SEC pursuant to Section 4(6) of the Securities Act and exemption of such sales from state law registration, documentation or offering requirements.

In general, under the JOBS Act a company is an “emerging growth company” if its initial public offering (“IPO”) of common equity securities was affected after December 8, 2011 and the company had less than \$1.07 billion of total annual gross revenues during its last completed fiscal year. A company will no longer qualify as an “emerging growth company” after the earliest of

- (i) the completion of the fiscal year in which the company has total annual gross revenues of \$1.07 billion or more;
- (ii) the completion of the fiscal year of the fifth anniversary of the company’s IPO;
- (iii) the company’s issuance of more than \$1 billion in nonconvertible debt in the prior three-year period, or
- (iv) the company becoming a “larger accelerated filer” as defined under the Exchange Act.

The JOBS Act provides additional new guidelines and exemptions for non-reporting companies and for non-public offerings. Those exemptions that impact the Company are discussed below.

Financial Disclosure. The financial disclosure in a registration statement filed by an “emerging growth company” pursuant to the Securities Act, will differ from registration statements filed by other companies as follows:

- (i) audited financial statements required for only two fiscal years (provided that “smaller reporting companies” such as the Company are only required to provide two years of financial statements);

- (ii) selected financial data required for only the fiscal years that were audited (provided that “smaller reporting companies” such as the Company are not required to provide selected financial data as required by Item 301 of Regulation S-K); and
- (iii) executive compensation only needs to be presented in the limited format now required for “smaller reporting companies”.

However, the requirements for financial disclosure provided by Regulation S-K promulgated by the Rules and Regulations of the SEC already provide certain of these exemptions for smaller reporting companies. The Company is a smaller reporting company. Currently a smaller reporting company is not required to file as part of its registration statement selected financial data and only needs to include audited financial statements for its two most current fiscal years with no required tabular disclosure of contractual obligations.

The JOBS Act also exempts the Company’s independent registered public accounting firm from having to comply with any rules adopted by the Public Company Accounting Oversight Board (“PCAOB”) after the date of the JOBS Act’s enactment, except as otherwise required by SEC rule.

The JOBS Act further exempts an “emerging.growth company” from any requirement adopted by the PCAOB for mandatory rotation of the Company’s accounting firm or for a supplemental auditor report about the audit.

Internal Control Attestation. The JOBS Act also provides an exemption from the requirement of the Company’s independent registered public accounting firm to file a report on the Company’s internal control over financial reporting, although management of the Company is still required to file its report on the adequacy of the Company’s internal control over financial reporting.

Section 102(a) of the JOBS Act exempts “emerging.growth companies” from the requirements in §14A(e) of the Exchange Act for companies with a class of securities registered under the Exchange Act to hold stockholder votes for executive compensation and golden parachutes.

Other Items of the JOBS Act. The JOBS Act also provides that an “emerging.growth company” can communicate with potential investors that are qualified institutional buyers or institutions that are accredited to determine interest in a contemplated offering either prior to or after the date of filing the respective registration statement. The JOBS Act also permits research reports by a broker or dealer about an “emerging.growth company” regardless of whether such report provides sufficient information for an investment decision. In addition, the JOBS Act precludes the SEC and FINRA from adopting certain restrictive rules or regulations regarding brokers, dealers and potential investors, communications with management and distribution of research reports on the “emerging.growth company’s” initial public offerings (IPOs).

Section 106 of the JOBS Act permits “emerging.growth companies” to submit registration statements under the Securities Act on a confidential basis provided that the registration statement and all amendments thereto are publicly filed at least 21 days before the issuer conducts any road show. This is intended to allow “emerging.growth companies” to explore the IPO option without disclosing to the market the fact that it is seeking to go public or disclosing the information contained in its registration statement until the company is ready to conduct a roadshow.

Election to Opt Out of Transition Period. Section 102(b)(1) of the JOBS Act exempts “emerging.growth companies” from being required to comply with new or revised financial accounting standards until private companies (that is, those that have not had a Securities Act registration statement declared effective or do not have a class of securities registered under the Exchange Act) are required to comply with the new or revised financial accounting standard.

The JOBS Act provides that a company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies but any such election to opt out is irrevocable. The Company has elected not to opt out of the transition period.

ITEM 1A. RISK FACTORS

You should be aware that there are substantial risks for an investment in our common stock. You should carefully consider these risk factors before you decide to invest in our common stock.

If any of the following risks were to occur, such as our business, financial condition, results of operations or other prospects, any of these could materially affect our likelihood of success. If that happens, the market price of our common stock, if any, could decline, and prospective investors would lose all or part of their investment in our common stock.

Risks Related to Our Business Operations

Our business, financial condition and results of operations are subject to various risks and uncertainties, including those described below. This section discusses factors that, individually or in the aggregate, could cause our actual results to differ materially from expected and historical results. Our business, financial condition or results of operations could be materially adversely affected by any of these risks. It is not possible to predict or identify all such factors. Consequently, the following description of Risk Factors is not a complete discussion of all potential risks or uncertainties applicable to our business.

Our current cash balance is only sufficient to fund our planned business operations through the third quarter of 2021. If additional capital is not available, we may not be able to pursue our planned business operations, may be forced to change our planned business operations, or may take other actions that could adversely impact our stockholders.

We are a clinical stage biotechnology company that currently has no revenue. Thus, our business does not generate the cash necessary to finance our planned business operations. We will require significant additional capital to: (i) develop FDA-approved products and commercialize such products; (ii) fund research and development activities relating to, and obtain regulatory approval for, our product candidates; (iii) protect our intellectual property; (iv) attract and retain highly-qualified personnel; (v) respond effectively to competitive pressures; and (vi) acquire complementary businesses or technologies.

Our future capital needs depend on many factors, including: (i) the scope, duration and expenditures associated with our research, development and commercialization efforts; (ii) continued scientific progress in our programs; (iii) the outcome of potential partnering or licensing transactions, if any; (iv) competing technological developments; (v) our proprietary patent position; and (vi) the regulatory approval process for our products.

We will need to raise substantial additional funds through public or private equity offerings, debt financings or strategic alliances and licensing arrangements to finance our planned business operations. We may not be able to obtain additional financing on terms favorable to us, if at all. General market conditions, as well as the ongoing COVID-19 pandemic, may make it difficult for us to seek financing from the capital markets, and the terms of any financing may adversely affect the holdings or the rights of our stockholders. For example, if we raise additional funds by issuing equity securities, further dilution to our stockholders will result, which may substantially dilute the value of their investment. Any equity financing may also have the effect of reducing the conversion or exercise price of our outstanding convertible or exercisable securities, which could result in the issuance (or potential issuance) of a significant number of additional shares of our common stock. In addition, as a condition to providing additional funds to us, future investors may demand, and may be granted, rights superior to those of existing stockholders. Debt financing, if available, may involve restrictive covenants that could limit our flexibility to conduct future business activities and, in the event of insolvency, could be paid before holders of equity securities received any distribution of our assets. We may be required to relinquish rights to our technologies or product candidates, or grant licenses through alliance, joint venture or agreements on terms that are not favorable to us, in order to raise additional funds. If adequate funds are not available, we may have to delay, reduce or eliminate one or more of our planned activities with respect to our business, or terminate our operations. These actions would likely reduce the market price of our common stock.

We will need additional capital which may not be available on commercially acceptable terms, if at all, which raises questions about our ability to continue as a going concern.

As of December 31, 2020, the Company had an accumulated deficit of \$48,357,638. Net loss for the year ended December 31, 2020, amounted to \$10,884,058 and as of December 31, 2020, we had a working capital deficit of \$17,406,356. The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. Additionally, as of December 31, 2020, we have outstanding debts of \$3,781,486. As we are not generating revenues, we need to raise a significant amount of capital in order to pay our debts and cover our operating costs. There is no assurance that we will be able to raise such needed capital or that such capital will be available under favorable terms.

We are subject to all the substantial risks inherent in the development of a new business enterprise within an extremely competitive industry. Due to the absence of a long-standing operating history and the emerging nature of the markets in which we compete, we anticipate operating losses until we can successfully implement our business strategy, which includes all associated revenue streams. We may never ever achieve profitable operations or generate significant revenues.

We currently have a monthly cash requirement spend of approximately \$500,000. We believe that in the aggregate, we will require significant additional capital funding to support and expand the research and development and marketing of our products, fund future clinical trials, repay debt obligations, provide capital expenditures for additional equipment and development costs, payment obligations, office space and systems for managing the business, and cover other operating costs until our planned revenue streams from products are fully-implemented and begin to offset our operating costs, if ever.

Since our inception, we have funded our operations with the proceeds from equity and debt financings. We have experienced liquidity issues due to, among other reasons, our limited ability to raise adequate capital on acceptable terms. We have historically relied upon the issuance equity and promissory notes that are convertible into shares of our common stock to fund our operations and have devoted significant efforts to reduce that exposure. We anticipate that we will need to issue equity to fund our operations and repay our outstanding debt for the foreseeable future. If we are unable to achieve operational profitability or we are not successful in securing other forms of financing, we will have to evaluate alternative actions to reduce our operating expenses and conserve cash.

These conditions raise substantial doubt about our ability to continue as a going concern for the next twelve months. The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. Accordingly, the consolidated financial statements do not include any adjustments relating to the recoverability of assets and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. The consolidated financial statements included herein also include a going concern footnote.

Additionally, wherever possible, our Board of Directors will attempt to use non-cash consideration to satisfy obligations. In many instances, we believe that the non-cash consideration will consist of restricted shares of our common stock, preferred stock or warrants to purchase shares of our common stock. Our Board of Directors has authority, without action or vote of the shareholders, but subject to NASDAQ rules and regulations (which generally require shareholder approval for any transactions which would result in the issuance of more than 20% of our then outstanding shares of common stock or voting rights representing over 20% of our then outstanding shares of stock), to issue all or part of the authorized but unissued shares of common stock, preferred stock or warrants to purchase such shares of common stock. In addition, we may attempt to raise capital by selling shares of our common stock, possibly at a discount to market in the future. These actions will result in dilution of the ownership interests of existing shareholders, may further dilute common stock book value, and that dilution may be material. Such issuances may also serve to enhance existing management's ability to maintain control of us, because the shares may be issued to parties or entities committed to supporting existing management.

We have significant and increasing liquidity needs and may require additional funding.

Research and development, management and administrative expenses and cash used for operations will continue to be significant and may increase substantially in the future in connection with new research and development initiatives, clinical trials, continued product commercialization efforts and the launch of our future product candidates. We will need to raise additional capital to fund our operations, continue to conduct clinical trials to support potential regulatory approval of marketing applications, and to fund commercialization of our future product candidates.

The amount and timing of our future funding requirements will depend on many factors, including, but not limited to:

- the timing of FDA approval, if any, and approvals in international markets of our future product candidates, if at all;
- the timing and amount of revenue from sales of our products, or revenue from grants or other sources;
- the rate of progress and cost of our clinical trials and other product development programs;
- costs of establishing or outsourcing sales, marketing and distribution capabilities;
- costs and timing of any outsourced growing and commercial manufacturing supply arrangements for our future product candidates;
- costs of filing, prosecuting, defending and enforcing any patent claims and other intellectual property rights associated with our future product candidates;
- the effect of competing technological and market developments;
- personnel, facilities and equipment requirements; and
- the terms and timing of any additional collaborative, licensing, co-promotion or other arrangements that we may establish.

While we expect to fund our future capital requirements from a number of sources, such as cash flow from operations and the proceeds from further public and/or private offerings, we cannot assure you that any of these funding sources will be available to us on favorable terms, or at all. Further, even if we can raise funds from all of the above sources, the amounts raised may not be sufficient to meet our future capital requirements.

We are currently subject to a restriction on our ability to issue securities.

The Company agreed in the February 2021 Purchase Agreement (discussed in greater detail below under “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Recent Funding Transactions—February 2021 Private Purchase”) that, until the earlier of (1) thirty days after the date on which the registration statement that is filed pursuant to the February 2021 Registration Rights Agreement to register the resale by the February 2021 Purchasers of the shares and the warrant shares is declared effective by the SEC (such date, the “Effective Date”) and (2) thirty days after such date that the shares may be sold without limitation pursuant to Rule 144 under the Securities Act, neither the Company nor any subsidiary thereof would (i) issue, enter into any agreement to issue or announce the issuance or proposed issuance of any shares of common stock (or common stock equivalents) or (ii) file any registration statement or any amendment or supplement thereto, in each case other than (A) as contemplated pursuant to the Registration Rights Agreement and (B) as contemplated by that certain Registration Rights Agreement, dated June 12, 2020, by and between the Company and the parties signatory thereto. Such restriction may limit our ability to raise funding, force us to seek debt financing, and/or may have a material adverse effect on our cash flows and the value of our securities.

We are dependent on the success of our future product candidates, some of which may not receive regulatory approval or be successfully commercialized.

Our success will depend on our ability to successfully develop and commercialize our future product candidates through our development programs, including our product candidate for the treatment of Dupuytren’s disease and any other product candidates developed through our fibrosis & anti-TNF, CBD derivatives, and α 7nAChR development platforms. We may never be able to develop products which receive regulatory approval in the U.S. or elsewhere. There can be no assurance that the FDA, EMA or any other regulatory authority will approve these product candidates.

Our ability to successfully commercialize our future product candidates will depend on, among other things, our ability to successfully complete pre-clinical and other non-clinical studies and clinical trials and to receive regulatory approvals from the FDA and similar foreign regulatory authorities. Delays in the regulatory process could have a material adverse effect on our business, results of operations and financial condition.

We have recently grown our business and will need to increase the size and complexity of our organization in the future, and we may experience difficulties in managing our growth and executing our growth strategy.

Our management, personnel and systems currently in place may not be adequate to support our business plan and future growth. We will need to increase our number of full-time equivalent employees in order to conduct Phase 1, 2 and 3 clinical trials of our future products and to establish a commercial organization and commercial infrastructure. As a result of these future activities, the complexity of our business operations is expected to substantially increase. We will need to develop and expand our scientific, manufacturing, sales and marketing, managerial, compliance, operational, financial and other resources to support our planned research, development, manufacturing and commercialization activities.

Our need to effectively manage our operations, growth and various projects requires that we:

- continue to improve our operational, financial, management and regulatory compliance controls and reporting systems and procedures;
- attract and retain sufficient numbers of talented employees;
- manage our commercialization activities effectively and in a cost-effective manner (currently trial and development for our clinical trials is very cost effective); and
- manage our development efforts effectively while carrying out our contractual obligations to contractors and other third parties.

We have utilized and continue to utilize the services of part-time outside consultants and contractors to perform a number of tasks for our company, including tasks related to compliance programs, clinical trial management, regulatory affairs, formulation development and other drug development functions. Our growth strategy may entail expanding our use of consultants and contractors to implement these and other tasks going forward. If we are not able to effectively expand our organization by hiring new employees and expanding our use of consultants and contractors, we may be unable to successfully implement the tasks necessary to effectively execute on our planned research, development, manufacturing and commercialization activities and, accordingly, may not achieve our research, development and commercialization goals.

We face liability for previously restated financial statements.

We filed a Current Report on Form 8-K on December 31, 2020 and another Current Report on Form 8-K on February 3, 2021, where we announced that due to matters we discovered which related to KBL, prior to the Business Combination, certain historical financial statements were unreliable. As a result, we restated our financial statements for the three and six months ended June 30, 2020 and for the three and nine months ended September 30, 2020, because of errors in such financial statements which were identified after such financial statements were filed with the SEC in our original quarterly reports for the quarters ended June 30, 2020 and September 30, 2020. While we believe these restatements are the result of the actions of, and are the responsibility of, the management of KBL (none of whom remain employed by the Company), we may be subject to stockholder litigation, rating downgrades, negative publicity and difficulties in attracting and retaining key clients, employees and management personnel as a result of such restatements. Additionally, our securities may trade at prices lower than similarly situated companies which have not had to restate their financial statements.

Our failure to appropriately account for complex financial instruments may result in the requirement that we restate our financial statements.

Certain of our current securities, and future securities we issue may, require complex accounting treatment and analysis. The SEC recently issued a Statement on Accounting and Reporting Considerations for Warrants Issued by Special Purpose Acquisition Companies (“SPACs”)(the “Statement”) on April 12, 2021 and may in the future issue further statements on SPAC accounting. While we believe that our financial statements for the year ended December 31, 2020 comply with the guidance issued on April 12, 2021, it is possible that as a result of the information and guidance set forth in the Statement, or in future statements or advisories released by the SEC or an accounting standards board, that we will need to restate our financial statements, and such guidance (including as set forth in the Statement), could have a material adverse effect on our financial condition and results of operations for prior periods which are required to be restated, if any, and/or on future periods moving forward, even if a restatement is not required.

Operating results may vary significantly in future periods.

Our financial results are unpredictable and may fluctuate, for among other reasons, due to commercial sales of our future product candidates; our achievement of product development objectives and milestones; clinical trial enrollment and expenses; research and development expenses; and the timing and nature of contract manufacturing and contract research payments. A high portion of our costs are predetermined on an annual basis, due in part to our significant research and development costs. Thus, small declines in future revenue could disproportionately affect financial results in a quarter.

We depend on our key personnel and our ability to attract and retain employees.

Our future growth and success depend on our ability to recruit, retain, manage and motivate our employees. We are highly dependent on our current management and scientific personnel, including our Chief Executive Officer, Dr. James N. Woody, our Co-Chairmen, Sir Marc Feldman, Ph.D., and Lawrence Steinman, M.D., our Chief Scientific Officer, Jonathan Rothbard, Ph.D., and our scientists, Raphael Mechoulam and Jagdeep Nanchahal. The inability to hire or retain experienced management personnel could adversely affect our ability to execute our business plan and harm our operating results. Due to the specialized scientific and managerial nature of our business, we rely heavily on our ability to attract and retain qualified scientific, technical and managerial personnel. The competition for qualified personnel in the biotechnological field is intense and we may be unable to continue to attract and retain qualified personnel necessary for the development of our business or to recruit suitable replacement personnel.

Problems in our manufacturing process for our new chemical entities, failure to comply with manufacturing regulations or unexpected increases in our manufacturing costs could harm our business, results of operations and financial condition.

We are responsible for the manufacture and supply of our future product candidates in the CBD derivatives and α 7nAChR programs for commercial use and for use in clinical trials. The manufacturing of our future product candidates necessitates compliance with GMPs and other regulatory requirements in international jurisdictions. Our ability to successfully manufacture our future product candidates will involve manufacture of finished products and labeling and packaging, which includes product information, tamper proof evidence and anti-counterfeit features, under tightly controlled processes and procedures. In addition, we will have to ensure chemical consistency among our batches, including clinical trial batches and, if approved, marketing batches. Demonstrating such consistency may require typical manufacturing controls as well as clinical data. We will also have to ensure that our batches conform to complex release specifications. If we are unable to manufacture our future product candidates in accordance with regulatory specifications, or if there are disruptions in our manufacturing process due to damage, loss or otherwise, or failure to pass regulatory inspections of our manufacturing facilities, we may not be able to meet demand or supply sufficient product for use in clinical trials, and this may also harm our ability to commercialize our future product candidates on a timely or cost-competitive basis, if at all.

We may not develop and expand our manufacturing capability in time to meet demand for our product candidates, and the FDA or foreign regulatory authorities may not accept our facilities or those of our contract manufacturers as being suitable for the production of our products and product candidates. Any problems in our manufacturing process could materially adversely affect our business, results of operations and financial condition.

We expect to face intense competition from companies with greater resources and experience than we have; and may face competition from competitors seeking to market our products under a Section 505(b)(2) application.

The pharmaceutical industry is highly competitive and subject to rapid change. The industry continues to expand and evolve as an increasing number of competitors and potential competitors enter the market. Many of these competitors and potential competitors have substantially greater financial, technological, managerial and research and development resources and experience than our company. Some of these competitors and potential competitors have more experience than our company in the development of pharmaceutical products, including validation procedures and regulatory matters. In addition, our future product candidates, if successfully developed, will compete with product offerings from large and well-established companies that have greater marketing and sales experience and capabilities than our company or our collaboration partners have. In particular, Insys Therapeutics, Inc. is developing CBD in Infantile Spasms ("L"), and potentially other indications. Zogenix, Inc. has reported positive data in two Phase 3 trials of low dose fenfluramine in Dravet syndrome and has commenced a Phase 3 trial with this product in Lennox Gastaut Syndrome. Biocodex recently received regulatory approval from the FDA for the drug Stiripentol (Diacomit) for the treatment of Dravet syndrome. Other companies with greater resources than our company may announce similar plans in the future. In addition, there are non-FDA approved CBD preparations being made available from companies in the medical marijuana industry, which might attempt to compete with our future product candidates.

Additionally, competitors may also seek to market versions of our drug products via a section 505(b)(2) application, which is a type of somewhat abbreviated NDA. NDA Section 505(b)(2) applications may be submitted for drug products that represent a modification, such as a new indication or new dosage form, of a previously approved drug. Section 505(b)(2) applications may rely on the FDA's previous findings for the safety and effectiveness of the previously approved drug in addition to information obtained by the 505(b)(2) applicant to support the modification of the previously approved drug. Preparing Section 505(b)(2) applications may be less costly and time-consuming than preparing an NDA based entirely on new data and information. Section 505(b)(2) applications are subject to the same patent certification procedures as an ANDA.

If we are unable to compete successfully, our commercial opportunities will be reduced and our business, results of operations and financial conditions may be materially harmed.

Our future product candidates, if approved, may be unable to achieve the expected market acceptance and, consequently, limit our ability to generate revenue from new products.

Even when product development is successful and regulatory approval has been obtained, our ability to generate sufficient revenue depends on the acceptance of our products by physicians and patients. We cannot assure you that any of our future product candidates will achieve the expected level of market acceptance and revenue if and when they obtain the requisite regulatory approvals. The market acceptance of any product depends on a number of factors, including the indication statement, warnings required by regulatory authorities in the product label and new competing products. Market acceptance can also be influenced by continued demonstration of efficacy and safety in commercial use, physicians' willingness to prescribe the product, reimbursement from third-party payors such as government health care programs and private third-party payors, the price of the product, the nature of any post-approval risk management activities mandated by regulatory authorities, competition, and marketing and distribution support. Further, our U.S. distribution depends on the adequate performance of a reimbursement support hub and contracted specialty pharmacies in a closed-distribution network. An ineffective or inefficient U.S. distribution model at launch may lead to inability to fulfill demand, and consequently a loss of revenue. The success and acceptance of a product in one country may be negatively affected by its activities in another. If we fail to adapt our approach to clinical trials in the U.S. market to meet the needs of EMA or other European regulatory authorities, or to generate the health economics and outcomes research data needed to support pricing and reimbursement negotiations or decisions in Europe, we may have difficulties obtaining marketing authorization for our products from EMA/European Commission and may have difficulties obtaining pricing and reimbursement approval for our products at a national level. Any factors preventing or limiting the market acceptance of our products could have a material adverse effect on our business, results of operations and financial condition.

All of our patents in the Anti-TNF and Fibrosis program are method of use patents, which may result in biosimilar drugs being used without our permission.

The success of our most advanced drug development platform depends on the enforceability of our method of use patents, as there are currently many biosimilar anti-TNF drugs in the market. If we are unable to obtain a composition of matter patents, and enforce such patents, our ability to generate revenue from the anti-TNF platform may be significantly limited and competitors may be able to use our research to bring competing drugs to market which would reduce our market share.

The majority of our license agreements provide the licensors and/or counter-parties the right to use and/or exploit such licensed intellectual property.

The majority of our license agreements provide the licensors and/or counter-parties the right to use and/or exploit such licensed intellectual property, and in some cases provide them ownership of such intellectual property, know-how and research results. As such, we may be in competition with parties who we have license agreements with, will likely not have the sole right to monetize, sell or distribute our product candidates and may be subject to restrictions on use and territory of sales. Any or all of the above may have a material adverse effect on our results of operations and cash flows and ultimately the value of our securities.

Because the results of preclinical studies and earlier clinical trials are not necessarily predictive of future results, we may not have favorable results in our planned and future clinical trials.

Any positive results from our preclinical testing, Phase 1 and Phase 2 clinical trials of our product candidate for Dupuytren's disease or any other product candidate may not necessarily be predictive of the results from planned or future clinical trials for such product candidates. Many companies in the pharmaceutical and biotechnology industries have suffered significant setbacks in clinical trials after achieving positive results in preclinical and early clinical development, and we cannot be certain that we will not face similar setbacks. These setbacks have been caused by, among other things, preclinical findings while clinical trials were underway or safety or efficacy observations in clinical trials, including adverse events. Moreover, our interpretation of clinical data or our conclusions based on the preclinical in vitro and in vivo models may prove inaccurate, as preclinical and clinical data can be susceptible to varying interpretations and analyses, and many companies that believed their product candidates performed satisfactorily in preclinical studies and clinical trials nonetheless failed to obtain FDA approval or a marketing authorization granted by the European Commission. If we fail to produce positive results in our planned clinical trial for our product candidate for the treatment of Dupuytren's disease, or our future clinical trials, the development timeline and regulatory approval and commercialization prospects for such product candidates, and, correspondingly, our business and financial prospects, would be materially adversely affected.

We have limited marketing experience, and we may not be able to successfully commercialize any of our future product candidates, even if they are approved in the future.

Our ability to generate revenues ultimately will depend on our ability to sell our approved products and secure adequate third-party reimbursement. We currently have no experience in marketing and selling our products. The commercial success of our future products depends on a number of factors beyond our control, including the willingness of physicians to prescribe our future products to patients, payors' willingness and ability to pay for our future products, the level of pricing achieved, patients' response to our future products, and the ability of our future marketing partners to generate sales. There can be no guarantee that we will be able to establish or maintain the personnel, systems, arrangements and capabilities necessary to successfully commercialize our future products or any product candidate approved by the FDA or other regulatory authority in the future. If we fail to establish or maintain successful marketing, sales and reimbursement capabilities or fail to enter into successful marketing arrangements with third parties, our product revenues may suffer.

If the price for any of our future approved products decreases or if governmental and other third-party payors do not provide coverage and adequate reimbursement levels, our revenue and prospects for profitability will suffer.

Patients who are prescribed medicine for the treatment of their conditions generally rely on third-party payors to reimburse all or part of the costs associated with their prescription drugs. Reimbursement systems in international markets vary significantly by country and by region, and reimbursement approvals generally must be obtained on a country-by-country basis. Coverage and adequate reimbursement from governmental healthcare programs, such as Medicare and Medicaid, and commercial payors is critical to new product acceptance. Coverage decisions may depend upon clinical and economic standards that disfavor new drug products when more established or lower cost therapeutic alternatives are already available or subsequently become available. Even if we obtain coverage for our future product candidates, the resulting reimbursement payment rates may require co-payments that patients find unacceptably high. Patients may not use our future product candidates if coverage is not provided or reimbursement is inadequate to cover a significant portion of a patient's cost.

In addition, the market for our future product candidates in the U.S. will depend significantly on access to third-party payors' drug formularies, or lists of medications for which third-party payors provide coverage and reimbursement. The industry competition to be included in such formularies often leads to downward pricing pressures on pharmaceutical companies. Also, third-party payors may refuse to include a particular branded drug in their formularies or otherwise restrict patient access to a branded drug when a less costly generic equivalent or other alternative is available.

Third-party payors, whether foreign or domestic, or governmental or commercial, are developing increasingly sophisticated methods of controlling healthcare costs. The current environment is putting pressure on companies to price products below what they may feel is appropriate. Our future revenues and overall success could be negatively impacted if we sell future product candidates at less than an optimized price. In addition, in the U.S., no uniform policy of coverage and reimbursement for drug products exists among third-party payors. Therefore, coverage and reimbursement for our future product candidates may differ significantly from payor to payor. As a result, the coverage determination process is often a time-consuming and costly process that will require us to provide scientific and clinical support for the use of our future product candidates to each payor separately, with no assurance that coverage will be obtained. If we are unable to obtain coverage of, and adequate payment levels for, our future product candidates, physicians may limit how much or under what circumstances they will prescribe or administer them and patients may decline to purchase them. This could affect our ability to successfully commercialize our product candidates, and thereby adversely impact our profitability, results of operations, financial condition and future success.

In addition, where we have chosen to collaborate with a third party on product candidate development and commercialization, our partner may elect to reduce the price of our products to increase the likelihood of obtaining reimbursement approvals. In many countries, products cannot be commercially launched until reimbursement is approved and the negotiation process in some countries can exceed 12 months. In addition, pricing and reimbursement decisions in certain countries can be affected by decisions made in other countries, which can lead to mandatory price reductions and/or additional reimbursement restrictions across a number of other countries, which may adversely affect sales and profitability. In the event that countries impose prices that are not sufficient to allow us or our partners to generate a profit, our partners may refuse to launch the product in such countries or withdraw the product from the market, which would adversely affect sales and profitability.

Business interruptions could delay us in the process of developing our future product candidates and could disrupt our product sales.

Loss of our manufacturing facilities, stored inventory or laboratory facilities through fire, theft or other causes, could have an adverse effect on our ability to meet demand for our future product candidates or to continue product development activities and to conduct our business. Failure to supply our partners with commercial products may lead to adverse consequences, including the right of partners to assume responsibility for product supply. Even if we obtain insurance coverage to compensate us for such business interruptions, such coverage may prove insufficient to fully compensate us for the damage to our business resulting from any significant property or casualty loss to our inventory.

If product liability lawsuits are successfully brought against us, we will incur substantial liabilities and may be required to limit the commercialization of our future product candidates.

Although we have never had any product liability claims or lawsuits brought against us, we face potential product liability exposure related to the testing of our future product candidates in human clinical trials, and we will face exposure to claims in jurisdictions where we market and distribute in the future. We may face exposure to claims by an even greater number of persons when we begin marketing and distributing our products commercially in the U.S. and elsewhere. In the future, an individual may bring a liability claim against us alleging that one of our future product candidates caused an injury. While we continue to take what we believe are appropriate precautions, we may be unable to avoid significant liability if any product liability lawsuit is brought against us. Large judgments have been awarded in class action or individual lawsuits based on drugs that had unanticipated side effects. Although we have purchased insurance to cover product liability lawsuits, if we cannot successfully defend our company against product liability claims, or if such insurance coverage is inadequate, we will incur substantial liabilities. Regardless of merit or eventual outcome, liability claims may result in decreased demand for our products, reputational damage, withdrawal of clinical trial participation participants, litigation costs, product recall costs, monetary awards, increased costs for liability insurance, lost revenues and business interruption.

Our employees may engage in misconduct or other improper activities, including noncompliance with regulatory standards and legal requirements.

We are exposed to the risk of employee fraud or other misconduct. Misconduct by employees could include intentional failures to comply with FDA, SEC or Office of Inspector General regulations, or regulations of any other applicable regulatory authority, failure to provide accurate information to the FDA or the SEC, comply with applicable manufacturing standards, other federal, state or foreign laws and regulations, report information or data accurately or disclose unauthorized activities. Employee misconduct could also involve the improper use of information, including information obtained in the course of clinical trials, or illegal appropriation of drug product, which could result in government investigations and serious harm to our reputation. Despite our adoption of a Code of Ethics, employee misconduct is not always possible to identify and deter. The precautions we take to detect and prevent these prohibited activities may not be effective in controlling unknown or unmanaged risks or losses or in protecting us from governmental investigations or other actions or lawsuits stemming from a failure to be in compliance with such laws or regulations. If any such actions are instituted against our company, and we are not successful in defending our company or asserting our rights, those actions could have a significant impact on our business, including the imposition of significant fines or other sanctions.

We are subject to the U.S. Foreign Corrupt Practices Act and other anti-corruption laws, as well as export control laws, customs laws, sanctions laws and other laws governing our operations. If we fail to comply with these laws, we could be subject to civil or criminal penalties, other remedial measures, and legal expenses, which could adversely affect our business, results of operations and financial condition.

Our operations are subject to anti-corruption laws, including the U.S. Foreign Corrupt Practices Act (“FCPA”), and other anti-corruption laws that apply in countries in which we do business. The FCPA and these other laws generally prohibit our company and our employees and intermediaries from bribing, being bribed or making other prohibited payments to government officials or other persons to obtain or retain business or gain some other business advantage. We and our commercial partners operate in a number of jurisdictions that pose a high risk of potential FCPA violations, and we participate in collaborations and relationships with third parties whose actions could potentially subject us to liability under the FCPA or local anti-corruption laws. In addition, we cannot predict the nature, scope or effect of future regulatory requirements to which our international operations might be subject or the manner in which existing laws might be administered or interpreted.

We are also subject to other laws and regulations governing our international operations, including regulations administered by the governments of the U.S., Canada, Israel, the United Kingdom and authorities in the EU, including applicable export control regulations, economic sanctions on countries and persons, customs requirements and currency exchange regulations, collectively referred to as the Trade Control Laws.

However, there is no assurance that we will be completely effective in ensuring our compliance with all applicable anti-corruption laws, including the FCPA or other legal requirements, including Trade Control Laws. If we are not in compliance with the FCPA and other anti-corruption laws or Trade Control Laws, we may be subject to criminal and civil penalties, disgorgement and other sanctions and remedial measures, and legal expenses, which could have an adverse impact on our business, financial condition, results of operations and liquidity. Likewise, any investigation of any potential violations of the FCPA, other anti-corruption laws by the U.S. or other authorities could also have an adverse impact on our reputation, business, financial condition and results of operations.

Security breaches, loss of data and other disruptions could compromise sensitive information related to our business, prevent us from accessing critical information or expose us to liability, which could adversely affect our business and our reputation.

In the ordinary course of business, we expect to collect and store sensitive data, including legally protected patient health information, credit card information, personally identifiable information about our employees, intellectual property, and proprietary business information. We expect to manage and maintain our applications and data utilizing on-site systems. These applications and data encompass a wide variety of business-critical information including research and development information, commercial information and business and financial information.

The secure processing, storage, maintenance and transmission of this critical information is vital to our operations and business strategy, and we devote significant resources to protecting such information. Although we take measures to protect sensitive information from unauthorized access or disclosure, our information technology and infrastructure may be vulnerable to attacks by hackers, or viruses, breaches or interruptions due to employee error, malfeasance or other disruptions, or lapses in compliance with privacy and security mandates. Any such virus, breach or interruption could compromise our networks and the information stored there could be accessed by unauthorized parties, publicly disclosed, lost or stolen. We have measures in place that are designed to prevent, and if necessary, to detect and respond to such security incidents and breaches of privacy and security mandates. However, in the future, any such access, disclosure or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, such as HIPAA and European Union General Data Protection Regulation (“GDPR”), government enforcement actions and regulatory penalties. Unauthorized access, loss or dissemination could also disrupt our operations, including our ability to process samples, provide test results, share and monitor safety data, bill payors or patients, provide customer support services, conduct research and development activities, process and prepare company financial information, manage various general and administrative aspects of our business and may damage our reputation, any of which could adversely affect our business, financial condition and results of operations.

In May 2016, the EU formally adopted the GDPR, which applies to all EU member states and became effective on May 25, 2018 and replaced the European Union Data Protection Directive. The regulation introduces stringent new data protection requirements in the EU and substantial fines for breaches of the data protection rules. It may increase our responsibility and liability in relation to personal data that we process and we may be required to put in place additional mechanisms ensuring compliance with the new data protection rules. The GDPR is a complex law and the regulatory guidance is still evolving, including with respect to how the GDPR should be applied in the context of clinical trials or other transactions from which we may gain access to personal data. These changes in the law will increase our costs of compliance and result in greater legal risks.

Risks Related to Development and Regulatory Approval of our Future Product Candidates

Clinical trials are expensive, time-consuming, uncertain and susceptible to change, delay or termination. The results of clinical trials are open to differing interpretations.

We have three separate programs for producing anti-inflammatory agents: (1) investigating new clinical opportunities for anti-TNF, (2) identifying orally available, small molecules that are agonists of $\alpha 7$ nicotinic acetylcholine receptor, and (3) identifying patentable analogs of CBD that initially will be used as pain medications. However, these programs, including the related clinical trials, are expensive, time consuming and difficult to design and implement.

Regulatory agencies may analyze or interpret the results of clinical trials differently than us. Even if the results of our clinical trials are favorable, the clinical trials for a number of its future product candidates are expected to continue for several years and may take significantly longer to complete. In addition, the FDA or other regulatory authorities, including state, local and foreign authorities, or an IRB, with respect to a trial at our institution, may suspend, delay or terminate its clinical trials at any time, require us to conduct additional clinical trials, require a particular clinical trial to continue for a longer duration than originally planned, require a change to its development plans such that we conduct clinical trials for a product candidate in a different order, e.g., in a step-wise fashion rather than running two trials of the same product candidate in parallel, or could suspend or terminate the registrations and quota allotments we require in order to procure and handle controlled substances, for various reasons, including the following, any of which could have a material adverse effect on our business, financial condition and results of operations:

- lack of effectiveness of any product candidate during clinical trials;
- discovery of serious or unexpected toxicities or side effects experienced by trial participants or other safety issues, such as drug interactions, including those which cause confounding changes to the levels of other concomitant medications;
- slower than expected rates of subject recruitment and enrollment rates in clinical trials;
- difficulty in retaining subjects who have initiated a clinical trial but may withdraw at any time due to adverse side effects from the therapy, insufficient efficacy, fatigue with the clinical trial process or for any other reason;
- delays or inability in manufacturing or obtaining sufficient quantities of materials for use in clinical trials due to regulatory and manufacturing constraints;
- inadequacy of or changes in our manufacturing process or product formulation;
- delays in obtaining regulatory authorization to commence a trial, including “clinical holds” or delays requiring suspension or termination of a trial by a regulatory agency, such as the FDA, before or after a trial is commenced;
- DEA related recordkeeping, reporting security or other violations at a clinical site, leading the DEA or state authorities to suspend or revoke the site’s-controlled substance license and causing a delay or termination of planned or ongoing trials;
- changes in applicable regulatory policies and regulation, including changes to requirements imposed on the extent, nature or timing of studies;

- delays or failure in reaching agreement on acceptable terms in clinical trial contracts or protocols with prospective clinical trial sites;
- uncertainty regarding proper dosing;
- delay or failure to supply product for use in clinical trials which conforms to regulatory specification;
- unfavorable results from ongoing pre-clinical studies and clinical trials;
- failure of our contract research organizations (“CROs”), or other third-party contractors to comply with all contractual requirements or to perform their services in a timely or acceptable manner;
- failure by our company, our employees, our CROs or their employees to comply with all applicable FDA or other regulatory requirements relating to the conduct of clinical trials;
- scheduling conflicts with participating clinicians and clinical institutions;
- failure to design appropriate clinical trial protocols;
- regulatory concerns with CBD derivative products generally and the potential for abuse, despite only working with non-plant based non-psychoactive products;
- insufficient data to support regulatory approval;
- inability or unwillingness of medical investigators to follow our clinical protocols; or
- difficulty in maintaining contact with patients during or after treatment, which may result in incomplete data.

Any failure by our company to comply with existing regulations could harm our reputation and operating results.

We are subject to extensive regulation by U.S. federal and state and foreign governments in each of the U.S., European and Canadian markets, in which we plan to sell our products, or in markets where we have product candidates progressing through the approval process.

We must adhere to all regulatory requirements including FDA's Good Laboratory Practice (“GLP”), Good Clinical Practice (“GCP”), and GMP requirements, pharmacovigilance requirements, advertising and promotion restrictions, reporting and recordkeeping requirements, and their European equivalents. If we or our suppliers fail to comply with applicable regulations, including FDA pre- or post-approval requirements, then the FDA or other foreign regulatory authorities could sanction our company. Even if a drug is approved by the FDA or other competent authorities, regulatory authorities may impose significant restrictions on a product's indicated uses or marketing or impose ongoing requirements for potentially costly post-marketing trials. Any of product candidates which may be approved in the U.S. will be subject to ongoing regulatory requirements for manufacturing, labeling, packaging, storage, distribution, import, export, advertising, promotion, sampling, recordkeeping and submission of safety and other post-market information, including both federal and state requirements. In addition, manufacturers and manufacturers' facilities are required to comply with extensive FDA requirements, including ensuring that quality control and manufacturing procedures conform to GMP. As such, we and our contract manufacturers (in the event contract manufacturers are appointed in the future) are subject to continual review and periodic inspections to assess compliance with GMP. Accordingly, we and others with whom we work will have to spend time, money and effort in all areas of regulatory compliance, including manufacturing, production, quality control and quality assurance. We will also be required to report certain adverse reactions and production problems, if any, to the FDA, and to comply with requirements concerning advertising and promotion for its products. Promotional communications with respect to prescription drugs are subject to a variety of legal and regulatory restrictions and must be consistent with the information in the product's approved label. Similar restrictions and requirements exist in the EU and other markets where we operate.

If a regulatory agency discovers previously unknown problems with a product, such as adverse events of unanticipated severity or frequency, or problems with the facility where the product is manufactured, or disagrees with the promotion, marketing or labeling of the product, it may impose restrictions on that product or on our company, including requiring withdrawal of the product from the market. If we fail to comply with applicable regulatory requirements, a regulatory agency or enforcement authority may issue warning letters, impose civil or criminal penalties, suspend regulatory approval, suspend any of our ongoing clinical trials, refuse to approve pending applications or supplements to approved applications submitted by us, impose restrictions on our operations, or seize or detain products or require a product recall.

In addition, it is possible that our future products will be regulated by the DEA, under the Controlled Substances Act or under similar laws elsewhere. DEA scheduling is a separate process that can delay when a drug may become available to patients beyond an NDA approval date, and the timing and outcome of such DEA process is uncertain. See also "[Risks Related to Controlled Substances](#)."

In addition, any government investigation of alleged violations of law could require us to spend significant time and resources in response, and could generate negative publicity. Any failure to comply with ongoing regulatory requirements may significantly and adversely affect our ability to commercialize and generate revenue from our future product candidates. If regulatory sanctions are applied or if regulatory approval is withdrawn, the value of our business and our operating results may be adversely affected.

Any action against us for violation of these laws, even if we successfully defend against it, could cause us to incur significant legal expenses, divert our management's attention from the operation of our business and damage our reputation. We expect to spend significant resources on compliance efforts and such expenses are unpredictable. Changing laws, regulations and standards might also create uncertainty, higher expenses and increase insurance costs. As a result, we intend to invest all reasonably necessary resources to comply with evolving standards, and this investment might result in increased management and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities.

We are subject to federal, state and foreign healthcare laws and regulations and implementation of or changes to such healthcare laws and regulations could adversely affect our business and results of operations.

In both the U.S. and certain foreign jurisdictions, there have been a number of legislative and regulatory proposals to change the healthcare system in ways that could impact our ability to sell our future product candidates. If we are found to be in violation of any of these laws or any other federal, state or foreign regulations, we may be subject to administrative, civil and/or criminal penalties, damages, fines, individual imprisonment, we from federal health care programs and the restructuring of our operations. Any of these could have a material adverse effect on our business and financial results. Since many of these laws have not been fully interpreted by the courts, there is an increased risk that we may be found in violation of one or more of their provisions. Any action against us for violation of these laws, even if we ultimately are successful in our defense, will cause us to incur significant legal expenses and divert our management's attention away from the operation of our business. In addition, in many foreign countries, particularly the countries of the EU the pricing of prescription drugs is subject to government control.

In some foreign countries, the proposed pricing for a drug must be approved before it may be lawfully marketed. The requirements governing drug pricing vary widely from country to country.

For example, some EU jurisdictions operate positive and negative list systems under which products may only be marketed once a reimbursement price has been agreed. To obtain reimbursement or pricing approval, some of these countries may require the completion of clinical trials that compare the cost-effectiveness of a particular product candidate to currently available therapies. Other member states allow companies to fix their own prices for medicines but monitor and control company profits. Such differences in national pricing regimes may create price differentials between EU member states. There can be no assurance that any country that has price controls or reimbursement limitations for pharmaceutical products will allow favorable reimbursement and pricing arrangements for any of our products. Historically, products launched in the UK and EU do not follow price structures of the U.S. In the UK and EU, the downward pressure on healthcare costs in general, particularly prescription medicines, has become intense. As a result, barriers to entry of new products are becoming increasingly high and patients are unlikely to use a drug product that is not reimbursed by their government. We may face competition from lower-priced products in foreign countries that have placed price controls on pharmaceutical products. In addition, the importation of foreign products may compete with any future product that we may market, which could negatively impact our profitability.

Specifically, in the U.S., we expect that the 2010 Affordable Care Act (“ACA”), as well as other healthcare reform measures that may be adopted in the future, may result in more rigorous coverage criteria and in additional downward pressure on the price that we may receive for any approved product. There have been judicial challenges to certain aspects of the ACA and numerous legislative attempts to repeal and/or replace the ACA in whole or in part, and we expect there will be additional challenges and amendments to the ACA in the future. At this time, the full effect that the ACA will have on our business in the future remains unclear. An expansion in the government’s role in the U.S. healthcare industry may cause general downward pressure on the prices of prescription drug products, lower reimbursements or any other product for which we obtain regulatory approval, reduce product utilization and adversely affect our business and results of operations. Any reduction in reimbursement from Medicare or other government programs may result in a similar reduction in payments from private payors. The implementation of cost containment measures or other healthcare reforms may prevent us from being able to generate revenue, attain profitability, or commercialize any of our future product candidates for which we may receive regulatory approval.

Information obtained from expanded access studies may not reliably predict the efficacy of our future product candidates in company-sponsored clinical trials and may lead to adverse events that could limit approval.

The expanded access studies we are currently supporting are uncontrolled, carried out by individual investigators and not typically conducted in strict compliance with GCPs, all of which can lead to a treatment effect which may differ from that in placebo-controlled trials. These studies provide only anecdotal evidence of efficacy for regulatory review. These studies contain no control or comparator group for reference and this patient data is not designed to be aggregated or reported as study results. Moreover, data from such small numbers of patients may be highly variable. Information obtained from these studies, including the statistical principles that we and the independent investigators have chosen to apply to the data, may not reliably predict data collected via systematic evaluation of the efficacy in company-sponsored clinical trials or evaluated via other statistical principles that may be applied in those trials. Reliance on such information to design our clinical trials may lead to trials that are not adequately designed to demonstrate efficacy and could delay or prevent our ability to seek approval of our future product candidates.

Expanded access programs provide supportive safety information for regulatory review. Physicians conducting these studies may use our future product candidates in a manner inconsistent with the protocol, including in children with conditions beyond those being studied in trials which we sponsor. Any adverse events or reactions experienced by subjects in the expanded access program may be attributed to our future product candidates and may limit its ability to obtain regulatory approval with labeling that we consider desirable, or at all.

There is a high rate of failure for drug candidates proceeding through clinical trials.

Generally, there is a high rate of failure for drug candidates proceeding through clinical trials. We may suffer significant setbacks in our clinical trials similar to the experience of a number of other companies in the pharmaceutical and biotechnology industries, even after receiving promising results in earlier trials. Further, even if we view the results of a clinical trial to be positive, the FDA or other regulatory authorities may disagree with our interpretation of the data. In the event that we obtain negative results from clinical trials for product candidates or other problems related to potential chemistry, manufacturing and control issues or other hurdles occur and our future product candidates are not approved, we may not be able to generate sufficient revenue or obtain financing to continue our operations, our ability to execute on our current business plan may be materially impaired, and our reputation in the industry and in the investment community might be significantly damaged. In addition, our inability to properly design, commence and complete clinical trials may negatively impact the timing and results of our clinical trials and ability to seek approvals for our drug candidates.

If we are found in violation of federal or state “fraud and abuse” laws or similar laws in other jurisdictions, we may be required to pay a penalty and/or be suspended from participation in federal or state health care programs, which may adversely affect our business, financial condition and results of operations.

In the U.S., we are subject to various federal and state health care “fraud and abuse” laws, including anti-kickback laws, false claims laws and other laws intended to reduce fraud and abuse in federal and state health care programs, which could affect our company particularly upon successful commercialization of our products in the U.S. The Medicare and Medicaid Patient Protection Act of 1987, or federal Anti-Kickback Statute, makes it illegal for any person, including a prescription drug manufacturer (or a party acting on its behalf), to knowingly and willfully solicit, receive, offer or pay any remuneration that is intended to induce the referral of business, including the purchase, order or prescription of a particular drug for which payment may be made under a federal health care program, such as Medicare or Medicaid. Under federal law, some arrangements, known as safe harbors, are deemed not to violate the federal Anti-Kickback Statute. Although we seek to structure our business arrangements in compliance with all applicable requirements, it is often difficult to determine precisely how the law will be applied in specific circumstances. Accordingly, it is possible that our practices may be challenged under the federal Anti-Kickback Statute and Federal False Claims Act. Violations of fraud and abuse laws may be punishable by criminal and/or civil sanctions, including fines and/or exclusion or suspension from federal and state health care programs such as Medicare and Medicaid and debarment from contracting with the U.S. government. In addition, private individuals have the ability to bring actions on behalf of the government under the federal False Claims Act as well as under the false claims laws of several states.

While we believe that we have structured our business arrangements to comply with these laws, that the government could allege violations of, or convict us of violating, these laws. If we are found in violation of one of these laws, we could be required to pay a penalty and could be suspended or excluded from participation in federal or state health care programs, and our business, results of operations and financial condition may be adversely affected.

The Members States of the EU and other countries also have anti-kickback laws and can impose penalties in case of infringement, which, in some jurisdictions, can also be enforced by competitors.

Serious adverse events or other safety risks could require us to abandon development and preclude, delay or limit approval of our future product candidates, limit the scope of any approved label or market acceptance, or cause the recall or loss of marketing approval of products that are already marketed.

If any of our future product candidates prior to or after any approval for commercial sale, cause serious or unexpected side effects, or are associated with other safety risks such as misuse, abuse or diversion, a number of potentially significant negative consequences could result, including:

- regulatory authorities may interrupt, delay or halt clinical trials;
- regulatory authorities may deny regulatory approval of our future product candidates;
- regulatory authorities may require certain labeling statements, such as warnings or contraindications or limitations on the indications for use, and/or impose restrictions on distribution in the form of a REMS in connection with approval or post-approval;
- regulatory authorities may withdraw their approval, require more onerous labeling statements, impose a more restrictive REMS, or require it to recall any product that is approved;
- we may be required to change the way the product is administered or conduct additional clinical trials;
- our relationships with our collaboration partners may suffer;
- we could be sued and held liable for harm caused to patients; or
- our reputation may suffer. The reputational risk is heightened with respect to those of our future product candidates that are being developed for pediatric indications.

We may voluntarily suspend or terminate our clinical trials if at any time we believe that the products present an unacceptable risk to participants, or if preliminary data demonstrates that our future product candidates are unlikely to receive regulatory approval or unlikely to be successfully commercialized. Following receipt of approval for commercial sale of a product, we may voluntarily withdraw or recall that product from the market if at any time we believe that its use, or a person's exposure to it, may cause adverse health consequences or death. To date, we have not withdrawn, recalled or taken any other action, voluntary or mandatory, to remove an approved product from the market. In addition, regulatory agencies, IRBs or data safety monitoring boards may at any time recommend the temporary or permanent discontinuation of our clinical trials or request that we cease using investigators in the clinical trials if they believe that the clinical trials are not being conducted in accordance with applicable regulatory requirements, or that they present an unacceptable safety risk to participants. Although we have never been asked by a regulatory agency, IRB or data safety monitoring board to temporarily or permanently discontinue a clinical trial, if we elect or are forced to suspend or terminate a clinical trial of any of our future product candidates, the commercial prospects for that product will be harmed and our ability to generate product revenue from that product may be delayed or eliminated. Furthermore, any of these events may result in labeling statements such as warnings or contraindications. In addition, such events or labeling could prevent us or our partners from achieving or maintaining market acceptance of the affected product and could substantially increase the costs of commercializing our future product candidates and impair our ability to generate revenue from the commercialization of these products either by our company or by our collaboration partners.

The development of a REMS for our future product candidates could cause delays in the approval process and would add additional layers of regulatory requirements that could impact our ability to commercialize our future product candidates in the U.S. and reduce their market potential.

Even if the FDA approves our NDA for any of our future product candidates without requiring a REMS as a condition of approval of the NDA, the FDA may, post-approval, require a REMS for any of our future product candidates if it becomes aware of new safety information that makes a REMS necessary to ensure that the benefits of the drug outweigh the potential risks. REMS elements can include medication guides, communication plans for health care professionals, and elements to assure safe use ("ETASU"). ETASU can include, but are not limited to, special training or certification for prescribing or dispensing, dispensing only under certain circumstances, special monitoring and the use of patient registries. Moreover, product approval may require substantial post-approval testing and surveillance to monitor the drug's safety or efficacy. We may be required to adopt a REMS for our future product candidates to ensure that the benefits outweigh the risks of abuse, misuse, diversion and other potential safety concerns. There can be no assurance that the FDA will approve a manageable REMS for our future product candidates, which could create material and significant limits on our ability to successfully commercialize our future product candidates in the U.S. Delays in the REMS approval process could result in delays in the NDA approval process. In addition, as part of the REMS, the FDA could require significant restrictions, such as restrictions on the prescription, distribution and patient use of the product, which could significantly impact our ability to effectively commercialize our future product candidates, and dramatically reduce their market potential, thereby adversely impacting our business, financial condition and results of operations. Even if initial REMS are not highly restrictive, if, after launch, our future product candidates were to be subject to significant abuse/non-medical use or diversion from illicit channels, this could lead to negative regulatory consequences, including a more restrictive REMS.

Risks Related to our Reliance Upon Third Parties

Our existing collaboration arrangements and any that we may enter into in the future may not be successful, which could adversely affect our ability to develop and commercialize our future product candidates.

We are a party to, and may seek additional, collaboration arrangements with pharmaceutical or biotechnology companies for the development or commercialization of our future product candidates. We may, with respect to our future product candidates, enter into new arrangements on a selective basis depending on the merits of retaining commercialization rights for ourselves as compared to entering into selective collaboration arrangements with leading pharmaceutical or biotechnology companies for each product candidate, both in the U.S. and internationally. To the extent that we decide to enter into collaboration agreements, we will face significant competition in seeking appropriate collaborators and the terms of any collaboration or other arrangements that we may establish may not be favorable to it.

Any existing or future collaboration that we enter into may not be successful. The success of our collaboration arrangements will depend heavily on the efforts and activities of our collaborators. Collaborators generally have significant discretion in determining the efforts and resources that they will apply to these collaborations. Disagreements between parties to a collaboration arrangement regarding development, intellectual property, regulatory or commercialization matters, can lead to delays in the development process or commercialization of the applicable product candidate and, in some cases, termination of the collaboration arrangement. These disagreements can be difficult to resolve if neither of the parties has final decision-making authority. Any such termination or expiration could harm our business reputation and may adversely affect it financially.

We expect to depend on a limited number of suppliers for materials and components in order to manufacture our future product candidates. The loss of these suppliers, or their failure to supply us on a timely basis, could cause delays in our current and future capacity and adversely affect our business.

We expect to depend on a limited number of suppliers for the materials and components required to manufacture our future product candidates. As a result, we may not be able to obtain sufficient quantities of critical materials and components in the future. A delay or interruption by our suppliers may also harm our business, results of operations and financial condition. In addition, the lead time needed to establish a relationship with a new supplier can be lengthy, and we may experience delays in meeting demand in the event we must switch to a new supplier. The time and effort to qualify for and, in some cases, obtain regulatory approval for a new supplier could result in additional costs, diversion of resources or reduced manufacturing yields, any of which would negatively impact our operating results. Our dependence on single-source suppliers exposes us to numerous risks, including the following: our suppliers may cease or reduce production or deliveries, they may be subject to government investigations and regulatory actions that limit or prevent production capabilities for an extended period of time, raise prices or renegotiate terms; our suppliers may become insolvent; we may be unable to locate a suitable replacement supplier on acceptable terms or on a timely basis, or at all; and delays caused by supply issues may harm our reputation, frustrate our customers and cause them to turn to our competitors for future needs.

Risks Related to our Intellectual Property

We may not be able to adequately protect our future product candidates or our proprietary technology in the marketplace.

Our success will depend, in part, on our ability to obtain patents, protect our trade secrets and operate without infringing on the proprietary rights of others. We rely upon a combination of patents, trade secret protection (i.e., know-how), and confidentiality agreements to protect the intellectual property of our future product candidates. The strengths of patents in the pharmaceutical field involve complex legal and scientific questions, and can be uncertain. Where appropriate, we seek patent protection for certain aspects of our products and technology. Filing, prosecuting and defending patents globally can be prohibitively expensive.

Our policy is to look to patent technologies with commercial potential in jurisdictions with significant commercial opportunities. However, patent protection may not be available for some of the products or technology we are developing. If we must spend significant time and money protecting, defending or enforcing our patents, designing around patents held by others or licensing, potentially for large fees, patents or other proprietary rights held by others, our business, results of operations and financial condition may be harmed. We may not develop additional proprietary products that are patentable. As of the date hereof, we have an extensive portfolio of patents, including many granted patents and patents pending approval.

The patent positions of pharmaceutical products are complex and uncertain. The scope and extent of patent protection for our future product candidates are particularly uncertain. Our future product candidates will be based on medicinal chemistry instead of cannabis plants. While we have sought patent protection, where appropriate, directed to, among other things, composition-of-matter for its specific formulations, their methods of use, and methods of manufacture, we do not have and will not be able to obtain composition of matter protection on these previously known CBD derivatives per se. We anticipate that the products we develop in the future will be based upon synthetic compounds we may discover. Although we have sought, and will continue to seek, patent protection in the U.S., Europe and other countries for our proprietary technologies, future product candidates, their methods of use, and methods of manufacture, any or all of them may not be subject to effective patent protection. If any of our products are approved and marketed for an indication for which we do not have an issued patent, our ability to use our patents to prevent a competitor from commercializing a non-branded version of our commercial products for that non-patented indication could be significantly impaired or even eliminated.

Publication of information related to our future product candidates by our company or others may prevent it from obtaining or enforcing patents relating to these products and product candidates. Furthermore, others may independently develop similar products, may duplicate our products, or may design around our patent rights. In addition, any of our issued patents may be opposed and/or declared invalid or unenforceable. If we fail to adequately protect our intellectual property, we may face competition from companies who attempt to create a generic product to compete with our future product candidates. We may also face competition from companies who develop a substantially similar product to our future product candidates that is not covered by any of our patents.

Many companies have encountered significant problems in protecting, defending and enforcing intellectual property rights in foreign jurisdictions. The legal systems of certain countries, particularly certain developing countries, do not favor the enforcement of patents and other intellectual property rights, particularly those relating to pharmaceuticals, which could make it difficult for us to stop the infringement of our patents or marketing of competing products in violation of our proprietary rights generally. Proceedings to enforce our patent rights in foreign jurisdictions could result in substantial cost and divert our efforts and attention from other aspects of our business.

If third parties claim that intellectual property used by our company infringes upon their intellectual property, our operating profits could be adversely affected.

There is a substantial amount of litigation, both within and outside the U.S., involving patent and other intellectual property rights in the pharmaceutical industry. We may, from time to time, be notified of claims that we are infringing upon patents, trademarks, copyrights or other intellectual property rights owned by third parties, and we cannot provide assurances that other companies will not, in the future, pursue such infringement claims against us, our commercial partners or any third-party proprietary technologies we have licensed. If we were found to infringe upon a patent or other intellectual property right, or if we failed to obtain or renew a license under a patent or other intellectual property right from a third party, or if a third party from whom we were licensing technologies was found to infringe upon a patent or other intellectual property rights of another third party, we may be required to pay damages, including damages of up to three times the damages found or assessed, if the infringement is found to be willful, suspend the manufacture of certain products or reengineer or rebrand our products, if feasible, or we may be unable to enter certain new product markets. Any such claims could also be expensive and time consuming to defend and divert management's attention and resources. Our competitive position could suffer as a result. In addition, if we have declined or failed to enter into a valid non-disclosure or assignment agreement for any reason, we may not own the invention or its intellectual property, and our products may not be adequately protected. Thus, we cannot guarantee that any of our future product candidates, or our commercialization thereof, does not and will not infringe any third party's intellectual property.

If we are not able to adequately prevent disclosure of trade secrets and other proprietary information, the value of our technology and products could be significantly diminished.

We rely on trade secrets to protect our proprietary technologies, especially where we do not believe patent protection is appropriate or obtainable. However, trade secrets are difficult to protect. We rely in part on confidentiality agreements with current and former employees, consultants, outside scientific collaborators, sponsored researchers, contract manufacturers, vendors and other advisors to protect our trade secrets and other proprietary information. These agreements may not effectively prevent disclosure of confidential information and may not provide an adequate remedy in the event of unauthorized disclosure of confidential information. In addition, we cannot guarantee that we have executed these agreements with each party that may have or have had access to our trade secrets. Any party with whom we or they have executed such an agreement may breach that agreement and disclose our proprietary information, including our trade secrets, and we may not be able to obtain adequate remedies for such breaches.

Enforcing a claim that a party illegally disclosed or misappropriated a trade secret is difficult, expensive and time-consuming, and the outcome is unpredictable. Also, some courts inside and outside the United States are less willing or unwilling to protect trade secrets. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor, we would have no right to prevent them, or those to whom they disclose such trade secrets, from using that technology or information to compete with us. If any of our trade secrets were to be disclosed to or independently developed by a competitor or other third-party, our competitive position would be harmed.

Risks Related to Controlled Substances

Controlled substance legislation differs between countries, and legislation in certain countries may restrict or limit our ability to sell our future product candidates.

Most countries are parties to the Single Convention on Narcotic Drugs 1961 and the Convention on Psychotropic Substances 1971, which governs international trade and domestic control of narcotic substances, including cannabis extracts. Countries may interpret and implement their treaty obligations in a way that creates a legal obstacle to us obtaining marketing approval for our future products in those countries. These countries may not be willing or able to amend or otherwise modify their laws and regulations to permit our future products to be marketed, or achieving such amendments to the laws and regulations may take a prolonged period of time. In that case, we would be unable to market our future product candidates in those countries in the near future or perhaps at all.

The product candidates that we are developing may be subject to U.S. controlled substance laws and regulations and failure to comply with these laws and regulations, or the cost of compliance with these laws and regulations, may adversely affect the results of our business operations, both during clinical development and post approval, and our financial condition.

The product candidates that we are developing may contain controlled substances as defined in The United States Federal Controlled Substances Act of 1970 and the Controlled Substances Import and Export Act, as amended (“CSA”). Controlled substances that are pharmaceutical products are subject to a high degree of regulation under the CSA, which establishes, among other things, certain registration, manufacturing quotas, security, recordkeeping, reporting, import, export and other requirements administered by the DEA. The DEA classifies controlled substances into five schedules: Schedule I, II, III, IV or V substances. Schedule I substances by definition have a high potential for abuse, no currently “accepted medical use” in the U.S., lack accepted safety for use under medical supervision, and may not be prescribed, marketed or sold in the U.S. Pharmaceutical products approved for use in the U.S. which contain a controlled substance are listed as Schedule II, III, IV or V, with Schedule II substances considered to present the highest potential for abuse or dependence and Schedule V substances the lowest relative risk of abuse among such substances.

While cannabis is a Schedule I controlled substance, products approved for medical use in the U.S. that contain cannabis or cannabis extracts should be placed in Schedules II-V, since approval by the FDA satisfies the “accepted medical use” requirement. If and when any of our future product candidates receive FDA approval, the DEA will make a scheduling determination. If the FDA, the DEA or any foreign regulatory authority determines that our future product candidates may have potential for abuse, it may require us to generate more clinical or other data than we currently anticipate to establish whether or to what extent the substance has an abuse potential, which could increase the cost and/or delay the launch of that product.

Facilities conducting research, manufacturing, distributing, importing or exporting, or dispensing controlled substances must be registered (licensed) to perform these activities and have the security, control, recordkeeping, reporting and inventory mechanisms required by the DEA to prevent drug loss and diversion. All these facilities must renew their registrations annually, except dispensing facilities, which must renew every three years. The DEA conducts periodic inspections of certain registered establishments that handle controlled substances. Obtaining the necessary registrations may result in delay of the importation, manufacturing or distribution of our future products. Furthermore, failure to maintain compliance with the CSA, particularly non-compliance resulting in loss or diversion, can result in regulatory action that could have a material adverse effect on our business, financial condition and results of operations. The DEA may seek civil penalties, refuse to renew necessary registrations, or initiate proceedings to restrict, suspend or revoke those registrations. In certain circumstances, violations could lead to criminal proceedings.

Individual states have also established controlled substance laws and regulations. Although state-controlled substances laws often mirror federal law, because the states are separate jurisdictions, they may separately schedule our future product candidates as well. State scheduling may delay commercial sale of any product for which we obtain federal regulatory approval and adverse scheduling could have a material adverse effect on the commercial attractiveness of such product. We or our partners must also obtain separate state registrations, permits or licenses in order to be able to obtain, handle, and distribute controlled substances for clinical trials or commercial sale, and failure to meet applicable regulatory requirements could lead to enforcement and sanctions by the states in addition to those from the DEA or otherwise arising under federal law.

Because our products may be controlled substances in the U.S., to conduct clinical trials in the U.S., each of our research sites must submit a research protocol to the DEA and obtain and maintain a DEA researcher registration that will allow those sites to handle and dispense our products and to obtain product from our importer. If the DEA delays or denies the grant of a research registration to one or more research sites, the clinical trial could be significantly delayed, and we could lose clinical trial sites. The importer for the clinical trials must also obtain an importer registration and an import permit for each import.

The legislation on cannabis in the EU differs among the member states, as this area is not yet fully harmonized. In Germany, for example, cannabis is regulated as a controlled substance (*Betäubungsmittel*) and its handling requires specific authorization.

The legalization and use of medical and recreational cannabis in the U.S. and abroad may impact our business.

There is a substantial amount of change occurring in the U.S. regarding the use of medical and recreational cannabis products. While cannabis products not approved by the FDA are Schedule I substances as defined under federal law, and their possession and use is not permitted according to federal law (except for research purposes, under DEA registration), at least 36 jurisdictions and the District of Columbia have enacted state laws to enable possession and use of cannabis for medical purposes, and at least 25 jurisdictions for recreational purposes. The U.S. Farm Bill, which was passed in 2018, descheduled certain material derived from hemp plants with extremely low tetrahydrocannabinol (“THC”) content. Although our business is quite distinct from that of online and dispensary cannabis companies, future legislation authorizing the sale, distribution, use, and insurance reimbursement of non-FDA approved cannabis products could affect our business.

General Business Risks Relating to our Company

The December 2017 tax reform bill could adversely affect our financial condition and results of operations.

On December 22, 2017, then President Trump signed into law a comprehensive tax reform bill (the “Tax Act”), that significantly reforms the Internal Revenue Code of 1986, as amended (the “Code”). The Tax Act, among other things, contains significant changes to corporate taxation, including a permanent reduction of the corporate income tax rate, a partial limitation on the deductibility of business interest expense, limitation of the deduction for certain net operating losses to 80% of current year taxable income, an indefinite net operating loss carryforward, immediate deductions for certain new investments instead of deductions for depreciation expense over time and modification or repeal of many business deductions and credits. The presentation of our financial condition and results of operations have been recorded in accordance with Generally Accepted Accounting Principles (GAAP), which requires the financial statement impact of the Tax Act to be recorded in the period in which the Tax Act was enacted. The financial statement impact of the Tax Act is based on our current interpretation of the provisions contained in the Tax Act and the Treasury Regulations and administrative guidance relating thereto. Any significant variance of our current interpretation of this law from any future Treasury Regulations or administrative guidance could result in a change to the presentation of our financial condition and results of operations and could negatively affect our business. The overall impact of the Tax Act and any future tax reform is uncertain and our business and financial condition could be adversely affected.

Changes in laws or regulations, or a failure to comply with any laws and regulations, may adversely affect our business, investments and results of operations.

We are subject to laws, regulations and rules enacted by national, regional and local governments. In particular, we are required to comply with certain SEC, NASDAQ and other legal or regulatory requirements. Compliance with, and monitoring of, applicable laws, regulations and rules may be difficult, time consuming and costly. Those laws, regulations and rules and their interpretation and application may also change from time to time and those changes could have a material adverse effect on our business, investments and results of operations. In addition, a failure to comply with applicable laws, regulations and rules, as interpreted and applied, could have a material adverse effect on our business and results of operations.

Certain of our executive officers and directors are now, and all of them may in the future become, affiliated with entities engaged in business activities similar to those conducted by us and, accordingly, may have conflicts of interest in determining to which entity a particular business opportunity should be presented.

Our executive officers and directors are, or may in the future become, affiliated with entities that are engaged in business activities similar to those that are conducted by us. Our officers and directors also may become aware of business opportunities which may be appropriate for presentation to us and the other entities to which they owe certain fiduciary or contractual duties. Accordingly, they may have conflicts of interest in determining whether a particular business opportunity should be presented to our company or to another entity. These conflicts may not be resolved in our favor and a potential opportunity may be presented to another entity prior to its presentation to us. Our Certificate of Incorporation provides that we renounce our interest in any corporate opportunity offered to any director or officer unless such opportunity is expressly offered to such person solely in his or her capacity as a director or officer of our company and such opportunity is one we are legally and contractually permitted to undertake and would otherwise be reasonable for us to pursue.

Our executive officers, directors, security holders and their respective affiliates may have competitive pecuniary interests that conflict with our interests.

We have not adopted a policy that expressly prohibits our directors, executive officers, security holders or affiliates from having a direct or indirect pecuniary or financial interest in any investment to be acquired or disposed of by us or in any transaction to which we are a party or have an interest. In fact, we may enter into a strategic transaction with a target business that is affiliated with our directors or executive officers. Nor do we have a policy that expressly prohibits any such persons from engaging for their own account in business activities of the types conducted by us. Accordingly, such persons or entities may have a conflict between their interests and ours. Certain of our officers and directors hold positions with companies which may be competitors of us. See also the biographies of our officers and directors below under "[Directors, Officers and Corporate Governance](#)".

We face significant penalties and damages in the event registration statements we filed to register certain securities sold in our prior offerings are subsequently suspended or terminated and/or if we fail to timely deliver securities upon conversion of our convertible notes.

We previously registered the shares of common stock issuable upon conversion of certain outstanding convertible promissory notes under the Securities Act, for resale. The agreements pursuant to which we sold such securities, and in some cases, the securities themselves, provide for liquidated damages upon the occurrence of certain events. Due to the recent requirement that we restate our June 30, 2020 and September 30, 2020 quarterly financial statements, and the similar requirement that we update such registration statement to reflect such restatement, the holders are due certain penalties.

For example, because the registration statement was unavailable for the resale of the shares of common stock underlying the convertible notes, for more than ten consecutive calendar days, then, in addition to any other rights the holders may have under the convertible notes or under applicable law, on the tenth day after the registration statement was unavailable for use for the resale of shares, and on each monthly anniversary of each such date thereafter, until the registration statement is available for us or sixty calendar days after the applicable event date, whichever occurs first, we are required to pay to each holder of certain of our convertible notes an amount in cash, as partial liquidated damages and not as a penalty, equal to 2% of the amount each holder paid the Company for the original subscription of convertible notes and preferred stock; provided, that the maximum amount payable shall not exceed 4%. If not in paid in full within seven days after the date payable, such amount accrues interest at 18% per annum until paid in full; and such amount was not timely paid. Such penalties and/or others which we are subject, could adversely affect our cash flow and cause the value of our securities to decline in value.

Such requirement to amend the registration statement also represented an event of default under certain of the convertible notes, which have a principal balance of \$316,111. As a result of such default, immediately, without need for notice or demand all of which are waived, interest on the notes accrues and is owed daily at an increased interest rate equal to the lesser of two percent per month (twenty-four percent (24.0%) per annum) or the maximum rate permitted under applicable law, and the convertible notes may be accelerated at the option of the holders thereof (payable in either cash or shares of common stock), in an amount equal to the greater of (a) one hundred thirty percent (130%) of the sum of the outstanding amount of the notes (including principal, interest, penalties and other amounts due thereunder)(the "Default Sum"); and (i) the Default Sum, divided by the conversion price, multiplied by (ii) the highest closing price of the Company's common stock on the period from the first date of default under the convertible notes until such default amount is paid.

Separately, we face penalties of \$1,000 per day for each day that we fail to deliver shares of common stock issuable upon conversion of certain of our outstanding convertible notes, if such shares are not delivered within two trading days after a conversion notice is given and in such case the holders of such notes also have buy-in rights pursuant to which additional penalties could be due. To date we have failed to timely deliver certain shares of common stock upon conversion of outstanding convertible notes. Such penalties and/or others which we are subject, could adversely affect our cash flow and cause the value of our securities to decline in value.

The value of our existing intangible assets may become impaired, depending upon future operating results.

Our intangible assets were approximately \$51.5 million as of December 31, 2020, representing approximately 93% of our total assets. We evaluate our intangible assets annually, or more often if there is a triggering event, to determine whether all or a portion of their carrying value may no longer be recoverable, in which case a charge to earnings may be necessary. Any future evaluations requiring an asset impairment charge for intangible assets would adversely affect future reported results of operations and stockholders' equity, although such charges would not affect our cash flow.

Our outstanding warrants may have an adverse effect on the market price of our common stock.

In our IPO, we issued warrants to purchase 5,750,000 shares of common stock as part of the units offered in our IPO and, simultaneously with the closing of our IPO, we issued in a private placement an aggregate of 502,500 private placement warrants contained in the private placement units, each exercisable to purchase one-half of one share of common stock at \$5.75 per half share. Additionally, in February 2021, we sold warrants to purchase up to 2,564,000 shares of common stock with an exercise price of \$5.00 per share. Such warrants, if and when exercised, will increase the number of issued and outstanding shares of our common stock and potentially reduce the value of the outstanding shares of common stock.

We may not be able to establish appropriate internal controls over financial reporting. Failure to achieve and maintain effective internal controls over financial reporting could lead to misstatements in our financial reporting and adversely affect our business.

As a private company, 180 was not required to document and test its internal controls over financial reporting nor was its management required to certify the effectiveness of internal controls and its auditors were not required to opine on the effectiveness of its internal control over financial reporting. Ensuring that we have adequate internal financial and accounting controls and procedures in place to produce accurate financial statements on a timely basis is a costly and time-consuming effort. The growth of our operations has created a need for additional resources within the accounting and finance functions due to the increasing need to produce timely financial information and to ensure the level of segregation of duties customary for a U.S. public company. Even after establishing internal controls, our management does not expect that our internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. No evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the business will have been detected.

Our business has been, and may continue to be, adversely affected by the COVID-19 pandemic.

In December 2019, a novel strain of coronavirus (COVID-19) was reported to have surfaced in Wuhan, China. In January 2020, COVID-19 spread to other parts of the world, including the United States and Europe, and efforts to contain its spread have intensified, with varying degrees of success. As a result, businesses have closed and limits have been placed on travel and everyday activities. The extent to which COVID-19 may impact our business will depend on future developments, which are highly uncertain and cannot be predicted with confidence, such as the duration of the outbreak, travel restrictions and social distancing in the United States and other countries, business closures or business disruptions, and the effectiveness of actions taken in the United States and other countries to contain and treat the disease. Should the COVID-19 pandemic continue, our plans could be delayed or interrupted. The spread of COVID-19 has also created global economic uncertainty, which may cause partners, suppliers and potential customers to closely monitor their costs and reduce their spending budget. The foregoing could materially adversely affect the clinical trials, supply chain, financial condition and financial performance of our company.

Enrollment of patients in our clinical trials, maintaining patients in our ongoing clinical trials, doing follow up visits with recruited patients and collecting data have been, and may continue to be, delayed or limited as certain of our clinical trial sites limit their onsite staff or temporarily close as a result of the COVID-19 pandemic and ongoing government restrictions. In addition, patients may not be able or willing to visit clinical trial sites for dosing or data collection purposes due to limitations on travel and physical distancing imposed or recommended by federal or state governments or patients' reluctance to visit the clinical trial sites during the pandemic. These factors resulting from the COVID-19 pandemic could delay or prevent the anticipated readouts from our clinical trials, which could ultimately delay or prevent our ability to generate revenues and could have a material adverse effect on our results of operations.

Risks Related to our Common Stock and Warrants

The market price of our common stock has been extremely volatile and may continue to be volatile due to numerous circumstances beyond our control.

The market price of our common stock has fluctuated, and may continue to fluctuate, widely, due to many factors, some of which may be beyond our control. These factors include, without limitation:

- “short squeezes”;
- comments by securities analysts or other third parties, including blogs, articles, message boards and social and other media;
- large stockholders exiting their position in our securities or an increase or decrease in the short interest in our securities;
- actual or anticipated fluctuations in our financial and operating results;
- risks and uncertainties associated with the ongoing COVID-19 pandemic;
- changes in foreign currency exchange rates;
- the commencement, enrollment or results of our planned or future clinical trials of our product candidates or those of our competitors;
- the success of competitive drugs or therapies;
- regulatory or legal developments in the United States and other countries;
- the success of competitive products or technologies;
- developments or disputes concerning patent applications, issued patents or other proprietary rights;
- the recruitment or departure of key personnel;
- the level of expenses related to our product candidates or clinical development programs;
- the results of our efforts to discover, develop, acquire or in-license additional product candidates;
- actual or anticipated changes in estimates as to financial results, development timelines or recommendations by securities analysts;
- our inability to obtain or delays in obtaining adequate drug supply for any approved drug or inability to do so at acceptable prices;
- disputes or other developments relating to proprietary rights, including patents, litigation matters and our ability to obtain patent protection for our technologies;

- significant lawsuits, including patent or stockholder litigation;
- variations in our financial results or those of companies that are perceived to be similar to us;
- changes in the structure of healthcare payment systems, including coverage and adequate reimbursement for any approved drug;
- market conditions in the pharmaceutical and biotechnology sectors;
- general economic, political, and market conditions and overall fluctuations in the financial markets in the United States and abroad; and
- investors' general perception of us and our business.

Stock markets in general and our stock price in particular have recently experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies and our company. For example, on March 26, 2021, our common stock experienced an intra-day trading high of \$10.60 per share and a low of \$6.72 per share. In addition, since the closing of the Business Combination, the sale prices of our common stock has ranged from a high of \$13.05 per share (on April 13, 2021) to a low of \$1.90 per share (on November 19, 2020). During this time, we have not experienced any material changes in our financial condition or results of operations that would explain such price volatility or trading volume. These broad market fluctuations may adversely affect the trading price of our securities. Additionally, these and other external factors have caused and may continue to cause the market price and demand for our common stock to fluctuate substantially, which may limit or prevent our stockholders from readily selling their shares of our common stock and may otherwise negatively affect the liquidity of our common stock.

Information available in public media that is published by third parties, including blogs, articles, message boards and social and other media may include statements not attributable to the Company and may not be reliable or accurate.

We are aware of a large volume of information being disseminated by third parties relating to our operations, including in blogs, message boards and social and other media. Such information as reported by third parties may not be accurate, may lead to significant volatility in our securities and may ultimately result in our common stock or other securities declining in value.

A significant number of our shares are eligible for sale and their sale or potential sale may depress the market price of our common stock.

Sales of a significant number of shares of our common stock in the public market could harm the market price of our common stock. Most of our common stock is available for resale in the public market and we are also required to register for resale the 2,564,000 shares of common stock and 2,564,000 shares of common stock issuable upon exercise of warrants, sold by us in a private transaction in February 2021. If a significant number of shares were sold, such sales would increase the supply of our common stock, thereby potentially causing a decrease in its price. Some or all of our shares of common stock may be offered from time to time in the open market pursuant to effective registration statements and/or compliance with Rule 144 (which is available starting November 6, 2021, subject to compliance with Rule 144, due to our status as a former “shell company”), which sales could have a depressive effect on the market for our shares of common stock. Subject to certain restrictions, a person who has held restricted shares for a period of six months may generally sell common stock into the market. The sale of a significant portion of such shares when such shares are eligible for public sale may cause the value of our common stock to decline in value.

Certain of our outstanding securities include lower priced and most favored nation rights.

A total of \$316,111 of outstanding convertible notes include rights to adjust the conversion price thereof (currently equal to the lowest of the last five days of volume weighted average price of our common stock), to the price of any securities we sell or issue in the future (including convertible securities), which a price less than then conversion price thereof, subject to certain customary exceptions. Additionally, such notes include a most favored nation right whereby such notes are deemed updated with any more favorable terms than of securities we issue or sell in the future. Such lower priced and most favorable nation rights may make it harder or more costly for us to raise funding in the future, may significantly lower the conversion price of, or materially adjust the terms of, such applicable convertible notes, and/or may cause significant dilution to existing stockholders.

There may not be sufficient liquidity in the market for our securities in order for investors to sell their shares. The market price of our common stock may continue to be volatile.

The market price of our common stock will likely continue to be highly volatile. Some of the factors that may materially affect the market price of our common stock are beyond our control, such as conditions or trends in the industry in which we operate or sales of our common stock. This situation is attributable to a number of factors, including the fact that we are a small company which is relatively unknown to stock analysts, stock brokers, institutional investors and others in the investment community that generate or influence sales volume, and that even if we came to the attention of such persons, they tend to be risk-averse and would be reluctant to follow an unproven company such as ours or purchase or recommend the purchase of our shares until such time as we became more seasoned and viable.

As a consequence, there may be periods of several days or more when trading activity in our shares is minimal or non-existent, as compared to a mature issuer which has a large and steady volume of trading activity that will generally support continuous sales without an adverse effect on share price. It is possible that a broader or more active public trading market for our common stock will not develop or be sustained, or that trading levels will not continue. These factors may materially adversely affect the market price of our common stock, regardless of our performance. In addition, the public stock markets have experienced extreme price and trading volume volatility. This volatility has significantly affected the market prices of securities of many companies for reasons frequently unrelated to the operating performance of the specific companies. These broad market fluctuations may adversely affect the market price of our common stock.

Risks Associated with Our Governing Documents and Delaware Law

Our Certificate of Incorporation provides for indemnification of officers and directors at our expense and limits their liability, which may result in a major cost to us and hurt the interests of our stockholders because corporate resources may be expended for the benefit of officers or directors.

Our Certificate of Incorporation provides for indemnification as follows: "To the fullest extent permitted by applicable law, the Corporation is authorized to provide indemnification of, and advancement of expenses to, such agents of the Corporation (and any other persons to which Delaware law permits the Corporation to provide indemnification) through Bylaw provisions, agreements with such agents or other persons, vote of stockholders or disinterested directors or otherwise, in excess of the indemnification and advancement otherwise permitted by Section 145 of the Delaware General Corporation Law, subject only to limits created by applicable Delaware law (statutory or non-statutory), with respect to actions for breach of duty to the Corporation, its stockholders and others."

We have been advised that, in the opinion of the SEC, indemnification for liabilities arising under federal securities laws is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification for liabilities arising under federal securities laws, other than the payment by us of expenses incurred or paid by a director, officer or controlling person in the successful defense of any action, suit or proceeding, is asserted by a director, officer or controlling person in connection with our activities, we will (unless in the opinion of our counsel, the matter has been settled by controlling precedent) submit to a court of appropriate jurisdiction, the question whether indemnification by us is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue. The legal process relating to this matter if it were to occur is likely to be very costly and may result in us receiving negative publicity, either of which factors is likely to materially reduce the market and price for our shares.

Our Certificate of Incorporation contains a specific provision that limits the liability of our directors for monetary damages to the Company and the Company's stockholders and requires us, under certain circumstances, to indemnify officers, directors and employees.

The limitation of monetary liability against our directors, officers and employees under Delaware law and the existence of indemnification rights to them may result in substantial expenditures by us and may discourage lawsuits against our directors, officers and employees.

Our Certificate of Incorporation contains a specific provision that limits the liability of our directors for monetary damages to the Company and the Company's stockholders. We also have contractual indemnification obligations under our employment and engagement agreements with our executive officers and directors. The foregoing indemnification obligations could result in us incurring substantial expenditures to cover the cost of settlement or damage awards against our directors and officers, which the Company may be unable to recoup. These provisions and resultant costs may also discourage us from bringing a lawsuit against our directors and officers for breaches of their fiduciary duties and may similarly discourage the filing of derivative litigation by our stockholders against our directors and officers, even though such actions, if successful, might otherwise benefit us and our stockholders.

Our directors have the right to authorize the issuance of shares of preferred stock and additional shares of our common stock.

Our directors, within the limitations and restrictions contained in our Certificate of Incorporation and without further action by our stockholders, have the authority to issue shares of preferred stock from time to time in one or more series and to fix the number of shares and the relative rights, conversion rights, voting rights, and terms of redemption, liquidation preferences and any other preferences, special rights and qualifications of any such series. Any issuance of shares of preferred stock could adversely affect the rights of holders of our common stock. Should we issue additional shares of our common stock at a later time, each investor's ownership interest in our stock would be proportionally reduced.

Anti-takeover provisions may impede the acquisition of the Company.

Certain provisions of the Delaware General Corporation Law (DGCL) have anti-takeover effects and may inhibit a non-negotiated merger or other business combination. These provisions are intended to encourage any person interested in acquiring control of us to negotiate with, and to obtain the approval of, our directors, in connection with such a transaction. As a result, certain of these provisions may discourage a future acquisition of the Company, including an acquisition in which the stockholders might otherwise receive a premium for their shares. In addition, we can also authorize "blank check" preferred stock, which could be issued by our board of directors without stockholder approval and may contain voting, liquidation, dividend and other rights superior to our common stock.

Compliance, Reporting and Listing Risks

We incur significant costs to ensure compliance with U.S. and NASDAQ Capital Market reporting and corporate governance requirements.

We incur significant costs associated with our public company reporting requirements and with applicable U.S. and NASDAQ Capital Market corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002 and other rules implemented by the SEC and The NASDAQ Capital Market. The rules of The NASDAQ Capital Market include requiring us to maintain independent directors, comply with other corporate governance requirements and pay annual listing and stock issuance fees. All of such SEC and NASDAQ obligations require a commitment of additional resources including, but not limited, to additional expenses, and may result in the diversion of our senior management's time and attention from our day-to-day operations. We expect all of these applicable rules and regulations to significantly increase our legal and financial compliance costs and to make some activities more time consuming and costly. We also expect that these applicable rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, it may be more difficult for us to attract and retain qualified individuals to serve on our board of directors or as executive officers.

We will continue to incur increased costs as a result of being a reporting company, and given our limited capital resources, such additional costs may have an adverse impact on our profitability.

We are an SEC-reporting company. The rules and regulations under the Exchange Act require reporting companies to provide periodic reports with interactive data files, which require that we engage legal, accounting and auditing professionals, and eXtensible Business Reporting Language (XBRL) and EDGAR (Electronic Data Gathering, Analysis, and Retrieval) service providers. The engagement of such services can be costly, and we may continue to incur additional losses, which may adversely affect our ability to continue as a going concern. In addition, the Sarbanes-Oxley Act of 2002, as well as a variety of related rules implemented by the SEC, have required changes in corporate governance practices and generally increased the disclosure requirements of public companies. For example, as a result of being a reporting company, we are required to file periodic and current reports and other information with the SEC and we have adopted policies regarding disclosure controls and procedures and regularly evaluate those controls and procedures.

The additional costs we continue to incur in connection with becoming a reporting company (expected to be several hundred thousand dollars per year) will continue to further stretch our limited capital resources. Due to our limited resources, we have to allocate resources away from other productive uses in order to continue to comply with our obligations as an SEC reporting company. Further, there is no guarantee that we will have sufficient resources to continue to meet our reporting and filing obligations with the SEC as they come due.

We may not be able to comply with NASDAQ's continued listing standards.

Our common stock and warrants trade on The NASDAQ Capital Market under the symbols BURL “[ATNF](#)” and “[ATNFW](#),” respectively. Notwithstanding such listing, there can be no assurance any broker will be interested in trading our securities. Therefore, it may be difficult to sell your securities if you desire or need to sell them. Our underwriters are not obligated to make a market in our securities, and even they do make a market, they can discontinue market making at any time without notice. Neither we nor the underwriters can provide any assurance that an active and liquid trading market in our securities will develop or, if developed, that such market will continue.

There is also no guarantee that we will be able to maintain our listings on The NASDAQ Capital Market for any period of time by perpetually satisfying NASDAQ's continued listing requirements. Our failure to continue to meet these requirements may result in our securities being delisted from NASDAQ.

Among the conditions required for continued listing on The NASDAQ Capital Market, NASDAQ requires us to maintain at least \$2.5 million in stockholders' equity or \$500,000 in net income over the prior two years or two of the prior three years, to have a majority of independent directors, and to maintain a stock price over \$1.00 per share. Our stockholders' equity may not remain above NASDAQ's \$2.5 million minimum, we may not generate over \$500,000 of yearly net income, we may not be able to maintain independent directors, and we may not be able to maintain a stock price over \$1.00 per share.

Furthermore, we are required to maintain a majority of independent directors and at least three members on our audit committee. On January 5, 2021, the Company received a letter from the NASDAQ Stock Market, LLC that the Company was no longer in compliance with NASDAQ Listing Rules 5605(b)(1) and 5605(c)(2), which require that the Company's board of directors be comprised of a majority of independent directors and that the Company have an Audit Committee consisting of at least three independent members, respectively (the “[Continued Listing Rules](#)”). NASDAQ provided the Company 45 days, or until February 19, 2021, to submit to NASDAQ a plan detailing how the Company intended to regain compliance with the rules. The Company timely submitted such plan and on March 1, 2021, the Company received notice from NASDAQ that the Company has been granted an extension until June 30, 2021 to regain compliance with the Continued Listing Rules. On May 27, 2021, June 10, 2021 and June 28, 2021, we issued Form 8-Ks announcing that four independent directors will be joining the Board of the Company with two appointments effective on the earlier of (a) the same business day following the filing of this Report with the SEC; and (b) July 2, 2021, and two appointments effective on the same business day following the filing of this Report with the SEC, which we believe will put us in compliance with the above noted NASDAQ Listing Rule.

On April 16, 2021, the Company received a notice from NASDAQ stating that the Company was not in compliance with NASDAQ Listing Rule 5250(c)(1) because it had not yet filed this Annual Report on Form 10-K for the year ended December 31, 2020 with the SEC by the required date such filing was due. Under NASDAQ rules, the Company had 60 calendar days from the date of the NASDAQ notification letter, or until June 15, 2021, to file this report with the SEC, which report was filed by such required date.

On May 19, 2021, the Company received another notice from NASDAQ stating that the Company is not in compliance with NASDAQ Listing Rule 5250(c)(1) because it has not yet filed its Quarterly Report on Form 10-Q for the quarter ended March 31, 2021 (the “Q1 2021 Form 10-Q”) with the SEC. Under NASDAQ rules, the Company has 60 calendar days from the date of the initial NASDAQ notification letter, relating to this Annual Report (discussed above), or until June 15, 2021, to file the Q1 2021 Form 10-Q with the SEC. If the Company was unable to file the Q1 2021 Form 10-Q with the SEC by June 15, 2021, the Company was permitted to submit a plan to regain compliance with NASDAQ's listing rules on or prior to that date, which plan of compliance has been submitted to NASDAQ. The Company timely submitted such plan and on June 22, 2021, and the Company received notice from Nasdaq that the Company has been granted an extension until July 31, 2021, to regain compliance with Nasdaq's continued listing rule as it relates to the untimely filings. In the event the Company does not regain compliance within the extension period, Nasdaq will provide the Company written notice of the delisting of the Company's securities, at which time the Company may appeal the decision to a Hearings Panel. However, there can be no assurance that the Company will be able to regain compliance within any extension period granted by NASDAQ.

If we fail to comply with NASDAQ rules and requirements, our stock may be delisted. In addition, even if we demonstrate compliance with the requirements above, we will have to continue to meet other objective and subjective listing requirements to continue to be listed on The NASDAQ Capital Market. Delisting from The NASDAQ Capital Market could make trading our common stock and/or warrants more difficult for investors, potentially leading to declines in our share price and liquidity. Without a NASDAQ Capital Market listing, stockholders may have a difficult time getting a quote for the sale or purchase of our stock, the sale or purchase of our stock would likely be made more difficult and the trading volume and liquidity of our stock could decline. Delisting from The NASDAQ Capital Market could also result in negative publicity and could also make it more difficult for us to raise additional capital. The absence of such a listing may adversely affect the acceptance of our common stock and/or warrants as currency or the value accorded by other parties. Further, if we are delisted, we would also incur additional costs under state blue sky laws in connection with any sales of our securities. These requirements could severely limit the market liquidity of our common stock and/or warrants and the ability of our stockholders to sell our common stock and/or warrants in the secondary market. If our common stock and/or warrants are delisted by NASDAQ, our common stock and/or warrants may be eligible to trade on an over-the-counter quotation system, such as the OTCQB Market, where an investor may find it more difficult to sell our stock or obtain accurate quotations as to the market value of our common stock and/or warrants. In the event our common stock and/or warrants are delisted from The NASDAQ Capital Market, we may not be able to list our common stock and/or warrants on another national securities exchange or obtain quotation on an over-the-counter quotation system.

We have identified material weaknesses in our disclosure controls and procedures and internal control over financial reporting. If not remediated, our failure to establish and maintain effective disclosure controls and procedures and internal control over financial reporting could result in material misstatements in our financial statements and a failure to meet our reporting and financial obligations, each of which could have a material adverse effect on our financial condition and the trading price of our common stock.

Maintaining effective internal control over financial reporting and effective disclosure controls and procedures are necessary for us to produce reliable financial statements. As reported herein under "Controls and Procedures", we have determined that our disclosure controls and procedures were not effective. Separately, management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2020, and determined that such internal control over financial reporting were not effective as a result of such assessments. Such determinations were based in part, on our need to restate our financial statements for the three and six and three and nine months ended June 30, 2020 and September 30, 2020, because of errors in such financial statements, which we believe were the result of misrepresentations by and actions of, and are the responsibility of, the management of KBL (none of whom remain employed by the Company), which were identified after such financial statements were filed with the SEC in our quarterly reports for the quarters ended June 30, 2020 and September 30, 2020, which restated financial statements have been filed to date.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.

Maintaining effective disclosure controls and procedures and effective internal control over financial reporting are necessary for us to produce reliable financial statements and the Company is committed to remediating its material weaknesses in such controls as promptly as possible. However, there can be no assurance as to when these material weaknesses will be remediated or that additional material weaknesses will not arise in the future. Any failure to remediate the material weaknesses, or the development of new material weaknesses in our internal control over financial reporting, could result in material misstatements in our financial statements and cause us to fail to meet our reporting and financial obligations, which in turn could have a material adverse effect on our financial condition and the trading price of our common stock, and/or result in litigation against us or our management. In addition, even if we are successful in strengthening our controls and procedures, those controls and procedures may not be adequate to prevent or identify irregularities or facilitate the fair presentation of our financial statements or our periodic reports filed with the SEC.

We may experience adverse impacts on our reported results of operations as a result of adopting new accounting standards or interpretations.

Our implementation of and compliance with changes in accounting rules, including new accounting rules and interpretations, could adversely affect our reported financial position or operating results or cause unanticipated fluctuations in our reported operating results in future periods.

Risks Relating to The JOBS Act

The JOBS Act allows us to postpone the date by which we must comply with certain laws and regulations and to reduce the amount of information provided in reports filed with the SEC. We cannot be certain if the reduced disclosure requirements applicable to “emerging growth companies” will make our common stock less attractive to investors.

We are and we will remain an “emerging growth company” until the earliest to occur of (i) the last day of the fiscal year during which our total annual revenues equal or exceed \$1.07 billion (subject to adjustment for inflation), (ii) the last day of the end of our 2022 fiscal year (5 years from our first public offering), (iii) the date on which we have, during the previous three-year period, issued more than \$1 billion in non-convertible debt, or (iv) the date on which we are deemed a “large accelerated filer” (with at least \$700 million in public float) under the Exchange Act. For so long as we remain an “emerging growth company” as defined in the JOBS Act, we may take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not “emerging growth companies” as described in further detail in the risk factors below. We cannot predict if investors will find our common stock less attractive because we will rely on some or all of these exemptions. If some investors find our common stock less attractive as a result, there may be a less active trading market for our common stock and our stock price may be more volatile. If we avail ourselves of certain exemptions from various reporting requirements, as is currently our plan, our reduced disclosure may make it more difficult for investors and securities analysts to evaluate us and may result in less investor confidence.

Our election not to opt out of the JOBS Act extended accounting transition period may not make our financial statements easily comparable to other companies.

Pursuant to the JOBS Act, as an “emerging growth company”, we can elect to opt out of the extended transition period for any new or revised accounting standards that may be issued by the Public Company Accounting Oversight Board (PCAOB) or the SEC. We have elected not to opt out of such extended transition period which means that when a standard is issued or revised and it has different application dates for public or private companies, we, as an “emerging growth company”, can adopt the standard for the private company. This may make a comparison of our financial statements with any other public company which is not either an “emerging growth company” nor an “emerging growth company” which has opted out of using the extended transition period, more difficult or impossible as possible different or revised standards may be used.

The JOBS Act also allows us to postpone the date by which we must comply with certain laws and regulations intended to protect investors and to reduce the amount of information provided in reports filed with the SEC.

The JOBS Act is intended to reduce the regulatory burden on “emerging growth companies”. The Company meets the definition of an “emerging growth company” and so long as it qualifies as an “emerging growth company,” it will, among other things:

- be exempt from the provisions of Section 404(b) of the Sarbanes-Oxley Act requiring that its independent registered public accounting firm provide an attestation report on the effectiveness of its internal control over financial reporting;
- be exempt from the “say on pay” provisions (requiring a non-binding stockholder vote to approve compensation of certain executive officers) and the “say on golden parachute” provisions (requiring a non-binding stockholder vote to approve golden parachute arrangements for certain executive officers in connection with mergers and certain other business combinations) of The Dodd–Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) and certain disclosure requirements of the Dodd-Frank Act relating to compensation of Chief Executive Officers;
- be permitted to omit the detailed compensation discussion and analysis from proxy statements and reports filed under the Exchange Act and instead provide a reduced level of disclosure concerning executive compensation; and
- be exempt from any rules that may be adopted by the PCAOB requiring mandatory audit firm rotation or a supplement to the auditor’s report on the financial statements.

The Company currently intends to take advantage of all of the reduced regulatory and reporting requirements that will be available to it so long as it qualifies as an “emerging growth company”. The Company has elected not to opt out of the extension of time to comply with new or revised financial accounting standards available under Section 102(b)(1) of the JOBS Act. Among other things, this means that the Company’s independent registered public accounting firm will not be required to provide an attestation report on the effectiveness of the Company’s internal control over financial reporting so long as it qualifies as an “emerging growth company”, which may increase the risk that weaknesses or deficiencies in the internal control over financial reporting go undetected. Likewise, so long as it qualifies as an “emerging growth company”, the Company may elect not to provide certain information, including certain financial information and certain information regarding compensation of executive officers, which it would otherwise have been required to provide in filings with the SEC, which may make it more difficult for investors and securities analysts to evaluate the Company. As a result, investor confidence in the Company and the market price of its common stock may be adversely affected.

Notwithstanding the above, we are also currently a “smaller reporting company”, meaning that we are not an investment company, an asset-backed issuer, or a majority-owned subsidiary of a parent company that is not a smaller reporting company and have a public float of less than \$75 million and annual revenues of less than \$50 million during the most recently completed fiscal year. In the event that we are still considered a “smaller reporting company”, at such time are we cease being an “emerging growth company”, the disclosure we will be required to provide in our SEC filings will increase, but will still be less than it would be if we were not considered either an “emerging growth company” or a “smaller reporting company”. Specifically, similar to “emerging growth companies”, “smaller reporting companies” are able to provide simplified executive compensation disclosures in their filings; are exempt from the provisions of Section 404(b) of the Sarbanes-Oxley Act requiring that independent registered public accounting firms provide an attestation report on the effectiveness of internal control over financial reporting; and have certain other decreased disclosure obligations in their SEC filings, including, among other things, only being required to provide two years of audited financial statements in annual reports. Decreased disclosures in our SEC filings due to our status as an “emerging growth company” or “smaller reporting company” may make it harder for investors to analyze the Company’s results of operations and financial prospects.

General Risk Factors

Provisions in our Certificate of Incorporation and Delaware law may inhibit a takeover of us, which could limit the price investors might be willing to pay in the future for our common stock and could entrench management.

Our Certificate of Incorporation contains provisions that may discourage unsolicited takeover proposals that stockholders may consider to be in their best interests. These provisions include a staggered board of directors and the ability of the board of directors to designate the terms of and issue new series of preferred shares, which may make more difficult the removal of management and may discourage transactions that otherwise could involve payment of a premium over prevailing market prices for our securities. We are also subject to anti-takeover provisions under Delaware law, which could delay or prevent a change of control. Together, these provisions may make more difficult the removal of management and may discourage transactions that otherwise could involve payment of a premium over prevailing market prices for our securities.

Failure to adequately manage our planned aggressive growth strategy may harm our business or increase our risk of failure.

For the foreseeable future, we intend to pursue an aggressive growth strategy for the expansion of our operations through increased product development and marketing. Our ability to rapidly expand our operations will depend upon many factors, including our ability to work in a regulated environment, market value-added products effectively to independent pharmacies, establish and maintain strategic relationships with suppliers, and obtain adequate capital resources on acceptable terms. Any restrictions on our ability to expand may have a materially adverse effect on our business, results of operations, and financial condition. Accordingly, we may be unable to achieve our targets for sales growth, and our operations may not be successful or achieve anticipated operating results.

Additionally, our growth may place a significant strain on our managerial, administrative, operational, and financial resources and our infrastructure. Our future success will depend, in part, upon the ability of our senior management to manage growth effectively. This will require us to, among other things:

- implement additional management information systems;
- further develop our operating, administrative, legal, financial, and accounting systems and controls;
- hire additional personnel;
- develop additional levels of management within our company;
- locate additional office space;
- maintain close coordination among our engineering, operations, legal, finance, sales and marketing, and client service and support organizations; and
- manage our expanding international operations.

As a result, we may lack the resources to deploy our services on a timely and cost-effective basis. Failure to accomplish any of these requirements could impair our ability to deliver services in a timely fashion or attract and retain new customers.

Our proprietary information, or that of our customers, suppliers and business partners, may be lost or we may suffer security breaches.

In the ordinary course of our business, we expect to collect and store sensitive data, including valuable and commercially sensitive intellectual property, clinical trial data, its proprietary business information and that of our future customers, suppliers and business partners, and personally identifiable information of our customers, clinical trial subjects and employees, patients, in its data centers and on our networks. The secure processing, maintenance and transmission of this information is critical to our operations. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, regulatory penalties, disrupt our operations, damage our reputation, and cause a loss of confidence in our products and our ability to conduct clinical trials, which could adversely affect our business and reputation and lead to delays in gaining regulatory approvals for our future product candidates. Although we maintain business interruption insurance coverage, our insurance might not cover all losses from any future breaches of our systems.

Failure of our information technology systems, including cybersecurity attacks or other data security incidents, could significantly disrupt the operation of our business.

Our business increasingly depends on the use of information technologies, which means that certain key areas such as research and development, production and sales are to a large extent dependent on our information systems or those of third-party providers. Our ability to execute our business plan and to comply with regulators' requirements with respect to data control and data integrity, depends, in part, on the continued and uninterrupted performance of our information technology systems, or IT systems and the IT systems supplied by third-party service providers. As information systems and the use of software and related applications by our company, our business partners, suppliers, and customers become more cloud-based, there has been an increase in global cybersecurity vulnerabilities and threats, including more sophisticated and targeted cyber-related attacks that pose a risk to the security of our information systems and networks and the confidentiality, availability and integrity of data and information. In addition, our IT systems are vulnerable to damage from a variety of sources, including telecommunications or network failures, malicious human acts and natural disasters. Moreover, despite network security and backup measures, some of our servers are potentially vulnerable to physical or electronic break-ins, computer viruses and similar disruptive problems. Despite the precautionary measures we and our third-party service providers have taken to prevent unanticipated problems that could affect our IT systems, a successful cybersecurity attack or other data security incident could result in the misappropriation and/or loss of confidential or personal information, create system interruptions, or deploy malicious software that attacks our systems. It is also possible that a cybersecurity attack might not be noticed for some period of time. In addition, sustained or repeated system failures or problems arising during the upgrade of any of our IT systems that interrupt our ability to generate and maintain data, and in particular to operate our proprietary technology platform, could adversely affect our ability to operate our business. The occurrence of a cybersecurity attack or incident could result in business interruptions from the disruption of our IT systems, or negative publicity resulting in reputational damage with our stockholders and other stakeholders and/or increased costs to prevent, respond to or mitigate cybersecurity events. In addition, the unauthorized dissemination of sensitive personal information or proprietary or confidential information could expose us or other third-parties to regulatory fines or penalties, litigation and potential liability, or otherwise harm our business.

We may acquire other companies which could divert our management's attention, result in additional dilution to our stockholders and otherwise disrupt our operations and harm our operating results.

We may in the future seek to acquire businesses, products or technologies that we believe could complement or expand our product offerings, enhance our technical capabilities or otherwise offer growth opportunities. The pursuit of potential acquisitions may divert the attention of management and cause us to incur various expenses in identifying, investigating and pursuing suitable acquisitions, whether or not they are consummated. If we acquire additional businesses, we may not be able to integrate the acquired personnel, operations and technologies successfully, effectively manage the combined business following the acquisition or realize anticipated cost savings or synergies. We also may not achieve the anticipated benefits from the acquired business due to a number of factors, including:

- incurrence of acquisition-related costs;
- diversion of management's attention from other business concerns;
- unanticipated costs or liabilities associated with the acquisition;
- harm to our existing business relationships with collaboration partners as a result of the acquisition;
- harm to our brand and reputation;
- the potential loss of key employees;
- use of resources that are needed in other parts of its business; and
- use of substantial portions of our available cash to consummate the acquisition.

In the future, if our acquisitions do not yield expected returns, we may be required to take charges to our operating results arising from the impairment assessment process. Acquisitions may also result in dilutive issuances of equity securities or the incurrence of debt, which could adversely affect our operating results. In addition, if an acquired business fails to meet our expectations, our business, results of operations and financial condition may be adversely affected.

If we make any acquisitions, they may disrupt or have a negative impact on our business.

If we make acquisitions in the future, funding permitting, which may not be available on favorable terms, if at all, we could have difficulty integrating the acquired company's assets, personnel and operations with our own. We do not anticipate that any acquisitions or mergers we may enter into in the future would result in a change of control of the Company. In addition, the key personnel of the acquired business may not be willing to work for us. We cannot predict the effect expansion may have on our core business. Regardless of whether we are successful in making an acquisition, the negotiations could disrupt our ongoing business, distract our management and employees and increase our expenses. In addition to the risks described above, acquisitions are accompanied by a number of inherent risks, including, without limitation, the following:

- the difficulty of integrating acquired products, services or operations;
- the potential disruption of the ongoing businesses and distraction of our management and the management of acquired companies;
- difficulties in maintaining uniform standards, controls, procedures and policies;
- the potential impairment of relationships with employees and customers as a result of any integration of new management personnel;
- the potential inability or failure to achieve additional sales and enhance our customer base through cross-marketing of the products to new and existing customers;
- the effect of any government regulations which relate to the business acquired;
- potential unknown liabilities associated with acquired businesses or product lines, or the need to spend significant amounts to retool, reposition or modify the marketing and sales of acquired products or operations, or the defense of any litigation, whether or not successful, resulting from actions of the acquired company prior to our acquisition; and
- potential expenses under the labor, environmental and other laws of various jurisdictions.

Our business could be severely impaired if and to the extent that we are unable to succeed in addressing any of these risks or other problems encountered in connection with an acquisition, many of which cannot be presently identified. These risks and problems could disrupt our ongoing business, distract our management and employees, increase our expenses and adversely affect our results of operations.

We may apply working capital and future funding to uses that ultimately do not improve our operating results or increase the value of our securities.

In general, we have complete discretion over the use of our working capital and any new investment capital we may obtain in the future. Because of the number and variety of factors that could determine our use of funds, our ultimate expenditure of funds (and their uses) may vary substantially from our current intended operating plan for such funds.

We intend to use existing working capital and future funding to support the development of our products and services, product purchases in our wholesale distribution division, the expansion of our marketing, or the support of operations to educate our customers. We will also use capital for market and network expansion, acquisitions, and general working capital purposes. However, we do not have more specific plans for the use and expenditure of our capital. Our management has broad discretion to use any or all of our available capital reserves. Our capital could be applied in ways that do not improve our operating results or otherwise increase the value of a stockholder's investment.

We have never paid or declared any dividends on our common stock.

We have never paid or declared any dividends on our common stock or preferred stock. Likewise, we do not anticipate paying, in the near future, dividends or distributions on our common stock. Any future dividends on common stock will be declared at the discretion of our board of directors and will depend, among other things, on our earnings, our financial requirements for future operations and growth, and other facts as we may then deem appropriate. Since we do not anticipate paying cash dividends on our common stock, return on your investment, if any, will depend solely on an increase, if any, in the market value of our common stock.

Stockholders may be diluted significantly through our efforts to obtain financing and satisfy obligations through the issuance of additional shares of our common stock.

Wherever possible, our board of directors will attempt to use non-cash consideration to satisfy obligations. In many instances, we believe that the non-cash consideration will consist of restricted shares of our common stock or where shares are to be issued to our officers, directors and applicable consultants. Our board of directors has authority, without action or vote of the stockholders, but subject to NASDAQ rules and regulations (which generally require stockholder approval for any transactions which would result in the issuance of more than 20% of our then outstanding shares of common stock or voting rights representing over 20% of our then outstanding shares of stock), to issue all or part of the authorized but unissued shares of common stock. In addition, we may attempt to raise capital by selling shares of our common stock, possibly at a discount to market. These actions will result in dilution of the ownership interests of existing stockholders, which may further dilute common stock book value, and that dilution may be material. Such issuances may also serve to enhance existing management's ability to maintain control of the Company because the shares may be issued to parties or entities committed to supporting existing management.

Our growth depends in part on the success of our strategic relationships with third parties.

In order to grow our business, we anticipate that we will need to continue to depend on our relationships with third parties, including our technology providers. Identifying partners, and negotiating and documenting relationships with them, requires significant time and resources. Our competitors may be effective in providing incentives to third parties to favor their products or services, or utilization of, our products and services. In addition, acquisitions of our partners by our competitors could result in a decrease in the number of our current and potential customers. If we are unsuccessful in establishing or maintaining our relationships with third parties, our ability to compete in the marketplace or to grow our revenue could be impaired and our results of operations may suffer. Even if we are successful, we cannot assure you that these relationships will result in increased customer use of our products or increased revenue.

Claims, litigation, government investigations, and other proceedings may adversely affect our business and results of operations.

We are currently subject to, and expect to continue to be regularly subject to, actual and threatened claims, litigation, reviews, investigations, and other proceedings. Any of these types of proceedings may have an adverse effect on us because of legal costs, disruption of our operations, diversion of management resources, negative publicity, and other factors. Our current legal proceedings are described in "Note 14. Commitments and Contingencies", under the heading "Litigation and Other Loss Contingencies", in the consolidated financial statements included herein beginning on page F-1. The outcomes of these matters are inherently unpredictable and subject to significant uncertainties. Determining legal reserves and possible losses from such matters involves judgment and may not reflect the full range of uncertainties and unpredictable outcomes. Until the final resolution of such matters, we may be exposed to losses in excess of the amount recorded, and such amounts could be material. Should any of our estimates and assumptions change or prove to have been incorrect, it could have a material effect on our business, consolidated financial position, results of operations, or cash flows. In addition, it is possible that a resolution of one or more such proceedings, including as a result of a settlement, could require us to make substantial future payments, prevent us from offering certain products or services, require us to change our business practices in a manner materially adverse to our business, requiring development of non-infringing or otherwise altered products or technologies, damaging our reputation, or otherwise having a material effect on our operations.

For all of the foregoing reasons and others set forth herein, an investment in our securities involves a high degree of risk.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

None.

ITEM 3. LEGAL PROCEEDINGS

From time to time, we may be a party to litigation that arises in the ordinary course of our business.

Such current litigation or other legal proceedings are described in, and incorporated by reference in, this "Item 3. Legal Proceedings" of this Annual Report on Form 10-K from, "Note 14. Commitments and Contingencies", under the heading "Litigation and Other Loss Contingencies", in the consolidated financial statements included herein beginning on page F-1. The Company believes that the resolution of currently pending matters will not individually or in the aggregate have a material adverse effect on our financial condition or results of operations. However, assessment of the current litigation or other legal claims could change in light of the discovery of facts not presently known to the Company or by judges, juries or other finders of fact, which are not in accord with management's evaluation of the possible liability or outcome of such litigation or claims.

Additionally, the outcome of litigation is inherently uncertain. If one or more legal matters were resolved against the Company in a reporting period for amounts in excess of management's expectations, the Company's financial condition and operating results for that reporting period could be materially adversely affected.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock, warrants, rights and units were previously listed on the NASDAQ Capital Market under the symbols “KBLM”, “KBLMW”, “KBLMR” and “KBLMU”, respectively. Our units commenced public trading on April 7, 2017 and our common stock, warrants and rights each commenced separate public trading on May 2, 2017. Our units automatically separated into the component securities upon consummation of the Business Combination and, as a result, no longer trade as a separate security, and our common stock and warrants began trading on the NASDAQ Capital Market under the symbols “ATNF” and “ATNFW,” respectively. Prior the Closing of the Business Combination, each unit consisted of one share of our common stock, one right convertible into 1/10th of one share of our common stock, and one warrant to purchase one half of one share of our common stock at an exercise price of \$11.50 per whole share.

Holders

As of July 2, 2021, there were 30,768,873 shares of common stock issued and outstanding held by 112 holders of record, and 8,628,908 shares of common stock underlying 14,630,158 warrants outstanding to purchase shares of our common stock, with a weighted average exercise price of \$9.52 per share, held by 19 holders of record.

Securities Authorized for Issuance Under Equity Compensation Plans

We have reserved 3,718,140 shares of our common stock for grant under our 2020 Omnibus Incentive Plan (“OIP”), of which 1,877,320 shares are available for future awards as of the date of this Report. The OIP is intended to be a vital component of our compensation program and the primary equity plan we use to grant equity-based incentive awards to our directors, officers, employees and consultants. Our Board believes that granting equity awards under the OIP will serve to align the interests of the key services providers of the Company and its subsidiaries with the Company’s stockholders, and that it would be in the best interest of the Company and its stockholders to make such grants.

Dividend Policy

We have never paid or declared any cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future. We anticipate that we will retain all of our future earnings for use in the operation of our business and for general corporate purposes. Any determination to pay dividends in the future will be at the discretion of our board of directors. Accordingly, investors must rely on sales of their common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investments.

Recent Sales of Unregistered Securities

The disclosures below include information on recent sales of unregistered securities during the three months ended December 31, 2020 and from the period from January 1, 2021 to the filing date of this report, and do not include information which has previously been included in a Quarterly Report on Form 10-Q or in a Current Report on Form 8-K:

In November 2020:

- 250,000 restricted shares of common stock were issued to broker-dealers to satisfy past obligations arising from advisory work;
- 63,269 restricted shares of common stock were issued to insiders (Sir Marc Feldmann and Lawrence Steinman) as a result of conversion of \$239,320 of convertible debt; and
- 10,360 restricted shares of common stock were issued to non-related parties as a result of conversion of \$39,189 of convertible debt.

In March 2021

- We issued 158,382 shares of common stock upon the conversion of \$432,384 of outstanding convertible notes at a conversion price of \$2.73 per share, pursuant to the terms of such notes;
- We issued 1,815 shares of common stock to an external consultant for investor relations services to be rendered;
- We issued 22,870 shares of common stock to external consultants of the Company for services rendered, at a price of \$6.34 per share;
- 2,503 restricted shares of common stock were issued for director fees due to Donald A. McGovern, Jr. our lead independent director in consideration for services rendered; and
- 2,101 restricted shares of common stock were issued for director fees due to Larry Gold, an independent director in consideration for services rendered.

In April 2021

- 138,414 restricted shares of common stock were issued for services rendered in connection with a Bonus to Prof. Jagdeep Nanchahal, our Chairman of our Clinical Advisory Committee (including 100,699 shares, the issuance of which was previously reported on a Current Report on Form 8-K); and
- We issued 37,715 shares of common stock to Dr. Jagdeep Nanchahal, a consultant, pursuant to the terms of his consulting agreement, as partial consideration for a bonus owed to Dr. Nanchahal.

* * * * *

We claim an exemption from registration pursuant to Section 4(a)(2) and/or Rule 506 of Regulation D of the Securities Act, for such issuances described above, since the foregoing issuances did not involve a public offering, the recipients were (a) “accredited investors”; and/or (b) had access to similar documentation and information as would be required in a Registration Statement under the Securities Act. The securities were offered without any general solicitation by us or our representatives. The securities are subject to transfer restrictions, and the certificates evidencing the securities contain an appropriate legend stating that such securities have not been registered under the Securities Act and may not be offered or sold absent registration or pursuant to an exemption therefrom and such securities may not be offered or sold in the United States absent registration or an exemption from registration under the Securities Act and any applicable state securities laws.

We claim an exemption from registration provided by Section 3(a)(9) of the Securities Act, for such note conversions, as the securities were exchanged by us with our existing security holders in transactions where no commission or other remuneration was paid or given directly or indirectly for soliciting such exchange.

Issuer Purchases of Equity Securities

None.

Special Voting Shares

We have two classes of preferred stock designated, named our Class C Special Voting Shares and our Class K Special Voting Shares (collectively, the “Special Voting Shares”), with the rights and preferences specified below.

The Special Voting Shares have a par value of \$0.0001 per share. The rights and preferences of each Special Voting Shares consists of the following:

- The right to vote in all circumstances in which our common stock have the right to vote, with the common stock as one class;

- The Special Voting Shares entitle the holder Odyssey Trust Company (the Trustee) to an aggregate number of votes equal to the number of shares of common stock that were issuable to the holders of the previously outstanding shares of CannBioRex Purchaseco ULC and/or Katexco Purchaseco ULC, Canadian subsidiaries of 180 (the “Exchangeable Shares”);
- The holder of the Special Voting Shares (and, indirectly, the holders of the Exchangeable Shares) has the same rights as the holders of the common stock as to notices, reports, financial statements and attendance at all stockholder meetings;
- No entitlement to dividends;
- The holder of the Special Voting Shares is not entitled to any portion of any related distribution upon windup, dissolution or liquidation of the Company; and
- The Company may cancel the Special Voting Shares when there are no Exchangeable Shares outstanding and no option or other commitment of CannBioRex Purchaseco ULC and Katexco Purchaseco ULC which could require either CannBioRex Purchaseco ULC and Katexco Purchaseco ULC to issue more Exchangeable Shares.

As set forth above, the holders of the Exchangeable Shares, through the applicable Special Voting Share, have voting rights and other attributes corresponding to the Common Stock. The Exchangeable Shares provide an opportunity for certain former Canadian resident holders of CBR Pharma or Katexco securities to obtain a deferral of taxable capital gains for Canadian income tax purposes in connection with the Reorganization.

ITEM 6. SELECTED FINANCIAL DATA

A registrant such as the Company, that qualifies as a smaller reporting company, as defined by §229.10(f)(1), is not required to provide the information required by this Item.

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the results of operations and financial condition of 180 Life Sciences Corp. as of and for the years ended December 31, 2020 and 2019 should be read in conjunction with our consolidated financial statements and the notes to those consolidated financial statements that are included elsewhere in this Annual Report. This Management’s Discussion and Analysis of Financial Condition and Results of Operations contains statements that are forward-looking. See “Cautionary Statement Regarding Forward-Looking Information” above. Actual results could differ materially because of the factors discussed in “Risk Factors” elsewhere in this Annual Report, and other factors that we may not know.

Organization of MD&A

Our Management’s Discussion and Analysis of Financial Condition and Results of Operations (the “MD&A”) is provided in addition to the accompanying consolidated financial statements and notes to assist readers in understanding our results of operations, financial condition, and cash flows. MD&A is organized as follows:

- **Business Overview and Recent Events**
- **Results of Operations.** An analysis of our financial results comparing the twelve months ended December 31, 2020 and 2019.
- **Liquidity and Capital Resources.** An analysis of changes in our balance sheets and cash flows and discussion of our financial condition.
- **Critical Accounting Policies.** Accounting estimates that we believe are important to understanding the assumptions and judgments incorporated in our reported financial results and forecasts.

Business Overview and Recent Events

On November 6, 2020 (“Closing Date”), the previously announced Business Combination was consummated following a special meeting of stockholders, where the stockholders of KBL considered and approved, among other matters, a proposal to adopt the Business Combination Agreement. Pursuant to the Business Combination Agreement, KBL Merger Sub merged with 180, with 180 continuing as the surviving entity and becoming a wholly-owned subsidiary of KBL. As part of the Business Combination, KBL issued 17,500,000 shares of common stock and equivalents to the stockholders of 180, in exchange for all of the outstanding capital stock of 180. The Business Combination became effective November 6, 2020 and 180 filed a Certificate of Amendment of its Certificate of Incorporation in Delaware to change its name to 180 Life Corp., and KBL changed its name to 180 Life Sciences Corp.

This MD&A and the related financial statements for the year ended December 31, 2020 primarily covers the historical operations of 180 to the Closing Date (November 6, 2020) and then the combined operations of the two entities from the Closing Date to December 31, 2020. The Business Combination was accounted for as a reverse recapitalization with the assets and liabilities of KBL being consolidated commencing with the Closing Date. Thus, the results of operations for the year ended December 31, 2020, only include the combined results after the Closing Date. See Note 5 - Business Combination to the accompanying Consolidated Financial Statements included at the end of this Annual Report on Form 10-K.

This MD&A and the related financial statements for the year ended December 31, 2019, primarily covers the historical operations of Katexco to the date of combination on July 16, 2019 and then for the combined operations of the three operating entities from the Closing Date to December 31, 2020. The Reorganization was accounted for as a reverse merger with the assets and liabilities of CBR Pharma and 180 LP valued and recorded as of the Closing Date under purchase accounting. Thus, the results of operations for the year ended December 31, 2020, only include the combined results after the Closing Date. See Note 4 - Reorganization and Recapitalization to the accompanying Consolidated Financial Statements included at the end of this Annual Report on Form 10-K.

Following the Closing of the Business Combination, we transitioned our operations to those of 180, which is a clinical stage biotechnology company headquartered in Palo Alto, California, focused on the development of therapeutics for unmet medical needs in chronic pain, inflammation, fibrosis and other inflammatory diseases, where anti-TNF therapy will provide a clear benefit to patients, by employing innovative research, and, where appropriate, combination therapy. We have three product development platforms:

- fibrosis and anti-tumor necrosis factor (“TNF”);
- drugs which are derivatives of cannabidiol (“CBD”); and
- alpha 7 nicotinic acetylcholine receptor (“α7nAChR”).

We have several future product candidates in development, including one product candidate in a Phase 2b clinical trial in the United Kingdom for Dupuytren’s disease, a condition that affects the development of fibrous connective tissue in the palm of the hand. 180 was founded by several world-leading scientists in the biotechnology and pharmaceutical sectors.

We intend to invest resources to successfully complete the clinical programs that are underway, discover new drug candidates, and develop new molecules to build up on its existing pipeline to address unmet clinical needs. The product candidates are designed via a platform comprised of defined unit operations and technologies. This work is performed in a research and development environment that evaluates and assesses variability in each step of the process in order to define the most reliable production conditions.

We may rely on third-party CMOs and other third parties for the manufacturing and processing of the product candidates in the future. We believe the use of contract manufacturing and testing for the first clinical product candidates is cost-effective and has allowed us to rapidly prepare for clinical trials in accordance with its development plans. We expect that third-party manufacturers will be capable of providing and processing sufficient quantities of these product candidates to meet anticipated clinical trial demands.

COVID-19 Pandemic

In December 2019, a new strain of the coronavirus (COVID-19) was reported in Mainland China and during the first quarter of 2020 the virus had spread to over 150 countries, resulting in a global pandemic. This COVID-19 pandemic and the public health responses to contain it have resulted in global recessionary conditions, which did not exist at December 31, 2019. Among other effects, government-mandated closures, stay-at-home orders and other related measures have significantly impacted global economic activity and business investment in general. A continuation or worsening of the levels of market disruption and volatility seen in the recent past could have an adverse effect on our ability to access capital, and on our business, results of operations and financial condition. We have been closely monitoring the developments and have taken active measures to protect the health of our employees, their families, and our communities. The ultimate impact on the 2021 fiscal year and beyond will depend heavily on the duration of the COVID-19 pandemic and public health responses, including government-mandated closures, stay-at-home orders and social distancing mandates, as well as the substance and pace of macroeconomic recovery, all of which are uncertain and difficult to predict considering the rapidly evolving landscape of the COVID-19 pandemic and the public health responses to contain it. As of December 31, 2020, COVID-19 has delayed and paused patient follow ups in one of our clinical trials to the end of 2021, additionally COVID-19 has delayed the initiation of certain clinical trials.

Close of Business Combination

On November 6, 2020 (the “Closing Date”), the Company consummated the previously announced Business Combination following a special meeting of stockholders held on November 5, 2020, where the stockholders of the Company considered and approved, among other matters, a proposal to adopt the Business Combination Agreement (as amended, the “Business Combination Agreement”), dated as of July 25, 2019. Pursuant to the Business Combination Agreement, among other things, a subsidiary of the Company merged with and into 180, with 180 continuing as the surviving entity and a wholly-owned subsidiary of the Company (the “Merger”). The Merger became effective on November 6, 2020. The Business Combination was accounted for as a reverse recapitalization of 180. All of 180’s capital stock outstanding immediately prior to the merger was exchanged for (i) 15,736,348 shares of 180LS common stock, (ii) 2 shares of Class C and Class K Special Voting Shares exchangeable into 1,763,652 shares of 180LS common stock which are presented as outstanding in the accompanying Statement of Changes in Stockholders’ Equity (Deficiency) due to the reverse recapitalization. The Company’s 6,928,645 outstanding shares of common stock are presented as being issued on the date of the Business Combination.

Financing

On February 19, 2021, the Company entered into a Securities Purchase Agreement with a number of institutional investors (the “Purchasers”) pursuant to which the Company agreed to sell to the Purchasers an aggregate of 2,564,000 shares (the “Shares”) of the Company’s common stock and warrants to purchase up to an aggregate of 2,564,000 shares of the Company’s common stock (the “Warrants”), at a combined purchase price of \$4.55 per Share and accompanying Warrant (the “Offering”). Aggregate gross proceeds from the Offering were approximately \$11.7 million, prior to deducting placement agent fees and estimated offering expenses payable by the Company. Net proceeds to the Company from the Offering, after deducting the placement agent fees and offering expenses payable by the Company, were approximately \$10.8 million. The Offering closed on February 23, 2021.

Maxim Group LLC (the “Placement Agent”) acted as exclusive placement agent in connection with the Offering pursuant to an Engagement Letter between the Company and the Placement Agent dated January 26, 2021 (as amended on February 18, 2021). Pursuant to the Engagement Letter, the Placement Agent received a commission equal to seven percent (7%) of the aggregate gross proceeds of the Offering, or \$816,634.

Conversion of Bridge Notes

On March 8, 2021, the holders of the Company’s convertible bridge notes, which were issued in December 27, 2019 and January 3, 2020 to various purchasers, converted an aggregate of \$432,384, which included accrued interest of \$66,633 owed under such convertible bridge notes, into an aggregate of 158,383 shares of common stock pursuant to the terms of such notes, as amended, at a conversion price of \$2.73 per share.

Convertible Debt Conversions

From November 27, 2020 to February 5, 2021, the holders of the Company’s convertible promissory notes converted an aggregate of \$4,782,107 owed under such convertible notes into an aggregate of 1,986,751 shares of common stock, pursuant to the terms of such notes, as amended, at conversion prices of between \$2.00 and \$3.29 per share.

Preferred Stock

On November 6, 2020, the Company issued Series A convertible preferred stock for gross proceeds of \$3,000,000. From November 27, 2020 to December 18, 2020, the holders of the Series A convertible preferred stock converted an aggregate conversion amount of \$3,666,667 into an aggregate of 1,619,144 shares of common stock, pursuant to the terms of the agreement, as amended, at conversion prices of between \$2.24 and \$2.31 per share.

We claim an exemption from registration pursuant to Section 4(a)(2) and/or Rule 506 of Regulation D of the Securities Act, for such issuances described above, since the foregoing issuances did not involve a public offering, the recipients were (a) “accredited investors”; and/or (b) had access to similar documentation and information as would be required in a Registration Statement under the Securities Act. The securities were offered without any general solicitation by us or our representatives. The securities are subject to transfer restrictions, and the certificates evidencing the securities contain an appropriate legend stating that such securities have not been registered under the Securities Act and may not be offered or sold absent registration or pursuant to an exemption therefrom and such securities may not be offered or sold in the United States absent registration or an exemption from registration under the Securities Act and any applicable state securities laws.

We claim an exemption from registration provided by Section 3(a)(9) of the Securities Act, for such note conversions, as the securities were exchanged by us with our existing security holders in transactions where no commission or other remuneration was paid or given directly or indirectly for soliciting such exchange.

See Note 18 – Subsequent Events to the audited financial statements included at the end of this Report for a more detailed discussion of these matters and other events subsequent to December 31, 2020.

Significant Financial Statement Components

Research and Development

To date, 180’s research and development expenses have related primarily to discovery efforts and preclinical and clinical development of its three product platforms: fibrosis and anti-TNF; drugs which are derivatives of CBD, and α 7nAChR. Research and development expenses consist primarily of costs associated with those three product platforms, which include:

- expenses incurred under agreements with 180’s collaboration partners and third-party contract organizations, investigative clinical trial sites that conduct research and development activities on its behalf, and consultants;
- costs related to production of clinical materials, including fees paid to contract manufacturers;
- laboratory and vendor expenses related to the execution of preclinical and clinical trials;
- employee-related expenses, which include salaries, benefits and stock-based compensation; and
- facilities and other expenses, which include expenses for rent and maintenance of facilities, depreciation and amortization expense and other supplies.

We expense all research and development costs in the periods in which they are incurred. We accrue for costs incurred as services are provided by monitoring the status of each project and the invoices received from its external service providers. We adjust our accrual as actual costs become known. When contingent milestone payments are owed to third parties under research and development arrangements or license agreements, the milestone payment obligations are expensed when the milestone results are achieved.

Research and development activities are central to our business model. Product candidates in later stages of clinical development generally have higher development costs than those in earlier stages of clinical development, primarily due to the increased size and duration of later-stage clinical trials. We expect that research and development expenses will increase over the next several years as clinical programs progress and as we seek to initiate clinical trials of additional product candidates. It is also expected that increased research and development expenses will be incurred as additional product candidates are selectively identified and developed. However, it is difficult to determine with certainty the duration and completion costs of current or future preclinical programs and clinical trials of product candidates.

The duration, costs and timing of clinical trials and development of product candidates will depend on a variety of factors that include, but are not limited to, the following:

- per patient trial costs;

- the number of patients that participate in the trials;
- the number of sites included in the trials;
- the countries in which the trials are conducted;
- the length of time required to enroll eligible patients;
- the number of doses that patients receive;
- the drop-out or discontinuation rates of patients;
- potential additional safety monitoring or other studies requested by regulatory agencies;
- the duration of patient follow-up;
- and the efficacy and safety profile of the product candidates.

In addition, the probability of success for each product candidate will depend on numerous factors, including competition, manufacturing capability and commercial viability. We will determine which programs to pursue and fund in response to the scientific and clinical success of each product candidate, as well as an assessment of each product candidate's commercial potential.

Because the product candidates are still in clinical and preclinical development and the outcome of these efforts is uncertain, we cannot estimate the actual amounts necessary to successfully complete the development and commercialization of product candidates or whether, or when, we may achieve profitability. Due to the early-stage nature of these programs, we do not track costs on a project-by-project basis. As these programs become more advanced, we intend to track the external and internal cost of each program.

General and Administrative

General and administrative expenses consist primarily of salaries and other staff-related costs, including stock-based compensation for shares of common stock issued to founders for personnel in executive, commercial, finance, accounting, legal, investor relations, facilities, business development and human resources functions and include vesting conditions.

Other significant general and administrative costs include costs relating to facilities and overhead costs, legal fees relating to corporate and patent matters, insurance, investor relations costs, fees for accounting and consulting services, and other general and administrative costs. General and administrative costs are expensed as incurred, and we accrue amounts for services provided by third parties related to the above expenses by monitoring the status of services provided and receiving estimates from our service providers and adjusting our accruals as actual costs become known.

It is expected that the general and administrative expenses will increase over the next several years to support our continued research and development activities, potential manufacturing activities, potential commercialization of its product candidates and the increased costs of operating as a public company. These increases are anticipated to include increased costs related to the hiring of additional personnel, developing commercial infrastructure, fees to outside consultants, lawyers and accountants, and increased costs associated with being a public company, as well as expenses related to services associated with maintaining compliance with NASDAQ listing rules and SEC requirements, insurance and investor relations costs.

Other Income

Other income primarily represents fees earned for research and development work performed for other companies, some of which are related parties.

Interest Expense

Interest expense consists primarily of interest expense related to debt instruments.

Gain (Loss) on Extinguishment of Convertible Notes

Gain (loss) on extinguishment of convertible notes represents the shortfall (excess) of the reacquisition cost of convertible notes as compared to their carrying value.

Change in Fair Value of Derivative Liabilities

Change in fair value of derivative liabilities represents the non-cash change in fair value of derivative liabilities during the reporting period.

Change in Fair Value of Accrued Issuable Equity

Change in fair value of accrued issuable equity represents the non-cash change in fair value of accrued equity prior to its formal issuance.

Income tax benefit	20,427	9,496
Net Loss	\$ (10,884,058)	\$ (25,394,046)

Research and Development

During the year ended December 31, 2020, we incurred research and development expenses of \$2,217,371 compared to \$1,981,299 incurred for the year ended December 30, 2019, representing an increase of \$236,072 or 12%. The increase includes a \$1,374,000 decrease in research and development expenses related to the temporary pausing of drug discovery services in 2020 provided by Evotec International GmbH in connection with a research and development agreement, a decrease in research and development expenses related to a reclassification of \$109,000 in connection with 2018 tax credits and \$327,000 in connection with estimated 2020 tax credits, partially offset by research and development agreements amended and entered into with Yissum during 2020 related to the formulation of cannabinoid metal salts and the evaluation of potential drugs in inflammation and pain of \$855,000, an increase of \$1,058,000 related to stock compensation paid to Yissum Research Development Company, an increase of \$192,000 due to two new research and development agreements that were entered into that relate to fibrosis and treatment of inflammation and respiratory viruses, and \$58,212 due to a decrease of miscellaneous research and development expenses.

Research and Development – Related Parties

During the year ended December 31, 2020, we incurred research and development expenses – related parties of \$75,633, representing twelve months of expenses in connection with the Company's consulting fees for clinical research versus six months of expense (approximately \$54,000) recognized during 2019.

General and Administrative

During the year ended December 31, 2020, we incurred general and administrative expenses of \$3,169,260 compared to \$5,607,808 incurred for the year ended December 30, 2019, representing a decrease of \$2,438,548 or 43%. The decrease is attributable to a swing from bad debt expense to bad debt recoveries in the amount of approximately \$2,400,000, a decrease in travel expenses of approximately \$394,000 due to COVID-19 travel restrictions, a decrease in professional and consulting fees of \$196,000 primarily attributable to increased merger and reorganization fees in 2019, partially offset by an increase in compensation of approximately \$212,000 for services provided by directors, officers or greater than 10% stockholders, and an increase of \$145,000 related to new patents, in connection with amounts paid to Stanford University of \$33,000 for anti-inflammatory and therapeutic technology, amounts paid to our IP counsels of \$54,000 related to patent filings and patent application filings, and amounts paid to a legal firm for \$70,000 related to treatment research.

General and Administrative – Related Parties

During the year ended December 31, 2020, we incurred general administrative expenses – related parties of \$185,848 compared to \$286,745 incurred for the year ended December 31, 2019, representing a decrease of \$100,897, or 35%. The decrease is primarily related to a decrease in rent expense resulting from the termination of an operating lease in the fourth quarter of 2019 and a decrease in bad debt expenses during 2020.

Modification of Stock Award – Related Parties

During the year ended December 31, 2019, we incurred \$12,959,360 of expenses related to the modification of a stock award as a result of the Company's waiver of its right of redemption for contingently redeemable shares that had been issued to a consultant to a subsidiary acquired in connection with the Reorganization. There was no stock award modification expense during the year ended December 31, 2020.

Rental Income – Related Parties

During the year ended December 31, 2019, we recognized \$25,946 of rental income from related parties in connection with the month-to-month subleases with various companies that share common officers and directors with the Company. The subleases terminated at the end of 2019. We did not recognize any sublease income during the year ended December 31, 2020.

Other (Expense) Income, Net

During the year ended December 31, 2020, we incurred other expenses, net of \$5,256,373 compared to \$4,540,256 for the year ended December 31, 2019, representing an increase in other expenses of \$716,117 or 16%. The increase was primarily due to an increase in the loss on extinguishment of convertible notes payable, net of \$1,877,467, an increase of \$1,816,309 in the change in fair value of derivative liabilities assumed at the Business Combination, and an increase of \$840,358 in interest expense related to additional promissory note issuances in 2020, a decrease in other income – related parties of \$312,329 earned pursuant to a research and development agreement, offset by a decrease in the aggregate amount of \$4,219,103 in the change in fair value of accrued issuable equity and accrued issuable equity – related parties. During the year ended December 31, 2020, there was a loss on sale of property and equipment of \$37,174 compared to a gain of \$1,714 during the year ended December 31, 2019. The loss during the years ended December 31, 2020 was related to the disposal of office furniture and fixtures. The gain during the year ended December 31, 2019 was related to the sale of office furniture and fixtures to a company that shares common officers and directors with the Company.

Liquidity and Capital Resources

As of December 31, 2020 and 2019, we had cash balances of \$2,108,544 and \$83,397, respectively, and working capital deficits of \$17,406,356 and \$8,892,515, respectively.

For the years ended December 31, 2020 and 2019, cash used in operating activities was \$3,871,961 and \$3,318,654, respectively. Our cash used in operations for the year ended December 31, 2020 was primarily attributable to our net loss of \$10,884,058, adjusted for non-cash expenses in the aggregate amount of \$4,679,931, as well as \$2,332,166 of net cash provided by changes in the levels of operating assets and liabilities. Our cash used in operations for the year ended December 31, 2019 was primarily attributable to our net loss of \$25,394,046, adjusted for non-cash expenses in the aggregate amount of \$19,038,761, as well as \$3,036,631 of net cash provided by changes in the levels of operating assets and liabilities.

For the years ended December 31, 2020 and 2019, cash provided by (used in) investing activities was \$14,490,724 and (\$708,149), respectively. Cash provided by investing activities during the year ended December 31, 2020 consisted of \$10,280,739 of cash released from a trust account in connection with the Business Combination, \$3,006,235 of cash acquired in the reverse recapitalization and \$1,203,750 of proceeds received from the collection of notes receivable. Cash used in investing activities during the year ended December 31, 2019 consisted of \$649,825 of cash used for the purchase of a note receivable, \$144,402 of cash used for the acquisition of intangible assets, partially offset by \$86,078 of cash acquired in connection with the Reorganization.

For the years ended December 31, 2020 and 2019, cash (used in) provided by financing activities was (\$8,733,927) and \$3,942,348, respectively. Cash used in financing activities during the year ended December 31, 2020 was due to payment of common stock redemptions in the amount of (\$9,006,493), repayments made to related parties in the amount of (\$201,859), and the repayment of loans in the amount of (\$72,843), partially offset by sources of cash from the net proceeds from the sale of common stock in the amount of \$72,500 and proceeds from loans and convertible notes in the amount of \$474,768. The net cash provided by financing activities during the year ended December 31, 2019 was comprised of \$1,257,045 proceeds from the sale and subscriptions for common stock, and \$2,685,303 cash proceeds from the issuance of loans and convertible notes.

Our product candidates may never achieve commercialization and we anticipate that we will continue to incur losses for the foreseeable future. We expect that our research and development expenses, general and administrative expenses, and capital expenditures will continue to increase. As a result, until such time, if ever, as we are able to generate substantial product revenue, we expect to finance our cash needs through a combination of equity offerings, debt financings or other capital sources, including potentially collaborations, licenses and other similar arrangements. Our primary uses of capital are, and we expect will continue to be, compensation and related expenses, third-party clinical research and development services, costs relating to the build-out of our headquarters and manufacturing facility, license payments or milestone obligations that may arise, laboratory and related supplies, clinical costs, manufacturing costs, legal and other regulatory expenses and general overhead costs.

Further, our operating plans may change, and we may need additional funds to meet operational needs and capital requirements for clinical trials and other research and development activities. We currently have no credit facility or committed sources of capital. Because of the numerous risks and uncertainties associated with the development and commercialization of our product candidates, we are unable to estimate the amounts of increased capital outlays and operating expenditures associated with our current and anticipated product development programs.

We have not yet achieved profitability and expect to continue to incur cash outflows from operations. It is expected that our research and development and general and administrative expenses will continue to increase and, as a result, we will eventually need to raise additional capital to fund our operations. If we are unable to obtain adequate funds on reasonable terms, we may be required to significantly curtail or discontinue operations or obtain funds by entering into financing agreements on unattractive terms. Our operating needs include the planned costs to operate our business, including amounts required to fund working capital and capital expenditures. The conditions outlined above indicate that there is substantial doubt about our ability to continue as a going concern within one year after the financial statement issuance date.

Our consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"), which contemplate continuation of the Company as a going concern and the realization of assets and satisfaction of liabilities in the normal course of business. The carrying amounts of assets and liabilities presented in the consolidated financial statements do not necessarily purport to represent realizable or settlement values. The condensed consolidated financial statements do not include any adjustment that might result from the outcome of this uncertainty.

Recent Funding Transactions

February 2021 Private Purchase

On February 19, 2021, we entered into a Securities Purchase Agreement (the "Purchase Agreement") with the purchasers identified on the signature pages thereto (the "Purchasers") pursuant to which the Company agreed to sell to the Purchasers an aggregate of 2,564,000 shares (the "Shares") of common stock and warrants to purchase up to an aggregate of 2,564,000 shares of common stock (the "SPA Warrants"), at a combined purchase price of \$4.55 per Share and accompanying SPA Warrant (the "Offering"). Aggregate gross proceeds from the Offering were approximately \$11.7 million, prior to deducting placement agent fees and estimated offering expenses payable by the Company. Net proceeds to the Company from the Offering, after deducting the placement agent fees and estimated offering expenses payable by the Company, were approximately \$10.8 million. The Offering closed on February 23, 2021.

The SPA Warrants have an exercise price equal to \$5.00, were immediately exercisable and are subject to customary anti-dilution adjustments for stock splits or dividends or other similar transactions. However, the exercise price of the SPA Warrants will not be subject to adjustment as a result of subsequent equity issuances at effective prices lower than the then-current exercise price. The SPA Warrants are exercisable until February 23, 2026. The SPA Warrants are subject to a provision prohibiting the exercise of such SPA Warrants to the extent that, after giving effect to such exercise, the holder of such Warrant (together with the holder's affiliates, and any other persons acting as a group together with the holder or any of the holder's affiliates), would beneficially own in excess of 4.99% of the outstanding common stock (which may be increased to 9.99% on a holder by holder basis, with 61 days prior written consent of the applicable holder).

In connection with the Offering, the Company also entered into a Registration Rights Agreement, dated as of February 23, 2021, with the Purchasers (the "Registration Rights Agreement"). Pursuant to the Registration Rights Agreement, the Company agreed to file a registration statement with the SEC on or prior to April 24, 2021 to register the resale of the Shares and the shares of common stock issuable upon exercise of the SPA Warrants (the "Warrant Shares"), and to cause such registration statement to be declared effective on or prior to June 23, 2021 (or, in the event of a "full review" by the SEC, August 22, 2021). The Company failed to file a registration statement with the SEC by May 24, 2021, triggering penalties equal to 3.0% of the aggregate gross proceeds of the securities sold in the Offering for the approximately two months of delay, which to date has totaled \$350,000.

The Company agreed in the Purchase Agreement that, until the earlier of (1) thirty (30) days after the date on which the registration statement that is filed pursuant to the Registration Rights Agreement to register the resale by the Purchasers of the Shares and the Warrant Shares is declared effective by the SEC (such date, the "Effective Date") and (2) thirty (30) days after such date that the Shares may be sold without limitation pursuant to Rule 144 under the Securities Act, neither the Company nor any subsidiary thereof would (i) issue, enter into any agreement to issue or announce the issuance or proposed issuance of any shares of common stock (or common stock equivalents) or (ii) file any registration statement or any amendment or supplement thereto, in each case other than (A) as contemplated pursuant to the Registration Rights Agreement and (B) as contemplated by that certain Registration Rights Agreement, dated June 12, 2020, by and between the Company and the parties signatory thereto.

Each of the directors and executive officers of the Company has entered into a lock-up agreement with the Company in connection with the Offering (each, a “Lock-Up Agreement”). Under the Lock-Up Agreements, from the date of the lock-up agreements until the earlier of (x) sixty (60) days after the Effective Date and (y) November 6, 2021, the directors and executive officers will not offer, sell, contract to sell, hypothecate, pledge or otherwise dispose of (or enter into any transaction which is designed to, or might reasonably be expected to, result in the disposition (whether by actual disposition or effective economic disposition due to cash settlement or otherwise) by the director or executive officer), directly or indirectly, or establish or increase a put equivalent position or liquidate or decrease a call equivalent position within the meaning of Section 16 of the Exchange Act, with respect to, any shares of common stock or securities convertible, exchangeable or exercisable into, shares of common stock, subject to limited exceptions. Maxim Group LLC (the “Placement Agent”) acted as exclusive placement agent in connection with the Offering pursuant to an Engagement Letter between the Company and the Placement Agent dated January 26, 2021 (together with the amendment letter dated February 18, 2021 (such amendment letter, the “Amendment Letter”), the “Engagement Letter”). The Engagement Letter provides, among other things, that the Placement Agent will receive a commission equal to seven percent (7%) of the aggregate gross proceeds of the Offering.

The Engagement Letter and the Purchase Agreement contain customary representations and warranties, agreements and obligations, conditions to closing and termination provisions. The representations, warranties and covenants contained in the Engagement Letter and the Purchase Agreement were made only for purposes of such agreement and as of specific dates, were solely for the benefit of the parties to the Engagement Letter and the Purchase Agreement, and may be subject to limitations agreed upon by the contracting parties.

Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements between us and any other entity that have, or are reasonably likely to have, a current or future effect on financial conditions, changes in financial conditions, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to stockholders.

Critical Accounting Policies

See Note 3 – Summary of Significant Accounting Policies of our consolidated financial statements included within this Annual Report for our critical accounting policies.

Recently Issued Accounting Pronouncements

See Note 3 – Summary of Significant Accounting Policies of our consolidated financial statements included within this Annual Report for a summary of recently issued and adopted accounting pronouncements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Pursuant to Item 305(e) of Regulation S-K (§ 229.305(e)), the Company is not required to provide the information required by this Item as it is a “smaller reporting company,” as defined by Rule 229.10(f)(1), however, the Company has provided the following information below relating to interest rate risk.

Interest Rate Risk

We are exposed to market risks in the ordinary course of its business. These risks primarily include interest rate sensitivities. As of December 31, 2020, we had \$2,108,544 in cash and cash equivalents. We intend to hold our cash in interest-bearing money market accounts. Our primary exposure to market risk is interest rate sensitivity, which is affected by changes in the general level of U.S. interest rates. Due to the short-term maturities of our cash equivalents and the low risk profile of its investments, an immediate 100 basis point change in interest rates would not have a material effect on the fair market value of our cash equivalents.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTAL DATA

See “Index to Consolidated Financial Statements” which appears on page F-1 of this Annual Report on Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES***No Management Assessment Report Regarding Internal Control Over Financial Reporting or Attestation Report of Registered Public Accounting Firm***

In accordance with the rules and regulations of the SEC, this Report does not include a report of management's assessment regarding internal control over financial reporting because management did not have sufficient time to conduct such an assessment after the closing of the Company's reverse recapitalization with KBL Merger Corp. IV, a special-purpose acquisition company at the time, on November 6, 2020. The Company intends to conduct a management assessment regarding internal control over financial reporting as of December 31, 2021. This Report also does not contain an attestation report of our registered public accounting firm regarding internal control over financial reporting since the Company, as an "emerging growth company," is not required to provide such report.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Although we did not conduct a formal assessment, management believes that the Company's internal controls over financial reporting were not effective as of December 31, 2020. Specifically, management's conclusion was based on the following material weaknesses which existed as of December 31, 2020:

- Financial Reporting Systems: The Company did not maintain a fully integrated financial consolidation and reporting system throughout the period and as a result, extensive manual analysis, reconciliation and adjustments were required in order to produce financial statements for external reporting purposes.
- Segregation of Duties: The Company does not currently have a sufficient complement of technical accounting and external reporting personnel commensurate to support standalone external financial reporting under public company or SEC requirements. Specifically, the Company did not effectively segregate certain accounting duties due to the small size of its accounting staff and maintain a sufficient number of adequately trained personnel necessary to anticipate and identify risks critical to financial reporting and the closing process. In addition, there were inadequate reviews and approvals by the Company's personnel of certain reconciliations and other processes in day-to-day operations due to the lack of a full complement of accounting staff.
- Insufficient written policies and procedures for accounting and financial reporting with respect to the requirements and application of GAAP and SEC disclosure requirements.
- Ineffective controls over period end financial disclosure and reporting processes.

A material weakness is a control deficiency or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. As a company with limited accounting resources, a significant amount of management's time and attention has been and will be diverted from our business to ensure compliance with these regulatory requirements.

Remediation Plan

The Company has recently established an Audit Committee to provide oversight of remediation efforts. Management intends to take steps to develop and enhance its internal controls over financial reporting, including:

- hiring additional accounting personnel;
- engaging an advisory firm to lead the remediation and assessment of internal controls;
- developing formal policies and procedures over accounting and reporting; and
- identifying additional information technology to improve financial reporting

Our management plans to establish procedures to monitor and evaluate the effectiveness of our internal controls over financial reporting on an ongoing basis and are committed to taking further action and implementing necessary enhancements or improvements. Management expects to complete its assessment of the design and operating effectiveness of its internal controls over financial reporting during 2021. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting through the date of this Report or during the quarter ended December 31, 2020, that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Executive Officers and Directors

The following table sets forth the name, age and position held by each of our executive officers and directors. Directors are elected for a period of one year and thereafter serve until the next annual meeting at which their successors are duly elected by the stockholders.

Name	Age	Position	Date First Appointed as Officer or Directors	Director Class*
Lawrence Steinman, M.D.	73	Executive Co-Chairman	November 2020	Class I
Sir Marc Feldmann, Ph.D.	76	Executive Co-Chairman	November 2020	Class II
James N. Woody, M.D., Ph.D.	78	Chief Executive Officer and Director	November 2020	Class I
Jonathan Rothbard, Ph.D.	69	Chief Scientific Officer	November 2020	
Ozan Pamir	30	Interim Chief Financial Officer and Secretary	November 2020	
Larry Gold, Ph.D.	79	Director	November 2020	Class II
Donald A. McGovern, Jr.	70	Director	November 2020	Class II
Pamela G. Marrone	64	Director	July 2021	Class II
Francis Knuettel II	55	Director	July 2021	Class I

* Terms expire at the annual meeting of stockholders to be held in 2021 (Class I) and 2022 (Class II) Directors.

There is no arrangement or understanding between our directors and executive officers and any other person pursuant to which any director or officer was or is to be selected as a director or officer, and there is no arrangement, plan or understanding as to whether non-management stockholders will exercise their voting rights to continue to elect the current board of directors (the “Board”). There are also no arrangements, agreements or understandings to our knowledge between non-management stockholders that may directly or indirectly participate in or influence the management of our affairs.

Biographical Information about our Directors

Lawrence Steinman, M.D. — Executive Co-Chairman (Class I Director)

Lawrence Steinman, M.D. has served as Co-Executive Chairman since the Closing of the Business Combination in November 2020. He also has primary scientific responsibility for our *α7nAChR* platform. Dr. Steinman served as Co-Chairman of 180 and as a member of its board of directors since April 2019. Prior to joining 180, he served on the Board of Directors of Centocor Biotech, Inc., from 1989 to 1998, the Board of Directors of Neurocine Biosciences from 1997 to 2005, the Board of Directors of Atreca from 2010 – 2019, the Board of Directors of BioAtla (NASDAQ:BCAB) from 2016 to present, the Board of Directors of Tolerion, Inc. from 2013 to 2020 and the Board of Directors of Alpha5 Integrin from 2020 to the present, and the Board of Directors of Pasithea from 2020 to the present. He is currently the George A. Zimmermann Endowed Chair in the Neurology Department at Stanford University and previously served as the Chair of the Interdepartmental Program in Immunology at Stanford University Medical School from 2003 to 2011. He is a member of the National Academy of Medicine and the National Academy of Sciences. He also founded the Steinman Laboratory at Stanford University, which is dedicated to understanding the pathogenesis of autoimmune diseases, particularly multiple sclerosis and neuromyelitis optica. He received the Frederic Sasse Award from the Free University of Berlin in 1994, the Sen. Jacob Javits Award from the U.S. Congress in 1988 and 2002, the John Dystel Prize in 2004 from the National MS Society in the U.S., the Charcot Prize for Lifetime Achievement in Multiple Sclerosis Research in 2011 from the International Federation of MS Societies and the Anthony Cerami Award in Translational Medicine by the Feinstein Institute of Molecular Medicine in 2015. He also received an honorary Ph.D. at the Hasselt University in 2008. He received his BA (physics) from Dartmouth College in 1968 and his MD from Harvard University in 1973. He also completed a fellowship in chemical immunology at the Weizmann Institute (1974 – 1977) and was an intern and resident at Stanford University Medical School. We believe Dr. Steinman’s extensive experience leading the research and development of numerous therapeutics qualify him to serve as a director.

Sir Marc Feldmann, Ph.D. — Executive Co-Chairman (Class II Director)

Sir Marc Feldmann, Ph.D. has served as Co-Executive Chairman since the Closing of the Business Combination in November 2020. He also has primary scientific responsibility for our synthetic CBD analogues programs. Prof. Feldmann has served as Co-Chairman of 180 and as a member of its board of directors since April 2018. Since August 2018, Prof. Feldmann has served as a director of Enosi Life Sciences Corp., a company which he founded that is a pre-clinical company focused on cancer and autoimmune deficiencies. He is an Emeritus Prof. at the Kennedy Institute of Rheumatology, Department of Orthopedics, Rheumatology and Musculoskeletal Sciences at Oxford. He is recognized as an expert in the development of anti-inflammatory therapeutics and has published over 700 papers reflecting an overarching commitment to both the cellular aspects of inflammatory autoimmune biology messenger molecules, cytokines and therapeutic applications. In 1983, he published a new hypothesis for the mechanism of induction of autoimmune diseases, highlighting the role of cytokines, which are potent signaling proteins and drive important processes like inflammation, immunity and cell growth. In collaboration with Sir Ravinder Maini, he showed that TNF was a key driver of rheumatoid arthritis, and that blocking it was beneficial, in novel test tube systems (*in vitro*) using human disease tissue from rheumatoid joints, animal models and a series of clinical trials. They developed a key patent for the targeting of excessive TNF Alpha and its optimal use, which was licensed to Centocor and eventually led to the acquisition of Centocor by Johnson & Johnson. He is a Fellow of the Royal College of Physicians, the Royal College of Pathologists. In recognition of his work, which has led to anti-TNF currently being the best-selling drug class in the world, Prof. Feldmann was elected to the Academy of Medical Sciences and the Royal Society in London, a Fellow of the Australian Academy of Science and a Foreign Member of the National Academy of Sciences, USA. He was knighted by Queen Elizabeth II in 2010 for his outstanding services to medicine, and also received the Australian equivalent, Companion of Honour (AC). He was awarded the Crafoord Prize in 2000, the Albert Lasker Award for Clinical Medical Research in 2003, the Cameron Prize for Therapeutics by the University of Edinburgh in 2004, the European Inventor Award (Lifetime Achievement) by the European Patent Office in 2007, the John Curtin Medal of the Australian National University in 2007 and the Dr. Paul Janssen Award for Biomedical Research in 2008, the Ernst Schering Prize in 2010 and the Gairdner International Award in 2014. He graduated with an MBBS degree from the University of Melbourne in 1967 and earned a Ph.D. in Immunology at the Walter and Eliza Hall Institute of Medical Research in 1972. He undertook postdoctoral research at the Imperial Cancer Research Fund's Tumour Immunology Unit in 1972 before moving to the Charing Cross Sunley Research Centre in 1985, which later merged with the Kennedy Institute of Rheumatology which then joined the Faculty of Medicine at Imperial College in 2000 and was transferred to the University of Oxford in 2011. We believe Prof. Feldmann's significant and successful experience leading the research and development of numerous therapeutics make him qualified to serve as a director.

James N. Woody, M.D., Ph.D. — Chief Executive Officer and Class I Director

James N. Woody, M.D., Ph.D. has served as our Chief Executive Officer and as a director since the Closing of the Business Combination in November 2020. Dr. Woody has served as the CEO of 180 since July 2020, and as a director of 180 Life Sciences since September 2020. Dr. Woody was a founder and served as Chairman of the Board of Directors for Viracta Pharmaceuticals, a lymphoma therapeutic company (July 2014 to December 2020). With the company undergoing a reverse merger into a public company, he resigned his Board member position and continues as a Board observer. He served as a General Partner of Latterell Venture Partners (February 2006 to December 2019) then moved to a Venture Partner position, for the two remaining LVP legacy companies, Viracta (NASDAQ:VIRX), and Perceptimed, a Pharmacy management company, where he continues to serve on the Board. He serves as an interim CEO for MaraBio Systems Inc., a startup autism diagnostic company, a position he held since November 2018, and also serves as Chairman of the Board for Enosi Life Sciences, a next generation TNF inhibitor company, which position he has held since July 2020. He served as a Board member of Integenix Inc. (2012 to 2018), and Neuraltus Pharmaceuticals, Inc. (February 2009 to December 2019). Dr. Woody was the founding CEO and Chairman of the Board of OncoMed Pharmaceuticals, Inc. (2004 to 2014), a NASDAQ listed company with a focus on antibodies targeting cancer stem cells. He previously served as a member of the Board of Directors of Protein Simple, formerly Cell Biosciences (2005 to 2014), acquired by Bio-Techne; Forte Bio Corporation, acquired by PALL in 2012 (2005 to 2012); Bayhill Therapeutics, Inc. (2004 to 2012); Femta Pharmaceuticals (2008 to 2012); and Proteolix, Inc. (2005 to 2009), acquired by Onyx for the multiple myeloma drug Carfilzomib. Dr. Woody also served on the Board of Directors of Talima Therapeutics, Inc. (2007 to 2011); HemaQuest Pharmaceuticals, Inc. (2009 to 2013); Calistoga (2009 to 2011), acquired by Gilead for the lymphoma drug Idealisib (Zeldig); Teralogic (2008 to 2014), a NASDAQ listed company; and Avidia (2003 to 2006), acquired by Amgen. From 1996 to 2004, He was President and General Manager of Roche Biosciences, Palo Alto, California (formerly Syntex), where he had responsibility for all bioscience research and development, ranging from genetics and genomics to clinical development of numerous new pharmaceuticals, as well as former Syntex administrative matters. From 1991 to 1996, Dr. Woody served as Senior Vice President of Research and Development and Chief Scientific Officer of Centocor, Inc., Malvern, Pennsylvania, where he assisted in the development of several new major antibody-based therapeutics in the fields of oncology and autoimmune and cardiovascular disease, including Remicade®, a multi-billion dollar pharmaceutical. Prior to that time, He served as a Medical Officer in the U.S. Navy, retiring as a CAPT (06) and as Commanding Officer of the Naval Medical Research and Development Command in 1991. Dr. Woody and his colleagues, with U.S. Navy and Congressional approval, founded the National Marrow Donor Program. He is a member of the Research Advisory Committee for the Veterans Gulf War Illness. Dr. Woody was a member of the Board of Directors of the Lucille Packard (Stanford) Children's Hospital (LPCH) in Palo Alto, California, (July 2002 to December 2020), serving as Chairman of the LPCH Quality Service and Safety Committee and a Member of the Patient Safety Oversight Committee. Dr. Woody also is a member of the Stanford Medical School Dean's Research Committee and Stanford "SPARK" research initiatives program. Dr. Woody received a B.S. in Chemistry from Andrews University, Berrien Springs, Michigan, an M.D. from Loma Linda University and Pediatric Subspecialty Training at Duke University School of Medicine and Harvard University School of Medicine. He received a Ph.D. in Immunology from the University of London, England. We believe that his expertise and experience in the life sciences and venture capital industries and his educational background make him qualified to serve as a director.

Larry Gold, Ph.D. — Class II Director

Larry Gold, Ph.D. has served as a director of our company since the Closing of the Business Combination in November 2020. Dr. Gold is the Founder and Chairman Emeritus of the Board, and former CEO of SomaLogic. Prior to SomaLogic, he also founded and was the Chairman of NeXagen, Inc., which later became NeXstar Pharmaceuticals, Inc. In 1999, NeXstar merged with Gilead Sciences, Inc. to form a global organization committed to the discovery, development and commercialization of novel products that treat infectious diseases. During his nearly 10 years at NeXstar, Dr. Gold held numerous executive positions including Chairman of the Board, Executive Vice President of R&D, and Chief Science Officer. Before forming NeXagen, he also co-founded and served as Co-Director of Research at Synergen, Inc., a biotechnology company later acquired by Amgen, Inc. Dr. Gold recently became the Chairman of Lab79, a new biotech company in Boulder, Colorado. Since 1970, Dr. Gold has been a professor at the University of Colorado at Boulder. While at the University, he served as the Chairman of the Molecular, Cellular and Developmental Biology Department from 1988 to 1992. Between 1995 and 2013, Dr. Gold received the CU Distinguished Lectureship Award, the National Institutes of Health Merit Award, the Career Development Award, the Lifetime Achievement Award from the Colorado Biosciences Association, and the Chiron Prize for Biotechnology. Dr. Gold was also awarded the 8th International Steven Hoogendijk Prize by the Dutch Batavian Society of Experimental Philosophy in 2018. In addition, Dr. Gold has been a member of the American Academy of Arts and Sciences since 1993 and the National Academy of Sciences since 1995. He is a fellow of the National Academy of Inventors. Dr. Gold also serves on the Board of Directors for CompleGen, Lab79, CNS Biosciences, Keck Graduate Institute, and the Biological Sciences Curriculum Study. Dr. Gold established the Gold Lab at the University of Colorado Boulder in 1971. Starting with basic research on bacteria and bacteriophage, the lab shifted its focus to human disease following the invention of the SELEX process in 1989. The Gold Lab today focuses on the utilization of biological and information technology to improve healthcare. Dr. Gold also began holding the GoldLab Symposia in 2010, an annual event that tackles big questions in healthcare. He is determined to change healthcare for the better through teaching, research, and debate among scientists and citizens throughout the world. Dr. Gold received a BA in 1963 in Biochemistry from Yale University, a Ph.D. in 1967 in Biochemistry from the University of Connecticut, and was an NIH Postdoctoral Fellow until 1969 at Rockefeller University.

Donald A. McGovern, Jr. — Class II Director

Donald A. McGovern, Jr. has served as a director of our company since the Closing of the Business Combination in November 2020. Mr. McGovern is a retired Vice Chairman, Global Assurance, of PricewaterhouseCoopers LLP (PwC). Through decades of leadership at PwC and board experience, Mr. McGovern brings wide-ranging operational, financial, accounting and audit and public company experience. He currently serves on the board of Cars.com. Mr. McGovern joined the Board of Cars.com in May 2017 upon the spinout of Cars.com from Tegna creating a new public company listed on the NYSE. Cars.com is a leading two-sided digital automotive marketplace. Mr. McGovern is chair of the Audit Committee, an audit committee financial expert under SEC regulations, and a member of the Compensation Committee. His past public board experience has been with CRH, plc. Mr. McGovern served two three-year terms (2013 – 2019) on the Board of CRH. During his tenure, he was Senior Independent Director, chair of the Remuneration Committee, a member of the Nomination Committee and of the Audit Committee and an audit committee financial expert under US SEC and UK FRC regulations. CRH is headquartered in Dublin, Ireland and listed on the London, Irish and New York Stock Exchanges. His past private company board experience includes Neuraltus Pharmaceuticals (2014 – 2019) and eASIC Corp (2016 – 2018). Mr. McGovern joined the Board of Neuraltus in preparation for Neuraltus doing a potential IPO. Neuraltus was a privately held, venture capital backed biopharmaceutical company dedicated to the development of therapeutics to treat neurological disorders. Mr. McGovern was chair of the Audit Committee and Compensation Committee. Mr. McGovern joined the Board of eASIC as the Company was in the process of filing a Form S-1 registration statement for an IPO. eASIC, a privately held, venture capital backed, fabless semiconductor company, was acquired by Intel Corporation. Mr. McGovern was chair of the Audit Committee and member of the Nomination Committee.

He is by background a High Technology Industry Assurance partner and served as the global engagement partner, lead audit partner, or concurring partner, for numerous Silicon Valley and other US public companies such as Cisco Systems, Applied Materials, Schlumberger, Ltd., Hewlett-Packard, Agilent Technologies, Nvidia, eBay, and Varian Medical. He also has served Silicon Valley pre-IPO companies and during his career had been involved in over 35 IPOs. He has extensive experience for SEC current reporting and securities filings related to initial public offerings and other SEC registration statements, due diligence, mergers and acquisitions, restructurings, divestitures and risk management.

Mr. McGovern spent 39 years at PwC including 26 years as a partner. Mr. McGovern was Vice Chairman, Global Assurance Leader and a member of the PwC Global Network Executive Team, from July 2008 until his retirement from PwC on June 30, 2013. He had been the Managing Partner of the firm's Silicon Valley Office from July 2001 to June 2007 and previously held other operating roles. In April 2001, Mr. McGovern was elected to the PwC Board of Partners and Principals of the US firm as well as to PwC's Global Board. He was the first ever lead director for the US Board (2001 – 2005) and was elected to serve 2 terms on each Board.

Mr. McGovern is a member of the American Institute of Certified Public Accountants and has an active CPA license to practice in California, Illinois and New York. He received a BA from Marquette University in 1972 and received an MBA from DePaul University in 1975. He also attended the Executive Program for Growing Companies of the Stanford University Graduate School of Business in 1992.

Pamela G. Marrone, Ph.D.— Class II Director

Dr. Marrone served as Chief Executive Officer and founder of Marrone Bio Innovations, Inc. (NASDAQ:MBII), a natural products company producing pest management and plant health products, from April 2006 until her retirement in August 2020, and continues to serve on the Board of Directors of such company. She also served as President of Marrone Bio from 2006 through January 2015 and from September 2015 to August 2017. Dr. Marrone is currently Executive Chairperson and Partner of Primary BioAg Innovations and Global BioAg Linkages, a pair of companies founded to help sincere innovators scale their bioag and agtech businesses and gain market adoption. Prior to founding Marrone Bio, in 1995 Dr. Marrone founded AgraQuest, Inc. (acquired by Bayer), where she served as chief executive officer until May 2004 and as President or Chairman from such time until March 2006, and where she led teams that discovered and commercialized several bio-based pest management products. She served as founding president and business unit head for Entotech, Inc., a biopesticide subsidiary of Denmark-based Novo Nordisk A/S (acquired by Abbott Laboratories), from 1990 to 1995, and held various positions at the Monsanto Company from 1983 until 1990, where she led the Insect Biology Group, which was involved in pioneering projects in transgenic crops, natural products and microbial pesticides. Dr. Marrone is an author of over a dozen invited publications, an inventor on more than 300 patents and is in demand as a speaker and has served on the boards and advisory councils of numerous professional and academic organizations. In 2016, Dr. Marrone was elected to the Cornell University Board of Trustees and completed her four-year term in July 2020. In 2013, Dr. Marrone was named the Sacramento region's "Executive of the Year" by the Sacramento Business Journal and "Cleantech Innovator of the Year" by the Sacramento Area Regional Technology Alliance and Best Manager with Strategic Vision by Agrow in 2014. In January 2019, she was awarded the "Sustie" award by the Ecological Farming Association for her decades-long leadership in sustainable agriculture. In March 2020, she was awarded the Most Admired CEO, Distinguished Career Award by the Sacramento Business Journal. Dr. Marrone earned a B.S. in Entomology from Cornell University and a Ph.D. in Entomology from North Carolina State University.

Francis Knuettel II, MBA— Class I Director

Mr. Knuettel has over 25 years of management experience in venture and private-equity backed public companies, and has advised public and private companies on financial management and controls, mergers and acquisitions, capital markets transactions and operating and financial restructurings. Mr. Knuettel has served as the Chief Executive Officer and director of Terra Tech Corp. (OTCQX:TRTC), a vertically integrated company focused on the cannabis sector with operations in California and Nevada, since December 2020. Mr. Knuettel was formerly Director of Capital and Advisory at Viridian Capital Advisors, a position he held from June 2020 to January 2021, following the sale but prior to the close of the acquisition of One Cannabis Group, Inc. (“OCG”) by an OTCQX listed company. At OCG, Mr. Knuettel served from June 2019 to January 2021 as Chief Financial Officer of the company, a leading cannabis dispensary franchisor, with over thirty cannabis dispensaries across seven states. Prior to joining OCG, Mr. Knuettel was Chief Financial Officer at MJardin Group, Inc. (“MJardin”) (August 2018 to January 2019, a Denver-based cannabis cultivation and dispensary management company, where he led the company’s IPO on the Canadian Securities Exchange. Following the IPO, Mr. Knuettel managed the merger with GrowForce, a Toronto-based cannabis cultivator, after which he moved over to the Chief Strategy Role (January 2019 to June 2019). In his role as CSO, he managed the acquisition of several private companies before recommending and executing the consolidation of management and other operations to Toronto and the closure of the executive office in Denver. From April to August 2018, Mr. Knuettel served as Chief Financial Officer of Aqua Metals, Inc. (NASDAQ:AQMS), an advanced materials firm that developed technology in battery recycling. Prior to that, from April 2014 to April, 2018, Mr. Knuettel served as Chief Financial Officer at Marathon Patent Group, Inc. (NASDAQ:MARA), a patent enforcement and licensing company. Before that, Mr. Knuettel held numerous CFO and CEO positions at early-stage companies where he had significant experience both building and restructuring businesses. He currently serves on the Board of Directors and in various committee roles of two private companies, one developing an anti-viral platform and the other focused on smart intubation devices. Mr. Knuettel graduated cum laude from Tufts University with a B.A. degree in Economics and from The Wharton School at the University of Pennsylvania with an M.B.A. in Finance and Entrepreneurial Management.

Director Qualifications

The Board believes that each of our directors is highly qualified to serve as a member of the Board. Each of the directors has contributed to the mix of skills, core competencies and qualifications of the Board. When evaluating candidates for election to the Board, the Board seeks candidates with certain qualities that it believes are important, including integrity, an objective perspective, good judgment, and leadership skills. Our directors are highly educated and have diverse backgrounds and talents and extensive track records of success in what we believe are highly relevant positions.

Biographical Information about our Executive Officers

Below is biographical information about the executive officers of our company, other than those executive officers who also serve on our board of directors, for whom biographical information can be found above.

Jonathan Rothbard, Ph.D. — Chief Scientific Officer

Jonathan Rothbard, Ph.D. has served as our Chief Scientific Officer since the Closing of the Business Combination in November 2020. Dr. Rothbard has served as the Chief Executive Officer and Chief Scientific Officer of Katexco since November 2018. Previously, he helped found ImmuLogic Pharmaceutical Corp., in Palo Alto, California, where he served as Chief Scientific Officer from 1989 to 1995, founded Amylin in San Diego, California in 1989, and CellGate in Redwood City, California, where he served as Chief Scientific Officer from 1998 to 2004. Dr. Rothbard also served on the faculty of the Department of Neurology at Stanford University Medical School and on the faculties of the Department of Chemistry and the Department of Rheumatology. He also previously served as the head of the Molecular Immunology Laboratory at the Imperial Cancer Research Fund in London. Dr. Rothbard received his BA from Hamilton College in 1973 and his Ph.D. from Columbia University in 1977 and completed post-doctoral fellowships at The Rockefeller University and Stanford University Medical School.

Ozan Pamir, CFA — Interim Chief Financial Officer and Secretary

Ozan Pamir has served as our interim Chief Financial Officer since November 2020. Mr. Pamir has also served as the Chief Financial Officer and as a member of the Board of Directors of 180, our wholly-owned subsidiary following the Closing of the Business Combination, since October 2018. Mr. Pamir has also served as the Chief Financial Officer and as a member of the Board of Directors of Unify Pharmaceuticals since August 2019, and as the Chief Financial Officer of Enosi Life Sciences between May 2020 and April 2021, both of which are pre-clinical companies focused on autoimmune diseases. Previously, Mr. Pamir served in various positions with Echelon Wealth Partners, a leading Canadian investment bank, from June 2014 to October 2018, including Investment Banking Analyst (June 2014 – June 2015), Senior Associate, Investment Banking (June 2015 – September 2017) and Vice President of Investment Banking (September 2017 – October 2018), as well as Investment Banking Analyst of OCI Groups from October 2013 to June 2014. Mr. Pamir holds an Economics and Finance degree from McGill University and is a CFA Charterholder.

Family Relationships

There are no family relationships among executive officers and directors.

Classified Board of Directors

The board is divided into two classes. At each annual general meeting of stockholders, the successors to directors whose terms then expire will be elected to serve from the time of election and qualification until the second annual meeting following the election. The directors are divided among the two classes as follows:

- the Class I directors are Lawrence Steinman, James N. Woody, and Francis Kneuttel II, and their terms expire at the annual meeting of stockholders to be held in 2021; and
- the Class II directors are Larry Gold, Sir Marc Feldmann and Donald A. McGovern, Jr., and Pamela G. Marrone and their terms expire at the annual meeting of stockholders to be held in 2022.

Any additional directorships resulting from an increase in the number of directors will be distributed among the two classes so that, as nearly as possible, each class will consist of one-half of the directors. The division of the board of directors into two classes with staggered two-year terms may delay or prevent a change of our management or a change in control.

Arrangements between Officers and Directors

There is no arrangement or understanding between our directors and executive officers and any other person pursuant to which any director or officer was or is to be selected as a director or officer. There are also no arrangements, agreements or understandings to our knowledge between non-management stockholders that may directly or indirectly participate in or influence the management of our affairs.

Other Directorships

Other than Mr. McGovern and Prof. Steinman, who serve on the Board of Directors of Cars.com and Bioatla (NASDAQ:BCAB), respectively, none of the directors of the Company are also directors of issuers with a class of securities registered under Section 12 of the Exchange Act (or which otherwise are required to file periodic reports under the Exchange Act).

Involve ment in Certain Legal Proceedings

To the best of our knowledge, during the past ten years, none of our directors or executive officers were involved in any of the following: (1) any bankruptcy petition filed by or against any business of which such person was a general partner or executive officer either at the time of the bankruptcy or within two years prior to that time; (2) any conviction in a criminal proceeding or being a named subject to a pending criminal proceeding (excluding traffic violations and other minor offenses); (3) being subject to any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining, barring, suspending or otherwise limiting his involvement in any type of business, securities or banking activities; (4) being found by a court of competent jurisdiction (in a civil action), the SEC or the Commodities Futures Trading Commission to have violated a federal or state securities or commodities law; (5) being the subject of, or a party to, any Federal or State judicial or administrative order, judgment, decree, or finding, not subsequently reversed, suspended or vacated, relating to an alleged violation of (i) any Federal or State securities or commodities law or regulation; (ii) any law or regulation respecting financial institutions or insurance companies including, but not limited to, a temporary or permanent injunction, order of disgorgement or restitution, civil money penalty or temporary or permanent cease-and-desist order, or removal or prohibition order; or (iii) any law or regulation prohibiting mail or wire fraud or fraud in connection with any business entity; or (6) being the subject of, or a party to, any sanction or order, not subsequently reversed, suspended or vacated, of any self-regulatory organization (as defined in Section 3(a)(26) of the Exchange Act), any registered entity (as defined in Section 1(a)(29) of the Commodity Exchange Act), or any equivalent exchange, association, entity or organization that has disciplinary authority over its members or persons associated with a member.

Board Leadership Structure

Our board of directors has the responsibility for selecting our appropriate leadership structure. In making leadership structure determinations, the board of directors considers many factors, including the specific needs of our business and what is in the best interests of our stockholders. Our current leadership structure is comprised of separate Chairmen of the board of directors and Chief Executive Officer (“CEO”). Lawrence Steinman, M.D. and Sir Marc Feldmann, Ph.D. serve as co-Chairmen of the board of directors and James N. Woody, M.D., Ph.D. serves as CEO. The board of directors does not have a policy as to whether the Chairmen should be independent directors, affiliated directors, or a member of management. Our board of directors believes that the Company’s current leadership structure is appropriate because it effectively allocates authority, responsibility, and oversight between management (the Company’s CEO, James N. Woody, M.D., Ph.D.) and the members of our board of directors. It does this by giving primary responsibility for the operational leadership and strategic direction of the Company to its CEO, while enabling our Chairmen to facilitate our board of directors’ oversight of management, promote communication between management and our board of directors, and support our board of directors’ consideration of key governance matters. The board of directors believes that its programs for overseeing risk, as described below, would be effective under a variety of leadership frameworks and therefore do not materially affect its choice of structure.

Risk Oversight

Effective risk oversight is an important priority of the board of directors. Because risks are considered in virtually every business decision, the board of directors discusses risk throughout the year generally or in connection with specific proposed actions. The board of directors’ approach to risk oversight includes understanding the critical risks in our business and strategy, evaluating our risk management processes, allocating responsibilities for risk oversight among the full board of directors, and fostering an appropriate culture of integrity and compliance with legal responsibilities.

The board of directors exercises direct oversight of strategic risks to us. Our Audit Committee reviews and assesses our processes to manage business and financial risk and financial reporting risk. It also reviews our policies for risk assessment and assesses steps management has taken to control significant risks. Our Compensation Committee oversees risks relating to compensation programs and policies. In each case management periodically reports to our board of directors or the relevant committee, which provides the relevant oversight on risk assessment and mitigation.

Committees of the Board of Directors

Our board of directors has four standing committees: an audit committee, a compensation committee, a nominating and corporate governance committee and a risk, safety and regulatory committee. All four committees are composed solely of independent directors. We filed a copy of our audit committee charter and our compensation committee charter as exhibits to the registration statement that we filed in connection with our IPO. We filed a copy of our nominating and corporate governance committee charter as an exhibit to our Current Report on Form 8-K that we filed with the SEC on November 12, 2020. Our risk, safety and regulatory committee charter is filed as an exhibit to this Annual Report on Form 10-K. You can review the charters for our standing committees by accessing our public filings at the SEC’s web site at www.sec.gov. The current members of the committees of our board of directors are as follows:

Director Name	Independent	Audit Committee	Compensation Committee	Nominating and Corporate Governance Committee	Risk, Safety and Regulatory Committee
Lawrence Steinman, M.D. (1)					
Sir Marc Feldmann, Ph.D. (1)					
James N. Woody, M.D., Ph.D.					
Larry Gold, Ph.D.	X	M		C	
Donald A. McGovern, Jr. (2)	X	C	M		M
Pamela G. Marrone, Ph.D.	X		M		C
Francis Knuettel II, MBA	X	M			M

(1) Co-Executive Chairman of the Board of Directors.

(2) Lead independent director.

C Chairperson of the Committee.

M Member of the Committee.

Audit Committee

NASDAQ listing standards and applicable SEC rules require that the audit committee of a listed company be comprised solely of independent directors. We have established an audit committee of the board of directors, which currently consists of Donald A. McGovern, Jr. (Chair), Larry Gold, Ph.D., and Francis Knuettel II, MBA. Each member of the audit committee meets the independent director standard under NASDAQ's listing standards and under Rule 10A-3(b)(1) of the Exchange Act. Each member of the audit committee is financially literate and our board of directors has determined that Mr. McGovern qualifies as an "audit committee financial expert" as defined in applicable SEC rules.

Responsibilities of the audit committee include:

- the appointment, compensation, retention, replacement, and oversight of the work of the independent registered public accounting firm and any other independent registered public accounting firm engaged by us;
- pre-approving all audit and non-audit services to be provided by the independent registered public accounting firm or any other registered public accounting firm engaged by us, and establishing pre-approval policies and procedures;
- reviewing and discussing with the independent registered public accounting firm all relationships the firm have with us in order to evaluate their continued independence;
- setting clear hiring policies for employees or former employees of the independent registered public accounting firm;
- setting clear policies for audit partner rotation in compliance with applicable laws and regulations;
- obtaining and reviewing a report, at least annually, from the independent registered public accounting firm describing (i) the independent auditor's internal quality-control procedures and (ii) any material issues raised by the most recent internal quality-control review, or peer review, of the audit firm, or by any inquiry or investigation by governmental or professional authorities, within, the preceding five years respecting one or more independent audits carried out by the firm and any steps taken to deal with such issues;
- reviewing and approving any related party transaction required to be disclosed pursuant to Item 404 of Regulation S-K promulgated by the SEC prior to us entering into such transaction; and
- reviewing with management, the independent registered public accounting firm, and our legal advisors, as appropriate, any legal, regulatory or compliance matters, including any correspondence with regulators or government agencies and any employee complaints or published reports that raise material issues regarding our consolidated financial statements or accounting policies and any significant changes in accounting standards or rules promulgated by the Financial Accounting Standards Board, the SEC or other regulatory authorities.

Compensation Committee

We have established a compensation committee of the board of directors. The members of our compensation committee are Donald A. McGovern, Jr. (Chair), Larry Gold, Ph.D. and Pamela G. Marrone, PhD. We have adopted a compensation committee charter, which details the principal functions of the compensation committee, including:

- reviewing and approving on an annual basis the corporate goals and objectives relevant to our Chief Executive Officer's compensation, evaluating our Chief Executive Officer's performance in light of such goals and objectives and determining and approving the remuneration (if any) of our Chief Executive Officer based on such evaluation in executive session at which the Chief Executive Officer is not present;
- reviewing and approving the compensation of all of our other executive officers;
- reviewing our executive compensation policies and plans;

- implementing and administering our incentive compensation equity-based remuneration plans;
- assisting management in complying with our proxy statement and annual report disclosure requirements;
- approving all special perquisites, special cash payments and other special compensation and benefit arrangements for our executive officers and employees;
- producing a report on executive compensation to be included in our annual proxy statement; and
- reviewing, evaluating and recommending changes, if appropriate, to the remuneration for directors.

The compensation committee charter also provides that the compensation committee may, in its sole discretion, retain or obtain the advice of a compensation consultant, legal counsel or other adviser and will be directly responsible for the appointment, compensation and oversight of the work of any such adviser. However, before engaging or receiving advice from a compensation consultant, external legal counsel or any other adviser, the compensation committee will consider the independence of each such adviser, including the factors required by NASDAQ and the SEC.

Nominating and Corporate Governance Committee

We have established a nominating and corporate governance committee of the board of directors. The members of our compensation committee are Larry Gold, Ph.D. (Chair), and Donald A. McGovern, Jr. Our board has determined that each member is independent under applicable NASDAQ listing standards. We have adopted a compensation committee charter, which details the principal functions of the nominating and corporate governance committee. Specific responsibilities of the nominating and corporate governance committee include:

- making recommendations to our Board regarding candidates for directorships;
- making recommendations to our Board regarding the size and composition of our Board;
- overseeing our corporate governance policies and reporting; and
- making recommendations to our Board concerning governance matters.

Risk, Safety and Regulatory Committee

In May 2021, the Board of Directors adopted a charter of a Risk, Safety and Regulatory Committee, which committee is tasked with, among other things, overseeing the Company's risk management policies and procedures, reviewing the Company's principal risk and compliance policies and the Company's approach to risk management, dealing with risk identification and risk assessment for the principal operational, business, compliance and ethics risks facing the Company, whether internal or external in nature including, but not limited to, the risks and incident responses associated with: information security; business continuity and disaster recovery; vendor management; operations risks; supply chain risks; employment and workplace conduct practices; safety and environmental matters; and legal risks, overseeing the Company's compliance programs, reviewing the Company's compliance with relevant laws, regulations, and corporate policies (including the Company's Code of Ethics), overseeing significant complaints and other matters raised through the Company's compliance reporting mechanisms, including the review and investigation of such matters as necessary, reviewing significant government inquiries or investigations and other significant legal actions, reviewing information about current and emerging legal and regulatory compliance risks and enforcement trends that may affect the Company's business operations, performance or strategy, meeting, and reviewing and discussing with management the implementation and enforcement of policies, standards, procedures and risk management programs, and compliance with applicable laws and regulations, related to the manufacture and supply of products consistent with applicable high-quality and medical product safety standards. The members of our Risk, Safety and Regulatory Committee are Pamela G. Marrone, Ph.D. (Chair), Donald A. McGovern, Jr., and Francis Kneuttel II, MBA. Our board has determined that each member is independent under applicable NASDAQ listing standards.

Insider Trading/Anti-Hedging Policies

All employees, officers and directors of, and consultants and contractors to, us or any of our subsidiaries are subject to our Insider Trading Policy. The policy prohibits the unauthorized disclosure of any nonpublic information acquired in the workplace, the misuse of material nonpublic information in securities trading. The policy also includes specific anti-hedging provisions.

To ensure compliance with the policy and applicable federal and state securities laws, all individuals subject to the policy must refrain from the purchase or sale of our securities except in designated trading windows or pursuant to preapproved 10b5-1 trading plans. Even during a trading window period, certain identified insiders, which include the named executive officers and directors, must comply with our designated pre-clearance policy prior to trading in our securities. The anti-hedging provisions prohibit all employees, officers and directors from engaging in “short sales” of our securities.

Policy on Equity Ownership

The Company does not have a policy on equity ownership at this time. However, as illustrated in the beneficial ownership table under “Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters,” below, all Named Executive Officers and directors are beneficial owners of stock of the Company.

Compensation Recovery

Under the Sarbanes–Oxley Act of 2002 (the “Sarbanes-Oxley Act”), in the event of misconduct that results in a financial restatement that would have reduced a previously paid incentive amount, we can recoup those improper payments from our Chief Executive Officer and Chief Accounting Officer. We plan to implement a claw back policy in the future, although we have not yet implemented such policy.

Meetings of the Board of Directors and Annual Meeting

During the fiscal year that ended on December 31, 2020, following the Business Combination, the Board held five meetings and took various other actions via the unanimous written consent of the board of directors and the various committees described below. Each director attended all of the Board of Directors meetings and committee meetings of the committees on which they served, during the fiscal year ended December 31, 2020 (following the Business Combination). Each director of the Company is expected to be present at annual meetings of stockholders, absent exigent circumstances that prevent their attendance. Where a director is unable to attend an annual meeting in person but is able to do so by electronic conferencing, the Company will arrange for the director’s participation by means where the director can hear, and be heard, by those present at the meeting.

Executive Sessions of the Board of Directors

The independent members of our board of directors meet in executive session (with no management directors or management present) from time to time. The executive sessions include whatever topics the independent directors deem appropriate.

Code of Ethics

We have adopted a Code of Ethics applicable to our directors, officers and employees, which we filed as an exhibit to the registration statement that we filed in connection with our IPO. You can review our Code of Ethics by accessing our public filings at the SEC’s web site at www.sec.gov. In addition, a copy of our Code of Ethics will be provided without charge upon request from us. We intend to disclose any amendments to or waivers of certain provisions of our Code of Ethics in a Current Report on Form 8-K.

Stockholder Communications

Our stockholders and other interested parties may communicate with members of the board of directors by submitting such communications in writing to our Corporate Secretary, 3000 El Camino Real, Bldg. 4, Suite 200, Palo Alto, California 94306, who, upon receipt of any communication other than one that is clearly marked “Confidential,” will note the date the communication was received, open the communication, make a copy of it for our files and promptly forward the communication to the director(s) to whom it is addressed. Upon receipt of any communication that is clearly marked “Confidential,” our Corporate Secretary will not open the communication, but will note the date the communication was received and promptly forward the communication to the director(s) to whom it is addressed. If the correspondence is not addressed to any particular board member or members, the communication will be forwarded to a board member to bring to the attention of the board of directors.

Delinquent Section 16(a) Reports

Section 16(a) of the Exchange Act requires our executive officers and directors and persons who own more than 10% of a registered class of our equity securities to file with the SEC initial statements of beneficial ownership, reports of changes in ownership and annual reports concerning their ownership in our common stock and other equity securities, on Form 3, 4 and 5 respectively. Executive officers, directors and greater than 10% stockholders are required by the SEC regulations to furnish our company with copies of all Section 16(a) reports they file.

Based solely on our review of the copies of such reports received by us, we believe that all filings required to be made under Section 16(a) during 2020 were timely made, except that Marlene Krauss, M.D., the Chief Executive Officer of KBL until the Closing of the Business Combination, failed to timely disclose nine transactions on Form 4, and as a result three Form 4s were untimely filed; Dr. James N. Woody, our Chief Executive Officer, inadvertently failed to timely report one transaction on Form 4, and as a result one Form 4 was untimely filed; Prof. Sir Marc Feldmann, our Co-Executive Chairman, inadvertently failed to timely file a Form 3 reporting his initial beneficial ownership of our securities upon his appointment as a member of the board of directors; Prof. Sir Marc Feldmann, our Co-Executive Chairman, inadvertently failed to timely file a Form 3 reporting his initial beneficial ownership of our securities upon his appointment as a member of the board of directors; Prof. Richard W. Barker, MA, D.Phil, OBE, our former director, inadvertently failed to timely file a Form 3 reporting his initial beneficial ownership of our securities upon his appointment as a member of the board of directors; Jonathan Rothbard, Ph.D., our Chief Science Officer, inadvertently failed to timely file a Form 3 reporting his initial beneficial ownership of our securities upon his appointment as Chief Science Officer; and Ozan Pamir, our Interim Chief Financial Officer, inadvertently failed to timely file a Form 3 reporting his initial beneficial ownership of our securities upon his appointment as Interim Chief Financial Officer.

New Directors; Change in Board Committees

On May 27, 2021, the Board of Directors appointed Russell T. Ray, MBA and Teresa DeLuca MD, MBA as members of the Board of Directors of the Company, to fill two vacancies on the Board of Directors, originally to be effective as of June 15, 2021. Effective on June 8, 2021, the Board of Directors, increased the number of members of the Board of Directors from seven to nine, and appointed Francis Knuettel II, MBA, and Pamela G. Marrone, Ph.D., as members of the Board, to fill the two new vacancies on the Board, effective as of the later of the filing of this report and June 28, 2021, and changed the effective date of the appointments of Mr. Ray and Dr. DeLuca to the same date. Subsequently, the Board of Directors appointed Pamela Marrone, Ph.D. and Francis Knuettel II, MBA as members of the Board of Directors on July 2, 2021, and determined that the appointments of Russell T. Ray, MBA and Teresa DeLuca MD, MBA would be effective upon the filing of this Annual Report on Form 10-K.

The Board of Directors determined that all new director appointees are “independent” pursuant to the rules of the NASDAQ Capital Market.

Also on June 8, 2021, the Board of Directors confirmed the following Board committee appointments, each effective upon the filing of this Annual Report on Form 10-K:

Director Name	Independent	Audit Committee	Compensation Committee	Nominating and Corporate Governance Committee	Risk, Safety and Regulatory Committee
Lawrence Steinman, M.D. (1)					
Sir Marc Feldmann, Ph.D. (1)					
James N. Woody, M.D., Ph.D.					
Larry Gold, Ph.D.	X	M		C	
Donald A. McGovern, Jr. (2)	X	C	M		M
Russell T. Ray, MBA	X	M	M	M	
Teresa DeLuca MD, MBA	X		C	M	
Pamela G. Marrone, Ph.D.	X		M		C
Frank Knuettel II, MBA	X	M			M

(1) Co-Executive Chairman of the Board of Directors.

(2) Lead independent director.

C Chairperson of the Committee.

M Member of the Committee.

In connection with each new director's appointment to the Board, such persons entered into offer letters with the Company, dated on or around May 21, 2021 (collectively, the "Offer Letters"). The Offer Letters set forth the compensation that the new directors will be entitled to, including a grant of options to purchase \$425,000 of value of shares of the Company's common stock (value per share and number of shares determined by the Black-Scholes calculation on the date of grant) (the "Initial Option Grant"), which will vest as to 1/48 of the balance of the option shares upon each month of service after the date of grant and have an exercise price per share equal to the closing sales price of a share of common stock on the grant date, provided that to the extent such grant results in less than an option to purchase 100,000 shares of the Company's common stock, it is expected that the difference in shares between the Initial Option Grant and 100,000 shares would be granted in the next compensation year (vesting as to 1/36 of the balance of the option shares upon each month of service after the date of grant and having an exercise price per share equal to the closing sales price of a share of common stock on the grant date); and cash fees consistent with the compensation policy of the Board of Directors as amended from time to time, which currently consists of \$40,000 per compensation year for an annual retainer fee plus additional committee fees of \$5,000 for each of the Compensation Committee or Nomination and Corporate Governance Committee, and \$7,500 for each of the Audit Committee or Risk Committee, on which the director serves, \$10,000 for the Chairperson of the Compensation Committee and the Nomination and Corporate Governance Committee and \$15,000 for the Chairperson of the Audit Committee and of the Risk Committee, per year.

The biographical information for Russell T. Ray, MBA and Teresa DeLuca MD, MBA are included in the Current Report on [Form 8-K](#) filed by the Company with the SEC on May 27, 2021 and for Francis Knuettel II, MBA, and Pamela G. Marrone, Ph.D., are included in the Current Report on [Form 8-K](#) filed by the Company with the SEC on June 10, 2021.

ITEM 11. EXECUTIVE COMPENSATION

Compensation of Directors and Officers by KBL Merger Corp. IV prior to the Closing of the Business Combination

None of the executive officers or directors of KBL, including Marlene Krauss, M.D., the Chief Executive Officer of KBL until the Closing of the Business Combination, were paid cash compensation in connection with services rendered to our company for the years ended December 31, 2020 and 2019. Commencing on June 2, 2017 through the Closing of the Business Combination, we paid our Sponsor a total of \$10,000 per month for administrative support and associated costs. Our Sponsor, executive officers and directors, or any of their respective affiliates, were reimbursed for any out-of-pocket expenses incurred in connection with activities on our behalf, such as identifying potential target businesses and performing due diligence on suitable business combinations. Our independent directors prior to the Closing of the Business Combination reviewed on a quarterly basis all payments that were made to our Sponsor, officers, directors or our or their affiliates. All of the directors and executive officers of KBL immediately prior to the Closing of the Business Combination resigned from their positions upon the Closing of the Business Combination.

In addition to the foregoing, on June 12, 2020, KBL entered into a resignation agreement with Dr. Krauss, whereby, among other things, upon the closing of the Business Combination, the employment of Dr. Krauss with the combined company would be terminated, and KBL became obligated to pay a cash severance payment of \$500,000 to Dr. Krauss (of which \$200,000 was paid during September 2020). As of December 31, 2020, there are no balances outstanding due to Dr. Krauss.

Compensation of Officers by 180 Life Sciences Corp. following the Closing of the Business Combination

General

Upon the Closing of the Business Combination, James N. Woody, M.D., Ph.D., the Chief Executive Officer of 180, was appointed to serve as the Chief Executive Officer of our company, and Jonathan Rothbard, Ph.D., the Chief Executive Officer and Chief Scientific Officer of Katexco, was appointed to serve as the Chief Scientific Officer of our company. Also following the Closing of the Business Combination, Ozan Pamir, the Chief Financial Officer of 180, continued to serve in that position for 180, and on November 27, 2020, he was appointed to serve as the Interim Chief Financial Officer of our company.

A description of the employment or services agreements with each of the foregoing persons is set forth below.

Description of Employment Agreements

James N. Woody 180 Employment Agreement

James N. Woody, M.D., Ph.D. and 180 entered into an employment agreement on July 1, 2020 (which agreement was amended on September 18, 2020), effective as of July 1, 2020, whereby Dr. Woody served as the Chief Executive Officer of 180 and began serving as our Chief Executive Officer following the Closing of the Business Combination. The initial term of the employment agreement started on July 1, 2020, is for a period of one (1) year and is subject to automatic renewal for consecutive one (1) year terms unless either party provides 60 days' notice. Dr. Woody's annual base salary was initially \$250,000 per year from July 1, 2020 to September 1, 2020, and increased to \$360,000 per year on September 1, 2020, provided that all salary was accrued and continues to be accrued. The agreement provides that Dr. Woody's salary is to be renegotiated with the completion of the next qualified financing of over \$20 million. Dr. Woody is eligible to participate in any stock option plans and receive other equity awards, as determined from time to time.

James N. Woody Amended and Restated Employment Agreement

On February 25, 2021, the Company entered into an Amended and Restated Employment Agreement with James N. Woody (the "A&R Agreement"), dated February 24, 2021, and effective November 6, 2020, which replaced and superseded the July 2020 agreement with 180 as discussed above. Pursuant to the A&R Agreement, Dr. Woody agreed to serve as the Chief Executive Officer of the Company. The agreement replaced his prior agreement with the Company. The A&R Agreement has a term of three years, and is automatically renewable thereafter for additional one-year periods, unless either party provides the other at least 90 days written notice of their intent to not renew the agreement. Dr. Woody's annual base salary under the agreement will initially be \$450,000 per year. The annual salary is also subject to automatic 5% yearly increases.

Dr. Woody is also eligible to receive an annual bonus, with a target bonus equal to 45% of his then-current base salary, based upon the Company's achievement of performance and management objectives as set and approved by the board of directors and/or Compensation Committee in consultation with Dr. Woody. At Dr. Woody's option, the annual bonus can be paid in cash or the equivalent value of the Company's common stock or a combination therefore. The board of directors, as recommended by the Compensation Committee, may also award Dr. Woody bonuses from time to time (in stock, options, cash, or other forms of consideration) in its discretion.

As additional consideration for Dr. Woody agreeing to enter into the agreement, the Company awarded him options to purchase 1,400,000 shares of the Company's common stock, which have a term of 10 years, and an exercise price of \$4.43 per share (the closing sales price on the date the board of directors approved the grant (February 26, 2021)). The options as subject to the Company's 2020 Omnibus Incentive Plan and vest at the rate of (a) 1/5th of such options on the grant date; and (b) 4/5th of such options vesting ratably on a monthly basis over the following 36 months on the last day of each calendar month; provided, however, that such options vest immediately upon Dr. Woody's death or disability, termination without cause or a termination by Dr. Woody for good reason (as defined in the agreement), a change in control of the Company or upon a sale of the Company. Under the employment agreement, Dr. Woody is also eligible to participate in any stock option plans and receive other equity awards, as determined by the board of directors from time to time.

The agreement can be terminated any time by the Company for cause (subject to the cure provisions of the agreement), or without cause (with 60 days prior written notice to Dr. Woody), by Dr. Woody for good reason (as described in the agreement, and subject to the cure provisions of the agreement), or by Dr. Woody without good reason. The agreement also expires automatically at the end of the initial term or any renewal term if either party provides notice of non-renewal as discussed above.

In the event the A&R Agreement is terminated without cause by the Company, or by Dr. Woody for good reason, the Company agreed to pay him the lesser of 18 months of salary or the remaining term of the agreement, the payment of any accrued bonus from the prior year, his pro rata portion of any current year's bonus and health insurance premiums for the same period that he is to receive severance payments (as discussed above).

The A&R Agreement contains standard and customary invention assignment, indemnification, confidentiality and non-solicitation provisions, which remain in effect for a period of 24 months following the termination of his agreement.

Our indirect wholly-owned subsidiary Katexco entered into an employment agreement with Dr. Rothbard on November 1, 2018. The agreement provides for an indefinite term that continues until termination. The initial annual base salary set forth in the agreement is \$300,000, with annual increases as determined by the board of directors. Any bonuses, including stock options, are in the sole discretion of Katexco, depending on financial circumstances and the performance of the services under the agreement.

The agreement provides that Dr. Rothbard is eligible to participate in the employee benefit plans that are established from time to time, including group health insurance, accidental death and dismemberment, group life insurance, short-term disability insurance, long-term disability insurance, drug coverage and dental coverage.

The agreement also provides Dr. Rothbard with severance benefits if his employment is terminated without "just cause," subject to his compliance with the restrictive covenants described below and his timely execution and non-revocation of a general release of claims.

In the event Dr. Rothbard's agreement is terminated without "just cause" (as defined in such agreement), Katexco agreed pay a period of two weeks plus two weeks for each completed year of service, up to a cumulative maximum of 16 weeks of compensation. If severance is paid in lieu of any amount of the required notice period, the amount of the severance pay will be equal to the then-current base salary pro-rated for the covered period. Upon any termination of employment, including a termination for "just cause," Dr. Rothbard is entitled to the base salary, bonuses and stock options actually earned up to the date of termination.

Pursuant to his agreement, Dr. Rothbard is subject to a six-month post-employment non-competition, non-solicitation and non-hire covenant.

As noted above, upon the Closing of the Business Combination, Dr. Rothbard was appointed to serve as the Chief Scientific Officer of our company.

On August 21, 2019, the Company entered into an Employment Agreement with Dr. Rothbard which replaced his prior agreement, which was not effective until the Closing Date, but became effective on such date. The Employment Agreement has a term of three years from the Closing Date (i.e., until November 6, 2023), automatically extending for additional one-year terms thereafter unless either party terminates the agreement with at least 90 days prior written notice before the next renewal date.

The Employment Agreement provides for Dr. Rothbard to be paid a salary of \$375,000 per year, with automatic increases in salary, on the first anniversary of the effective date, and each anniversary thereafter, of 10%.

The Employment Agreement provides for Dr. Rothbard to receive an annual bonus subject to meeting certain objectives set by the Board of Directors, with a targeted bonus amount of 50% of his then salary, payable on or before February 15th of each year.

The Employment Agreement also provides for Dr. Rothbard to earn equity compensation in the discretion of the Board of Directors. Dr. Rothbard may also be issued bonuses, from time to time, in the discretion of the board of directors, which may be payable in cash, stock or options.

In the event Dr. Rothbard's employment is terminated by the Company without cause, by Dr. Rothbard for good reason (as discussed in the employment agreement), or the agreement is not renewed by the Company, he is required to be paid 36 months of severance pay (if such termination occurs during the first year of the term); 24 months of severance pay (if such termination occurs during the second year of the term); and 12 months of severance pay (if such termination occurs after the second year of the term), along with any accrued bonus amount and a pro rata annual bonus based on the targeted bonus, as well as the payment of health insurance premiums for the same period over which he is required to be paid severance pay.

Ozan Pamir Katexco Employment Agreement

Our indirect wholly-owned subsidiary Katexco entered into an employment agreement with Mr. Pamir on October 22, 2018. The agreement provides for an indefinite term that continues until termination. The initial annual base salary set forth in the agreement was CAD \$120,000, with annual increases as determined by the board of directors. The agreement also provided Mr. Pamir with a CAD \$20,000 signing bonus. Any bonuses, including stock options, are in the sole discretion of Katexco, depending on financial circumstances and the performance of the services under the agreement. In 2019, the compensation was increased to \$120,000 per annum in US dollars.

On February 1, 2020, there was an amendment to Mr. Pamir's consulting agreement with Katexco, whereby the contract was transferred from Katexco to Katexco Pharmaceuticals Corp. - US.

Ozan Pamir Company Employment Agreement

On February 25, 2021, the Company entered into an Employment Agreement dated February 24, 2021, and effective November 6, 2020, which agreement was amended and corrected on March 1, 2021, to be effective as of the effective date of the original agreement (which amendment and correction is retroactively updated in the discussion of the agreement), with Ozan Pamir, the Company's Interim Chief Financial Officer, which replaced and superseded Mr. Pamir's agreement with Katexco, as discussed above. Pursuant to the agreement, Mr. Pamir agreed to serve as the Interim Chief Financial Officer of the Company; and the Company agreed to pay Mr. Pamir \$300,000 per year. Such salary is to be increased to a mutually determined amount upon the closing of a new financing, and shall also be increased on a yearly basis.

Under the agreement, Mr. Pamir is eligible to receive an annual bonus, in a targeted amount of 30% of his then salary, based upon the Company's achievement of performance and management objectives as set and approved by the Chief Executive Officer, in consultation with Mr. Pamir. The bonus amount is subject to adjustment. The board of directors, as recommended by the Compensation Committee of the Company (and/or the Compensation Committee), may also award Mr. Pamir bonuses from time to time (in stock, options, cash, or other forms of consideration) in its discretion.

As additional consideration for Mr. Pamir agreeing to enter into the agreement, the Company awarded him options to purchase 180,000 shares of the Company's common stock, which have a term of 10 years, and an exercise price of \$4.43 per share (the closing sales price on the date the board of directors approved the grant (February 26, 2021)). The options as subject to the Company's 2020 Omnibus Incentive Plan and vest at the rate of (a) 1/5th of such options upon the grant date; and (b) 4/5th of such options vesting ratably on a monthly basis over the following 36 months on the last day of each calendar month; provided, however, that such options vest immediately upon Mr. Pamir's death or disability, termination without cause or a termination by Mr. Pamir for good reason (as defined in the agreement), a change in control of the Company or upon a sale of the Company. Under the employment agreement, Mr. Pamir is also eligible to participate in any stock option plans and receive other equity awards, as determined by the board of directors from time to time.

The agreement can be terminated any time by the Company with or without cause with 60 days prior written notice and may be terminated by Mr. Pamir at any time with 60 days prior written notice. The agreement may also be terminated by the Company with six days' notice in the event the agreement is terminated for cause under certain circumstances. Upon the termination of Mr. Pamir's agreement by the Company without cause or by Mr. Pamir for good reason, the Company agreed to pay him three months of severance pay.

The agreement contains standard and customary invention assignment, indemnification, confidentiality and non-solicitation provisions, which remain in effect for a period of 24 months following the termination of his agreement.

On May 27, 2021, the Company entered into a Second Amendment to Employment Agreement with Ozan Pamir (the "Second Amendment"). The Second Amendment amended the terms of Mr. Pamir's employment solely to provide that all compensation payable to Mr. Pamir under such agreement would be paid directly by the Company.

Inflammation consultancy Agreements with each of Prof. Sir Marc Feldmann and Prof. Jagdeep Nanchahal

See “Inflammation consultancy Agreements with each of Prof. Sir Marc Feldmann and Prof. Jagdeep Nanchahal” under “Material Agreements—Consulting Agreements”, under “Item 1. Business”, above.

Prof Jagdeep Nanchahal Consulting Agreement

See “Prof Jagdeep Nanchahal Consulting Agreement” under “Material Agreements—Consulting Agreements”, under “Item 1. Business”, above.

Summary Compensation Table

The following table sets forth certain information concerning compensation earned by or paid to certain persons who we refer to as our “Named Executive Officers” for services provided for the fiscal years ended December 31, 2020 and 2019. Our Named Executive Officers include persons who (i) served as our, or 180’s, principal executive officer or acted in a similar capacity during the years ended December 31, 2020 and 2019, (ii) were serving at fiscal year-end as our two most highly compensated executive officers, other than the principal executive officer, whose total compensation exceeded \$100,000, and (iii) if applicable, up to two additional individuals for whom disclosure would have been provided as a most highly compensated executive officer, but for the fact that the individual was not serving as an executive officer at fiscal year-end.

As noted above, none of the executive officers of KBL prior to the Closing of the Business Combination, including our former Chief Executive Officer, received any cash compensation for their services.

Name and Principal Position		Salary (\$)	Bonus (\$)	All Other Compensation (\$)	Total (\$)
James N. Woody (1) Chief Executive Officer	2020	\$ 175,166	\$ -	\$ 90,000	\$ 265,166
Ozan Pamir (2) Chief Financial Officer	2020	\$ 187,000	\$ -	\$ 112,750(4) (6)	\$ 299,750
	2019	\$ 108,604	\$ -	\$ 93,832(5) (6)	\$ 202,436
Jonathan Rothbard, Ph.D. (3) Chief Scientific Officer	2020	\$ 333,968	\$ -	\$ -	\$ 333,968
	2019	\$ 300,000	\$ -	\$ -	\$ 300,000

Does not include perquisites and other personal benefits or property, unless the aggregate amount of such compensation is more than \$10,000. No executive officer earned any stock awards, option awards, non-equity incentive plan compensation or nonqualified deferred compensation during the periods reported above. Option Awards and Stock Awards represent the aggregate grant date fair value of awards computed in accordance with Financial Accounting Standards Board Accounting Standard Codification Topic 718.

- (1) Dr. Woody was a consultant of 180 from January 1, 2020 through June 30, 2020 and was paid \$90,000 in consultant fees. On August 13, 2020, effective July 1, 2020, Mr. Woody was hired as the Chief Executive Officer of 180, and of our Company, beginning November 6, 2020. Effective November 6, 2020, Dr. Woody and the Company entered into an employment agreement which entitles Dr. Woody to an annual salary of \$450,000 and a target bonus of 45%. As of the date of this filing, all of the amounts owed to Dr. Woody have been fully paid.
- (2) On November 9, 2020, Mr. Pamir was hired as the Chief Financial Officer of 180, and, starting November 27, 2020, Interim Chief Financial Officer of our Company. Effective November 9, 2020, Mr. Pamir has a new employment agreement which entitles him to an annual salary of \$300,000 and a target bonus of 30%. As of the date of this filing, all of the amounts owed to Mr. Pamir have been fully paid.
- (3) Dr. Rothbard was the Chief Executive Officer and Chief Scientific Officer of Katexco, and Chief Scientific Officer of our Company following the closing of the Business Combination. As of the Business Combination, Dr. Rothbard has a new employment agreement which entitles him to an annual salary of \$375,000 and a target bonus of 50%. As of the date of this filing, all of the amounts owed to Dr. Rothbard have been fully paid via cash and issuance of stock.
- (4) Represents consulting fees paid by CBR Pharma. The consulting agreement has been terminated.
- (5) Based on a U.S. dollar to Canadian dollar exchange rate of 1.3262 on December 31, 2019.
- (6) Based on a U.S. dollar to Canadian dollar exchange rate of 1.3649 on December 31, 2020.

Bonuses

No bonuses were paid to the officers named in the table above, whether by 180 prior to the Closing of the Business Combination or by our company following the Closing of the Business Combination, during the fiscal years ended December 31, 2020 or 2019.

Stock Options

No stock options were granted to the officers named in the table above, whether by 180 prior to the Closing of the Business Combination or by our company following the Closing of the Business Combination, during the fiscal years ended December 31, 2020 or 2019.

Potential Payments Upon Termination

Pursuant to the employment agreements for Dr. Woody, Dr. Rothbard and Mr. Pamir, severance benefits will be paid in the event of a termination without “just cause” (as defined in such agreements). Dr. Woody, in the event of such termination, is entitled to severance payments in the form of continued base salary, for the lesser of eighteen (18) months or the then remaining term of the agreement, (ii) payment of any accrued and unpaid annual bonus for any year preceding the year in which the employment terminates; (iii) payment of a pro rata annual bonus for the year in which the employment terminates calculated by multiplying the target bonus amount by a fraction, the numerator of which is the number of calendar days elapsed in the year as of the effective date of termination of employment and the denominator of which is 365; and (iv) payment by the Company of Dr. Woody’s monthly health insurance premiums. For Dr. Rothbard, in the event of such termination during his first year, Dr. Rothbard would be entitled to his then base salary for a period of 36 months, during his second year, Dr Rothbard would be entitled to his then base salary for a period of 24 months, and 12 months if the termination happens in the third year of Dr Rothbard’s employment or thereafter; (ii) payment of any accrued and unpaid annual bonus for any year preceding the year in which the employment terminates; (iii) payment of a pro rata annual bonus for the year in which the employment terminates calculated by multiplying the target bonus amount by a fraction, the numerator of which is the number of calendar days elapsed in the year as of the effective date of termination of employment and the denominator of which is 365; and (iv) payment by the Company of monthly health insurance premiums. Mr. Pamir, in the event of such termination, would be entitled to an amount equal to his then current base salary for a period of (3) months.

Outstanding Equity Awards at Year Ended December 31, 2020

None of our executive officers held any outstanding stock awards or option awards as of December 31, 2020.

Directors who are not Named Executive Officers of our Company prior to the Closing of the Business Combination

Name	Fees earned or paid in cash (\$)	Stock/option awards (\$)	All other compensation (\$)	Total (\$)
Lawrence Steinman	\$ 100,000	\$ -	\$ 53,943	\$ 153,943
Sir Marc Feldmann, Ph.D., M.D. (3)	\$ 156,963	\$ -	\$ -	\$ 156,963
Larry Gold, Ph.D. (1) (2)	\$ -	\$ 48,198	\$ -	\$ 48,198
Donald A. McGovern, Jr. (1) (2)	\$ -	\$ 48,198	\$ -	\$ 48,198

* The table above does not include the amount of any expense reimbursements paid to the above directors. No directors received any Non-Equity Incentive Plan Compensation or Nonqualified Deferred Compensation. Does not include perquisites and other personal benefits, or property, unless the aggregate amount of such compensation is more than \$10,000.

- (1) On December 3, 2020, we granted to each of Dr. Gold and Mr. McGovern options to purchase up to 25,000 shares of our common stock at an exercise price of \$2.49 per share. The options vest in equal monthly instalments over the 12 months after the grant date, subject to such director’s continued service to our company on such vesting dates.
- (2) Represents the aggregate grant date fair value of the award computed in accordance with the provisions of FASB ASC Topic 718. The assumptions used in calculating the aggregate grant date fair value of the awards reported in this column are set forth in our consolidated financial statements included in this prospectus.
- (3) Based on a GBP to USD exchange rate of 1.30.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth, as of July 8, 2021, the number and percentage of outstanding shares of our common stock beneficially owned by: (a) each person who is known by us to be the beneficial owner of more than 5% of our outstanding shares of common stock; (b) each of our directors; (c) each of our Named Executive Officers; and (d) all current directors and Named Executive Officers, as a group. As of July 8, 2021 (“Date of Determination”), there were 30,768,873 shares of common stock and no shares of preferred stock issued and outstanding.

Beneficial ownership has been determined in accordance with Rule 13d-3 under the Exchange Act. Under this rule, certain shares may be deemed to be beneficially owned by more than one person (if, for example, persons share the power to vote or the power to dispose of the shares). In addition, shares are deemed to be beneficially owned by a person if the person has the right to acquire shares (for example, upon exercise of an option or warrant or upon conversion of a convertible security) within 60 days of the date as of which the information is provided. In computing the percentage ownership of any person, the amount of shares is deemed to include the amount of shares beneficially owned by such person by reason of such acquisition rights. As a result, the percentage of outstanding shares of any person as shown in the following table does not necessarily reflect the person’s actual voting power at any particular date.

Beneficial ownership as set forth below is based on our review of our record stockholders list and public ownership reports filed by certain stockholders of the Company, and may not include certain securities held in brokerage accounts or beneficially owned by the stockholders described below.

Unless otherwise indicated, we believe that all persons named in the table below have sole voting and investment power with respect to all shares of common stock beneficially owned by them. Unless otherwise indicated, the business address of each of the entities, directors and executive officers in this table is 3000 El Camino Real, Bldg. 4, Suite 200, Palo Alto, CA 94306.

Name and Address of Beneficial Owners		Number of Common Stock Shares Beneficially Owned	Percent of Common Stock
<i>Directors and Executive Officers</i>			
James N. Woody	(1)	490,919	1.7%
Jonathan Rothbard		560,449	1.8%
Ozan Pamir	(2)	132,608	*

Equity Compensation Plan Information

The following table sets forth information, as of December 31, 2020, with respect to our compensation plans under which common stock is authorized for issuance.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (A)	Weighted-average exercise price of outstanding options, warrants and rights (B)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in Column A) (C)
Equity compensation plans approved by stockholders (1)	50,000	\$ 2.49	3,218,400
Equity compensation plans not approved by stockholders (2)	63,658	\$ 5.28	3,154,742

- (1) This relates to the options granted to Dr. Gold and Mr. McGovern. See Note 15 – Stockholders Equity of the Consolidated Financial Statements included herein for the details of the stock options.
- (2) This relates to the AGP warrants that were not issued as of December 31, 2020. See Note 11 – Derivative Liabilities of the Consolidated Financial Statements included herein for the details of the AGP warrants.

Changes in Control

The Company is not currently aware of any arrangements which may at a subsequent date result in a change of control of the Company.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Except as referenced below or otherwise disclosed above under (or incorporated by reference in) “[Item 11. Executive Compensation](#)”, which information is incorporated by reference in this Item 13, there have been no transactions since January 1, 2019 (provide certain of the disclosures below relate to prior periods in the event such disclosure is necessary to make more recent disclosures clear), and there is not currently any proposed transaction, in which the Company was or is to be a participant, where the amount involved exceeds the lesser of \$120,000 or one percent of the average of the Company’s total assets at year-end for the last two completed fiscal years, and in which any officer, director, or any stockholder owning greater than five percent (5%) of our outstanding voting shares, nor any member of the above referenced individual’s immediate family, had or will have a direct or indirect material interest.

Notice of Acceleration

On December 29, 2020, the Company received notice from Marlene Krauss, M.D., the former Chief Executive Officer and director of KBL, alleging the occurrence of an event of default of the terms of a certain promissory note in the amount of \$371,178, dated March 15, 2019, evidencing amounts owed by the Company to KBL IV Sponsor LLC (which Dr. Krauss serves as sole managing member of), for failure to repay such note within five days of the release of funds from escrow in connection with the Purchase Agreement. Dr. Krauss has declared the entire amount of the note to be immediately due and payable. The note, pursuant to its terms, accrues damages of \$2,000 per day until paid in full (subject to a maximum amount of damages equal to the principal amount of the note upon the occurrence of the event of default thereunder). There are continuing disputes regarding amounts that may be due to Dr. Krauss under the note.

Registration Rights

The holders of the founder shares and private placement units (and their component securities) and their permitted transferees are entitled to registration rights pursuant to a registration rights agreement signed on the effective date of our IPO. The holders of these securities and their permitted transferees are entitled to make up to three demands, excluding short form demands, that we register such securities. In addition, the holders and their permitted transferees have certain “piggy-back” registration rights with respect to registration statements filed subsequent to our completion of our initial business combination and rights to require us to register for resale such securities pursuant to Rule 415 under the Securities Act. Notwithstanding the foregoing, the underwriters may not exercise their demand and “piggyback” registration rights after five (5) and seven (7) years after the effective date of the registration statement relating to our IPO and may not exercise their demand rights on more than one occasion. Further, the holders and their permitted transferees have certain “piggy-back” registration rights regarding the shares of our common stock issuable upon the conversion of the Convertible Sponsor Note with respect to the registration statement(s) that we may file pursuant to the Registration Rights Agreement that we entered into in connection with the June 2020 SPA. We satisfied the foregoing registration rights through the filing of a Registration Statement on Form S-1 (No. 333-248539), which registration statement was declared effective on November 2, 2020; provided that such registration statement is currently not effective and we are currently in default of our obligations under the Registration Rights Agreement.

Related Party Transaction Policy

Our audit committee must review and approve any related party transaction we propose to enter into. Our audit committee charter details the policies and procedures relating to transactions that may present actual, potential or perceived conflicts of interest and may raise questions as to whether such transactions are consistent with the best interest of our company and our stockholders. A summary of such policies and procedures is set forth below.

Any potential related party transaction that is brought to the audit committee’s attention will be analyzed by the audit committee, in consultation with outside counsel or members of management, as appropriate, to determine whether the transaction or relationship does, in fact, constitute a related party transaction. At its meetings, the audit committee will be provided with the details of each new, existing or proposed related party transaction, including the terms of the transaction, the business purpose of the transaction and the benefits to us and to the relevant related party.

In determining whether to approve a related party transaction, the audit committee must consider, among other factors, the following factors to the extent relevant:

- whether the terms of the transaction are fair to us and on the same basis as would apply if the transaction did not involve a related party;
- whether there are business reasons for us to enter into the transaction;
- whether the transaction would impair the independence of an outside director; and
- whether the transaction would present an improper conflict of interest for any director or executive officer.

Any member of the audit committee who has an interest in the transaction under discussion must abstain from any voting regarding the transaction, but may, if so, requested by the Chairman of the audit committee, participate in some or all of the audit committee's discussions of the transaction. Upon completion of its review of the transaction, the audit committee may determine to permit or to prohibit the transaction.

Director Independence

Our board of directors has determined that Larry Gold, Ph.D. and Donald A. McGovern, Jr., are independent directors as defined under the NASDAQ rules governing members of boards of directors and as defined under Rule 10A-3 of the Exchange Act. As described in greater detail below, although we do not currently meet the NASDAQ continued listing rules which require a majority of a listed company's board of directors be independent and which require an audit committee consisting of at least three members, NASDAQ has provided us until June 30, 2021, to regain compliance with such continued listing rules.

On January 5, 2021, the Company received a letter from the NASDAQ Stock Market, LLC that the Company was no longer in compliance with NASDAQ Listing Rules 5605(b)(1) and 5605(c)(2), which require that the Company's board of directors be comprised of a majority of independent directors and that the Company have an Audit Committee consisting of at least three independent members, respectively (the "Continued Listing Rules").

NASDAQ provided the Company 45 days, or until February 19, 2021, to submit to NASDAQ a plan detailing how the Company intended to regain compliance with the rules. The Company timely submitted such plan and on March 1, 2021, the Company received notice from NASDAQ that the Company has been granted an extension until June 30, 2021 to regain compliance with the Continued Listing Rules. In the event the Company does not regain compliance within the extension period, NASDAQ will provide the Company written notice of the delisting of the Company's securities, at which time the Company may appeal the decision to a Hearings Panel.

On May 27, 2021, the Company's Board of Directors appointed two new directors to the Board, effective on June 15, 2021. On June 8, 2021, the Company's Board of Directors appointed two additional directors to the Board of Directors, effective on the earlier of (a) the day following the date this Report is filed with the SEC; and (b) June 28, 2021 and changed the effective date of appointment for the other two directors to the same date. As a result of these appointments, the Company expects to be in compliance with the independent director requirements under the NASDAQ rules.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

WithumSmith+Brown, PC (“Withum”) served as the independent registered public accounting firm for KBL from its inception through the closing of the Business Combination on November 6, 2020. The firm of Marcum LLP (“Marcum”) served as the independent registered public accounting firm for privately-held 180 prior to the Business Combination, and continued as the Company’s independent registered public accounting firm following the Business Combination.

The following is a summary of fees paid or to be paid for audit, tax and related fees for services rendered during the periods indicated:

	For the Fiscal Year Ended December 31,	
	2020	2019
Marcum		
Audit Fees	\$ 405,616	\$ 291,947(1)
Audit-Related Fees	-	-
Tax Fees	-	-
All Other Fees	-	-
Total	\$ 405,616	\$ 291,947
Withum		
Audit Fees	\$ 46,500	\$ -
Audit-Related Fees	-	-
Tax Fees	-	-
All Other Fees	-	-
Total	\$ 46,500	\$ -

(1) Includes an amount based on Canadian dollar to U.S. dollar exchange rate of 0.7568 on December 31, 2019.

Audit Fees. Audit fees consist of fees billed for professional services rendered for the audit of our annual consolidated financial statements and services that are normally provided by Marcum LLP and Withum, Smith and Brown, PC in connection with regulatory filings, including for professional services rendered for the audit of our annual consolidated financial statements, review of the financial information included in our Forms 10-Q for the respective periods and other required filings with the SEC for the applicable years. The above amounts include interim procedures and audit fees, as well as attendance at audit committee meetings.

Audit-Related Fees. Audit-related services consist of fees billed for assurance and related services that are reasonably related to performance of the audit or review of our consolidated financial statements and are not reported under “Audit Fees.” These services include attest services that are not required by statute or regulation and consultations concerning financial accounting and reporting standards.

Tax Fees. Include fees paid for tax return services.

All Other Fees. Includes fees not included under “Audit Fees”, “Audit-Related Fees” and “Tax Fees”.

Pre-Approval Policy

It is the policy of our board of directors that all services to be provided by our independent registered public accounting firm, including audit services and permitted audit-related and non-audit services, must be pre-approved by our Audit Committee. Our Audit Committee pre-approved all services, audit and non-audit related, provided to us by Marcum and Withum for 2020 and 2019.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENTS AND SCHEDULES

(a) Documents filed as part of this Annual Report:

The following is an index of the financial statements, schedules and exhibits included in this Form 10-K or incorporated herein by reference.

(1) All Financial Statements

Index to Consolidated Financial Statements

Report of Independent Registered Public Accounting Firm	F-2
Consolidated Balance Sheets	F-3
Consolidated Statements of Operations and Comprehensive Loss	F-4
Consolidated Statements of Changes in Stockholders' (Deficiency) Equity	F-5
Consolidated Statements of Cash Flows	F-6
Notes to Consolidated Financial Statements	F-8

(2) Consolidated Financial Statement Schedules

Except as provided above, all financial statement schedules have been omitted, since the required information is not applicable or is not present in amounts sufficient to require submission of the schedule, or because the information required is included in the consolidated financial statements and notes thereto included in this Form 10-K.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of
180 Life Sciences Corp.
(formerly known as KBL Merger Corp. IV)

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of 180 Life Sciences Corp. (formerly known as KBL Merger Corp. IV) (the "Company") as of December 31, 2020 and 2019, the related consolidated statements of operations and comprehensive loss, changes in stockholders' equity and cash flows for each of the two years in the period ended December 31, 2020, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2020, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2020, in conformity with accounting principles generally accepted in the United States of America.

Explanatory Paragraph – Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As more fully described in Note 2 to the financial statements, the Company has a significant working capital deficiency, has incurred significant losses and needs to raise additional funds to meet its obligations and sustain its operations. These conditions raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 2. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (the "PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Marcum LLP

Marcum LLP

We have served as the Company's auditor since 2019.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

NOTE 1 — BUSINESS ORGANIZATION AND NATURE OF OPERATIONS

180 Life Sciences Corp., formerly known as KBL Merger Corp. IV (“180LS”, or together with its subsidiaries, the “Company”), was a blank check company organized under the laws of the State of Delaware on September 7, 2016. The Company was formed for the purpose of effecting a merger, share exchange, asset acquisition, share purchase, reorganization or similar business combination with one or more businesses.

180 Life Corp. (“180”, f/k/a 180 Life Sciences Corp. and CannBioRx Life Sciences Corp.) is a wholly-owned subsidiary of the Company and was incorporated in the State of Delaware on January 28, 2019. The Company is located in the United States (“U.S.”) and is a medical pharmaceutical company focused upon unmet medical needs in the areas of inflammatory diseases, fibrosis, and chronic pain by employing innovative research and, where appropriate, combination therapies, through its three wholly-owned subsidiaries, 180 Therapeutics L.P. (“180 LP”), CannBioRex Pharmaceuticals Corp. (“CBR Pharma”), and Katexco Pharmaceuticals Corp. (“Katexco”). 180 LP, CBR Pharma and Katexco are together, the “180 Subsidiaries.” Katexco was incorporated on March 7, 2018 under the provisions of the British Corporation Act of British Columbia. Additionally, 180’s wholly-owned subsidiaries Katexco Callco, ULC, Katexco Purchaseco, ULC, CannBioRex Callco, ULC, and CannBioRex Purchaseco, ULC were formed in the Canadian Province of British Columbia on May 31, 2019 to facilitate the acquisition of Katexco, CBR Pharma and 180 LP (see Note 4 - Reorganization and Recapitalization).

180 LP is a clinical stage biotechnology company focused on the discovery and development of biologic therapies for the treatment of fibrosis. CBR Pharma is a pharmaceutical research company specializing in the clinical development of synthetic pharmaceutical grade cannabinoid compounds for the treatment of rheumatoid arthritis and related arthritic diseases. Katexco is a medical pharmaceutical company researching and developing orally available therapies harnessing nicotinic receptors to treat inflammatory diseases.

Reorganization and Business Combination

On July 16, 2019, 180 and each of 180 LP, Katexco and CBR Pharma completed a corporate restructuring, pursuant to which 180 LP, Katexco and CBR Pharma became wholly-owned subsidiaries of 180 (the “Reorganization”). It was determined that Katexco was the accounting acquirer in the Reorganization and the remaining companies were the accounting acquirees (see Note 4 - Reorganization and Recapitalization).

On November 6, 2020 (the “Closing Date”), the Company consummated the previously announced business combination (the “Business Combination”) following a special meeting of stockholders held on November 5, 2020, where the stockholders of the Company considered and approved, among other matters, a proposal to adopt that certain Business Combination Agreement (as amended, the “Business Combination Agreement”), dated as of July 25, 2019. Pursuant to the Business Combination Agreement, among other things, a subsidiary of the Company merged with and into 180, with 180 continuing as the surviving entity and a wholly-owned subsidiary of the Company (the “Merger”). The Merger became effective on November 6, 2020 (see Note 5 – Business Combination).

Risks and Uncertainties

Regarding the COVID-19 pandemic, a continuation or worsening of the levels of market disruption and volatility seen in the recent past could have an adverse effect on the Company’s ability to access capital, on the Company’s business, results of operations and financial condition. Management continues to monitor the developments and have taken active measures to protect the health of the Company’s employees, their families and the Company’s communities. The ultimate impact will depend heavily on the duration of the COVID-19 pandemic and public health responses, as well as the substance and pace of macroeconomic recovery, all of which are uncertain and difficult to predict considering the continuing evolving landscape of the COVID-19 pandemic and the public health responses to contain it.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Management has evaluated, and will continue to evaluate, the impact of the COVID-19 pandemic on the industry and has concluded that while it is reasonably possible that the virus could have a negative effect on the Company's financial position, results of its operations and/or completion of business combination, the specific impact is not readily determinable as of the date of these consolidated financial statements. To date, the follow-up time for patient data for the Phase 2b Dupuytren's disease clinical trial, in addition to the launch of clinical trials in our SCA platform were delayed as a result of COVID-19, however, such follow-up is now completed. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTE 2 — GOING CONCERN AND MANAGEMENT'S PLANS

The Company has not generated any revenues and has incurred a significant loss since inception. During the year ended December 31, 2020, the Company incurred a net loss of \$10,884,058 and used \$3,871,961 of cash in operations. As of December 31, 2020, the Company has an accumulated deficit of \$48,357,638 and a working capital deficit of \$17,406,356. The Company expects to invest a significant amount of capital to fund research and development. As a result, the Company expects that its operating expenses will increase significantly, and consequently will require significant revenues to become profitable. Even if the Company does become profitable, it may not be able to sustain or increase profitability on a quarterly or annual basis. The Company cannot predict when, if ever, it will be profitable. There can be no assurance that the intellectual property of the Company, or other technologies it may acquire, will meet applicable regulatory standards, obtain required regulatory approvals, be capable of being produced in commercial quantities at reasonable costs, or be successfully marketed. The Company plans to undertake additional laboratory studies with respect to the intellectual property, and there can be no assurance that the results from such studies or trials will result in a commercially viable product or will not identify unwanted side effects.

These consolidated financial statements have been prepared under the assumption of a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The Company's ability to continue its operations is dependent upon obtaining new financing for its ongoing operations. See Note 18 – Subsequent Events for information related to financings completed subsequent to December 31, 2020. Future financing options which the Company plans to explore as funds are needed include equity financings and loans and if the Company is unable to obtain such additional financing timely, or at all, the Company may have to curtail its development, marketing and promotional activities, which would have a material adverse effect on its business, financial condition and results of operations, and it could ultimately be forced to discontinue its operations and liquidate. These matters raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time, which is defined as within one year after the date that the consolidated financial statements are issued. Realization of the Company's assets may be substantially different from the carrying amounts presented in these consolidated financial statements and the accompanying consolidated financial statements do not include any adjustments that may become necessary, should the Company be unable to continue as a going concern. See Note 1 – Business Organization and Nature of Operations - Risk and Uncertainties related to COVID-19.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

NOTE 3 — SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The Business Combination was accounted for as a reverse recapitalization, and 180 is deemed to be the accounting acquirer.

Consequently, the assets and liabilities and the historical operations that are reflected in these consolidated financial statements prior to the Business Combination are those of 180 Life Corp. and its subsidiaries. The preferred stock, common stock, additional paid in capital and earnings per share amount in these consolidated financial statements for the period prior to the Business Combination have been restated to reflect the recapitalization in accordance with the shares issued to the shareholders of the former parent, 180 Life Corp. as a result of the Business Combination.

Emerging Growth Company Disclosure Exemptions

The Company qualifies as an “emerging growth company,” as defined in the JOBS Act. For so long as the Company remains an emerging growth company, it is permitted and plans to rely on exemptions from certain disclosure requirements that are applicable to other public companies that are not emerging growth companies. These provisions include, but are not limited to: being permitted to have only two years of audited financial statements and only two years of related selected financial data and management’s discussion and analysis of financial condition and results of operations disclosure; an exemption from compliance with the auditor attestation requirement in the assessment of our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act; not being required to comply with any requirement that may be adopted by the Public Company Accounting Oversight Board regarding mandatory audit firm rotation or a supplement to the auditor’s report providing additional information about the audit and the financial statements; reduced disclosure obligations regarding executive compensation arrangements in our periodic reports, registration statements and proxy statements; and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. In addition, the JOBS Act permits emerging growth companies to take advantage of an extended transition period to comply with new or revised accounting standards applicable to public companies. The Company intends to take advantage of the exemptions discussed above.

Principles of Consolidation

The consolidated financial statements include the consolidated accounts of Katexco prior to the Reorganization, the consolidated accounts of 180 Life Corp., which includes Katexco, CBR Pharma and 180 LP, between the Reorganization and the Business Combination, and, effective with the closing of the Business Combination, the consolidated accounts also include 180LS. All intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates, judgments, and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, together with amounts disclosed in the related notes to the consolidated financial statements. The Company’s significant estimates used in these financial statements include, but are not limited to, the fair value of equity shares, the valuation of derivative liabilities, the valuation allowance associated with income tax balances, the valuation of intangible assets in acquisition accounting, the useful lives of long-lived assets and the recovery of notes receivable and other assets. Certain of the Company’s estimates could be affected by external conditions, including those unique to the Company and general economic conditions. It is reasonably possible that these external factors could have an effect on the Company’s estimates and may cause actual results to differ from those estimates.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

Accounting for Business Combinations

As required by U.S. GAAP, the Company records acquisitions under the acquisition method of accounting, under which the assets acquired and liabilities assumed are initially recorded at their respective fair values and any excess purchase price over the estimated fair value of net assets acquired is reflected as goodwill. The Company uses estimates and, in some instances, independent third-party valuation firms to assist in determining the fair values of assets acquired, liabilities assumed and contingent consideration, if any. Such estimates and valuations require significant assumptions, including projections of future events and operating performance. The estimated fair values are subject to change during the measurement period, which is limited to one year subsequent to the acquisition date.

Foreign Currency Translation

The Company's reporting currency is the United States dollar. The functional currency of certain subsidiaries is the Canadian Dollar ("CAD") or British Pound ("GBP"). Assets and liabilities are translated based on the exchange rates at the balance sheet date (0.7847 and 0.7689 for the CAD, 1.3649 and 1.3262 for the GBP as of December 31, 2020 and 2019, respectively), while expense accounts are translated at the weighted average exchange rate for the period (0.7462 and 0.7568 for the CAD and 1.2843 and 1.2613 for the GBP for the years ended December 31, 2020 and 2019, respectively). Equity accounts are translated at historical exchange rates. The resulting translation adjustments are recognized in stockholders' equity (deficiency) as a component of accumulated other comprehensive income.

Comprehensive income (loss) is defined as the change in equity of an entity from all sources other than investments by owners or distributions to owners and includes foreign currency translation adjustments as described above. During the years ended December 31, 2020 and 2019, the Company recorded other comprehensive gain/(loss) of \$459,622 and (\$160,745), respectively, as a result of foreign currency translation adjustments.

Foreign currency gains and losses resulting from transactions denominated in foreign currencies, including intercompany transactions, are included in results of operations. The Company recorded \$1,030 and \$7,652 of foreign currency transaction gains/(losses) for the years ended December 31, 2020 and 2019, respectively. Such amounts have been classified within general and administrative expenses in the accompanying consolidated statements of operations and comprehensive loss.

Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents in the financial statements. The Company had no cash equivalents at December 31, 2020 or 2019. As of December 31, 2020, the Company had bank accounts in the United States and the United Kingdom. The Company's cash deposits in United States and English financial institutions may at times may be in excess of the Federal Deposit Insurance Corporation ("FDIC") or the Financial Services Compensation Scheme ("FSCS") insurance limits, respectively. The Company has not experienced losses in such accounts and periodically evaluates the creditworthiness of its financial institutions.

Intangible Assets and In-Process Research and Development ("IPR&D")

Intangible assets consist of licensed patents held by Katexco as well as technology licenses acquired in connection with the Reorganization. Licensed patents are amortized over the remaining life of the patent. Technology licenses represent the fair value of licenses acquired for the development and commercialization of certain licenses and knowledge. The technology licenses are amortized on a straight-line basis over the estimated useful lives of the underlying patents. It will be necessary to monitor and possibly adjust the useful lives of the licensed patents and technology licenses depending on the results of the Company's research and development activities.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

IPR&D assets represent the fair value assigned to technologies that were acquired on July 16, 2019 in connection with the Reorganization, which have not reached technological feasibility and have no alternative future use. IPR&D assets are considered to be indefinite-lived until the completion or abandonment of the associated research and development projects. During the period that the IPR&D assets are considered indefinite-lived, they are tested for impairment on an annual basis, or more frequently if the Company becomes aware of any events occurring or changes in circumstances that indicate that the fair value of the IPR&D assets are less than their carrying amounts. If and when development is complete, which generally occurs upon regulatory approval, and the Company is able to commercialize products associated with the IPR&D assets, these assets are then deemed definite-lived and are amortized based on their estimated useful lives at that point in time. If development is terminated or abandoned, the Company may record a full or partial impairment charge related to the IPR&D assets, calculated as the excess of the carrying value of the IPR&D assets over their estimated fair value.

Impairment of Long-Lived Assets

The Company reviews long-lived assets and certain identifiable assets for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recovered. An impairment exists when the carrying value of the long-lived asset is not recoverable and exceeds its estimated fair value. No impairment charges were recorded during the years ended December 31, 2020 and 2019, respectively.

Goodwill

Goodwill represents the difference between the purchase price and the fair value of assets and liabilities acquired in a business combination. The Company reviews goodwill yearly, or more frequently whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recovered, for impairment by initially considering qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill, as a basis for determining whether it is necessary to perform a quantitative analysis. If it is determined that it is more likely than not that the fair value of reporting unit is less than its carrying amount, a quantitative analysis is performed to identify goodwill impairment. If it is determined that it is not more likely than not that the fair value of the reporting unit is less than its carrying amount, it is unnecessary to perform a quantitative analysis. The Company may elect to bypass the qualitative assessment and proceed directly to performing a quantitative analysis. As of December 31, 2020, the Company elected to bypass the qualitative assessment and conducted a quantitative assessment whereby it was determined the fair value of the reporting unit (which the Company concluded was the consolidated entity), exceeded the carrying value and, accordingly, there was no impairment of goodwill.

Fair Value of Financial Instruments

The Company measures the fair value of financial assets and liabilities based on the guidance of Accounting Standards Codification (“ASC”) 820 “Fair Value Measurements” (“ASC 820”), which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements.

ASC 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 describes three levels of inputs that may be used to measure fair value:

- Level 1 - Quoted prices in active markets for identical assets or liabilities;
- Level 2 - Quoted prices for similar assets and liabilities in active markets or inputs that are observable; and
- Level 3 - Inputs that are unobservable (for example, cash flow modeling inputs based on assumptions).

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

The carrying amounts of certain of the Company's financial instruments, consisting primarily of notes receivable, loans payable and convertible notes payable, approximate their fair values as presented in these consolidated financial statements due to the short-term nature of those instruments. The Company's derivative liabilities were valued using level 3 inputs (see Note 11 – Derivative Liabilities for additional information).

Accrued Issuable Equity

The Company records accrued issuable equity when it is contractually obligated to issue shares and there has been a delay in the issuance of such shares. Accrued issuable equity is recorded and carried at fair value with changes in its fair value recognized in the Company's consolidated statements of operations. Once the underlying shares of common stock are issued, the accrued issuable equity is reclassified as of the share issuance date at the then current fair market value of the common stock.

Stock-Based Compensation

The Company measures the cost of services received in exchange for an award of equity instruments based on the fair value of the award. The fair value of the award is measured on the grant date and is estimated by management based on observations of the recent cash sales prices of common stock. The fair value amount is then recognized over the period during which services are required to be provided in exchange for the award, usually the vesting period. Upon the exercise of an option or warrant, the Company issues new shares of common stock out of its authorized shares.

Derivative Liabilities and Convertible Instruments

The Company evaluates its debt and equity issuances to determine if those contracts or embedded components of those contracts qualify as derivatives requiring separate recognition in the Company's financial statements. Entities must consider whether to classify contracts that may be settled in its own stock, such as warrants, as equity of the entity or as an asset or liability. If an event that is not within the entity's control could require net cash settlement, then the contract should be classified as an asset or a liability rather than as equity.

The result of this accounting treatment is that the fair value of the embedded derivative is marked-to-market at each balance sheet date and recorded as a liability and the change in fair value is recorded in other (expense) income, net in the consolidated statements of operations. In circumstances where there are multiple embedded instruments that are required to be bifurcated, the bifurcated derivative instruments are accounted for as a single, compound derivative instrument. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is reassessed at the end of each reporting period. Equity instruments that are initially classified as equity that become subject to reclassification are reclassified to liability at the fair value of the instrument on the reclassification date. Derivative instrument liabilities are classified in the balance sheet as current or non-current based on whether or not net-cash settlement of the derivative instrument is expected within twelve months of the balance sheet date.

If the embedded conversion options do not require bifurcation, the Company then evaluates for the existence of a beneficial conversion feature by comparing the fair value of the Company's underlying stock as of the commitment date to the effective conversion price of the instrument (the intrinsic value).

Debt discounts under these arrangements are amortized over the term of the related debt to their stated date of redemption and are classified in interest expense in the consolidated statements of operations. Preferred stock discounts are only accreted to their redemption value if redemption becomes probable.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Amendments to convertible instruments are evaluated as to whether they should be accounted for as a modification of the original instrument with no change to the accounting or, if the terms are substantially changed, as an extinguishment of the original instrument and the issuance of a new instrument.

The Company has computed the fair value of warrants, options, convertible notes and convertible preferred stock issued using the Monte-Carlo and Black-Scholes option pricing models. The expected term used for warrants, convertible notes and convertible preferred stock are the contractual life and the expected term used for options issued is the estimated period of time that options granted are expected to be outstanding. The Company utilizes the “simplified” method to develop an estimate of the expected term of “plain vanilla” option grants. The Company is utilizing an expected volatility figure based on a review of the historical volatilities, over a period of time, equivalent to the expected life of the instrument being valued, of similarly positioned public companies within its industry. The risk-free interest rate was determined from the implied yields from U.S. Treasury zero-coupon bonds with a remaining term consistent with the expected term of the instrument being valued.

Net Loss Per Common Share

Basic net loss per common share is computed by dividing net loss attributable to common shareholders by the weighted average number of common shares outstanding during the period. Diluted net loss per common share is computed by dividing net loss attributable to common shareholders by the weighted average number of common shares outstanding, plus the number of additional common shares that would have been outstanding if the common share equivalents had been issued (computed using the treasury stock or if converted method), if dilutive.

The following common share equivalents are excluded from the calculation of weighted average common shares outstanding, because their inclusion would have been anti-dilutive:

	For the Years Ended December 31,	
	2020	2019
Options	50,000	-
Warrants	6,064,908	-
Convertible debt ^(a)	932,614	682,908
Total potentially dilutive shares	<u>7,047,522</u>	<u>682,908</u>

(a) Represents shares issuable upon conversion of debt at variable conversion process, which were calculated using the fair value of the Company’s common stock at the respective balance sheet date.

Research and Development

Research and development expenses are charged to operations as incurred. During the years ended December 31, 2020 and 2019, the Company incurred \$2,217,371 and \$1,981,299, respectively, of research and development expenses. See Note 17 – Related Parties for more information on research and development expenses – related parties. See Note 3 for a discussion related to acquired IPR&D.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

Income Taxes

The Company accounts for income taxes under the provisions of ASC Topic 740 “Income Taxes” (“ASC 740”).

The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of items that have been included or excluded in the financial statements or tax returns. Deferred tax assets and liabilities are determined on the basis of the difference between the tax basis of assets and liabilities and their respective financial reporting amounts (“temporary differences”) at enacted tax rates in effect for the years in which the temporary differences are expected to reverse.

The Company utilizes a recognition threshold and measurement process for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Company’s policy is to classify assessments, if any, for tax related interest as interest expense and penalties as general and administrative expenses in the consolidated statements of operations and comprehensive loss.

Reclassifications

Certain prior period balances have been reclassified in order to conform to the current period presentation. These reclassifications have no effect on previously reported results of operations or loss per share.

Subsequent Events

The Company has evaluated events that have occurred after the balance sheet date but before these financial statements were issued. Based upon that evaluation, the Company did not identify any recognized or non-recognized subsequent events that would have required adjustment or disclosure in the financial statements, except as disclosed in Note 18 - Subsequent Events.

Recently Issued Accounting Pronouncements

Recently Adopted Accounting Pronouncements

In March 2020, the Financial Accounting Standards Board (“FASB”) issued ASU 2020-03, “Codification Improvements to Financial Instruments” (“ASU 2020-03”). ASU 2020-03 improves and clarifies various financial instruments topics. ASU 2020-03 includes seven different issues that describe the areas of improvement and the related amendments to GAAP, intended to make the standards easier to understand and apply by eliminating inconsistencies and providing clarifications. The Company adopted ASU 2020-03 upon issuance, which did not have a material effect on the Company’s consolidated financial statements.

In January 2017, the FASB issued Accounting Standards Update (“ASU”) No 2017-04, “Intangibles – Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment”, which eliminated the calculation of implied goodwill fair value. Under the amendments in this update, an entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit’s fair value. However, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The Company adopted ASU 2017-04 upon issuance and its adoption did not have a material impact on the Company’s consolidated financial statements.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Recently Issued But Not Yet Adopted Accounting Pronouncements

In February 2016, the FASB issued Accounting Standards Update (“ASU”) No 2016-02, “Leases (Topic 842)” (“ASU 2016-02”). ASU 2016-02 requires that a lessee recognize the assets and liabilities that arise from operating leases. A lessee should recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. For leases with a term of twelve months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. In transition, lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. This amendment will be effective for fiscal years beginning after December 15, 2020, and interim periods within fiscal years beginning after December 15, 2021. The FASB issued ASU No. 2018-10 “Codification Improvements to Topic 842, Leases” (“ASU 2018-10”), ASU No. 2018-11 “Leases (Topic 842) Targeted Improvements” (“ASU 2018-11”) in July 2018, and ASU No. 2018-20 “Leases (Topic 842) - Narrow Scope Improvements for Lessors” (“ASU 2018-20”) in December 2018. ASU 2018-10 and ASU 2018-20 provide certain amendments that affect narrow aspects of the guidance issued in ASU 2016-02. ASU 2018-11 allows all entities adopting ASU 2016-02 to choose an additional (and optional) transition method of adoption, under which an entity initially applies the new leases standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. The Company is currently evaluating these ASUs and their impact on its consolidated financial statements.

In August 2018, the FASB issued ASU No. 2018-13 “Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement” (“ASU 2018-13”). The amendments in ASU 2018-13 modify the disclosure requirements on fair value measurements based on the concepts in the FASB Concepts Statement, including the consideration of costs and benefits. The amendments on changes in unrealized gains and losses, the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements, and the narrative description of measurement uncertainty should be applied prospectively for only the most recent interim or annual period presented in the initial fiscal year of adoption. All other amendments should be applied retrospectively to all periods presented upon their effective date. The amendments are effective for fiscal years beginning after December 15, 2020. Early adoption is permitted, including adoption in an interim period. The Company is currently evaluating ASU 2018-13 and its impact on its financial position, results of operations and cash flows.

In December 2019, the FASB issued ASU 2019-12, “Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes,” which is intended to simplify various aspects related to accounting for income taxes. ASU 2019-12 removes certain exceptions to the general principles in Topic 740 and also clarifies and amends existing guidance to improve consistent application. ASU 2019-12 is effective for fiscal years beginning after December 15, 2021. The Company is currently evaluating ASU 2019-12 and its impact on its financial position, results of operations, and cash flows.

In February 2020, the FASB issued ASU No. 2020-02, Financial Instruments — Credit Losses (Topic 326) and Leases (Topic 842) — Amendments to SEC Paragraphs Pursuant to Securities and Exchange Commission (“SEC”) Staff Accounting Bulletin No. 119 and Update to SEC Section on Effective Date (“ASU 2020-02”) which provides clarifying guidance and minor updates to ASU No. 2016-13 — Financial Instruments — Credit Loss (Topic 326) (“ASU 2016-13”) and related to ASU No. 2016-02 — Leases (Topic 842). ASU 2020-02 amends the effective date of ASU 2016-13, such that ASU 2016-13 and its amendments will be effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2022. The Company is currently evaluating ASU 2020-02 and its impact on its financial position, results of operations, and cash flows.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

In August 2020, the FASB issued ASU No. 2020-06 “Debt with Conversion and Other Options (Topic 470) and Derivatives and Hedging-Contracts in Entity’s Own Equity (Topic 815). The amendments in ASU 2020-06 are intended to simplify the accounting for certain financial instruments with characteristics of liabilities and equity by eliminating certain accounting models in Subtopic 470-20, for convertible debt instruments. Under the amendments in this update, the embedded conversion features no longer are separated from the host contract for convertible instruments with conversion features that are not required to be accounted for as derivatives under Topic 815, Derivatives and Hedging, or that do not result in substantial premiums accounted for as paid-on capital. A convertible debt instrument will be accounted for as a single liability measured at its amortized cost and convertible preferred stock will be accounted for as a single equity instrument measured at its historical cost, as long as no other features require bifurcation and recognition as derivatives. By removing the separation models, the interest rate of convertible debt instruments typically will be closer to the coupon interest rate when applying the guidance in Topic 835, Interest. These amendments to the derivatives scope exception for contracts in an entity’s own equity change the population of contracts that are recognized as assets or liabilities. For a freestanding instrument, an entity should record it in equity if the instrument qualifies for the derivatives scope exception under the amendments. For an embedded feature, if the feature qualifies for the derivatives scope exception under the amendments, an entity should no longer separate the feature and account for it individually. The amendments in this Update are effective for fiscal years beginning after December 15, 2021, including interim periods within those fiscal years. The Company is currently evaluating ASU 2020-06 and its impact on its financial position, results of operations, and cash flows.

NOTE 4 — REORGANIZATION AND RECAPITALIZATION

On July 16, 2019, 180 and each of 180 LP, Katexco and CBR Pharma completed a corporate restructuring, pursuant to which 180 LP, Katexco and CBR Pharma became wholly-owned subsidiaries of 180 (the “Reorganization”). It was determined that Katexco was the accounting acquirer in the Reorganization and the remaining companies were the accounting acquirees.

In connection with the Reorganization, the Company issued an aggregate of 9,881,785 shares of common stock, and 1 share of preferred stock which is exchangeable into an aggregate of 1,664,083 shares of common stock at the option of the holders, to the former shareholders of CBR Pharma and 180 LP, in exchange for 100% of the outstanding equity and equity equivalents of CBR Pharma and 180 LP. Of the 9,881,785 shares of common stock issued in connection with the Reorganization, 2,694,053 shares were issued to a consultant who were subject to redemption by 180 LP (the “Contingently Redeemable Shares”) for an aggregate redemption price of \$4.00 if (i) the closing of the Business Combination did not occur on or prior to October 31, 2019; or (iii) the consultant terminated its service with 180 LP prior to October 31, 2019. On November 11, 2019, the Board of Directors authorized its management to enter into an agreement to waive its right of redemption in connection with the Contingently Redeemable Shares. Note 15 - Stockholders’ Equity (Deficiency), Contingently Redeemable Shares.

The Reorganization was accounted for as a reverse acquisition using the acquisition method of accounting, with Katexco being the accounting acquirer for financial reporting purposes.

The following table summarizes the purchase price consideration paid to the accounting acquirees:

	CBR Pharma	180 LP	Total
Debt assumed	\$ -	\$ 270,000	\$ 270,000
Shares at fair value ^(a)	24,927,274	20,939,224	45,866,498
Total Purchase Consideration	\$ 24,927,274	\$ 21,209,224	\$ 46,136,498

- a) Represents the fair value of 3,965,059 and 1,326,830 shares of common stock and common stock equivalents issued to the former shareholders of CBR Pharma and 180 LP, respectively. The value of the Contingently Redeemable Shares was not accounted for since, as of the date of the Reorganization, it was not probable that the conditions for which the redemption provision could be removed would be met.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

The following table represents the preliminary allocation of the assets acquired and liabilities assumed, based on their fair values on the acquisition date:

	CBR Pharma	180	Total
Cash	\$ 47,268	\$ 38,810	\$ 86,078
Prepaid expenses (1)	126,606	595,849	722,455
Other receivables	-	420,000	420,000
Deposits	86,192	-	86,192
Property and equipment	47,958	-	47,958
Technology licenses (2)	1,609,000	-	1,609,000
In process research and development (2)	1,584,000	10,943,000	12,527,000
Due from (to) related parties	783,593	(555,100)	228,493
Accounts payable and accrued expenses	(1,528,894)	(134,081)	(1,662,976)
Deferred income, related party (3)	(36,537)	(492,329)	(528,866)
Deferred tax liabilities (4)	(832,000)	(2,845,180)	(3,677,180)
Net fair value of assets acquired and liabilities assumed	1,887,186	7,970,969	9,858,154
Goodwill (2)	23,040,089	13,238,255	36,278,344
Total	\$ 24,927,275	\$ 21,209,224	\$ 46,136,498

- (1) Includes \$588,349 related to prepaid research and development expenses with Oxford University. See Note 14 – Commitments and Contingencies.
 (2) Changes in the balance of technology licenses, in process research and development and goodwill reflected on the balance sheet are the result of the impact of the change in foreign currency exchange rates.
 (3) Represents deferred income associated with the 360 Life Sciences Corp. agreement (formerly known as the “Reformation Pharmaceuticals” agreement). See Note 14 – Commitments and Contingencies.
 (4) See Note 16 – Income Taxes for more information on deferred tax liabilities.

Management, with the assistance of an independent valuation firm, valued the technology licenses and the in-process research and development utilizing the cost approach. The goodwill is attributed to (a) synergies arising from the overlap of clinical research among the entities; (b) the benefit of future market, drug and product development; and (c) the benefit of revenue growth from both areas. The deferred tax liability relates to the book-tax basis difference associated with the intangible assets at an estimated tax rate of 26%, which is an estimate of the blended United States and Canadian federal and state/province effective income tax rates.

Pro Forma Results

The following table sets forth the unaudited pro forma results of the Company as if the Reorganization were effective on January 1, 2019. These combined results are not necessarily indicative of the results that may have been achieved had the companies always been combined.

	For the Year Ended December 31, 2019
Revenues	\$ -
Operating loss	\$ (25,300,321)
Net loss	\$ (29,437,823)

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

NOTE 5 — BUSINESS COMBINATION

On November 6, 2020 (the “Closing Date”), the Company consummated the previously announced business combination (the “Business Combination”) following a special meeting of stockholders held on November 5, 2020, where the stockholders of the Company considered and approved, among other matters, a proposal to adopt that certain Business Combination Agreement (as amended, the “Business Combination Agreement”), dated as of July 25, 2019. References to “KBL” below refer to the Company prior to the Closing Date, then known as KBL Merger Corp. IV (“KBL”). Pursuant to the Business Combination Agreement, among other things, a subsidiary of the Company merged with and into 180, with 180 continuing as the surviving entity and a wholly-owned subsidiary of the Company (the “Merger”). The Business Combination was accounted for as a reverse recapitalization of 180. All of 180’s capital stock outstanding immediately prior to the merger was exchanged for (i) 15,736,348 shares of 180LS common stock, (ii) 2 shares of Class C and Class K Special Voting Shares exchangeable into 1,763,652 shares of 180LS common stock which are presented as outstanding in the accompanying Statement of Changes in Stockholders’ Equity (Deficiency) due to the reverse recapitalization. KBL’s 6,928,645 outstanding shares of common stock are presented as being issued on the date of the Business Combination.

Below is a summary of the assets acquired and the liabilities assumed in connection with the Business Combination:

	KBL Merger Corp. IV
Cash	\$ 3,006,235
Prepaid expenses	57,748
Marketable securities held in Trust Account	10,373,857
Accounts payable and accrued expenses	(4,722,933)
Convertible notes payable, net of debt discount	(2,504,045)
Derivative liabilities (see Note 11)	(3,945,365)
Due to/from Related Party	(201,859)
Loans payable	(10,000)
Promissory note with 180	(496,161)
Redemptions payable	(9,006,493)
Net fair value of assets acquired and liabilities assumed	(6,813,017)
Series A convertible preferred stock (see Note 15)	(1,411,264)
Effect of reverse recapitalization	\$ (8,860,281)

Subsequent to the Business Combination, the marketable securities were released from the Trust Account, were converted into cash, and were used to settle the share redemptions payable.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

NOTE 6 — NOTES RECEIVABLE, NET

The Company had the following notes receivable from KBL, net as of December 31, 2020 and 2019:

	As of December 31,	
	2020	2019
Notes receivable from KBL	\$ -	\$ 1,699,825
Provision for notes receivable from KBL	-	(1,699,825)
Notes receivable, net	\$ -	\$ -

As of December 31, 2019, 180 had loaned \$1,699,825 to KBL to fund its operating expenses, deal transaction expenses, and certain financing expenses for the Business Combination. During the year ended December 31, 2020, KBL paid an aggregate amount of \$1,203,750 on behalf of 180 in the form of payments to various vendors of 180 and cash paid directly to 180 in order to fund its operations, in partial satisfaction of the Company's Notes Receivable. The notes did not accrue interest and matured upon the closing of the Business Combination. As of December 31, 2020, the remaining balance of the notes receivable from KBL was eliminated in consolidation as part of the Business Combination with KBL.

The notes receivable from KBL were originally fully reserved because recoverability could not be assured in the event the Business Combination did not close and since the Business Combination was consummated, the reserve was reversed and recovered as of December 31, 2020. During the years ended December 31, 2020 and 2019, 180 recorded bad debt (recovery) expense of (\$1,699,825) and \$649,825, respectively, related to the notes receivable from KBL, which is included in general and administrative expense on the accompanying consolidated statements of operations and comprehensive loss. The Company recorded \$1,050,000 of bad debt expense before the Reorganization, which is not included in these consolidated financial statements.

NOTE 7 — PREPAID EXPENSES AND OTHER CURRENT ASSETS

Prepaid expenses consist of the following as of December 31, 2020 and 2019:

	As of December 31,	
	2020	2019
Insurance	\$ 1,003,271	\$ -
Research and development expense tax credit receivable	409,470	211,740
Professional fees	104,080	115,166
Value-added tax receivable	37,751	43,352
Taxes	37,424	-
Other	14,418	34,999
Research and development	\$ -	\$ 186,391
	\$ 1,606,414	\$ 591,648

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

NOTE 8 — INTANGIBLE ASSETS

Intangible assets consist of the following as of December 31, 2020 and 2019:

	Remaining Amortization Period In Years	As of December 31, 2020			As of December 31, 2019		
		at December 31, 2020	Gross Asset Value	Accumulated Amortization	Net Carrying Value	Gross Asset Value	Accumulated Amortization
Licensed patents	15.6	\$ 592,608	\$ (76,766)	\$ 515,842	\$ 583,145	\$ (43,314)	\$ 539,831
Technology license	18.5	1,652,469	(120,493)	1,531,976	1,619,107	(37,104)	1,582,003
		\$ 2,245,077	\$ (197,259)	\$ 2,047,818	\$ 2,202,252	\$ (80,418)	\$ 2,121,834

Changes in the gross asset value of licensed patents and technology licenses from the dates acquired are the result of changes in the foreign currency exchange rate.

The Company recorded amortization expense of \$116,841 and \$62,589 during the years ended December 31, 2020 and 2019, respectively, related to intangible assets, which is included in general and administrative expense on the accompanying consolidated statements of operations and comprehensive loss.

Future amortization related to intangible assets is as follows:

For the Years Ending December 31,		
2021		\$ 113,994
2022		113,994
2023		113,994
2024		113,994
2025		113,994
Thereafter		1,477,848
		\$ 2,047,818

FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

NOTE 9 — ACCRUED EXPENSES

Accrued expenses consist of the following as of December 31, 2020 and 2019:

	For the Years Ended December 31,	
	2020	2019
Consulting fees	\$ 1,718,559	\$ 613,115
Professional fees	1,261,751	459,084
Employee and director compensation	878,292	395,248
Interest	184,576	15,571
Other	45,321	3,003
Research and development fees	17,817	120,631
Travel expenses	4,600	-
Patent costs	-	84,814
	\$ 4,110,916	\$ 1,691,466

As of December 31, 2020 and 2019, accrued expenses - related parties was \$454,951 and \$177,074, respectively. As of December 31, 2020, accrued expenses – related parties consisted of fees of professional fees and services. See Note 17 – Related Parties for details.

NOTE 10 — ACCRUED ISSUABLE EQUITY

A summary of the accrued issuable equity activity during the years ended December 31, 2020 and 2019 is presented below:

Balance at January 1, 2019	\$ 640,116
Reclassification to equity	(979,365)
Mark-to market	327,879
Effect of FX translation	11,370
Balance at December 31, 2019	-
Additions	43,095
Reclassification to equity	-
Mark-to market	-
Balance at December 31, 2020	\$ 43,095

During the year ended December 31, 2020, the Company entered into a contractual arrangement for services in exchange for shares of common stock of the Company for fixed dollar amounts. Pursuant to the contractual agreement, the Company will issue an aggregate value of \$5,000 common shares on a monthly basis and an aggregate of \$30,000 of common shares at the end of each quarter. As of December 31, 2020, the Company recorded \$43,095 of accrued issuable equity related to services. See Note 14 – Commitment and Contingencies for more information on this contractual agreement. See Note 18 – Subsequent Events for additional information.

(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

NOTE 11 — DERIVATIVE LIABILITIES

The following table sets forth a summary of the changes in the fair value of Level 3 derivative liabilities that are measured at fair value on a recurring basis:

	For the Year Ended December 31, 2020			
	Warrants	Convertible Notes	Preferred Stock	Total
Beginning balance as of January 1, 2020	\$ -	\$ -	\$ -	\$ -
Derivative liabilities assumed at date of Business Combination	2,754,865	23,500	1,167,000	3,945,365
Derecognition of derivative liabilities in connection with convertible note and preferred stock modifications and exchanges	-	(723,336)	(2,033,068)	(2,756,404)
Issuance of derivative liabilities	-	1,219,700	218,000	1,437,700
Change in fair value of derivative liabilities	1,462,305	(294,064)	648,068	1,816,309
Ending balance as of December 31, 2020	\$ 4,217,170	\$ 225,800	\$ -	\$ 4,442,970

During the year ended December 31, 2020, in connection with the Business Combination, the Company assumed derivative liabilities in the aggregate amounts of \$188,940, \$1,978,000, \$587,925, \$23,500, and \$531,000 related to the AGP Warrants (defined below under AGP Warrants), public warrants, private warrants, embedded conversion options of certain convertible notes payable, and redemption features of the Series A Preferred Stock, respectively. See Note 13 – Convertible Notes Payable for additional details. See Note 15 – Stockholders’ Equity (Deficiency) for a description of the warrants issued and preferred stock redemption features deemed to be derivative liabilities. In applying the Monte-Carlo and Black-Scholes option pricing models to derivatives assumed on November 6, 2020, the Company used the following assumptions:

	November 6, 2020
Riske free interest rate	0.08% - 0.40%
Expected term (years)	0.26 - 5.01
Expected volatility	80% - 207%
Expected dividends	0.00%

In connection with the modification of certain convertible notes on November 25, 2020 (See Note 13 – Convertible Notes Payable for additional details), the Company applied the Monte-Carlo and Black-Scholes option pricing models to value embedded features as derivative liabilities with the following assumptions:

	November 25, 2020
Riske free interest rate	0.06% - 0.09%
Expected term (years)	0.24 - 0.54
Expected volatility	115% - 160%
Expected dividends	0.00%

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

During the year ended December 31, 2020, the Company extinguished an aggregate of \$1,318,704 of derivative liabilities in connection with repayments and exchanges of certain convertible notes payable and preferred stock into shares of the Company's common stock. See Note 13 – Convertible Notes Payable and Note 15 – Stockholders' Equity (Deficiency) for additional details. In applying the Monte-Carlo and Black-Scholes option pricing models to derivatives related to the embedded features of the convertible notes during the year ended December 31, 2020, the Company used the following assumptions:

	For the Year Ended December 31, 2020
Riske free interest rate	0.03% - 0.09%
Expected term (years)	0.15 - 0.50
Expected volatility	105% - 150%
Expected dividends	0.00%

In applying the Monte-Carlo and Black-Scholes option pricing models to derivatives outstanding on December 31, 2020, the Company used the following assumptions:

	December 31, 2020
Riske free interest rate	0.00% - 0.36%
Expected term (years)	0.11 - 4.85
Expected volatility	84% - 207%
Expected dividends	0.00%

Convertible Notes

On November 6, 2020, in connection with the Business Combination (see Note 5), the Company assumed certain convertible notes (see Note 13) which had default features that had been bifurcated from the notes and were recorded as derivative liabilities with a fair value of \$23,500 on that date. On November 25, 2020, the conversion prices of the convertible notes were amended and the Company determined that the amendment should be recorded as an extinguishment (see Note 13). The existing derivative liabilities were first marked-to-market as of the date of the amendment, reducing the value by \$3,200 and the \$20,300 fair value of the derivative liabilities was then derecognized. The reissuance of the amended convertible notes was recorded, including the bifurcation of the default features and new redemption features which had an aggregate fair value of \$1,219,700. Between November 27, 2020 and December 31, 2020, there were multiple conversions of the convertible notes that were recorded as extinguishments due to the existence of bifurcated derivative liabilities (see Note 13). The bifurcated derivative liabilities were marked-to-market just prior to each conversion and at period end, resulting in an aggregate reduction of \$290,864 in the fair value of the derivative liabilities and \$703,036 aggregate fair value of the bifurcated derivative liabilities were derecognized on the conversion dates, leaving derivative liabilities with a fair value of \$225,800 outstanding on December 31, 2020.

Alliance Global Partners ("AGP") Warrants

In connection with the closing of the Business Combination on November 6, 2020, the Company became obligated to issue five-year warrants for the purchase of 63,658 shares of the Company's common stock at an exercise price of \$5.28 per share (the "AGP Warrant Liability") to an investment banking firm in connection with a prior private placement. The value of the AGP Warrants assumed on the date of the Business Combination was \$188,940 and at December 31, 2020 the value is \$165,895, the difference is due to a change in fair value of \$23,045. See Note 18 – Subsequent Events for details of the issuance of the AGP warrants.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Public Warrants

Participant's in KBL's initial public offering received an aggregate of 11,500,000 Public Warrants ("Public Warrants"). Each Public Warrant entitles the holder to purchase one-half of one share of the Company's common stock at an exercise price of \$5.75 per half share (\$11.50 per whole share), subject to adjustment. No fractional shares will be issued upon exercise of the Public Warrants. The Public Warrants are currently exercisable and will expire five years after the completion of the Business Combination or earlier upon redemption or liquidation. The Company may redeem the Public Warrants, in whole and not in part, at a price of \$0.01 per Public Warrant upon 30 days' notice ("30-day redemption period"), only in the event that the last sale price of the common stock equals or exceeds \$18.00 per share for any 20 trading days within a 30-trading day period ending on the third trading day prior to the date on which notice of redemption is given, provided there is an effective registration statement with respect to the shares of common stock underlying such Public Warrants and a current prospectus relating to those shares of common stock is available throughout the 30-day redemption period. If the Company calls the Public Warrants for redemption as described above, the Company's management will have the option to require all holders that wish to exercise Public Warrants to do so on a "cashless basis." Management has determined that the Public Warrants contain a tender offer provision which could result in the Public Warrants settling for the tender offer consideration (including potentially cash) in a transaction that didn't result in a change-in-control. This feature results in the Public Warrants being precluded from equity classification. Accordingly, the Public Warrants are classified as liabilities measured at fair value, with changes in fair value each period reported in earnings. The value of the Public Warrants assumed on the date of the Business Combination was \$1,978,000 and at December 31, 2020 the value was \$3,795,000, the difference is due to a change in fair value of \$1,817,000.

Private Warrants

Participant's in KBL's initial private placement received an aggregate of 502,500 Private Warrants ("Private Warrants"). Each Private Warrant entitles the holder to purchase one-half of one share of the Company's common stock at an exercise price of \$5.75 per half share (\$11.50 per whole share), subject to adjustment. No fractional shares will be issued upon exercise of the warrants. The Private Warrants are currently exercisable and will expire five years after the completion of the Business Combination or earlier upon redemption or liquidation. The Private Warrants are non-redeemable so long as they are held by original holders or their permitted transferees. If the Private Warrants are held by other parties, the Company may redeem the Private Warrants, in whole and not in part, at a price of \$0.01 per Warrant upon 30 days' notice ("30-day redemption period"), only in the event that the last sale price of the common stock equals or exceeds \$18.00 per share for any 20 trading days within a 30-trading day period ending on the third trading day prior to the date on which notice of redemption is given, provided there is an effective registration statement with respect to the shares of common stock underlying such Warrants and a current prospectus relating to those shares of common stock is available throughout the 30-day redemption period. If the Company calls the Private Warrants for redemption as described above, the Company's management will have the option to require all holders that wish to exercise Private Warrants to do so on a "cashless basis." Management has determined that the Private Warrants contain a tender offer provision which could result in the Private Warrants settling for the tender offer consideration (including potentially cash) in a transaction that didn't result in a change-in-control. This feature (amongst others) results in the Private Warrants being precluded from equity classification. Accordingly, the Private Warrants are classified as liabilities measured at fair value, with changes in fair value each period reported in earnings. The value of the Private Warrants assumed on the date of the Business Combination was \$587,925 and at December 31, 2020, the value was \$256,275, the difference is due to a change in fair value of \$331,650.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

The following is a summary of warrant activity (in whole shares) for the year ended December 31, 2020:

	Number of Warrants	Weighted Average Exercise Price	Weighted Average Remaining Life In Years	Aggregate Intrinsic Value
Outstanding, January 1, 2020	-	\$ -	-	\$ -
Issued	6,064,908	\$ 11.43	-	\$ -
Outstanding, December 31, 2020	<u>6,064,908</u>	<u>\$ 11.43</u>	4.9	\$ -

(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

On January 31, 2020, the loan payable dated October 29, 2019 was amended to increase the principal balance by \$3,000 in satisfaction of certain accounts payable. The loans payable issued between September 18, 2019 and March 31, 2020 matured on June 30, 2020. On July 1, 2020, the Company amended the terms of these loans to extend the maturity terms to the earlier of (a) the closing of a qualified financing; or (b) November 1, 2020.

On June 12, 2020, the Company entered into a promissory note agreement with Kingsbrook Opportunities Master Fund LP (“Kingsbrook”) for an aggregate principal sum of \$150,000, which bears interest at 15% per annum and matures on August 31, 2021. See Note 13 — Convertible Notes Payable, Extinguishment of Senior Note and Issuance of New Note for additional details. See Note 18 – Subsequent Events for information related to the repayment of this note.

On November 27, 2020, the Company entered into amended loan agreements, excluding the Kingsbrook promissory note and PPP loans (discussed below), with all parties to modify the terms of the loan agreements. The loan agreements were extended and modified to mature at the earlier of (a) a filing pursuant to a Form S-1 Registration Statement; or (b) February 15, 2021. See Note 18 – Subsequent Events for more information on the extension of the loans and repayment of the Kingsbrook promissory note.

The terms of all loan extensions were reviewed and were deemed to be modifications, rather than extinguishments.

Loans Payable, Non-Current Portion

The non-current portion of the Company’s loans payable as of December 31, 2020 are as follows:

	Simple Interest Rate	December 31, 2020	Maturity Date
PPP loan payable issued May 5, 2020	1.0%	51,051	5/4/2022
PPP loan payable issued April 24, 2020	1.0%	2,000	4/23/2022
BBLS loan payable issued June 10, 2020	2.5%	68,245	6/10/2026
Subtotal		121,296	
Less: Current portion of PPP loans (see above)		(7,533)	
		\$ 113,763	

During April and May 2020, the Company received loans in the aggregate amount of \$53,051 (the “PPP Loans”), under the Payroll Protection Program (“PPP”), to support continuing employment during the COVID-19 pandemic. See Note 18 – Subsequent Events for more information on the application for forgiveness of the PPP Loans.

Effective March 27, 2020, legislation referred to as the Coronavirus Aid, Relief, and Economic Security Act (the “CARES Act”) was passed to benefit companies in the U.S. that were significantly impacted by the pandemic. Under the terms of the CARES Act, as amended by the Paycheck Protection Program Flexibility Act of 2020, the Company is eligible to apply for and receive forgiveness for all or a portion of their respective PPP Loans. Such forgiveness will be determined, subject to limitations, based on the use of the loan proceeds for certain permissible purposes as set forth in the PPP, including, but not limited to, payroll costs (as defined under the PPP) and mortgage interest, rent or utility costs (collectively, “Qualifying Expenses”) incurred during the 24 weeks subsequent to funding, and on the maintenance of employee and compensation levels, as defined, following the funding of the PPP Loan. The Company intends to use the proceeds of their PPP Loans for Qualifying Expenses. However, no assurance is provided that the Company will be able to obtain forgiveness of the PPP Loans in whole or in part. Any amounts not forgiven incur interest at 1.0% per annum and monthly repayments of principal and interest are deferred for six months after the date of disbursement. While the Company’s PPP loans currently have a two-year maturity, the amended law will permit the Company to request a five-year maturity. As of December 31, 2020, the Company recorded accrued interest of \$354 related to the PPP loans. During the years ended December 31, 2020, and 2019, the Company recorded interest expense of \$354 and \$0, respectively, related to the PPP loans.

(FORMERLY KBL MERGER CORP. IV)**
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

On June 10, 2020, the Company received GBP £50,000 (USD \$64,353) of cash proceeds pursuant to the Bounce Back Loan Scheme (“BBLS”), which provides financial support to businesses across the UK that are losing revenue, and seeing their cashflow disrupted, as a result of the COVID-19 outbreak. The BBLS is unsecured and bears interest at 2.5% per annum. The maximum loan amount is GBP £50,000 and the length of the loan is six years, with payments beginning 12 months after the date of disbursement. Early repayment is allowed, without early repayment fees. As of December 31, 2020, the Company recorded accrued interest of GBP £514 (USD \$702) related to the BBLS loan. During the years ended December 31, 2020, and 2019, the Company recorded interest expense of GBP £514 (USD \$702) and \$0, respectively, related the BBLS loan.

Loans Payable, Related Parties

Loans payable to related parties (the “Related Party Loans”) consist of loans payable to certain of the Company’s officers, directors and a greater than 10% stockholder. The Company had the following loans payable to related parties outstanding as of December 31, 2020 and 2019:

	Simple Interest Rate	December 31, 2020	December 31, 2019
Loan payable issued September 18, 2019	8%	\$ 50,000	\$ 50,000
Loan payable issued October 8, 2019	0%	4,000	4,000
Loan payable issued October 20, 2019 *	8%	81,463	79,572
Loan payable issued October 28, 2019 *	8%	7,088	6,887
Loan payable issued October 29, 2019	8%	40,000	40,000
Loan payable issued October 29, 2019	8%	10,000	10,000
Loan payable issued November 27, 2019 *	8%	20,515	19,933

* These loans are denominated in currencies other than USD.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

At issuance, the Related Party Loans provided for a maturity date upon the earliest of (a) the consummation of the Business Combination; (b) June 30, 2020; or (c) 60 days after the respective issuance date. On July 1, 2020, the Company amended the terms of the Related Party Loans to extend the maturity terms to the earlier of (a) the closing of a qualified financing; or (b) November 1, 2020. See Note 18 – Subsequent Events, Extension of the Loan Agreements for additional details. The terms of all loan extensions were reviewed and were deemed to be modifications, rather than extinguishments.

Interest Expense on Loans Payable

For the year ended December 31, 2020, the Company recognized interest expense and interest expense — related parties associated with outstanding loans, of \$23,709 and \$35,973, respectively. During the year ended December 31, 2019, the Company recognized interest expense and interest expense — related parties associated with outstanding loans, of \$2,055 and \$3,086, respectively.

As of December 31, 2020, the Company had accrued interest and accrued interest — related parties associated with outstanding loans, of \$24,824 and \$37,539, respectively. As of December 31, 2019, the Company had accrued interest and accrued interest — related parties associated with outstanding loans, of \$2,055 and \$3,086, respectively. See Note 17 — Related Parties for additional details.

FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Dominion, Kingsbrook and Alpha Convertible Promissory Notes

Upon the closing of the Business Combination, the Dominion (defined below), Kingsbrook and Alpha (defined below) Convertible Promissory Notes were assumed.

Dominion Convertible Promissory Notes

	Dominion		
	Principal	Debt Discount	Net
Balance at 12/31/19	\$ -	\$ -	\$ -
Assumption of Note	1,805,556	-	1,805,556
Debt discount at assumption	-	(722,966)	(722,966)
Amortization of debt discount	-	134,134	134,134
Impact of extinguishment	-	588,832	588,832
Impact of conversion	(972,222)	-	(972,222)
Balance at 12/31/20	\$ 833,334	\$ -	\$ 833,334

On June 12, 2020 (the “Dominion Issue Date”), KBL entered into a \$1,666,667 10% Secured Convertible Promissory Note and \$138,889 10% Senior Secured Convertible Extension Promissory Note (together the “Dominion Convertible Promissory Notes”) with Dominion Capital LLC (“Dominion”), which was issued to Dominion in conjunction with 400,000 shares of common stock (the “Dominion Commitment Shares”). In conjunction with the transaction, KBL entered into a series of Leak Out Agreements in which certain parities agreed that they would not sell, dispose or otherwise transfer, in aggregate more than 5% of the composite daily trading volume of the common stock of KBL. Pursuant to the Leak-Out Agreement between the KBL and Caravel CAD Fund Ltd., KBL issued 404,245 restricted shares of common stock (“Leak-Out Shares”).

The Dominion Convertible Promissory Notes had a debt discount due to original issue discount, third-party fees directly attributed to the issuance, leak-out shares, a derivative liability, a beneficial conversion feature and warrants. The debt discount assumed at the Business Combination for this note was \$722,996, which is being amortized to interest expense over the term of the debt. See Note 11 – Derivative Liabilities for more information on the derivative liabilities related to this note.

The Company has agreed to pay the principal amount, together with interest at the annual rate of 10% (unless the Company defaults, which increases the interest rate to 15%) (including 10% guaranteed interest), with principal and accrued interest on the Dominion Convertible Promissory Notes due and payable on February 11, 2021 (the “Dominion Maturity Date”), unless converted under terms and provisions as set forth within the Dominion Convertible Promissory Notes. The Dominion Convertible Promissory Notes provide Dominion with the right to convert, at any time, all or any part of the outstanding principal and accrued but unpaid interest into shares of the Company’s common stock at a conversion price of \$5.28 per share. The Dominion Convertible Promissory Notes require the Company to reserve at least 868,056 and 114,584 shares of common stock from its authorized and unissued common stock to provide for all issuances of common stock under the 10% Secured Convertible Promissory Note and 10% Senior Secured Convertible Extension Promissory Note, respectively. However, the Dominion Convertible Promissory Notes provide that the aggregate number of shares of common stock issued to the Dominion under the Dominion Convertible Promissory Notes shall not exceed 4.99% of the total number of shares of common stock outstanding as of the closing date unless the Company has obtained stockholder approval of the issuance (the “Beneficial Ownership Limitation”). Dominion, upon not less than sixty-one (61) days’ prior notice to the Company, may increase or decrease the Beneficial Ownership Limitation; provided, that the Beneficial Ownership Limitation in no event exceeds 9.99% of the number of shares of the common stock outstanding immediately after giving effect to the issuance of shares of common stock upon conversion of the Dominion Convertible Promissory Notes held by Dominion.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

On the 10th day following the Company consummating any public or private offering of any securities or other financing or capital-raising transaction of any kind (each a "Subsequent Offering") on any date other than the Maturity Date, the Company shall, subject to Dominion's conversion rights set forth in such notes, pay to Dominion in cash an amount equal to the Mandatory Prepayment Amount but in no event greater than fifty percent (50%) of the gross proceeds from the Subsequent Offering.

The Company shall pay a late fee (the "Late Fees") on any amount required to be paid under any transaction document and not paid when due, at a rate equal to the lesser of an additional 10% of such amount or the maximum rate permitted by applicable law which shall be due and owing daily from the date such amount is due hereunder through the date of actual payment in full of such amount in cash.

Immediately on and after the occurrence of any event of default, without need for notice or demand all of which are waived, interest on the notes shall accrue and be owed daily at an increased interest rate equal to the lesser of two percent (2.0%) per month (twenty-four percent (24.0%) per annum) or the maximum rate permitted under applicable law. In addition, in any event of default, the Company must pay a mandatory default amount equal to one hundred thirty percent (130%) of the sum of the outstanding principal amount of the Dominion Convertible Promissory Notes at such time and all accrued interest unpaid at such time (including any minimum interest remaining outstanding on such principal amount as of such time) and (b) all other amounts, costs, fees (including late fees), expenses, indemnification and liquidated and other damages and other amounts due to Dominion or any other party in respect of the Dominion Convertible Promissory Notes (as applicable, the "Mandatory Prepayment Amount").

The Dominion Convertible Promissory Notes also contain a provision whereby Dominion is due a minimum interest amount or make whole amount meaning on any date and with respect to any principal amount owing under the Dominion Convertible Promissory Notes, the difference between (a) 10% of such principal amount, representing a full year of interest payments thereunder and (b) any payment of interest made prior to such date with respect to such principal amount. To be free from doubt, the minimum interest amount is only applicable for the initial 12 month period from the Issue Date.

During the year ended December 31, 2020, the Company recorded interest expense and amortization of debt discount of \$77,067 and \$134,164, respectively, and accrued interest of \$52,254 as of December 31, 2020 associated with the Dominion Convertible Promissory Notes.

See Convertible Debt Conversions of the Dominion, Kingsbrook and Alpha Convertible Promissory Notes further on in this note for the details related to the 2020 conversions of the notes. See Note 18 - Subsequent Events for information related to the conversions of the convertible notes subsequent to December 31, 2020.

Amortization of debt discount	-	127,227	127,227
Impact of extinguishment	-	558,388	558,388
Impact of conversion	(1,695,411)	-	(1,695,411)
Balance at 12/31/20	\$ 101,000	\$ -	\$ 101,000

On June 12, 2020 (the “Kingsbrook Issue Date”), KBL entered into a \$1,657,522 10% Secured Convertible Promissory Note and \$138,889 10% Senior Secured Convertible Extension Promissory Note (together the “Kingsbrook Convertible Promissory Notes”) with Kingsbrook Opportunities Master Fund LP (“Kingsbrook”), which was issued to Kingsbrook in conjunction with 250,000 shares of common stock (the “Kingsbrook Commitment Shares”).

The Kingsbrook Convertible Promissory Notes had a debt discount due to original issue discount, third-party fees directly attributed to the issuance, a derivative liability, a beneficial conversion feature and warrants. The debt discount assumed at the Business Combination for this note was \$685,615, which is being amortized to interest expense over the term of the debt. See Note 11 – Derivative Liabilities for more information on the derivative liabilities related to this note.

The Company has agreed to pay the principal amount, together with guaranteed interest at the annual rate of 10% (unless the Company defaults, which increases the interest rate to 15%), with principal and accrued interest on the Kingsbrook Convertible Promissory Notes due and payable on February 11, 2021 (the “Maturity Date”), unless converted under terms and provisions as set forth within the Kingsbrook Convertible Promissory Notes. The Kingsbrook Convertible Promissory Notes provide Kingsbrook with the right to convert, at any time, all or any part of the outstanding principal and accrued but unpaid interest into shares of the Company’s common stock at a conversion price of \$5.28 per share. The Kingsbrook Convertible Promissory Notes require the Company to reserve at least 1,823,275 and 114,584 shares of common stock from its authorized and unissued common stock to provide for all issuances of common stock under the 10% Secured Convertible Promissory Note and 10% Senior Secured Convertible Extension Promissory Note, respectively. However, the Kingsbrook Convertible Promissory Notes provide that the aggregate number of shares of common stock issued to Kingsbrook under the Kingsbrook Convertible Promissory Notes shall not exceed 4.99% of the total number of shares of common stock outstanding as of the closing date unless the Company has obtained stockholder approval of the issuance (the (“Beneficial Ownership Limitation”). Kingsbrook, upon not less than sixty-one (61) days’ prior notice to the Company, may increase or decrease the Beneficial Ownership Limitation; provided, that the Beneficial Ownership Limitation in no event exceeds 9.99% of the number of shares of the common stock outstanding immediately after giving effect to the issuance of shares of common stock upon conversion of the Kingsbrook Convertible Promissory Notes held by Kingsbrook.

On the 10th day following the Company consummating any public or private offering of any securities or other financing or capital-raising transaction of any kind (each a “Subsequent Offering”) on any date other than the Maturity Date, the Company shall, subject to Kingsbrook’s conversion rights set forth in the note, pay to Kingsbrook in cash an amount equal to the Mandatory Prepayment Amount but in no event greater than fifty percent (50%) of the gross proceeds from the Subsequent Offering.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Immediately on and after the occurrence of any Event of Default, without need for notice or demand all of which are waived, interest on this Note shall accrue and be owed daily at an increased interest rate equal to the lesser of two percent (2.0%) per month (twenty-four percent (24.0%) per annum) or the maximum rate permitted under applicable law. In addition, in any Event of Default, the Company must pay a mandatory default amount equal to one hundred thirty percent (130%) of the sum of the outstanding principal amount of the Kingsbrook Convertible Notes at such time and all accrued interest unpaid at such time (including any minimum interest amount remaining outstanding on such principal amount as of such time) and (b) all other amounts, costs, fees (including late fees), expenses, indemnification and liquidated and other damages and other amounts due to Kingsbrook or any other party in respect of the Kingsbrook Convertible Promissory Notes.

The Kingsbrook Convertible Promissory Notes also contain a provision whereby Kingsbrook is due a minimum interest amount or make whole amount meaning on any date and with respect to any principal amount owing under the Kingsbrook Convertible Promissory Notes, the difference between (a) 10% of such principal amount, representing a full year of interest payments thereunder and (b) any payment of interest made prior to such date with respect to such principal amount. To be free from doubt, the minimum interest amount is only applicable for the initial 12 month period from the Issue Date.

During the year ended December 31, 2020, the Company recorded interest expense and amortization of debt discount of \$61,315 and \$127,228, respectively, and accrued interest of \$0 as of December 31, 2020 associated with the Kingsbrook Convertible Promissory Notes.

See Convertible Debt Conversions of the Dominion, Kingsbrook and Alpha Convertible Promissory Notes further on in this note for the details related to the 2020 conversions of the notes. See Note 18 - Subsequent Event for information related to the conversions of the convertible notes that occurred subsequent to December 31, 2020.

Alpha Convertible Promissory Note

	Alpha		
	Principal	Debt Discount	Net

Impact of conversion	(495,000)	-	(495,000)
Balance at 12/31/20	\$ 616,111	\$ -	\$ 616,111

On September 8, 2020 (the “Alpha Issue Date”), KBL entered into a \$1,111,111 10% Secured Convertible Promissory Note (the “Alpha Convertible Promissory Note”) with Alpha Capital Anstalt (“Alpha”), which was issued to the Holder in conjunction with 100,000 shares of common stock (the “Alpha Capital Anstalt Commitment Shares”).

The Alpha Convertible Promissory Notes had a debt discount due to original issue discount, third-party fees directly attributed to the issuance, a derivative liability, a beneficial conversion feature and warrants. The debt discount assumed at the Business Combination for this note was \$800,421, which is being amortized to interest expense over the term of the debt. See Note 11 – Derivative Liabilities for more information on the derivative liabilities related to this note.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

The Company has promised to pay the principal amount, together with guaranteed interest at the annual rate of 10% (unless the Company defaults, which increases the interest rate to 15%), with principal and accrued interest on the Alpha Convertible Promissory Note due and payable on April 7, 2021 (the “Maturity Date”), unless converted under terms and provisions as set forth within the Alpha Capital Anstalt Convertible Note. The Alpha Convertible Promissory Note provides Alpha with the right to convert, at any time, all or any part of the outstanding principal and accrued but unpaid interest into shares of the Company’s common stock at a conversion price of \$5.28 per share. The Alpha Convertible Promissory Note provides that the aggregate number of shares of common stock issued to Alpha under the Alpha Convertible Promissory Note shall not exceed 4.99% of the total number of shares of common stock outstanding as of the closing date unless the Company has obtained stockholder approval of the issuance (the “the Beneficial Ownership Limitation”). Alpha, upon not less than sixty-one (61) days’ prior notice to the Company, may increase or decrease the Beneficial Ownership Limitation; provided, that the Beneficial Ownership Limitation in no event exceeds 9.99% of the number of shares of the common stock outstanding immediately after giving effect to the issuance of shares of common stock upon conversion of the Alpha Convertible Promissory Note held by Alpha.

On the 10th day following the Company consummating any public or private offering of any securities or other financing or capital-raising transaction of any kind (each a “Subsequent Offering”) on any date other than the Maturity Date, the Company shall, subject to Alpha’s conversion rights set forth herein, pay to Alpha in cash an amount equal to the Mandatory Prepayment Amount but in no event greater than fifty percent (50%) of the gross proceeds from the Subsequent Offering.

Immediately on and after the occurrence of any Event of Default, without need for notice or demand all of which are waived, interest on this Note shall accrue and be owed daily at an increased interest rate equal to the lesser of two percent (2.0%) per month (twenty-four percent (24.0%) per annum) or the maximum rate permitted under applicable law. In addition, upon any Event of Default, the holder can elect to accelerate the amount due, payable in cash or in shares of common stock, at the greater of (i) 130% of the outstanding principal amount and accrued interest (including 10% minimum interest, discussed below), and other fees, expenses amounts due under any other transaction document; and (ii) divided by the lowest volume weighted average price of the Company’s Common Stock during the five trading day period ending on the trading day immediately prior to the dated of determination (subject to a floor of \$2.00), and multiplied by the highest closing price for the Company’s common stock during the period beginning on the first date that an event of default occurred. A holder has made claims regarding an alleged Event of Default and the Company is in discussions with such note holder.

The Alpha Convertible Promissory Note also contains a provision whereby Alpha is due a minimum interest amount or make whole amount meaning on any date and with respect to any principal amount owing under the Alpha Convertible Promissory Note, the difference between (a) 10% of such principal amount, representing a full year of interest payments thereunder and (b) any payment of interest made prior to such date with respect to such principal amount. To be free from doubt, the minimum interest amount is only applicable for the initial 12 month period from the Issue Date.

During the year ended December 31, 2020, the Company recorded interest expense and amortization of debt discount of \$28,962 and \$94,787, respectively, and accrued interest of \$47,504 as of December 31, 2020 associated with the Alpha Convertible Promissory Notes.

See Convertible Debt Conversions of the Dominion, Kingsbrook and Alpha Convertible Promissory Notes further on in this note for the details related to the 2020 conversions of the notes. See Note 18 - Subsequent Event for information related to the conversions of the convertible notes that occurred subsequent to December 31, 2020.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Extinguishment of the Dominion, Kingsbrook and Alpha Convertible Promissory Notes

On November 25, 2020, the Company entered into an amended agreement with Dominion, and Alpha to amend the secured convertible promissory notes in the original aggregate principal amount of \$4,713,078 (after giving effect to a 10% original issue discount) that the Company issued pursuant to a purchase agreement (the “Notes”) so that the fixed conversion price of the Notes, during the 90 day period following November 6, 2020, shall be equal to the lower of: (A) ninety-six percent (96%) of the lowest volume weighted average price of the common stock of the Company on the NASDAQ Capital Market during the five trading day period ending on the trading day immediately prior to the applicable conversion date and (B) \$5.28; provided, that in no event shall the fixed conversion price be lower than \$2.00 (in each case, as appropriately adjusted for any stock dividend, stock split, stock combination, reclassification or similar transaction that proportionately decreases or increases the number of shares of common stock prior to such date). No other changes were made to the Notes as a result of the amendment agreement. The change of the conversion price of the Notes, triggered the most-favored-nation clause and changed the conversion price of the Series A Convertible Preferred Stock to be the same price as the Notes.

The Company determined that while the cash flows of the Secured Convertible Notes did not change upon the amendment (maturity and interest rate remained the same), the increase of the fair value of the conversion feature exceeded 10% of the carrying value of the Secured Convertible Notes prior to the amendment, and accordingly, the amendment should be accounted for as an extinguishment. In recording the extinguishment, the Company compared the reacquisition price of the post-amended Secured Convertible Notes in the aggregate amount of \$5,932,778 to the net carrying value of the derivative liability and pre-amended Secured Convertible Notes in the aggregate amount of \$2,880,524. As a result, the Company recorded a loss on extinguishment in the aggregate amount of \$3,052,254.

Convertible Debt Conversions of the Dominion, Kingsbrook and Alpha Convertible Promissory Notes

The holders of the Secured Convertible Promissory Notes elected to convert principal and interest into shares of the Company’s common stock as follows:

	Principal Balance Converted	Interest Converted	Derivative Liabilities Converted	Total Amount Converted	Common Shares Issued	Fair Value of Shares Issued	Loss on Extinguishment of Convertible Notes
Dominion Convertible Promissory Note	\$ 972,222	\$ 97,222	\$ 201,216	\$ 1,270,660	464,287	\$ 1,275,525	\$ 4,865
Kingsbrook Convertible Promissory Note	1,695,411	169,541	378,335	\$ 2,243,287	816,769	2,198,155	(45,132)
Alpha Capital Convertible Promissory Note	495,000	12,528	123,485	\$ 631,013	238,572	691,304	60,291
Total	\$ 3,162,633	\$ 279,291	\$ 703,036	\$ 4,144,960	1,519,628	\$ 4,164,985	\$ 20,025

After the closing of the Business Combination, from November 27, 2020 to December 31, 2020, the holders of the Company’s convertible promissory notes were converted an aggregate of \$3,441,924, which includes accrued interest of \$279,291, which is owed under such convertible notes into an aggregate of 1,519,628 shares of our common stock, pursuant to the terms of such notes, as amended, at conversion prices of between \$2.00 and \$2.31 per share.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Default of Certain Convertible Promissory Notes

On December 31, 2020, the Company filed a Current Report on Form 8-K with the SEC which disclosed, among other things, that the condensed consolidated financial statements of the Company, which were prepared based on the information and representations received from the former KBL management, for the interim period ended September 30, 2020, should no longer be relied upon due to errors in the condensed consolidated financial statements and should be restated. As a result, the Company recognized a derivative liability related to an arguable default of the Secured Convertible Notes, which was valued using a Monte Carlo Simulation.

Senior Notes

On July 25, 2019, the Company issued Senior Secured Notes (the "Senior Notes") totaling \$1,200,000 of which an aggregate of \$175,000 was issued to the former Chief Executive Officer and a director of the Company. The Senior Notes bear interest at a rate of 15% per annum and matured on November 15, 2019. Any accrued and unpaid interest portion is capitalized to principal on a monthly basis. Pursuant to the terms of the Senior Notes, the maturity date may be extended an additional 30 days at the option of the Company if the Securities and Exchange Commission's review of the documents filed in connection with the Business Combination has taken more than 30 days. In the event of an event of default: a) the Company is required to notify the holders of these notes (the "Holders") within one business day of any such occurrence; b) the interest rate increases to 18% per annum; and c) the Holder may require the Company to redeem any or all of the outstanding principal and interest together with a 25% premium.

The Senior Notes rank senior to all outstanding and future indebtedness of the Company and its subsidiaries and are secured by: a) the Company's equity interests in its subsidiaries; b) guarantees issued by those subsidiaries; and c) assets of those subsidiaries.

The Senior Notes, plus accrued and unpaid interest, and any outstanding late charges, automatically convert into common shares immediately prior to the occurrence of the Business Combination at the conversion price of \$4.23 per share. If the Company issues any shares of its common stock or securities that are effectively common stock equivalents prior to the Business Combination at a price of less than \$4.23 per share, then the conversion price per share will be adjusted so that the Holders receive the same conversion price. The above represents a contingent beneficial conversion feature that will be accounted for when the contingency is resolved. As of December 31, 2019, the contingently adjustable, non-bifurcated beneficial conversion features associated with the Senior Notes were not resolved. See below for details regarding the amendment of the Senior Notes and the conversion terms.

On January 13, 2020, the Company and holders of a series of Senior Secured Notes (the "Senior Notes") agreed to exchange the Senior Notes for new Senior Secured Notes (the "Amended Senior Notes") with amended terms (the "Senior Note Amendments"). Pursuant to the Amended Senior Notes, the note holders waived all events of default associated with the Senior Notes and the aggregate principal amount and accrued interest of \$1,282,205 and \$6,411, respectively, was converted to principal in the aggregate amount of \$1,846,052 (consisting of \$1,282,205 of the outstanding principal of the Senior Notes, \$6,411 of accrued interest reclassified to principal, \$200,000 of restructuring fees and \$357,436 of redemption premiums), of which \$186,988 and \$935, of aggregate principal and accrued interest, respectively, owed to the former Chief Executive Officer and a director of the Company, was converted to principal in the aggregate amount of \$239,320 (consisting of \$186,988 of the outstanding principal of the Senior Notes, \$935 of accrued interest reclassified to principal and \$51,397 of redemption premiums). See above in Note 13 – Convertible Notes Payable for a table displaying the impact of the increase in the principal under the column titled Amendment to Senior Note and Bridge Notes.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

The Company accounted for the amendment to the Senior Notes as note extinguishments, since the present value of future cash flows under the Amended Senior Notes was substantially different than the future cash flows under the Senior Notes. Accordingly, the Company recognized a loss on extinguishment of \$886,736, consisting of the issuance of the Amended Senior Note in the aggregate principal amount of \$1,846,052, partially offset by the derecognition of the aggregate carrying amount of the extinguished Senior Notes of \$1,288,616, plus the immediately recognized beneficial conversion feature of \$329,300 arising from the modified conversion terms of the Amended Senior Notes.

The Amended Senior Notes rank senior to all outstanding and future indebtedness of the Company and its subsidiaries and are secured by: a) the Company's equity interests in its subsidiaries; b) guarantees issued by those subsidiaries; and c) assets of those subsidiaries.

The Amended Senior Notes were convertible into common stock of the Company at any time following issuance until maturity and automatically convert into common stock of the Company immediately prior to the occurrence of the Business Combination, in either event, at a conversion price of \$4.23 per share. If the Company issues any shares of its common stock, or securities that are effectively common stock equivalents, prior to the Business Combination at a price of less than \$4.23 per share, then the conversion price per share would be adjusted to the price at which those common shares (or equivalents) were issued.

The Amended Senior Notes bear interest at a rate of 15% per annum and matured in February 2020. On June 12, 2020, the Company entered into an additional amendment with each noteholder to extend the maturity dates from February 2020 to August 2021. Unpaid interest is reclassified to the principal on a monthly basis.

In the event of default: a) the Company is required to notify the holders of these notes within one business day of any such occurrence; b) the interest rate increases to 18% per annum; and c) the holder may require the Company to redeem any or all of the outstanding principal and interest together with a 25% premium.

Additional Amendment to an Amended Senior Note

On June 12, 2020, the Company, KBL, and the holder of an Amended Senior Note in the aggregate principal amount of \$1,661,136 agreed that (i) such Amended Senior Note will automatically convert into 404,265 shares of the Company's common stock upon the Business Combination, and (ii) the holder of such Amended Senior Note and its affiliates shall not sell or dispose more than 5% of the daily trading volume of such shares of common stock as reported by Bloomberg, LP.

Extinguishment of Senior Note and Issuance of New Note

On June 12, 2020, the Company, KBL, certain investors (the "Purchasers") and the holder (the "Initial Purchaser") of an Amended Senior Note in the aggregate principal and interest amount of \$1,528,360 (consisting of principal of \$1,510,113 and accrued interest payable of \$18,247) entered into a Securities Purchase Agreement pursuant to which (i) the Amended Senior Note was extinguished, and (ii) KBL sold to the Purchasers a secured promissory note which is secured by the intellectual property of the Company. Such transaction closed on June 29, 2020. See above in Note 13 – Convertible Notes Payable for a table displaying the impact of extinguishing the aforementioned \$1,510,113 of principal under the column titled Amendment to Senior Note and Bridge Notes. Concurrent with the transaction, on June 12, 2020, the Company, KBL, the Purchasers and Kingsbrook entered into a guaranty agreement pursuant to which the Company is a guarantor to the notes issued by KBL to the Purchasers and Kingsbrook. As of September 30, 2020, the Company determined that contingent payments under the guaranty agreement were not probable.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

Additionally, in connection with the Securities Purchase Agreement, the Company issued the Initial Purchaser a non-convertible loan payable in the principal amount of \$150,000 which bears interest at a rate of 15% per annum, payable at maturity. The note matures on August 31, 2021 (see Note 12 Loans Payable).

During the nine months ended September 30, 2020, in connection with the Amended Senior Note extinguishment and loan payable issuance above, the Company recognized a gain on extinguishment of convertible notes payable in the amount of \$1,378,360.

Conversion of Senior Notes at Close of Business Combination

On November 6, 2020, upon the consummation of the Business Combination, the Company issued 482,894 shares of common stock, par value \$0.0001, to the holders of the Senior Notes, as a result of the automatic conversion of promissory notes in the principal amount of about \$2,039,539 and accrued interest of \$77,779, or an aggregate of \$2,117,318, as per the closing of the Merger pursuant to the Business Combination Agreement, dated as of July 25, 2019, by and among the Company, KBL Merger Sub, Inc., 180 Life Corp., Katexco Pharmaceuticals Corp., CannBioRex Pharmaceuticals Corp., 180 Therapeutics L.P. and Lawrence Pemble in his capacity as stockholder representative.

Bridge Notes

On January 3, 2020 and December 27, 2019, the Company issued convertible bridge notes in the aggregate amount of \$82,500 and \$250,000 under the same terms. The total outstanding principal amount of convertible bridge notes of \$332,500 (the "Bridge Notes") and the respective accrued interest will automatically convert into a portion of the 17.5 million shares of KBL common stock to be received upon the consummation of the Business Combination Agreement at a conversion price equal to the lesser of \$6.00 per KBL share or 60% of the implied valuation at such time, as defined. The Bridge Notes accrue interest at 15% per annum. The contingently adjustable, non-bifurcated beneficial conversion feature associated with the convertible note will be accounted for at the time the contingency is resolved. The Bridge Notes matured on June 30, 2020. The Company may elect to prepay the Bridge Notes at any time without penalty, however, the holder may elect to receive shares of common stock of the Company in lieu of prepayment at the holder's discretion. The Company analyzed the embedded conversion option of the convertible note at issuance and determined the embedded conversion option contains a contingent beneficial conversion feature that will be accounted for when the contingency is resolved. As of December 31, 2019, the contingently adjustable, non-bifurcated beneficial conversion feature associated with the convertible note was not resolved. See below for further details regarding the amendment of the Bridge Notes and the conversion terms.

Amended Bridge Notes

On July 7, 2020, effective June 29, 2020, the Company entered into an amendment agreement with each Bridge Noteholder (the "Amended Bridge Notes"). Pursuant to the terms of the Amended Bridge Notes, the principal under each Amended Bridge Note is increased by 10% and the Amended Bridge Notes mature upon the earlier of (i) the date that the Registration Statement, which refers to the Form S-4 Registration Statement filed with the Commission by KBL, relating to the Business Combination, including the exchange of shares of common stock of the Company for shares of common stock of KBL, which is declared effective by the SEC; (ii) such date in which all amounts due and owing under the Amended Bridge Notes become due and payable pursuant to the terms of the agreement; and (iii) August 28, 2021 ("Maturity Date"). See above in Note 13 – Convertible Notes Payable for a table displaying the impact of the increase in the 10% of principal under the column titled Amendment to Senior Note and Bridge Notes. The Amended Bridge Notes can be converted at the following options:

- at any time prior to the Maturity Date, at the option of the holder, the remaining outstanding principal amount of the Amended Bridge Notes, and any accrued but unpaid interest, may be converted into shares of common stock; or
- automatically at the Maturity Date, the remaining outstanding principal amounts of these Amended Bridge Notes and any accrued but unpaid interest, will automatically convert ("Automatic Conversion").

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Depending on the timing of the conversion, the holder will receive either:

- shares of common stock of the Company, if the Business Combination has not occurred prior to such Maturity Date; or
- shares of KBL if the Business Combination has occurred prior to such Maturity Date.

In either case above, the number of conversion shares equal to (A) the outstanding principal amount plus interest being converted, divided by (B) the lesser of (i) \$4.23 per share or (ii) the per share price equal to 0.60 multiplied by the per share price of one share of common stock sold by the Company as part of a PIPE transaction (or the deemed value of one share of common stock as reasonably determined by the board of directors of the Company sold in the PIPE transaction if the securities sold in the PIPE transaction include units or other securities convertible into shares of common stock), subject to equitable adjustment for any stock splits, combinations or similar events affecting the Company. As per the agreement, a PIPE transaction is defined as a private placement or public offering of shares of common stock of KBL for purposes of raising additional capital to fund the Business Combination or other matters. The Company determined that the embedded features of the Amended Bridge Notes were (i) a fixed price conversion option which represented a beneficial conversion feature of de minimis value and (ii) a redemption feature with de minimis value. See Note 18 – Subsequent Events for details regarding the conversion of the Bridge Notes.

Second Amendment to the Bridge Notes

On October 7, 2020, the Company entered into an additional amendment with each Amended Bridge Noteholder pursuant to which the Amended Bridge Notes will no longer mature upon the date that the Registration Statement is declared effective by the SEC. Since the change in cash flows was not more than 10%, this amendment was deemed to be a modification.

180 LP Convertible Notes

In connection with the Reorganization, the Company assumed \$270,000 of debt related to convertible notes payable (the “Notes”), of which \$10,000 is owed to the former Chief Executive Officer of 180 LP and \$260,000 is owed to a founder and director of the Company.

Principal of \$160,000 due under the Notes accrues interest at a rate of 5.0% per annum and principal of \$110,000, accrues interest at 2.5% per annum. Interest is compounded annually. Effective upon the closing of the first issuance of convertible preferred units (or units with similar rights) with proceeds of at least \$1,000,000 (the “Qualified Financing”), all of the outstanding principal and interest under these Notes will automatically be converted into other equity interests of the Company of the same class issued to other investors in the Qualified Financing, at a conversion price equal to 80% of the price per unit of the Qualified Financing securities paid by the other investors. The Notes contain contingent beneficial conversion features, which will be accounted for at the time the conversion price is known, and the contingency is resolved.

Interest on Convertible Notes

During the years ended December 31, 2020 and 2019, the Company recorded interest expense of \$915,371 and \$123,112, respectively, related to convertible notes payable, and recorded interest expense - related parties of \$32,452 and \$17,827, respectively, related to convertible notes payable - related parties. During the year ended December 31, 2020, the Company capitalized an aggregate of \$228,099 of accrued interest and \$34,760 of accrued interest – related parties, respectively, to note principal.

As of December 31, 2020 and 2019, accrued interest expense related to convertible notes payable was \$182,181 and \$13,515, respectively, and accrued interest expense - related parties related to convertible notes payable - related parties was \$124,833 and \$75,524, respectively, which is included in accrued expenses and accrued expenses - related parties, respectively, on the accompanying consolidated balance sheets.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

NOTE 14 — COMMITMENTS AND CONTINGENCIES

Litigation and Other Loss Contingencies

The Company records liabilities for loss contingencies arising from claims, assessments, litigation, fines, penalties and other sources when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. The Company has no liabilities recorded for loss contingencies as of December 31, 2020 or 2019.

Potential Legal Matters

The Company may initiate legal action against former executives of KBL for non-disclosure in the KBL original June 30, 2020 and September 30, 2020 Form 10-Qs of the matters disclosed in Note 14 (as restated) of the September 30, 2020 financial statements in the amended Form 10-Q filed on February 5, 2021. If such legal action is initiated, the Company would seek damages to cover, at a minimum, the unrecorded and contingent liability obligations and legal fees. There can be no assurance that, if such legal action is initiated, the Company will be successful in its legal actions.

The Company has initiated legal action against Tyche Capital LLC (“Tyche”) for breaching its obligations under a term sheet entered into between KBL, KBL IV Sponsor, LLC, 180 and Tyche on April 10, 2019 and for breaching its obligations under the Guarantee and Commitment Agreement entered into between KBL and Tyche on July 25, 2019. The Company is seeking damages to bring the net tangible asset balance of KBL as of November 6, 2020, the closing date of the Business Combination, to \$5,000,001. There can be no assurance that the Company will be successful in its legal actions. See also “Tyche Guarantee and Commitment Agreement” below.

In April 2021, Cantor Fitzgerald & Co. (“Cantor”) filed a complaint against the Company in the Supreme Court of the State of New York, County of New York (Index No. 652709/2021), alleging causes of action against the Company relating to the claimed breach of a fee agreement between the parties from February 2018, requiring the Company to pay Cantor a transaction fee in cash in the event the Company completed a business transaction and the alleged breach of a settlement agreement subsequently entered into with Cantor on or around November 6, 2020. The complaint seeks \$1,500,000 in damages, pre-and-post judgment interest and attorneys’ fees. The Company believes it has meritorious defenses to the allegations, and the Company intends to continue to vigorously defend against the litigation. The Company believes that it has counterclaims against Cantor and plans to plead such counterclaims in defense of claims raised. The outcome of the matter is currently unknown. See also “Cantor Fitzgerald & Co. Breach of Contract”, below. The Company is in discussions with Cantor regarding the registration of the 150,000 shares that have been issued to Cantor and hopes to resolve this dispute by registering the shares that have been issued to Cantor, of which there is no assurance.

Notice of Acceleration

On December 29, 2020, the Company received notice from Marlene Krauss, M.D., the former Chief Executive Officer and director of KBL, alleging the occurrence of an event of default of the terms of a certain promissory note dated March 15, 2019 in the amount of \$371,178 evidencing amounts owed by the Company to KBL IV Sponsor LLC (which Dr. Krauss serves as sole managing member of), for failure to repay such note within five days of the release of funds from escrow in connection with the Purchase Agreement. Dr. Krauss has declared the entire amount of the note to be immediately due and payable. The note, pursuant to its terms, accrues damages of \$2,000 per day until paid in full (subject to a maximum amount of damages equal to the principal amount of the note). Due to the matters described in Potential Legal Matters in Note 14 to these financial statements, there are disputes regarding any amounts that may be due to Dr. Krauss under the note.

Registration Rights

The holders of the founder shares (“Founder Shares”) and private units (“Private Units”) and warrants that may be issued upon conversion of working capital loans (“Working Capital Loans”), which were issued to the sponsors of KBL in connection with the Business Combination, (and any shares of the Company’s common stock issuable upon the exercise of the Private Units and warrants that may be issued upon conversion of Working Capital Loans) are entitled to registration rights pursuant to a registration rights agreement signed on the effective date of the initial public offering (“Initial Public Offering”). The holders of these securities are entitled to make up to three demands, excluding short form demands, that the Company register such securities. In addition, the holders have certain “piggy-back” registration rights with respect to registration statements filed subsequent to the consummation of a Business Combination. However, the registration rights agreement provides that the Company will not permit any registration statement filed under the Securities Act to become effective until termination of the applicable Lock-Up Period, which is one year after the Closing Date of the Business Combination. The Company will bear the expenses incurred in connection with the filing of any such registration statements. The Company satisfied the foregoing registration rights through the filing of a Registration Statement on Form S-1 with the SEC on October 19, 2020, which registration statement was declared effective by the SEC on November 2, 2020 (No. 333-249539), provided that the Company subsequently determined that such Form S-1 Registration Statement could not be relied upon because of the requirement to restate the Company’s financial statements for the periods ended June 30 and September 30, 2020.

Cantor Fitzgerald & Co. Breach of Contract

On February 27, 2018, KBL entered into a service contract with Cantor Fitzgerald & Co. (“CF&CO”) whereby CF&CO would receive a transaction fee in cash arising out of any contemplated business combination by the Company. On July 25, 2019, KBL entered into the Business Combination Agreement whereby CF&CO became entitled to a transaction fee of \$1,500,000 (the “Transaction Fee”). On November 6, 2020, the Company and CF&CO entered into a settlement agreement (the “Settlement Agreement”) whereby CF&CO agreed to release the Company from the obligation to pay the Transaction Fee in cash and to instead accept 150,000 fully paid shares of the Company’s common stock, but only if the Company would take all necessary action to permit the sale of the Shares by filing with the Securities and Exchange Commission (the “SEC”) a shelf registration statement within 30 days following the closing of the merger. On November 6, 2020, the Company closed the merger and in breach of the Settlement Agreement, did not file a registration statement with the SEC within 30 days of the November 6, 2020 closing, due to the need to restate the previously filed KBL financial statements (See Potential Legal Matters in this Note 14). As a result, CF&CO claims that the Transaction Fee of \$1,500,000 owed under the Fee Agreement is due in cash and has been payable by the Company to CF&CO since December 6, 2020. See Note 18 – Subsequent Events for details regarding current litigation pursued in connection with the Transaction Fee.

Tyche Guarantee and Commitment Agreement

On April 10, 2019, 180, KBL, KBL IV Sponsor, LLC (“Sponsor”), and Tyche Capital LLC (“Tyche”) entered into a non-binding term sheet (the “Term Sheet”) for a potential business combination transaction (the “Transaction”). Pursuant to the Term Sheet, Sponsor agreed to deposit 1,906,250 shares of common stock initially acquired by Sponsor prior to the consummation of the Company’s initial public offering into a separate segregated escrow account (the “Escrow Account”). The Term Sheet also included certain binding provisions where (i) Tyche agreed to participate in a PIPE transaction to ensure that KBL had at least \$5,000,001 in net tangible assets at the closing of the Transaction, and (ii) in the event of a breach of the obligations of Tyche, the shares deposited to the Escrow Account would be released to the Sponsor. Further, on July 25, 2019, KBL and Tyche entered into a Guarantee and Commitment Agreement, where Tyche provided an absolute guarantee to ensure KBL had at least \$5,000,001 in net tangible assets by purchasing shares from KBL. See Note 14 – Commitments and Contingencies for potential matters as the Company initiated legal action against Tyche for this obligation.

EarlyBird-Capital Finder's Fee

On October 17, 2018, KBL entered into an agreement with EarlyBird-Capital, Inc. ("EarlyBird"), whereby EarlyBird would introduce potential targets to the Company on a non-exclusive basis for the purpose of consummating a merger, capital stock exchange, asset acquisition, or other similar business combination. Upon the closing of a transaction, the Company will pay EarlyBird a finder's fee, payable in cash, of 1% of the value of the transaction, minus any liabilities at closing in excess of \$5,000,000. See Note 18 – Subsequent Events for more information on the EarlyBird finder's fee.

Yissum Research and License Agreement

On May 13, 2018, CBR Pharma entered into a worldwide research and license agreement with Yissum Research Development Company of the Hebrew University of Jerusalem, Ltd. ("Yissum Agreement") allowing CBR Pharma to utilize certain patent (the "Licensed Patents"). The Licensed Patents shall expire, if not earlier terminated pursuant to the provisions of the Yissum Agreement, on a country-by-country, product-by-product basis, upon the later of: (i) the date of expiration in such country of the last to expire Licensed Patent included in the Licensed Technology; (ii) the date of expiration of any exclusivity on the product granted by a regulatory or government body in such country; or (iii) the end of a period of twenty (20) years from the date of the First Commercial Sale in such country. Should the periods referred to in items (i) or (ii) above expire in a particular country prior to the period referred to in item (iii), above, the license in that country or those countries shall be deemed a license to the Know-How during such post-expiration period.

Royalties will be payable to Yissum if sales of any products which use, exploit or incorporate technology covered by the Licensed Patents ("Net Sales") are US \$500,000,000 or greater, calculated at 3% for the first annual \$500,000,000 of Net Sales and at 5% of Net Sales thereafter.

Pursuant to the Yissum Agreement, if Yissum achieves the following milestones, CBR Pharma will be obligated to make the following payments:

- i) \$75,000 for successful point of care in animals;
- ii) \$75,000 for submission of the first investigational new drug testing;
- iii) \$100,000 for commencement of one phase I/II trial;
- iv) \$150,000 for commencement of one phase III trial;
- v) \$100,000 for each product market authorization/clearance (maximum of \$500,000); and
- vi) \$250,000 for every \$250,000,000 in accumulated sales of the product until \$1,000,000,000 in sales is achieved.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

In the event of an exit event (“Event”), which may be defined as either, a transaction or series of transactions under which the receipt of any consideration, monetary or otherwise by the Company or its shareholders is received in consideration for the sale of shares of the Company or shareholders, or an initial public offering (“IPO”) of the Company, but for greater certainty excludes a reorganization of the Company where the ultimate equity holders of the reorganized entity remain substantially the same as that of the Company, the Company will issue 5% of the issued and outstanding shares, on a fully diluted basis, to Yissum prior to the closing of an Event. These shares will be subject to: (a) as to half of such shares, a lock-up period ending 12 months from the Event date and as to the other half of such shares, a lock-up period ending 24 months from the Event date, and (b) in any event, any resale restrictions (including lock-ups and hold periods). See Note 15 – Stockholders’ Equity (Deficiency) for more information on the shares issued to Yissum as part of the business combination.

CBR Pharma is also party to consulting agreements with Yissum, whereby Yissum has agreed to provide two of its employees as consultants to the Company for \$100,000 per annum per person for a term of three years, commencing May 13, 2018.

On January 1, 2020, CBR Pharma entered into a first amendment to the Yissum Agreement (“First Amendment”) with Yissum, allowing CBR Pharma to sponsor additional research performed by two Yissum professors. Pursuant to the terms of the First Amendment, the Company will pay Yissum \$200,000 per year plus 35% additional for University overhead for the additional research performed by each professor over an 18-month period, starting May 1, 2019. As of December 31, 2020 the Company owes an outstanding balance of \$418,098 in connection with the Yissum Agreement (as amended), of which \$48,908 is reflected within accounts payable and \$370,000 is included in accrued expenses on the accompanying consolidated balance sheet. During the year ended December 31, 2020, the Company recognized research and development expenses of \$442,453 related to this agreement.

During the year ended December 30, 2019, actual research and development expenses and accrued expenses relating to the Yissum Agreement were \$19,350 and \$121,894, respectively. Because CBR Pharma is an accounting acquiree in the Reorganization, the contract expense included in the accompanying consolidated statements of operations and comprehensive loss is only for the post-Reorganization period. See Note 15- Stockholders’ Equity (Deficiency) for more information related to common stock.

Additional Yissum Agreement

On November 11, 2019 (the “Effective Date”), CBR Pharma entered into a new worldwide research and license agreement with Yissum (the “Additional Yissum Agreement”), allowing CBR Pharma to obtain a license and perform the research, development and commercialization of the licensed patents (the “Licensed Patents”) in the research of cannabinoid salts relating to arthritis and pain management. Within 60 days after the end of the first anniversary of the Effective Date, Yissum will present the Company with a detailed written report summarizing the results of their research.

The Licensed Patents shall expire, if not earlier terminated pursuant to the provisions of the Additional Yissum Agreement, on a country-by-country, product-by-product basis, upon the later of: (i) the date of expiration in such country of the last to expire Licensed Patent included in the Licensed Technology; (ii) the date of expiration of any exclusivity on the product granted by a regulatory or government body in such country; or (iii) the end of a period of twenty (20) years from the date of the first commercial sale in such country. Should the periods referred to in items (i) or (ii) above expire in a particular country prior to the period referred to in item (iii), above, the license in that country or those countries shall be deemed a license to the know-how during such post-expiration period.

Pursuant to the terms of the Additional Yissum Agreement, CBR Pharma paid Yissum a non-refundable license fee of \$70,000 and will pay an aggregate of \$398,250 of research, development and consulting fees over the term of the Additional Yissum Agreement, as well as an annual license maintenance fee of \$25,000, beginning on the first anniversary of the Effective Date.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

The Company shall pay Yissum the following amounts in connection with the achievement of the following milestones:

- Submission of the first Investigational New Drug application: \$75,000
- Dosing of first patient in phase II trial: \$100,000
- Dosing of first patient in phase III trial: \$150,000
- Upon first market authorization/clearance: \$150,000
- Upon second market authorization/clearance: \$75,000
- For every \$250,000,000.00 US in accumulated Net Sales of the Product until \$1,000,000,000.00 US in sales: \$250,000

Upon the commercialization of the license, the Company shall pay Yissum a royalty equal to 3% of the first aggregate \$500,000,000 of annual net sales and 5% thereafter. As of December 31, 2020, the Company had \$91,748 and \$298,686 of accounts payable and accrued expenses, respectively, relating to the Additional Yissum Agreement. During the years ended December 31, 2020 and 2019, the Company recorded the purchase of the patents of \$72,995 and \$71,525, respectively, as an intangible asset to be amortized on a straight-line basis over the remaining lives of the patents and \$477,411 and \$0, respectively, of research and development expenses.

Evotec Agreement

On June 7, 2018, Katexco entered into an agreement (the “Drug Discovery Services Agreement”) with Evotec International GmbH (“Evotec”), whereby the Company and Evotec have agreed to negotiate research programs to be conducted by Evotec for the Company. Pursuant to the Drug Discovery Services Agreement, Evotec has agreed to conduct specified research services (the “Project”). The Project is scheduled to be conducted over a 24-month period, over which the Company will fund a minimum of \$4,937,500 and a maximum of \$5,350,250, based on quarterly invoices. During the years ended December 31, 2020 and 2019, the Company expensed \$31,979 and \$1,401,165, respectively, of research and development expenses in connection with the Drug Discovery Services agreement, and recorded interest expense of \$31,979 and \$36,899, respectively, on unpaid balances owed related to the Drug Discovery Services Agreement, which is included in accounts payable on the accompanying consolidated balance sheets. As of December 31, 2020 and 2019, unpaid balances owed related to the Drug Discovery Services Agreement amounted to \$1,342,299 and \$1,301,187, respectively.

Stanford License Agreement

On May 8, 2018, Katexco entered into a six-month option agreement (the “Stanford Option”) with Stanford University (“Stanford”) under which Stanford granted the Company a six-month option to acquire an exclusive license for patents (the “Licensed Patents”) which are related to biological substances used to treat auto-immune diseases. In consideration for the Stanford Option, the Company paid Stanford \$10,000 (the “Option Payment”), which was creditable against the first anniversary license maintenance fee payment.

On July 25, 2018, Katexco exercised their six-month option and entered into an exclusive license agreement with equity (the “Stanford License Agreement”) with Stanford. Pursuant to the Stanford License Agreement, beginning upon the first anniversary of the effective date, and each anniversary thereafter, the Company will pay Stanford, in advance, a yearly license maintenance fee of \$20,000, on each of the first and second anniversaries and \$40,000 on each subsequent anniversary, which will be expensed on a straight-line basis annually.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Furthermore, the Company will be obligated to make the following milestone payments:

- (i) \$100,000 upon initiation of Phase II trial,
- (ii) \$500,000 upon the first U.S. Food and Drug Administration approval of a product (the “Licensed Product”) resulting from the Licensed Patents; and
- (iii) \$250,000 upon each new Licensed Product thereafter.

The Stanford License Agreement is cancellable by the Company with 30 days’ notice. Royalties, calculated at 2.5% of 95% of net product sales, will be payable to Stanford. Also, the Company will reimburse Stanford for patent expenses as per the agreement. The Company paid Stanford \$20,000 for the annual license maintenance fee that was recorded to prepaid expenses and is being expensed on a straight-line basis over 12 months, which had a balance of \$6,978 as of December 31, 2020. During the years ended December 31, 2020 and 2019, the Company recorded patent and license fees of \$32,979 and \$32,443, respectively, related to the Stanford License Agreement, which is included in general and administrative expenses on the accompanying statements of operations and comprehensive loss.

Pursuant to the Stanford License Agreement, there are other considerations disclosed in the agreement, such as a purchase right of up to 10% participation in a private offering of the Company’s equity securities, and if there is a change of control in the Company, the Company will pay a change of control fee of \$200,000 to Stanford. The Business Combination does not qualify for change of control because 180 is the accounting acquirer and the majority of the shareholder base and officers of 180 is the same and will carry on.

Oxford University Agreements

On August 15, 2018, CBR Pharma entered into an agreement (the “Oxford University Agreement”) for a research project with the University of Oxford (“Oxford”), which expires on December 31, 2019, or any later date agreed upon by the parties in writing. The Oxford University Agreement provides that Oxford will undertake a research project (the “Project”) based around the clinical development of cannabinoid-based and non-cannabinoid-based drugs that are known to exhibit both anti-inflammatory and immunomodulatory properties. The aim of the Project is to develop and characterize chemical compounds that are synthesized at Yissum in order to create treatments for rheumatoid arthritis and other chronic inflammatory conditions, and to eventually obtain regulatory approval in order to initiate early-phase clinical trials in patients.

The Company has agreed to pay to Oxford the following, which is being recognized on a straight-line basis over the 12-month term of the Oxford Agreement:

- (i) £166,800 on signing of the agreement, (USD \$214,210 paid on August 22, 2018)
- (ii) £166,800 six months after commencement of the Project, (USD \$214,804 paid on January 29, 2019)
- (iii) £166,800 nine months after commencement of the Project and (USD \$217,877 paid on May 5, 2019)
- (iv) £55,600 twelve months after commencement of the Project. (USD \$73,737 accrued at December 31, 2019)

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

On May 30, 2019 (“Effective Date”), CBR Pharma entered into an amended research agreement with Oxford to amend the expiration date of the research project to December 31, 2019 or until any later date agreed by the parties in writing, or until this Oxford University Agreement is terminated in accordance with its provisions. On November 27, 2019, the Company entered into an amended agreement with Oxford to further extend the term of the research project to March 31, 2020 or any later date agreed upon by the parties in writing.

During the year ended December 31, 2020, the Company did not record any research and development expenses related to this agreement. During the year ended December 31, 2019, the Company recorded research and development expenses of \$57,498. Because CBR Pharma is an accounting acquiree in the Reorganization, the contract expense included in the accompanying consolidated statements of operations and comprehensive loss is only for the post-Reorganization period.

On March 22, 2019, 180 LP entered into a one-year research agreement (the “Research Agreement”) with Oxford pursuant to which 180 LP agreed to pay Oxford approximately \$900,000 to perform certain research and to obtain the exclusive option to negotiate a license to commercially exploit any arising intellectual property as a result of Oxford’s research. During the year ended December 31, 2020, the Company recognized research and development expenses of \$186,391. During the year ended December 31, 2019, the Company recognized research and development expenses of \$396,950 related to the Research Agreement. Because 180 LP is an accounting acquiree in the Reorganization, the contract expense included in the accompanying consolidated statements of operations and comprehensive loss is only for the post-Reorganization period.

On September 18, 2020, CBR Pharma entered into a 3 year research and development agreement (the “3 Year Oxford Agreement”) with Oxford to research and investigate the mechanisms underlying fibrosis in exchange for aggregate consideration of \$1,085,738 (£795,468), of which \$109,192 (£80,000) is to be paid 30 days after the project start date and the remaining amount is to be paid in four equal installments of \$244,136 (£178,867) on the six month anniversary and each of the annual anniversaries of the project start date. The agreement can be terminated by either party upon written notice or if the Company remains in default on any payments due under this agreement for more than 30 days. During the year ended December 31, 2020, the Company recognized \$113,433 (£88,385) of research and development expenses in connection with the 3 Year Oxford Agreement.

On September 21, 2020, CBR Pharma entered into a 2 year research and development agreement (the “2 Year Oxford Agreement”) with Oxford University for the clinical development of cannabinoid drugs for the treatment of inflammatory diseases in exchange for aggregate consideration of \$625,124 (£458,000), of which \$138,917 (£101,778) is to be paid 30 days after the project start date and the remaining amount is to be paid every 6 months after the project start date in 4 installments, whereby \$138,917 (£101,778) is to be paid in the first 3 installments and \$69,456 (£50,888) is to be paid as the final installment. The agreement can be terminated by either party upon written notice or if the Company remains in default on any payments due under this agreement for more than 30 days. During the year ended December 31, 2020, the Company recognized \$78,374 (£61,067) of research and development expenses in connection with the 2 Year Oxford Agreement, which is reflected within accrued expenses on the accompanying consolidated balance sheet.

As of December 31, 2020, the Company owed Oxford an aggregate of \$704,960, including \$693,515 of accounts payable and \$11,445 of accrued expense. As of December 31, 2019, the Company owed Oxford an aggregate of \$472,021, including \$398,284 of accounts payable and \$73,737 of accrued expense.

FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

Kennedy License Agreement

On September 27, 2019, 180 LP entered into a license agreement (the “Kennedy License Agreement”) with the Kennedy Trust for Rheumatology Research (“Kennedy”) exclusively in the U.S., Japan, United Kingdom and countries of the EU, for certain licensed patents (the “Kennedy Licensed Patents”), including the right to grant sublicenses, and the right to research, develop, sell or manufacture any pharmaceutical product (i) whose research, development, manufacture, use, importation or sale would infringe the Kennedy Licensed Patents absent the license granted under the Kennedy License Agreement or (ii) containing an antibody that is a fragment of or derived from an antibody whose research, development, manufacture, use, importation or sale would infringe the Kennedy Licensed Patents absent the license granted under the Kennedy License Agreement, for all human uses, including the diagnosis, prophylaxis and treatment of diseases and conditions.

As consideration for the grant of the Kennedy Licensed Patents, 180 LP paid Kennedy an upfront fee of GBP £60,000, (USD \$74,000) on November 22, 2019, which was recognized as an intangible asset for the purchase of the licensed patents and is being amortized over the remaining life of the patents. 180 LP will also pay Kennedy royalties equal to (i) 1% of the net sales for the first annual GBP £1 million (USD \$1,283,400) of net sales, and (ii) 2% of the net sales after the net sales are at or in excess of GBP £1 million, as well as 25% of all sublicense revenue, provided that the amount of such percentage of sublicense revenue based on amounts which constitute royalties shall not be less than 1% on the first cumulative GBP £1 million of net sales of the products sold by such sublicenses or their affiliates, and 2% on that portion of the cumulative net sales of the products sold by such sublicenses or their affiliates in excess of GBP £1 million.

The term of the royalties paid by the Company to Kennedy will expire on the later of (i) the last valid claim of a patent included in the Kennedy Licensed Patents which covers or claims the exploitation of a product in the applicable country; (ii) the expiration of regulatory exclusivity for the product in the country; or (iii) 10 years from the first commercial sale of the product in the country. The Kennedy License Agreement may be terminated without cause by providing a 90-day notice.

Petcanna Sub-License Agreement

On August 20, 2018, CBR Pharma entered into a sub-license agreement (the “Sub-License Agreement”) with its wholly owned subsidiary, Petcanna Pharma Corp. (“Petcanna”), of which the Company’s former Chief Financial Officer is a director. Petcanna is a private company with the same principals as the Company.

Pursuant to the terms of the Sub-license Agreement, the Company has granted a sub-license on the Licensed Patents to pursue development and commercialization for the treatment of any and all veterinary conditions. In consideration, Petcanna will (a) issue 9,000,000 common shares of its share capital (the “Petcanna Shares”) 30 days after the effective date; and (b) pay royalties of 1% of net sales. The Company will be issued 85% and Yissum will be issued 15% of the 9,000,000 common shares of the Petcanna subsidiary. The Petcanna shares are deemed to be founders shares with no value. The Petcanna shares have not been issued as of December 31, 2020, due to administrative delays.

360 Life Sciences Corp. Agreement - Related Party (Acquisition of ReFormation Pharmaceuticals Corp.)

On July 1, 2020, the Company entered into an amended agreement with ReFormation Pharmaceuticals, Corp. (“ReFormation”) and 360 Life Sciences Corp. (“360”), whereby 360 has entered into an agreement to acquire 100% ownership of ReFormation, on or before July 31, 2020 (“Closing Date”). The Company shares officers and directors with each of ReFormation and 360. Upon the Closing Date, 360 will make tranche payments in tranches to 180 LP in the aggregate amount of \$300,000. The parties agree that the obligations will be paid by 360 to 180 LP by payments of \$100,000 for every \$1,000,000 raised through the financing activities of 360, up to a total of \$300,000, however, not less than 10% of all net financing proceeds received by 360 shall be put towards the obligation to the Company until paid in full. This transaction closed on July 31, 2020.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

On February 26, 2019, 180 LP entered into a one-year agreement (the “Pharmaceutical Agreement”) with ReFormation, a related party that shares directors and officers of 180 LP, pursuant to which the ReFormation agreed to pay 180 LP \$1.2 million for rights of first negotiation to provide for an acquisition of any arising intellectual property or an exclusive licensing, partnering, or collaboration transaction to use any arising intellectual property with respect to a contemplated research agreement between the Company and Oxford (see Oxford University Agreements, above), which was signed on March 22, 2019 and therefore is the start date of the project. Of the \$1.2 million receivable from Reformation pursuant to the Pharmaceutical Agreement, \$0.9 million was received by the Company on March 14, 2019 and the remaining \$0.3 million will be received over the one-year term of the agreement.

180 LP is recognizing the income earned in connection with the Pharmaceutical Agreement on a straight-line basis over the term of the agreement. During the years ended December 31, 2020 and 2019, 180 LP recognized \$240,000 and \$552,329, respectively, of income related to the Pharmaceutical Agreement, which is included in other income in the accompanying consolidated statement of operations and other comprehensive income loss (because 180 LP is an accounting acquiree in the Reorganization, the other income included in the accompanying consolidated statements of operations and comprehensive loss is only for the post-Reorganization period). As of December 31, 2020 and 2019, the Company had a receivable of \$300,000 and \$60,000, respectively, representing income earned in excess of cash received pursuant to the Pharmaceutical Agreement.

Operating Leases

On February 17, 2020, the Company entered into a twelve-month lease agreement to lease office space located in London, UK. The rent is approximately GBP £4,250 (USD \$5,801) per month over the lease term for a total lease commitment of GBP £61,200 (USD \$83,532). The lease commenced on February 19, 2020 and expires on February 18, 2021. In connection with the lease, the Company paid the landlord a security deposit of GBP £5,100 (USD \$6,961). The lease shall continue until one of the following two events occur: (a) another lease agreement is entered into by the parties or (b) either party gives not less than three full calendar months written notice terminating this agreement prior to the expiration date. The Company terminated the lease in August 2020 due to the COVID-19 pandemic. The Company's rent expense amounted to GBP £30,257 (USD \$38,831) and GBP £0 for the years ended December 31, 2020 and 2019, respectively. Rent expense is reflected in general and administrative expenses in the consolidated statements of operations and comprehensive loss.

On October 17, 2018, CBR Pharma entered into a twelve (12) month lease agreement to lease office space located in London, UK. The rent is approximately GBP £6,400 (USD \$4,808) per month over the lease term for a total lease commitment of GBP £56,845 (USD \$69,823). The lease commenced on December 1, 2018 and expired on November 30, 2019 and was not renewed. In connection with the lease, the Company paid the landlord a security deposit of GBP £4,410 (USD \$5,619). During the year ended December 31, 2019, the Company recorded GBP £22,836 (USD \$28,803) of rent expense related to the lease.

On June 8, 2018, CBR Pharma entered into a thirty (30) month agreement to lease office space located in Toronto, Canada (the “Toronto Lease”). The Toronto Lease base rent ranged from \$10,993 to \$14,658 per month over the lease term for a total base lease commitment of \$425,082. The Toronto Lease expired on November 30, 2020. The Company has subleased the office space in Toronto, Canada to various other companies on a month-to-month basis. Please refer to “Due from Related Parties” in Note 17, Related Parties. In September 2019, the Company and the landlord of the Toronto Lease mutually agreed to terminate the lease on March 31, 2020 without penalty and the landlord would retain the security deposit of CAD \$120,000 (\$92,268) as rent expense for the period of October 2019 through March 2020. Since the Company and its sublessees vacated the space in October 2019 and did not occupy the space as of December 31, 2019, the Company recorded the full amount of the security deposit to rent expense in 2019 in satisfaction of the lease agreement and accelerated a rent expense of CAD \$60,000 (\$46,134). During the years ended December 31, 2020 and 2019, the Company recognized rent expense of \$0 and \$76,267, respectively. During the years ended December 31, 2020 and 2019, the Company recognized rental income – related parties of \$0 and \$25,946, respectively. Because CBR Pharma is an accounting acquiree in the Reorganization, the contract expense and rental income included in the accompanying consolidated statements of operations and comprehensive loss is only for the post-Reorganization period.

C&H Capital Consulting Services Agreement

On September 4, 2020, the Company entered into a consulting agreement for investor relations services in exchange for shares of the Company for fixed dollar amounts. Pursuant to the agreement, the Company will issue an aggregate of 5,000 common shares on a monthly basis and an aggregate of 30,000 common shares at the end of each quarter. See Note 10 – Accrued Issuable Equity and Note 18 – Subsequent Events for additional details.

Directors and Officers Insurance Financing

On December 10, 2020, the Company entered into a financing arrangement for a Directors and Officers Insurance Policy (the “D&O Insurance”) with Hudson Specialty Insurance Co. and Lloyds of London to finance \$728,438 of a total D&O Insurance amount of \$1,002,816, inclusive of premiums, taxes, and fees. As of December 31, 2020, a total of \$854,550 and \$655,594 remains financed in prepaid expenses and loans payable, respectively, payable in monthly installments of \$72,844.

NOTE 15 — STOCKHOLDERS' EQUITY (DEFICIENCY)

Preferred Stock

Pursuant to the Company’s Second Amended and Restated Certificate of Incorporation filed on November 6, 2020, the Company has 5,000,000 preferred shares authorized at a par value of \$0.0001 per share, of which 1,000,000 shares are designated as Series A Convertible Preferred Stock (“Series A Preferred”), 1 share is designated as the Class K Special Voting Share and 1 share is designated as the Class C Special Voting Share. The Class K Special Voting Share and the Class C Special Voting Share are together, the “Special Voting Shares”. As of December 31, 2020, there is no Series A Preferred issued or outstanding; there is one Class K Special Voting Share and one Class C special Voting Share issued and outstanding.

Series A Preferred Stock

The Series A Preferred is convertible into common stock at an initial conversion price of \$5.28 per share, at the election of the holder, at any time following issuance, subject to certain anti-dilution adjustments. Upon a dilutive issuance (as defined) at a price per share lower than the existing conversion price, the conversion price will adjust to the lower of (a) the dilutive issuance price per share; or (b) the lowest volume-weighted-average-price during the five days preceding the dilutive issuance. Upon any conversion, a make-whole amount (as defined in the Certificate of Designation of the Series A Preferred) shall be due with respect to each share of Series A Preferred converted. At any time following the three-month anniversary of the Business Combination, the holder of the Series A Preferred had the right to force the Company to redeem all or any portion of the Series A Preferred then owned by the holder in cash. Series A Preferred stockholders were entitled to 10% dividends. Holders of the Series A Preferred had no voting rights.

The Company assumed 1,000,000 shares of issued and outstanding Series A Preferred in connection with the Business Combination with a carrying value of \$1,411,265, which was net of a \$1,922,068 discount from its stated value of \$3,333,333. The discount included an original issuance discount of \$333,333, cash issuance costs of \$318,333, warrant issuance costs of \$103,402 (fair value of warrant issued to placement agent), and a bifurcated redemption feature that was valued at \$1,167,000 at issuance (see Note 11 – Derivative Liabilities). No accretion of the Series A Preferred discount was required because redemption wasn’t deemed to be probable.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

On November 25, 2020, a dilutive issuance reduced the conversion price to the lower of (a) 96% of the lowest volume-weighted-average-price of the common stock during the five-day period preceding the conversion date; or (b) \$5.28, both subject to a floor of \$2.00 per share. The conversion price adjustment was treated as an extinguishment and reissuance of the outstanding Series A Preferred. On the extinguishment date, the bifurcated redemption feature was marked-to-market, increasing the value by \$606,000 and recognizing a corresponding charge to change in fair value of derivative liabilities. The \$1,411,265 carrying value of the preferred stock and the \$1,773,000 fair value of the derivative liability were derecognized and we recognized the new \$3,531,924 fair value of the preferred stock and the new \$218,000 value of the bifurcated redemption feature. The difference of \$565,659 was recognized as a deemed dividend.

During the period from November 30, 2020 to December 18, 2020, the 1,000,000 shares of Series A Preferred of the Company with a total conversion value of \$3,666,667 were converted into shares of the Company's common stock at conversion prices of between \$2.00 and \$2.31 per share, pursuant to the terms of such preferred stock. The bifurcated redemption features were marked-to-market just prior to each conversion, resulting in an aggregate charge of \$42,068 to change in fair value of derivative liabilities and the \$260,068 fair value of the bifurcated redemption features were derecognized on the conversion dates. At conversion, the aggregate \$3,531,924 carrying value of the preferred stock and the \$260,068 fair value of the derivative liability were derecognized and we recognized the \$4,349,035 fair value of the 1,614,144 shares of common stock issued. The difference of \$557,043 was recorded as deemed dividend expense, including \$333,333 associated with the make-whole premiums and \$223,710 associated with the contingent beneficial conversion feature. Due to such conversions, the Company currently has no shares of Series A Preferred issued or outstanding.

The aggregate deemed dividend presented on the income statement is comprised of the \$333,333 make-whole dividend, the \$223,710 beneficial conversion feature and a \$565,659 extinguishment loss associated with the conversion price adjustment.

Special Voting Shares

The Special Voting Shares were issued to the former shareholders of CBR Pharma and Katexco in connection with the Reorganization. The Special Voting Shares are exchangeable by the holder for shares of the Company's common stock and vote together as a single class with the Company's common stockholders. Special Voting Shares are not entitled to receive any dividend or distributions.

The following table summarizes the Special Voting Shares activity during the years ended December 31, 2020 and 2019:

	For the Years Ended December 31,	
	2020	2019
January 1 balance	2,990,904	-
Shares issued	-	2,990,904
Shares exchanged	(1,521,157)	-
December 31 balance	1,469,747	2,990,904

Included in the 2,990,904 special voting shares in the table above, are 1,664,072 special voting shares issued to CBR Pharma stockholders in connection with the Reorganization. See Note 4 – Reorganization and Recapitalization for additional details.

Common Stock

The Company is authorized to issue 100,000,000 shares of the Company's common stock with a par value of \$0.0001 per share. Holders of the Company's shares of the Company's common stock are entitled to one vote for each share.

During the year ended December 31, 2019, the Company issued 12,800,454 shares of its common stock, of which 64,657 shares were issued for cash consideration of \$1,130,656 and services valued at \$333,145, 2,854,012 shares with an aggregate issuance date fair value of \$12,992,470 were issued in full satisfaction of accrued issuable equity and investors deposits, and 9,881,785 shares with an aggregate fair value at issuance of \$45,866,502 were issued to the accounting acquiree stockholders in connection with the Reorganization.

On March 10, 2020, the Company issued 12,292 shares of common stock for cash proceeds of \$72,500.

On November 6, 2020, the Company issued 240,540 shares with a grant date value of \$1,057,989 as compensation to a consultant as part of the business combination that was granted on May 13, 2018. See Note 14 – Commitments and Contingencies for more information related to Yissum Research and License Agreement.

On November 6, 2020, the Company effectively issued 1,519,628 shares of common stock to the KBL shareholders upon the consummation of the Reverse Merger.

During November and December 2020, the Company issued 2,102,038 shares of its common stock upon the conversion of convertible debt and interest in the aggregate amount of \$6,466,353.

During the period from November 30, 2020 to December 18, 2020, the Company issued 1,619,144 shares of common stock upon the conversion of \$4,349,035 of Series A Preferred Stock as described above.

During the year ended December 31, 2020, the Company issued 1,521,157 shares of its common stock upon the exchange of common stock equivalents associated with the Special Voting Shares.

Stock Options

On December 3, 2020, the Company issued ten-year options for the purchase of an aggregate of 50,000 shares of its common stock to two members of the board of directors. The options are exercisable at \$2.49 per share and vest in equal monthly installments over the twelve months following the grant date. The grant date value of \$93,575 was estimated using the Black Scholes valuation method with the following assumptions used:

Expected Term	5.27 years
Volatility	100.0%
Risk Free Rate	0.4%
Annual Rate of Dividends	0.00%

The options expire on December 31, 2030. As of December 31, 2020, there was \$85,777 of unrecognized stock-based compensation expense related to the stock options that will be recognized over the weighted average remaining vesting period of 0.9 years. During the year ended December 31, 2020, the Company recorded stock-based compensation expense of \$7,798 related to the amortization of the grant date value of the options.

(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Adoption of 2020 Omnibus Incentive Plan

At a special meeting of stockholders held on November 5, 2020, the stockholders of the Company considered and approved the 2020 Omnibus Incentive Plan (the “Incentive Plan”) and reserved 3,718,140 shares of common stock for issuance thereunder. The Incentive Plan was previously approved on October 24, 2019, subject to stockholder approval, by the Board of Directors of the Company. The Incentive Plan became effective on November 6, 2020, immediately upon the closing of the Business Combination.

Contingently Redeemable Shares

On July 16, 2019, in connection with the Reorganization, the Company issued 2,694,053 shares to a consultant that were subject to redemption by 180 for an aggregate redemption price of \$4.00 if (i) the closing of the Business Combination did not occur on or prior to October 31, 2019; or (ii) the consultant terminated his service with 180 prior to October 31, 2019.

On November 11, 2019, the Board of Directors authorized management to waive its right of redemption in connection with the Contingently Redeemable Shares. This was accounted for as a modification of the stock award. During the year ended December 31, 2019, the Company recorded a charge related to a modification of a stock award – related parties of \$12,959,360 in connection with the waiver of the Company’s right of redemption related to the Contingently Redeemable Shares. See Note 17 – Related Parties for more information about Modification of Stock Award – Related Party.

NOTE 16 — INCOME TAXES

The Company is subject to federal and state/provincial income taxes in the United States, Canada, and the United Kingdom and each legal entity files on a non-consolidated basis. The benefit of the pre-reorganization net operating losses of 180 LP were passed through to its owners.

The losses before income taxes consist of the following domestic and international components:

	For the Years Ended December 31,	
	2020	2019
Domestic	\$ (8,635,341)	\$ (18,288,861)
International	(2,269,144)	(7,114,681)
	\$ (10,904,485)	\$ (25,403,542)

The provision for income taxes consists of the following benefits (provisions):

	For the Years Ended December 31,	
	2020	2019
Deferred tax benefits:		
Domestic:		
Federal	\$ 1,289,907	\$ 969,769
State	427,689	321,576

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

The change in the valuation reserve for deferred tax assets consists of the following:

	For the Years Ended December 31,	
	2020	2019
Beginning of period	\$ (4,979,276)	\$ (942,251)
Allowance established in connection with the recording of deferred tax assets acquired resulting from the following transactions:		
- Reorganization in 2019 described in Note 4	- (2,031,811)	
- Business combination in 2020 described in Note 5	(2,491,161)	-
Change in valuation pursuant to the tax provision	(2,238,783)	(1,945,821)
True-up to a prior year's tax return	-	(59,393)
End of period	\$ (9,709,220)	\$ (4,979,276)

As of December 31, 2020, the Company had net operating loss ("NOL") carryforwards that may be available to offset future taxable income in various jurisdictions as follows:

- Approximately \$11,123,000 each of domestic federal and state NOLs. The federal NOLs have no expiration date and the state NOLs will begin to expire in 2038;
- Approximately \$9,417,000 each of Canadian federal and provincial NOLs. Those NOLs will begin to expire in 2038; and
- Approximately \$4,030,000 of United Kingdom federal NOLs. Those NOLs have no expiration date.

The utilization of the domestic NOLs to offset future taxable income may be subject to annual limitations under Section 382 of the Internal Revenue Code and similar state statutes as a result of ownership changes, but the United States federal NOLs have no expiration dates.

On July 16, 2019 as part of the Reorganization (see Note 4), we acquired net deferred tax assets of \$2,031,811, against which there is a full valuation allowance. On November 6, 2020, we acquired net deferred tax assets of \$2,491,161, against which there is a full valuation allowance.

The Company has assessed the likelihood that deferred tax assets will be realized in accordance with the provisions of ASC 740 *Income Taxes* ("ASC 740"). ASC 740 requires that such a review considers all available positive and negative evidence, including the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies. ASC 740 requires that a valuation allowance be established when it is "more likely than not" that all, or a portion, of deferred tax assets will not be realized. After the performance of such reviews as of December 31, 2020 and 2019, management believes that uncertainty exists with respect to future realization of its deferred tax assets and has, therefore, established a full valuation allowance as of those dates. Thus, the Company established valuation reserves of \$2,491,161 and \$2,031,811 in connection with the net deferred tax assets acquired in connection with the Business Combination described in Note 5 and the Reorganization described in Note 4 during the years ended December 31, 2020 and 2019, respectively. Additionally, the Company recorded increases in the valuation allowance of \$2,238,783 and \$1,945,821 in connection with the tax provisions for the years ended December 31, 2020 and 2019, respectively.

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

Management has evaluated and concluded that there were no material uncertain tax positions requiring recognition in the Company's consolidated financial statements as of December 31, 2020 and 2019. The Company does not expect any significant changes in its unrecognized tax benefits within twelve months of the reporting date.

No tax audits were commenced or were in process during the years ended December 31, 2020 and 2019 nor were any tax related interest or penalties incurred during those periods. The Company's tax returns filed in the United States, Canada, and the United Kingdom since inception remain subject to examination, with the exception of the tax returns filed for the 180 LP pass-through entity whose tax returns remain subject to examination beginning with the 2018 tax return.

NOTE 17 — RELATED PARTIES

Due from Related Parties

Due from related parties was \$300,000 as of December 31, 2020 and consists of a receivable due from a research and development company that has shared officers and directors.

Due from related parties was \$73,248 as of December 31, 2019 and consists of (i) a receivable of \$60,000 due from a research and development company that has shared officers and directors and (ii) a travel advance of \$13,248 to a company with shared officers and directors.

Accounts Payable - Related Parties

Accounts payable - related parties was \$215,495 as of December 31, 2020 and consists of \$196,377 for professional services provided by the Company's directors and \$19,118 for accounting fees for services provided by a director and his company. Accounts payable - related parties was \$123,035 as of December 31, 2019 and consists of \$101,009 for professional services provided by the Company's directors and \$22,026 for accounting fees for services provided by a director and his company.

Accrued Expenses - Related Parties

Accrued expenses - related parties was \$454,951 as of December 31, 2020 and consists of \$124,833 of interest accrued on loans and convertible notes due to certain officers and directors of the Company and \$330,118 of accrued professional fees for services provided by certain directors of the Company. Accrued expenses - related parties of \$177,074 as of December 31, 2019, consists of \$78,610 of interest accrued on loans and convertible notes due to certain officers and directors of the Company, \$30,464 of accrued professional fees for services provided by certain directors of the Company and \$68,000 of accrued accounting fees related to services provided by a Company director and his company.

Due to Related Parties

Due to related parties was \$0 and \$17,341 as of December 31, 2020 and 2019, respectively. The balance as of December 31, 2019 represents an overpayment of rent by a company that is subleasing space from the Company in Toronto, Canada whose directors and officers of the Company are affiliated with the Company.

NOTE 18 — SUBSEQUENT EVENTS

Repayment of Kingsbrook Promissory Note

On March 3, 2021, the Company repaid the Kingsbrook promissory note in cash for an aggregate of \$166,313, which included the principal of \$150,000 and accrued interest of \$16,313.

Extension of the Loan Agreements

On February 10, 2021, the Company entered into amended loan agreements to modify the terms of certain loan agreements in the aggregate principal amount of \$412,716, previously entered into with Sir Marc Feldman and Dr. Lawrence Steinman, the Co-Executive Chairmen of the Board of Directors. The loan agreements were extended and modified to be paid back at the Company's discretion, either by 1) repayment in cash, or 2) by converting the outstanding amounts into shares of common stock at the same price per share as the next financing transaction.

On April 12, 2021, the Company entered into amended loan agreements with such individuals, which extended the date of all of their outstanding loan agreements, to September 30, 2021 (see Note 12 – Loans Payable). The loan agreements were extended and modified to mature at the earlier of (a) a Form S-1 financing; or (b) September 30, 2021.

Convertible Debt Conversions

From January 15, 2021 to February 5, 2021, the holders of the Company's convertible promissory notes converted an aggregate of \$1,340,183, which included accrued interest of \$105,850, owed under such convertible notes into an aggregate of 467,123 shares of common stock, pursuant to the terms of such notes, as amended, at conversion prices of between \$2.45 and \$3.29 per share.

On March 8, 2021, the holders of the Company's convertible bridge notes, which were issued in December 27, 2019 and January 3, 2020 to various purchasers, converted an aggregate of \$432,384, which included accrued interest of \$66,633 owed under such convertible bridge notes, into an aggregate of 158,383 shares of common stock pursuant to the terms of such notes, as amended, at a conversion price of \$2.73 per share.

Default on Convertible Notes

On February 3, 2021, there was an event of default in connection with the Alpha Capital convertible note (the "Alpha Capital Note"), which resulted in an increase in the settlement value of the Alpha Capital Note. The additional liability is accounted for as a bifurcated derivative. The holder of the Alpha Convertible Note has alleged that the default event described in Note 13, Convertible Notes Payable also applies to the \$300,000 of principal that was converted on February 4, 2021, which would result in an additional increase to the settlement amount of the Alpha Convertible Note. The Company is in discussions with the noteholder regarding this dispute.

Stock Option Issuances

On February 25, 2021, the Company awarded options to two of its officers to purchase 1,580,000 shares of the Company's common stock, which have a term of 10 years, and an exercise price of \$4.43 per share (the closing sales price on the date the Board of Directors approved the grant (February 26, 2021)). The options are subject to the Company's 2020 Omnibus Incentive Plan and vest at the rate of (a) 1/5th of such options upon the grant date; and (b) 4/5th of such options vesting ratably on a monthly basis over the following 36 months on the last day of each calendar month; provided, however, that such options vest immediately upon officers' deaths or disabilities, terminations without cause or terminations for good reason, a change in control of the Company or upon a sale of the Company.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

Sale of Common Stock in Private Offering

On February 19, 2021, the Company entered into a Securities Purchase Agreement with certain purchasers (the “Purchasers”), pursuant to which the Company agreed to sell an aggregate of 2,564,000 shares of common stock (the “Shares”) and warrants to purchase up to an aggregate of 2,564,000 shares of common stock (the “PIPE Warrants”), at a combined purchase price of \$4.55 per share and PIPE Warrant (the “Private Offering”). The Private Offering closed on February 23, 2021. Aggregate gross proceeds from the Private Offering were approximately \$11.7 million. Net proceeds to the Company from the Private Offering, after deducting the placement agent fees and estimated offering expenses payable by the Company, were \$10.7 million. The placement agent fees and offering expenses were accounted for as a reduction of additional paid in capital.

The PIPE Warrants have an exercise price equal to \$5.00 per share, are immediately exercisable and are subject to customary anti-dilution adjustments for stock splits or dividends or other similar transactions. However, the exercise price of the PIPE Warrants will not be subject to adjustment as a result of subsequent equity issuances at effective prices lower than the then-current exercise price. The PIPE Warrants are exercisable for 5 years following the closing date. The PIPE Warrants are subject to a provision prohibiting the exercise of such Warrants to the extent that, after giving effect to such exercise, the holder of such Warrant (together with the holder’s affiliates, and any other persons acting as a group together with the holder or any of the holder’s affiliates), would beneficially own in excess of 4.99% of the Company’s outstanding common stock (which may be increased to 9.99% on a holder by holder basis, with 61 days prior written consent of the applicable holder). The PIPE Warrants did not meet the requirements for equity classification due to the existence of a tender offer provision that could potentially result in cash settlement of the PIPE Warrants that didn’t meet the limited exception in the case of a change-in-control. Accordingly, the Company reclassified the \$7,294,836 fair value of the PIPE Warrants, which was determined using the Black-Scholes option pricing model, from additional paid-in-capital to derivative liabilities. The following assumptions were used to value the PIPE Warrants at issuance:

	February 23, 2021
Risk-free interest rate	0.59%
Expected term (years)	5.00
Expected volatility	85.0%
Expected dividends	0.0%

In connection with the Private Offering, the Company also entered into a Registration Rights Agreement, dated as of February 23, 2021, with the Purchasers (the “Registration Rights Agreement”). Pursuant to the Registration Rights Agreement, the Company agreed to file a registration statement with the Securities and Exchange Commission (the “SEC”) on or prior to April 24, 2021 to register the resale of the Shares and the shares of common stock issuable upon exercise of the PIPE Warrants (the “Warrant Shares”), and to cause such registration statement to be declared effective on or prior to June 23, 2021 (or, in the event of a “full review” by the SEC, August 22, 2021). The Company is currently in default of the terms of the Registration Rights Agreement as the registration statement to register the Shares and Warrant Shares was not filed by April 24, 2021. As a result of this default, the Company is required to pay damages to the Purchasers in the aggregate amount of \$174,993 each month beginning on April 24, 2021, and until such date that the registration statement is filed with the SEC.

Consulting Agreement

On February 25, 2021, the Company entered into a consultancy agreement (the “Consulting Agreement”) with Prof. Jagdeep Nanchahal, our Chairman of our Clinical Advisory Committee, dated February 22, 2021, and effective December 1, 2020.

On March 31, 2021, subsequently thereafter, the Consulting Agreement was amended to include CBR Pharma, a corporation incorporated and registered in England and Wales, and an indirect wholly-owned subsidiary of the Company, as a party thereto. In addition, the Company agreed to pay the consultant 15,000 British Pounds (GBP) per month (approximately \$20,800) during the term of the agreement, increasing to GBP 23,000 per month (approximately \$32,000) on the date (a) of publication of the data from the phase 2b clinical trial for Dupuytren’s disease (RIDD) and (b) the date that the Company has successfully raised over \$15 million in capital. The Company also agreed to pay the consultant a bonus (“Bonus 1”) in the sum of 100,000 GBP upon submission of the Dupuytren’s disease clinical trial data for publication in a peer-reviewed journal. In addition, for prior work performed, including completion of the recruitment to the RIDD (Dupuytren’s) trial, the Company agreed to pay the consultant GBP 434,673 (approximately \$605,000) (“Bonus 2”). At the election of the consultant, Bonus 2 shall be paid at least 50% (fifty percent) or more, as the consultant elects, in shares of the Company’s common stock, at a share price of \$3.00 per share, or the share price on the date of the grant, whichever is lower, with the remainder paid in GBP. Bonus 2 shall be deemed earned and payable upon the Company raising a minimum of \$15 million in additional funding, through the sale of debt or equity, after December 1, 2020 (the “Vesting Date”) and shall not be accrued, due or payable prior to such Vesting Date. Bonus 2 shall be payable by the Company within 30 calendar days of the Vesting Date. Finally, the consultant shall receive another one-time bonus (“Bonus 3”) of GBP 5,000 (approximately \$7,000) on enrollment of the first patient to the phase 2 frozen shoulder trial, and another one-time bonus (“Bonus 4”) of GBP 5,000 (approximately \$7,000) for enrollment of the first patient to the phase 2 delirium/POCD trial.

180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

The Consulting Agreement has an initial term of three years, and renews thereafter for additional three-year terms, until terminated as provided in the agreement. The Consulting Agreement can be terminated by either party with 12 months prior written notice (provided the Company's right to terminate the agreement may only be exercised if the consultant fails to perform his required duties under the Consulting Agreement), or by the Company immediately under certain conditions specified in the Consulting Agreement if (a) the consultant fails or neglects efficiently and diligently to perform the services or is guilty of any breach of its or his obligations under the agreement (including any consent granted under it); (b) the consultant is guilty of any fraud or dishonesty or acts in a manner (whether in the performance of the services or otherwise) which, in the reasonable opinion of the Company, has brought or is likely to bring the consultant, the Company or any of its affiliates into disrepute or is convicted of an arrestable offence (other than a road traffic offence for which a non-custodial penalty is imposed); or (c) the consultant becomes bankrupt or makes any arrangement or composition with his creditors. If the Consulting Agreement is terminated by the Company for any reason other than cause, the consultant is entitled to a lump sum payment of 12 months of his fee as at the date of termination.

On March 31, 2021, in satisfaction of amounts owed to the consultant for 50% of Bonus 2, the Company issued 100,699 shares of the Company's common stock to the Consultant. Additionally, on April 15, 2021, in satisfaction of amounts owed to the consultant for an additional 19% of Bonus 2, the Company issued 37,715 of the Company's common stock. The remainder of Bonus 2 will be due to the Consultant at such time as the Company has raised \$15 million, which obligation was waived by the Company in connection with the issuance of the shares described above.

Employment Agreements of Chief Executive Officer

On February 25, 2021, the Company entered into an amended agreement with the Chief Executive Officer ("CEO") (the "A&R Agreement"), dated February 24, 2021, and effective November 6, 2020. Pursuant to the A&R Agreement, the CEO agreed to serve as an officer of the Company. The agreement replaced his prior agreement with the Company. The A&R Agreement has a term of three years, and is automatically renewable thereafter for additional one-year periods, unless either party provides the other at least 90 days written notice of their intent to not renew the agreement. The CEO's annual base salary under the agreement will initially be \$450,000 per year. The annual salary is also subject to automatic 5% yearly increases.

The CEO is also eligible to receive an annual bonus, with a target bonus equal to 45% of his then-current base salary, based upon the Company's achievement of performance and management objectives as set and approved by the Board of Directors and/or Compensation Committee in consultation with the CEO. At the CEO's option, the annual bonus can be paid in cash or the equivalent value of the Company's common stock or a combination thereof. The Board of Directors, as recommended by the Compensation Committee, may also award the CEO bonuses from time to time (in stock, options, cash, or other forms of consideration) in its discretion. Under the A&R Agreement, the CEO is also eligible to participate in any stock option plans and receive other equity awards, as determined by the Board of Directors from time to time.

The agreement can be terminated any time by the Company for cause (subject to the cure provisions of the agreement), or without cause (with 60 days prior written notice to the CEO), by the CEO for good reason (as described in the agreement, and subject to the cure provisions of the agreement), or by the CEO without good reason. The agreement also expires automatically at the end of the initial term or any renewal term if either party provides notice of non-renewal as discussed above.

In the event the A&R Agreement is terminated without cause by the Company, or by the CEO for good reason, the Company agreed to pay him the lesser of 18 months of salary or the remaining term of the agreement, the payment of any accrued bonus from the prior year, his pro rata portion of any current year's bonus and health insurance premiums for the same period that he is to receive severance payments (as discussed above).

**180 LIFE SCIENCES CORP. AND SUBSIDIARIES
(FORMERLY KBL MERGER CORP. IV)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

The A&R Agreement contains standard and customary invention assignment, indemnification, confidentiality and non-solicitation provisions, which remain in effect for a period of 24 months following the termination of his agreement.

Employment Agreement for Chief Financial Officer

On February 25, 2021, the Company entered into an employment agreement (the “Employment Agreement”) dated February 24, 2021, and effective November 6, 2020, which agreement was amended and corrected on March 1, 2021, to be effective as of the effective date of the original agreement (which amendment and correction is retroactively updated in the discussion of the agreement), with the Company’s Interim Chief Financial Officer (“CFO”). Pursuant to the agreement, the CFO agreed to serve as an officer of the Company; and the Company agreed to pay the CFO \$300,000 per year. Such salary is to be increased to a mutually determined amount upon the closing of a new financing, and shall also be increased on a yearly basis.

Under the agreement, the CFO is eligible to receive an annual bonus, in a targeted amount of 30% of his then salary, based upon the Company’s achievement of performance and management objectives as set and approved by the CEO, in consultation with the CFO. The bonus amount is subject to adjustment. The Board of Directors, as recommended by the Compensation Committee of the Company (and/or the Compensation Committee), may also award the CFO bonuses from time to time (in stock, options, cash, or other forms of consideration) in its discretion. Under the Employment Agreement, the CFO is also eligible to participate in any stock option plans and receive other equity awards, as determined by the Board of Directors from time to time. As of December 31, 2020, the Company recorded \$15,750 of accrued bonus payable to the CFO.

The agreement can be terminated any time by the Company with or without cause with 60 days prior written notice and may be terminated by the CFO at any time with 60 days prior written notice. The agreement may also be terminated by the Company with six days’ notice in the event the agreement is terminated for cause under certain circumstances. Upon the termination of the CFO’s agreement by the Company without cause or by the CFO for good reason, the Company agreed to pay him three months of severance pay.

The agreement contains standard and customary invention assignment, indemnification, confidentiality and non-solicitation provisions, which remain in effect for a period of 24 months following the termination of his agreement.

Officer’s and Director’s Compensation

On March 31, 2021, the Board of Directors of the Company approved the issuance of 67,802 shares of restricted common stock to certain directors and officers under the Company’s 2020 Omnibus Incentive Plan, which amounts represented 50% of the amounts currently owed to such persons in consideration for services rendered. The shares issued were valued at the closing sales price on March 29, 2021, the last closing sales price prior to the date such issuance was approved by the Board of Directors.

On March 5, 2021, in consideration for the fees earned as members of the Board of Directors of the Company and in satisfaction of amounts owed in accrued directors’ fees, the Company issued 4,604 shares of the Company’s common stock, which are fully-paid and non-assessable upon issuance.

KCSA Settlement Agreement

On March 12, 2021, the Company agreed it was in the Company’s best interest to enter into a settlement agreement with Kanan Corbin Schupak & Aronow, Inc. (“KCSA”) in connection with outstanding obligations in the aggregate of approximately \$58,962 due for services rendered to CBR Pharma and Katexco. Thereupon the Company issued KCSA 8,675 shares of the Company’s restricted common stock in satisfaction of the terms of the settlement.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019**

AGP Warrants

On March 12, 2021, the Company issued a warrant to AGP (the “AGP Warrant”) to purchase up to an aggregate of 63,658 shares of the Company’s common stock at a purchase price of \$5.28 per share, subject to adjustment, and limited at any given time not to exceed a beneficial ownership of 4.99% of the total number of issued and outstanding shares of the Company’s common stock. The AGP Warrant is exercisable at any time on or after May 2, 2021 and on or prior to May 2, 2024. This issuance satisfies the Company’s obligation to AGP, as discussed in Note 11 – Derivative Liabilities.

The newly issued AGP Warrant did not meet the requirements for equity classification due to the existence of a tender offer provision that could potentially result in cash settlement of the AGP Warrant that did not meet the limited exception in the case of a change-in-control. Accordingly, the AGP Warrant will continue to be liability-classified.

C&H Capital Inc. Consulting Agreement

On March 19, 2021, in satisfaction of accrued issuable equity owed to C&H Capital Inc. (“C&H Capital”) for services rendered related to investor relations and strategic planning, the Company issued 14,195 of shares of the Company’s restricted common stock to C&H Capital.

Effective March 15, 2021, the Company entered into an amendment to the consulting agreement with C&H Capital. Pursuant to the amendment, as compensation for investor relations and strategic planning services, the Company issued 1,815 shares of the Company’s common stock which vest monthly over a one-year period to C&H Capital and the initial agreement with C&H Capital was terminated.

Cantor Fitzgerald & Co. Litigation

On April 4, 2021, the Company received a court summons in connection with the alleged breach of the Settlement Agreement pursuant to which CF&CO is currently pursuing litigation. The Company plans to file a response with the court pursuant to an extension that was granted to file an answer.

EarlyBird Settlement Agreement

On April 23, 2021, the Company settled the amounts due pursuant to a certain finder agreement entered into with EarlyBird on October 17, 2017 (the “Finder Agreement”). The Company’s Board of Directors determined it was in the best interests to settle all claims which had been made or could be made with respect to the Finder Agreement and entered into a settlement agreement (the “Settlement Agreement”). Pursuant to the Settlement Agreement, the Company paid EarlyBird a cash payment of \$275,000 and issued 225,000 shares of the Company’s restricted common stock to EarlyBird.

Larsen Consulting Agreement

On April 29, 2021, the Company entered into a consulting agreement with Glenn Larsen, the former Chief Executive Officer of 180 Therapeutics LP, to act in the capacity as negotiator for the licensing of four patents. In consideration for services provided, the Company agreed to compensate the consultant with \$50,000 of its restricted common stock which vests upon the Company entering into a licensing transaction with the assistance of the consultant.

Application for Forgiveness of the PPP Loan

On May 19, 2021, the Company applied for loan forgiveness for the amount of \$51,051 in connection to amounts borrowed by Katexco under the PPP. The result of the application has not yet been determined.

Legal Action

On May 17, 2021, Tyche Capital LLC (“Tyche”) filed a counterclaim against the Company alleging that it was the Company, rather than Tyche, that had breached the Guarantee and Commitment Agreement entered into between KBL and Tyche on July 25, 2019. Tyche also filed a Third Party Complaint against six third-party defendants, including three members of the Company's management, Sir Marc Feldman, Dr. James Woody, and Ozan Pamir, claiming that they allegedly breached fiduciary duties to Tyche with regards to the Guarantee and Commitment Agreement. The Company denies all of such claims, as do the three individual members of the Company's management, and will vigorously defend against all of Tyche's claims.

University of Oxford Agreement

On May 24, 2021, CannUK entered into another research agreement with Oxford (the “Fifth Oxford Agreement”), pursuant to which CannUK will sponsor work at the University of Oxford to conduct a multi-centre, randomised, double blind, parallel group, feasibility study of anti-TNF injection for the treatment of adults with frozen shoulder during the pain-predominant phase.

CannUK, as the sponsor, agreed to make the following payments to Oxford:

Milestone	Amount Due (excluding VAT)
Upon signing of the Fifth Oxford Agreement	£ 70,546
6 months post signing of the Fifth Oxford Agreement	£ 70,546
12 months post signing of the Fifth Oxford Agreement	£ 70,546
24 months post signing of the Fifth Oxford Agreement	£ 70,546

**DESCRIPTION OF THE REGISTRANT'S SECURITIES
REGISTERED PURSUANT TO SECTION 12 OF
THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED**

General

180 Life Sciences Corp., *formerly* KBL Merger Corp. IV (the “Company” or “we”) is incorporated in the state of Delaware. The rights of our stockholders are generally governed by Delaware law, our amended and restated Certificate of Incorporation and our Bylaws (each as amended and restated in effect as of the date hereof).

This exhibit describes the general terms of the following two classes of securities registered under Section 12 of the Securities Exchange Act of 1934, as amended: our common stock, par value \$0.0001 per share and warrants exercisable for one-half share of our common stock.

This exhibit is a summary and is not intended to be a complete description of the rights and preferences of such securities. The terms of these securities may also be affected by the Delaware General Corporation Law (“DGCL”). Our amended and restated Certificate of Incorporation and Bylaws as they exist on the date of this Annual Report on Form 10-K are incorporated by reference or filed as an exhibit to the Annual Report on Form 10-K of which this exhibit is a part, and amendments or restatements of each will be filed with the Securities and Exchange Commission (“SEC”) in future periodic or current reports in accordance with the rules of the SEC. The summary below is qualified in its entirety by reference to our amended and restated Certificate of Incorporation and Bylaws, which are filed as exhibits to our Annual Report on Form 10-K of which this exhibit is a part.

Authorized Capitalization

The total number of authorized shares of our common stock is 100,000,000 shares, \$0.0001 par value per share. The total number of “blank check” authorized shares of our preferred stock is 5,000,000 shares, \$0.0001 par value per share. There are no shares of preferred stock currently outstanding.

The terms of our preferred stock are not included herein as such preferred stock is not registered under Section 12 of the Exchange Act.

Common Stock

Voting Rights. Each share of our common stock is entitled to one vote on all stockholder matters. Shares of our common stock do not possess any cumulative voting rights.

Except for the election of directors, if a quorum is present, an action on a matter is approved if it receives the affirmative vote of the holders of a majority of the voting power of the shares of capital stock present in person or represented by proxy at the meeting and entitled to vote on the matter, unless otherwise required by applicable law, Delaware law, our Certificate of Incorporation, as amended or Bylaws, as amended. The election of directors will be determined by a plurality of the votes cast in respect of the shares present in person or represented by proxy at the meeting and entitled to vote, meaning that the nominees with the greatest number of votes cast, even if less than a majority, will be elected. The rights, preferences and privileges of holders of common stock are subject to, and may be impacted by, the rights of the holders of shares of any series of preferred stock that we have designated, or may designate and issue in the future.

Our board of directors is divided into two classes, each of which will generally serve for a term of two years with only one class of directors being elected in each year. There is no cumulative voting with respect to the election of directors, with the result that the holders of more than 50% of the shares voted for the election of directors can elect all of the directors.

Dividend Rights. Each share of our common stock is entitled to equal dividends and distributions per share with respect to the common stock when, as and if declared by our Board of Directors, subject to any preferential or other rights of any outstanding preferred stock.

Liquidation and Dissolution Rights. Upon liquidation, dissolution or winding up, our common stock will be entitled to receive pro rata on a share-for-share basis, the assets available for distribution to the stockholders after payment of liabilities and payment of preferential and other amounts, if any, payable on any outstanding preferred stock.

Fully Paid Status. All outstanding shares of the Company's common stock are validly issued, fully paid and non-assessable.

Listing. Our common stock is listed and traded on the NASDAQ Capital Market under the symbol "ATNF".

Other Matters. No holder of any shares of our common stock has a preemptive right to subscribe for any of our securities, nor are any shares of our common stock subject to redemption or convertible into other securities.

Anti-Takeover Effects Under Section 203 of Delaware General Corporation Law

We are subject to Section 203 of Delaware General Corporation Law, which prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years after the date that such stockholder became an interested stockholder, with the following exceptions:

- before such date, the Board of Directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;
- upon completion of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85 percent of the voting stock of the corporation outstanding at the time the transaction began, excluding for purposes of determining the voting stock outstanding (but not the outstanding voting stock owned by the interested stockholder) those shares owned (i) by persons who are directors and also officers and (ii) employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or an exchange offer; or
- on or after such date, the business combination is approved by our Board of Directors and authorized at an annual or a special meeting of the stockholders, and not by written consent, by the affirmative vote of at least 66 2/3 percent of the outstanding voting stock that is not owned by the interested stockholder.

In general, Section 203 defines "business combination" to include the following:

- any merger or consolidation involving the corporation or any direct or indirect majority owned subsidiary of the corporation and the interested stockholder or any other corporation, partnership, unincorporated association, or other entity if the merger or consolidation is caused by the interested stockholder and as a result of such merger or consolidation the transaction is not excepted as described above;
- any sale, transfer, pledge, or other disposition (in one transaction or a series) of 10% or more of the assets of the corporation involving the interested stockholder;
- subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder;
- any transaction involving the corporation that has the effect of increasing the proportionate share of the stock or any class or series of the corporation beneficially owned by the interested stockholder; or

- the receipt by the interested stockholder of the benefit of any loss, advances, guarantees, pledges, or other financial benefits by or through the corporation.

In general, Section 203 defines an “interested stockholder” as an entity or a person who, together with the person’s affiliates and associates, beneficially owns, or within three years prior to the time of determination of interested stockholder status did own, 15 percent or more of the outstanding voting stock of the corporation.

A Delaware corporation may “opt out” of these provisions with an express provision in its original certificate of incorporation or an express provision in its certificate of incorporation or bylaws resulting from a stockholders’ amendment approved by at least a majority of the outstanding voting shares. We have not opted out of these provisions. As a result, mergers or other takeover or change in control attempts of us may be discouraged or prevented.

Warrants

Each warrant entitles the registered holder to purchase one-half of one share of our common stock at a price of \$5.75 per half share, subject to adjustment as discussed below, at any time commencing on the later of 12 months from the closing of our initial public offering or 30 days after the completion of our initial business combination (which closed on November 6, 2020). If a warrant holder holds two warrants, such warrants will be exercisable for one share of our common stock. Warrants must be exercised for whole shares. The warrants will expire five years after the completion of our initial business combination (i.e., November 6, 2025), at 5:00 p.m., New York City time, or earlier upon redemption or liquidation.

We will not be obligated to deliver any shares of common stock pursuant to the exercise of a warrant and will have no obligation to settle such warrant exercise unless a registration statement under the Securities Act with respect to the shares of common stock underlying the warrants is then effective and a prospectus relating thereto is current, subject to our satisfying our obligations described below with respect to registration. No warrant will be exercisable for cash or on a cashless basis, and we will not be obligated to issue any shares to holders seeking to exercise their warrants, unless the issuance of the shares upon such exercise is registered or qualified under the securities laws of the state of the exercising holder, unless an exemption is available. In the event that the conditions in the two immediately preceding sentences are not satisfied with respect to a warrant, the holder of such warrant will not be entitled to exercise such warrant and such warrant may have no value and expire worthless. In no event will we be required to net cash settle any warrant. In the event that a registration statement is not effective for the exercised warrants, the purchaser of a unit containing such warrant will have paid the full purchase price for the unit solely for the share of common stock underlying such unit.

We have agreed that as soon as practicable, but in no event later than thirty (30) days, after the closing of our initial Business Combination (which closing date was November 6, 2020), we will use our best efforts to file with the SEC a registration statement for the registration, under the Securities Act, of the shares of common stock issuable upon exercise of the warrants. We will use our best efforts to cause the same to become effective within 90 days after the closing of our initial business combination and to maintain the effectiveness of such registration statement, and a current prospectus relating thereto, until the expiration of the warrants in accordance with the provisions of the warrant agreement. Notwithstanding the above, if our common stock is at the time of any exercise of a warrant not listed on a national securities exchange such that it satisfies the definition of a “covered security” under Section 18(b)(1) of the Securities Act, we may, at our option, require holders of public warrants who exercise their warrants to do so on a “cashless basis” in accordance with Section 3(a)(9) of the Securities Act and, in the event we so elect, we will not be required to file or maintain in effect a registration statement or register or qualify the shares under blue sky laws, and in the event we do not so elect, we will use our best efforts to register or qualify the shares under the blue sky laws of the state of residence in those states in which the warrants were initially offered by us in our initial public offering.

Once the warrants become exercisable, we may call the warrants for redemption:

- in whole and not in part;

- at a price of \$0.01 per warrant;
- upon not less than 30 days' prior written notice of redemption (the "30-day redemption period") to each warrant holder; and
- if, and only if, the reported last sale price of the common stock equals or exceeds \$18.00 per share for any 20 trading days within a 30-trading day period ending on the third trading day prior to the date we send to the notice of redemption to the warrant holders.

If and when the warrants become redeemable by us, we may not exercise our redemption right if the issuance of shares of common stock upon exercise of the warrants is not exempt from registration or qualification under applicable state blue sky laws or we are unable to affect such registration or qualification. We will use our best efforts to register or qualify the shares of common stock under the blue-sky laws of the state of residence in those states in which the warrants were initially offered by us in our initial public offering.

We have established the last of the redemption criterion discussed above to prevent a redemption call unless there is at the time of the call a significant premium to the warrant exercise price. If the foregoing conditions are satisfied and we issue a notice of redemption of the warrants, each warrant holder will be entitled to exercise his, her or its warrant prior to the scheduled redemption date. However, the price of the common stock may fall below the \$18.00 redemption trigger price as well as the \$11.50 warrant exercise price (for whole shares) after the redemption notice is issued.

If we call the warrants for redemption as described above, our management will have the option to require any holder that wishes to exercise his, her or its warrant to do so on a "cashless basis." If our management takes advantage of this option, all holders of warrants would pay the exercise price by surrendering their warrants for that number of shares of common stock equal to the quotient obtained by dividing (x) the product of the number of shares of common stock underlying the warrants, multiplied by the difference between the exercise price of the warrants and the "fair market value" by (y) the fair market value. The "fair market value" shall mean the average reported last sale price of the common stock for the 10 trading days ending on the third trading day prior to the date on which the notice of redemption is sent to the holders of warrants. If our management takes advantage of this option, the notice of redemption will contain the information necessary to calculate the number of shares of common stock to be received upon exercise of the warrants, including the "fair market value" in such case. Requiring a cashless exercise in this manner would reduce the number of shares to be issued and thereby lessen the dilutive effect of a warrant redemption.

If the number of outstanding shares of common stock is increased by a stock dividend payable in shares of common stock, or by a split-up of shares of common stock or other similar event, then, on the effective date of such stock dividend, split-up or similar event, the number of shares of common stock issuable on exercise of each warrant will be increased in proportion to such increase in the outstanding shares of common stock. A rights offering to holders of common stock entitling holders to purchase shares of common stock at a price less than the fair market value will be deemed a stock dividend of a number of shares of common stock equal to the product of (i) the number of shares of common stock actually sold in such rights offering (or issuable under any other equity securities sold in such rights offering that are convertible into or exercisable for common stock) multiplied by (ii) one (1) minus the quotient of (x) the price per share of common stock paid in such rights offering divided by (y) the fair market value. For these purposes (i) if the rights offering is for securities convertible into or exercisable for common stock, in determining the price payable for common stock, there will be taken into account any consideration received for such rights, as well as any additional amount payable upon exercise or conversion and (ii) fair market value means the volume weighted average price of common stock as reported during the ten (10) trading day period ending on the trading day prior to the first date on which the shares of common stock trade on the applicable exchange or in the applicable market, regular way, without the right to receive such rights.

In addition, if we, at any time while the warrants are outstanding and unexpired, pay a dividend or make a distribution in cash, securities or other assets to the holders of common stock on account of such shares of common stock (or other shares of our capital stock into which the warrants are convertible), other than (a) as described above, (b) certain ordinary cash dividends, (c) to satisfy the redemption rights of the holders of common stock in connection with a proposed initial business combination, (d) as a result of the repurchase of shares of common stock by us if the proposed initial business combination is presented to our stockholders for approval, or (e) in connection with the redemption of our public shares upon our failure to complete our initial business combination, then the warrant exercise price will be decreased, effective immediately after the effective date of such event, by the amount of cash and/or the fair market value of any securities or other assets paid on each share of common stock in respect of such event.

If the number of outstanding shares of our common stock is decreased by a consolidation, combination, reverse stock split or reclassification of shares of common stock or other similar event, then, on the effective date of such consolidation, combination, reverse stock split, reclassification or similar event, the number of shares of common stock issuable on exercise of each warrant will be decreased in proportion to such decrease in outstanding shares of common stock.

Whenever the number of shares of common stock purchasable upon the exercise of the warrants is adjusted, as described above, the warrant exercise price will be adjusted by multiplying the warrant exercise price immediately prior to such adjustment by a fraction (x) the numerator of which will be the number of shares of common stock purchasable upon the exercise of the warrants immediately prior to such adjustment, and (y) the denominator of which will be the number of shares of common stock so purchasable immediately thereafter.

In case of any reclassification or reorganization of the outstanding shares of common stock (other than those described above or that solely affects the par value of such shares of common stock), or in the case of any merger or consolidation of us with or into another corporation (other than a consolidation or merger in which we are the continuing corporation and that does not result in any reclassification or reorganization of our outstanding shares of common stock), or in the case of any sale or conveyance to another corporation or entity of the assets or other property of us as an entirety or substantially as an entirety in connection with which we are dissolved, the holders of the warrants will thereafter have the right to purchase and receive, upon the basis and upon the terms and conditions specified in the warrants and in lieu of the shares of our common stock immediately theretofore purchasable and receivable upon the exercise of the rights represented thereby, the kind and amount of shares of stock or other securities or property (including cash) receivable upon such reclassification, reorganization, merger or consolidation, or upon a dissolution following any such sale or transfer, that the holder of the warrants would have received if such holder had exercised their warrants immediately prior to such event. However, if such holders were entitled to exercise a right of election as to the kind or amount of securities, cash or other assets receivable upon such consolidation or merger, then the kind and amount of securities, cash or other assets for which each warrant will become exercisable will be deemed to be the weighted average of the kind and amount received per share by such holders in such consolidation or merger that affirmatively make such election, and if a tender, exchange or redemption offer has been made to and accepted by such holders (other than a tender, exchange or redemption offer made by us in connection with redemption rights held by our stockholders as provided for in the our amended and restated Certificate of Incorporation or as a result of the repurchase of shares of common stock by us if a proposed initial business combination is presented to the stockholders of the Company for approval) under circumstances in which, upon completion of such tender or exchange offer, the maker thereof, together with members of any group (within the meaning of Rule 13d-5(b)(1) under the Exchange Act) of which such maker is a part, and together with any affiliate or associate of such maker (within the meaning of Rule 12b-2 under the Exchange Act) and any members of any such group of which any such affiliate or associate is a part, own beneficially (within the meaning of Rule 13d-3 under the Exchange Act) more than 50% of the outstanding shares of common stock, the holder of a warrant will be entitled to receive the highest amount of cash, securities or other property to which such holder would actually have been entitled as a stockholder if such warrant holder had exercised the warrant prior to the expiration of such tender or exchange offer, accepted such offer and all of the common stock held by such holder had been purchased pursuant to such tender or exchange offer, subject to adjustments (from and after the consummation of such tender or exchange offer) as nearly equivalent as possible to the adjustments provided for in the warrant agreement. Additionally, if less than 70% of the consideration receivable by the holders of common stock in such a transaction is payable in the form of common stock in the successor entity that is listed for trading on a national securities exchange or is quoted in an established over-the-counter market, or is to be so listed for trading or quoted immediately following such event, and if the registered holder of the warrant properly exercises the warrant within thirty days following public disclosure of such transaction, the warrant exercise price will be reduced as specified in the warrant agreement based on the per share consideration minus Black-Scholes Warrant Value (as defined in the warrant agreement) of the warrant in order to determine and realize the option value component of the warrant. This formula is to compensate the warrant holder for the loss of the option value portion of the warrant value due to the requirement that the warrant holder exercise the warrant within 30 days of the event. The Black-Scholes model is an accepted pricing model for estimating fair market value where no quoted market price for an instrument is available.

The warrants were issued in registered form under a warrant agreement between Continental Stock Transfer & Trust Company, as warrant agent, and us. You should review a copy of the warrant agreement, which is filed as (or incorporated by reference as) an exhibit to our Annual Report on Form 10-K of which this exhibit is a part, for a complete description of the terms and conditions applicable to the warrants. The warrant agreement provides that the terms of the warrants may be amended without the consent of any holder to cure any ambiguity or correct any defective provision, but requires the approval by the holders of at least 65% of the then outstanding public warrants to make any change that adversely affects the interests of the registered holders of public warrants.

The warrants may be exercised upon surrender of the warrant certificate on or prior to the expiration date at the offices of the warrant agent, with the exercise form on the reverse side of the warrant certificate completed and executed as indicated, accompanied by full payment of the exercise price (or on a cashless basis, if applicable), by certified or official bank check payable to us, for the number of warrants being exercised. The warrant holders do not have the rights or privileges of holders of common stock and any voting rights until they exercise their warrants and receive shares of common stock. After the issuance of shares of common stock upon exercise of the warrants, each holder will be entitled to one vote for each share held of record on all matters to be voted on by stockholders.

Warrants may be exercised only for a whole number of shares of common stock. No fractional shares will be issued upon exercise of the warrants. If, upon exercise of the warrants, a holder would be entitled to receive a fractional interest in a share, we will, upon exercise, round down to the nearest whole number the number of shares of common stock to be issued to the warrant holder. As a result, warrant holders not purchasing an even number of warrants must sell any odd number of warrants in order to obtain full value from the fractional interest that will not be issued.

Dividends

We have not paid any cash dividends on our common stock to date and do not intend to pay cash dividends prior to the completion of a business combination. The payment of cash dividends in the future will be dependent upon our revenues and earnings, if any, capital requirements and general financial condition subsequent to completion of a business combination. The payment of any cash dividends subsequent to a business combination will be within the discretion of our board of directors at such time. In addition, our board of directors is not currently contemplating and does not anticipate declaring any stock dividends in the foreseeable future. Further, if we incur any indebtedness, our ability to declare dividends may be limited by restrictive covenants we may agree to in connection therewith.

Exclusive forum for certain lawsuits

Our amended and restated Certificate of Incorporation requires, to the fullest extent permitted by law, that derivative actions brought in our name, actions against directors, officers and employees for breach of fiduciary duty and other similar actions may be brought only in the Court of Chancery in the State of Delaware and, if brought outside of Delaware, the stockholder bringing such suit will be deemed to have consented to service of process on such stockholder's counsel. Although we believe this provision benefits us by providing increased consistency in the application of Delaware law in the types of lawsuits to which it applies, the provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers, or other employees, which may have the effect of discouraging lawsuits against our directors and officers.

Notwithstanding the foregoing, in the event the Court of Chancery in the State of Delaware lacks subject matter jurisdiction over any such action or proceeding, the sole and exclusive forum for such action or proceeding will be another court in the State of Delaware, or if no court in the State of Delaware has jurisdiction, the federal district court for the District of Delaware, in each such case, unless the Court of Chancery (or such other state or federal court located within the State of Delaware, as applicable) has dismissed a prior action by the same plaintiff asserting the same claims because such court lacked personal jurisdiction over an indispensable party named as a defendant therein. To the fullest extent permitted by law, the forum selection provision discussed above will apply to derivative actions or proceedings brought on our behalf and arising under the Securities Act or the Exchange Act, although our stockholders cannot waive compliance with the federal securities laws and the rules and regulations thereunder. There is uncertainty as to whether a court would enforce such provision in connection with any such derivative action or proceeding arising under the Securities Act or the Exchange Act, and it is possible that a court could find the forum selection provision to be inapplicable or unenforceable in such a case.

Special meeting of stockholders

Our Bylaws provide that special meetings of our stockholders may be called only by a majority vote of our board of directors, by our Chief Executive Officer or by our Chairman.

Listing of Securities

The warrants are listed on The NASDAQ Stock Market under the symbol "[ATNFW](#)".

EMPLOYMENT AGREEMENT

This Employment Agreement (this “Agreement”) is made as of August 21, 2019, between KBL Merger Corp. IV (the “Company”), and Jonathan Rothbard (“Executive”) (collectively, the Company and Executive are the “Parties”).

WHEREAS, this Agreement is being entered into in connection with that certain Business Combination Agreement, dated July 25, 2019, between the Company, CannBioRx Life Sciences Corp., Katexco Pharmaceuticals Corp., CannBioRex Pharmaceuticals Corp., 180 Therapeutics L.P., and certain other parties (the “Combination Agreement”). The effectiveness of this Agreement is conditioned upon the closing of the transactions contemplated by the Combination Agreement.

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. Start Date; Employment Term. Executive’s employment with the Company pursuant to this Agreement will commence on the closing of the transactions contemplated by the Combination Agreement (the “Start Date”) and end on the third (3rd) anniversary of the Start Date (the “Initial Term”); provided, however, that on such anniversary and on each anniversary thereafter (each, an “Extension Date”), the term of Executive’s employment under this Agreement shall be automatically extended for an additional one (1) year period (each, a “Renewal Term”), unless the Company or the Executive provides the other at least ninety (90) days’ prior written notice before the next Extension Date that the Initial Term or Renewal Term, as applicable, shall not be so extended. This Agreement shall automatically terminate without any action on the part of any person and be *void ab initio* if the Combination Agreement is terminated in accordance with its terms, and neither the Company nor any other person shall have any liability to Executive under this Agreement if the Closing does not occur. The period of time from the Start Date through the termination of this Agreement and Executive’s employment hereunder pursuant to its terms is hereafter referred to as the “Employment Term.”

2. Position; Duties. During the Employment Term, Executive shall serve as the Chief Scientific Officer, reporting to the Chief Executive Officer (the “CEO”). Executive shall also serve as a Director on the Company’s Board at the discretion of the Company’s stockholders. During the Employment Term, Executive shall perform such duties and responsibilities on behalf of the Company and its affiliates as are consistent with Executive’s position and title.

3. Compensation.

(a) **Base Salary.** Executive’s annual base salary will initially be \$375,000 per year, payable in accordance with the Company’s normal payroll procedures, less all applicable withholdings and deductions. On the first anniversary of the Effective Date and on each anniversary thereafter, the then-current base salary shall be increased by ten-percent (10%). The base salary, as increased in accordance with this Section 3(a), will hereinafter be referred to as the “Base Salary.”

(b) **Bonus.** Executive will be eligible to receive an annual bonus, with a target bonus opportunity equal to fifty-percent (50%) of Executive’s then-current base salary, based upon the Company’s achievement of performance and management objectives as set and approved by the Board in consultation with the Executive. With respect to 2019, the annual bonus will not be less than \$187,500. The annual bonus shall be paid on or before February 15th of the year following the year in which the bonus is earned. Executive must be employed by the Company on the date of payment in order to earn and receive any annual bonus, unless Executive is terminated without Cause or resigns with Good Reason.

(c) Equity Award. The Company will grant to Executive, as of the Start Date, equity awards of the Company in an amount to be determined by the CEO. The equity awards will vest ratably on a monthly basis over 36 months, beginning on the last day of the month of the date of grant; provided however, that the equity awards will vest immediately upon Executive's death or disability (as defined in section 4(b)), termination without Cause or a termination by the Executive for Good Reason, a change in control of the Company (as defined in the Company's equity incentive plan or agreement) or upon a sale of the Company. Such equity award shall be subject to such other provisions to be set forth in Company's equity incentive plan established and a grant agreement to be entered into between Executive and the Company, which grant agreement shall be no less favorable than that for other senior executives and directors of the Company.

(d) Benefits. Executive will be eligible to participate in the benefits offered by the Company, including, without limitation, any health insurance, retirement, and fringe benefits offered by the Company, in accordance with the applicable terms of the benefit program, plan, or arrangement.

4. Termination of Employment. The Company or the Executive may terminate the Executive's employment pursuant to this Section 4. Upon any termination of the Executive's employment, the Company shall have no further obligations to the Executive under this Agreement other than for payment of any accrued but unpaid base salary, properly incurred but unreimbursed business expenses, accrued but unused vacation, and severance payments, if any, required under Section 5. Rights and benefits of the Executive under the benefit plans and programs of the Company shall be determined in accordance with the provisions of such plans and programs.

(a) Death. The Executive's employment will terminate upon the Executive's death.

(b) Disability. The Company may terminate the Executive's employment by reason of the Executive's becoming subject to a Disability (as defined in the following sentence) upon the Company providing thirty (30) days' prior notice to Executive of its intention to terminate Executive's employment due to his or her Disability. For purposes of this Agreement, "Disability" means the Executive is unable to perform the essential functions of his or her position, with or without a reasonable accommodation, for a period of ninety (90) consecutive calendar days or one-hundred and eighty (180) non-consecutive calendar days within any rolling twelve (12) month period.

(c) Cause. The Company may terminate the Executive's employment under this Agreement for "Cause." For purposes of this Agreement, "Cause" means any of the following: (i) Executive's engaging in any acts of fraud, theft, or embezzlement involving the Company; (ii) Executive's conviction, including any plea of guilty or nolo contendere, of any felony crime which is relevant to the Executive's position with the Company; and (iii) Executive's material violation of this Agreement which is materially damaging to the reputation or business of the Company, provided that prior to terminating Executive for Cause, the Board must first (A) provide notice to Executive specifying in reasonable detail the condition giving rise to Cause for termination no later than the sixtieth (60th) day following the occurrence of that condition; (B) provide the Executive a period of thirty (30) days to remedy the condition, if subject to remedy, and so specify in the notice; and (C) terminate his employment for Cause within thirty (30) days following the expiration of the period to remedy if the Executive fails to remedy the condition.

(d) Without Cause. The Company may terminate the Executive's employment without Cause on sixty (60) days' prior written notice to the Executive.

(e) By the Executive for Good Reason. The Executive may terminate his employment for Good Reason by (A) providing notice to the Company specifying in reasonable detail the condition giving rise to the Good Reason no later than the sixtieth (60th) day following the occurrence of that condition; (B) providing the Company a period of thirty (30) days to remedy the condition if subject to remedy, and so specifying in the notice; and (C) terminating his employment for Good Reason within thirty (30) days following the expiration of the period to remedy if the Company fails to remedy the condition. 111e following, if occurring without the Executive's consent, shall constitute "Good Reason" for termination by the Executive: (i) a material diminution in the nature or scope of the Executive's title, authority or responsibilities; (ii) a material adverse change in the Executive's duties, including, without limitation, such duties set forth in Section 2; (iii) a requirement that the Executive report to any person other than the Board; (iv) a material reduction in Base Salary or target bonus opportunity; or (v) the Company's breach of a material provision of this Agreement.

(f) By the Executive without Good Reason. The Executive may terminate his employment hereunder at any time upon thirty (30) days' prior written notice to the Company.

(g) Expiration. Executive's employment will terminate automatically upon the expiration of the Initial Term or Renewal Term, as applicable, if either party has elected not to extend the Initial Term or Renewal Term in accordance with Section I.

5. Payments on Termination.

(a) Termination Without Cause; For Good Reason. Subject to Section S(b), in the event the Company terminates the employment of Executive without Cause pursuant to Section 4(d), Executive resigns for Good Reason pursuant to Section 4(e), or the Executive's employment terminates due to expiration of the Employment Term in accordance with Section 4(g) following the Company's delivery to Executive of a notice of intent not to renew pursuant to Section I, then the Company shall pay to the Executive, in addition to any amounts payable under Section 4, (i) severance payments in the form of continued Base Salary, at Executive's Base Salary as then in effect, for the thirty-six (36) month period following the effective date of the Executive's termination if such termination happens during the first year of the Executive's employment, twenty four months (24) if termination happens in the second year of the Executive's employment, and twelve (12) months if the termination happens in the third year of the Executive's employment or thereafter; (ii) payment of any accrued and unpaid annual bonus for any year preceding the year in which Executive's employment terminates; (iii) payment of a pro rata annual bonus for the year in which Executive's employment terminates calculated by multiplying the target bonus amount by a fraction, the numerator of which is the number of calendar days elapsed in the year as of the effective date of Executive's termination of employment and the denominator of which is 365; and (iv) payment by the Company of Executive's monthly health insurance premiums for a period matching the period that Executive is entitled to severance payments pursuant to section S(a)(i) hereof. The severance in S(a)(i) and (iv) will be paid pursuant to the Company's payroll schedule then in effect commencing on the sixtieth (60th) day following the last day of employment and the payments in S(a)(ii) and (iii) will be paid on the sixtieth (60th) day following the last day of employment.

(b) Requirement of Release. As a condition precedent to receiving any of the severance payments pursuant to Section S(a), Executive must execute (without revocation) a general release of claims in a form mutually agreed to by the Company and the Executive (the "Release"). The Release must be effective and irrevocable prior to the sixtieth (60th) day following the Executive's last day of employment. If the Executive fails to execute the Release pursuant to this Section S(b), the Executive shall forfeit and not be entitled to any severance payments under Sections S(a).

6. Section 409A Compliance. This Agreement and any payments or benefits provided hereunder shall be interpreted, operated and administered in a manner intended to avoid the imposition of additional taxes under Section 409A of the Internal Revenue Code of 1986, as amended (the “Code”). Further, the Company and Executive hereto acknowledge and agree that the form and timing of the payments and benefits to be provided pursuant to this Agreement are intended to be exempt from, or to comply with, one or more exceptions to the requirements of Section 409A of the Code. Notwithstanding anything contained herein to the contrary, to the extent required to avoid accelerated taxation or tax penalties under Section 409A of the Code, Executive shall not be considered to have terminated employment for purposes of this Agreement and no payments shall be due to Executive under this Agreement that are payable upon Executive’s termination of employment until Executive would be considered to have incurred a “separation from service” from the Company within the meaning of Section 409A of the Code. In addition, for purposes of this Agreement, each amount to be paid or benefit to be provided to Executive pursuant to this Agreement shall be construed as a separate identified payment for purposes of Section 409A of the Code. If the Executive is deemed on the date of termination to be a “specified employee” within the meaning of that term under Section 409A(a)(2)(B), then with regard to any payment or the provision of any benefit that is considered deferred compensation under Section 409A payable on account of a “separation from service,” such payment or benefit shall not be made or provided until the date which is the earlier of (i) the expiration of the six (6)-month period measured from the date of such “separation from service” of the Executive, and (ii) the date of the Executive’s death, to the extent required under Section 409A. Upon the expiration of the foregoing delay period, all payments and benefits delayed pursuant to this Section 6 (whether they would have otherwise been payable in a single sum or in installments in the absence of such delay) shall be paid or reimbursed to the Executive in a lump sum, and any remaining payments and benefits due under this Agreement shall be paid or provided in accordance with the normal payment dates specified for them herein. With respect to expenses eligible for reimbursement under the terms of this Agreement: (i) the amount of such expenses eligible for reimbursement in any taxable year shall not affect the expenses eligible for reimbursement in another taxable year; and (ii) any reimbursements of such expenses shall be made no later than the end of the calendar year following the calendar year in which the related expenses were incurred, except, in each case, to the extent that the right to reimbursement does not provide for a “deferral of compensation” within the meaning of Section 409A of the Code.

7. Representations. Executive represents and warrants to the Company that (a) the execution, delivery and performance of this Agreement by Executive does not and will not conflict with, breach, violate or cause a default under any contract, agreement, instrument, order, judgment or decree to which Executive is a party or by which Executive is bound, (b) Executive is not a party to or bound by any employment agreement, noncompetition agreement or confidentiality agreement with any other person or entity (other than any such agreement with any subsidiary or predecessor of the Company) and (c) upon the execution and delivery of this Agreement by the Company, this Agreement shall be the valid and binding obligation of Executive, enforceable in accordance with its terms.

8. Survival. Executive acknowledges and agrees that Sections 5-10 of this Agreement shall survive the separation of Executive’s employment for any reason.

9. Severability. The Parties intend for this Agreement to be enforced as written. However, if any section or portion of a section of this Agreement shall to any extent be declared illegal or unenforceable by a duly authorized court having jurisdiction, (a) then the remainder of this Agreement, or the application of such section or portion of such section in circumstances other than those as to which it is so declared illegal or unenforceable, shall not be affected thereby, and each section or portion of such section of this Agreement shall be valid and enforceable to the fullest extent permitted by law; and/or (b) because of the scope of a section or portion of such section is found to be unreasonable, the Company and Executive agree that the court making such determination shall have the power to “blue-pencil” the Agreement as necessary to make it reasonable in scope; and in its reduced or blue-penciled form such section or portion of such section shall then be enforceable and shall be enforced.

10. Miscellaneous.

(a) Deductions and Withholding. Executive agrees that the Company and/or its subsidiaries or affiliates shall withhold from any and all compensation paid to or required to be paid to Executive pursuant to this Agreement all federal, state, local and/or other taxes which the Company determines are required to be withheld in accordance with applicable statutes and/or regulations from time to time in effect and all amounts required to be deducted in respect of Executive's coverage under applicable employee benefit plans.

(b) Integration. This Agreement embodies the entire agreement and understanding between the Parties with respect to the subject matter hereof and supersedes all prior oral or written agreements and understandings relating to the subject matter hereof. No statement, representation, warranty, covenant or agreement of any kind not expressly set forth in this Agreement shall affect, or be used to interpret, change or restrict, the express terms and provisions of this Agreement.

(c) Successors. This Agreement shall inure to the benefit of and be enforceable by Executive's personal representatives, executors, administrators, heirs, distributees, devisees and legatees. The Company shall take commercially reasonable efforts to require any successor to the Company to expressly assume and agree to perform this Agreement in the same manner and to the same extent that the Company would be required to perform it if no such succession had taken place. Executive's rights and obligations under this Agreement may not be assigned by Executive without the prior written consent of the Company.

(d) Waiver. No waiver of any provision hereof shall be effective unless made in writing and signed by the waiving party. The failure of any party to require the performance of any term or obligation of this Agreement, or the waiver by any party of any breach of this Agreement, shall not prevent any subsequent enforcement of such term or obligation or be deemed a waiver of any subsequent breach.

(e) Amendment. This Agreement may be amended or modified only by a written instrument signed by Executive and by a duly authorized representative of the Company.

(f) Governing Law. This Agreement shall be governed by and construed and enforced in accordance with the internal laws of the State of Delaware without regard to principles of conflict of laws.

(g) Counterparts. This Agreement may be executed in any number of counterparts, each of which when so executed and delivered shall be taken to be an original; but such counterparts shall together constitute one and the same document.

Direct and Indirect Subsidiaries of 180 Life Sciences Corp.***LIST OF SUBSIDIARIES**

Name	Jurisdiction of Incorporation
180 Life Corp.	Delaware
Katexco Calco ULC	British Columbia
CannBioRex Calco ULC	British Columbia
180 Therapeutics LP	Delaware
Katexco Purchaseco ULC	British Columbia
CannBioRex Purchaseco ULC	British Columbia
Katexco Pharmaceuticals Corp.	British Columbia
CannBioRex Pharmaceuticals Corp.	British Columbia
Katexco Pharmaceuticals Corp.	California
CannBioRex Pharma Limited	United Kingdom

* Pursuant to Item 601(b)(21)(ii) of Regulation S-K, the names of other subsidiaries of 180 Life Sciences Corp. are omitted because, considered in the aggregate, they would not constitute a significant subsidiary as of the end of the year covered by this report. Inclusion in this list is not, however, a representation that the listed subsidiary is a “significant subsidiary.”

Certification of Chief Executive Officer

I, James N. Woody, M.D., Ph.D., certify that:

1. I have reviewed this annual report on Form 10-K for the year ended December 31, 2020, of 180 Life Sciences Corp. (the “Registrant”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)), and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and
5. The registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Certification of Chief Financial Officer

I, Ozan Pamir, certify that:

1. I have reviewed this annual report on Form 10-K for the year ended December 31, 2020, of 180 Life Sciences Corp. (the “Registrant”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)), and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and
5. The registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

**180 Life Sciences Corp. (the “Company”)
Risk, Safety and Regulatory Committee Charter**

Role:

The Risk, Safety and Regulatory Committee’s role is to assist the Board of Directors of 180 Life Sciences Corp. (the “Company”) in overseeing (i) management’s identification and evaluation of the Company’s principal operational, business, legal, compliance and ethics risks, including the Company’s policies, procedures and practices employed to manage risks, and (ii) the Company’s compliance, safety and regulatory programs.

Membership:

The membership of the Committee will consist of at least two directors of the Company.

Operations:

The Board shall designate one member of the Committee to act as its chairperson. The Committee will meet a minimum of once a year. Additional meetings may occur as the Committee or its chair deems advisable. The Committee may also meet periodically in executive session without Company management present. The Committee will cause to be kept adequate minutes of its proceedings, and will report on its actions and activities at the next quarterly meeting of the Board. Committee members will be furnished with copies of the minutes of each meeting and any action taken by unanimous consent. The Committee is governed by the same rules regarding meetings (including meetings by conference telephone or similar communications equipment) action without meetings, notice, waiver of notice, and quorum and voting requirements as are applicable to the Board. The Committee is authorized to adopt its own rules of procedure not inconsistent with (a) any provision of the Company’s Certificate of Incorporation, (b) any provision of the Bylaws of the Company, or (c) the laws of the State of Delaware.

Authority:

The Committee will have the resources and authority necessary to discharge its duties and responsibilities. The Committee has authority to retain and terminate outside counsel, regulatory advisors, or other experts or consultants, as it deems appropriate, including authority to approve the fees and other retention terms for such persons. Any communications between the Committee and legal counsel in the course of obtaining legal advice will be considered privileged communications of the Company and the Committee will take all necessary steps to preserve the privileged nature of those communications.

Except as otherwise delegated by the Board or the Committee, the Committee will act on behalf of the Board.

The Committee may form and delegate authority to subcommittees and may delegate authority to one or more designated members of the Committee to perform certain of its duties from time to time.

Performance Evaluation:

The Committee shall review its own performance and reassess the adequacy of this Charter at least annually in such manner as it deems appropriate, and submit such evaluation, including any recommendations for change, to the full Board for review, discussion and approval.

Responsibilities:

The Committee shall have authority, to the extent it deems necessary or appropriate, to retain advisors. The Company will provide the appropriate funding, as determined by the Committee, for payment of compensation to any advisors employed by the Committee.

Specific responsibilities and duties of the Committee include:

Risk

1. Review management's proposed approach to risk tolerance, including any risk statement developed for this purpose.
2. Oversee the Company's risk management policies and procedures dealing with risk identification and risk assessment for the principal operational, business, compliance and ethics risks facing the Company, whether internal or external in nature including, but not limited to, the risks and incident responses associated with:
 - information security;
 - business continuity and disaster recovery;
 - vendor management;
 - operations risks;
 - supply chain risks;
 - employment and workplace conduct practices;
 - safety and environmental matters; and
 - legal risks.
3. Review the Company's principal risk and compliance policies and material changes to such policies.
4. Periodically review management's efforts to foster a Company-wide culture that supports appropriate risk awareness and the identification, escalation and appropriate treatment of risks that exceed designated risk tolerance levels.
5. Periodically review the Company's approach to risk assessments and mitigation strategies with the Board to facilitate coordination with the activities of the Board and other Board Committees.

Safety, Compliance and Regulatory

1. Oversee the Company's compliance programs, including review of, with the appropriate members of management, the organizational structure, staffing, implementation and management's assessment of the effectiveness of the Company's compliance programs relating to the Company's principal legal and regulatory compliance risks, the related policies and procedures, and the adequacy of the resources for those programs. Review of the Company's compliance policies and procedures shall include the Company's Code of Conduct, relevant "whistleblower" reporting and non-retaliation policies, relevant education and training, and other written compliance policies and procedures that guide the Company and the conduct of its agents in day-to-day operations.
2. Review the Company's approach to, and results of, risk identification, assessment and mitigation plans for the principal legal and regulatory compliance risks facing the Company.
3. Review the Company's compliance with relevant laws, regulations, and corporate policies (including the Company's Code of Conduct).
4. Oversee significant complaints and other matters raised through the Company's compliance reporting mechanisms, including the review and investigation of such matters as necessary.
5. Review significant government inquiries or investigations and other significant legal actions.
6. Review information about current and emerging legal and regulatory compliance risks and enforcement trends that may affect the Company's business operations, performance or strategy.
7. Meet regularly with the Company's Chief Executive Officer to discuss matters within the Committee's oversight responsibilities.
8. The Committee shall review and discuss with management the implementation and enforcement of policies, standards, procedures and risk management programs, and compliance with applicable laws and regulations, related to the manufacture and supply of products consistent with applicable high-quality and medical product safety standards.
9. Other Areas of Regulatory Compliance: At least annually, the Committee shall review and discuss with relevant management the implementation and effectiveness of risk management programs.
